SUMMO PERMOTI DOLORE, REDACTORES OMNIBUS NUNTIANT LECTORIBUS PROF. JOHANNIS PETRI MAGRINI, BIBLIOGRAPHIAE OCEANOGRAPHICAE FUNDATORIS ET DIRECTORIS, OBITUM QUI EVENIT ROMAE DIE XXI MAII HUIUS ANNI MCMXXXV.

MORS EUM CORRIPUIT NOVIS OPERIBUS STUDENTEM NOVAQUE CONSILIA PRO SCIENTIARUM PROGRESSIBUS COGITANTEM, QUIPPE QUI SEMPER IN VITA SENTENTIAE OBTEMPERAVERIT : ET NOVA INCIPERE ET INCEPTA PERFICERE.

REI MILITARIS PERITUS ET RERUM SCIENTIFICARUM, INTER ARMA AC STUDIA COTIDIE MAXIMA CUM DILIGENTIA VERSABATUR, NEC QUIDQUAM PRAETERMITTEBAT UT STUDIA ET OPERA PERFICERENTUR. TAM VERSATILI ET MULTIPLICI INGENIO PRAEDITUS ERAT QUAM QUI DE REBUS MAXIME DIVERSIS EODEM TEMPORE AGERE POSSIT.

MIRABANTUR AMICI ET COLLABORATORES TANTAM OPERUM LABORUMQUE MAGNITUDINEM ET DIVERSITATEM; OMNIBUS PERSUASUM ERAT VIRUM TANTUM MAGNI INGENII FIRMAEQUE SALUTIS HAEC PERFICERE POSSE.

ACERRIMUS MORBUS VIOLENTUSQUE ERIPUIT.

PROF. JOHANNES PETRUS MAGRINI MAGNIS MUNERIBUS HONORIBUSQUE FUNCTUS EST. DIRECTOR ENIM FUIT OFFICII HYDROGRAPHICI AD MAGISTRATUM VENETUM AQUIS CURANDIS PERTINENTIS; PRAEFECTUS OFFICII HYDRAULICI MILITARIS; PRAEFECTUS MISSIONIS MARIBUS ORIENTALIBUS EXPLORANDIS, CONSTANTINOPOLI SEDEM HABENTIS A MCMXX AD MCMXXI; MAGISTER HYDROGRAPHUS IN R. SCHOLA POLYTECHNICA PATAVINA, DIRECTOR OFFICII CENTRALIS INTERNATIONALIS PRO OCEANOGRAPHIA; ADVOCATUS A SECRETIS CONSILII NATIONALIS PRO INVESTIGATIONIBUS SCIENTIFICIS; VICE-PRAESES R. COLLEGII THALASSOGRAPHICI ITALICI, CONSILIARIUS LEGATUS INSTITUTI PRO STUDIIS HADRIATICIS; DIRECTOR MONOGRAPHIAE EDENDAE «DE LACUNA VENETIARUM» IUSSU COMMISSIONIS INTERNATIONALIS MARI MEDITERRANEO EXPLORANDO; FUNDATOR ET DIRECTOR HUIUS BIBLIOGRAPHIAE OCEANOGRAPHICAE QUAM COTIDIE CURAVIT, AMPLIFICAVIT ET IN MELIUS REDDIDIT.

LATINA LINGUA, QUAM ILLE SEMPER DILEXIT, NOMEN EIUS OMNIUM TRADAT IN MEMORIAM.

# ABBREVIATIONES

**a.** - annus, anno, année, an, año
**Aardr.** - Aardrijkskundig
**Abb.** - Abbildungen
**Abh.** - Abhandlung(en)
**Abt.** - Abteilung
**Acad.** - Academia, Académie, Academy
**Accad.** - Accademia
**Akad.** - Akademia, Akademie, Akademi, Akademiîa; Akademische
**Algol.** - Algologique
**Amer.** - America; American, Americano
**Anat.** - Anatomia, Anatomie, Anatomy; Anatomico(a), Anatomique, Anatomical, Anatomisch
**Anatom.** - Anatomistes
**Ann.** - Annales, Annali, Annals, Annaler, Annalen, Anais, Analele; Annuel, Annual
**Annot.** - Annotationes, Annotations
**Annu.** - Annuario, Annuaire
**Anu.** - Anuario
**Anz.** - Anzeiger
**App.** - Appendice, Appendix
**Aquicult.** - Aquiculture
**Arb.** - Arbok
**Arbeit.** - Arbeit(en)
**Arch.** - Archivium, Archivio, Archive(s), Archiv, Archivo
**Ark.** - Arkiv(et)
**Arsb.** - Arsbok
**Arsber.** - Arsberetning
**Assoc.** - Associazione, Association
**Astron.** - Astronomia, Astronomie, Astronomy; Astronomico(a), Astronomique, Astronomical, Astronomisch
**Austr.** - Australian

**Bacteriol.** - Bacteriology, Bacteriologie; Bacteriological, Bacteriologisch
**Bactériol.** - Bactériologie; Bactériologique
**Batteriol.** - Batteriologia; Batteriologico(a)
**Begr.** - Begründet
**Beitr.** - Beitrag, Beiträge
**Ber.** - Bericht(e)
**Biol.** - Biologia, Biologie, Biology; Biologico(a), Biologique, Biological, Biologisch, Biologisk
**Bl.** - Blatt, Blätter
**Bol.** - Boletim, Boletin
**Boll.** - Bollettino
**Bot.** - Botanica, Botanique, Botany, Botanik; Botanical, Botanisch, Botanisk
**Brit.** - Britain; British
**Bul.** - Buletin, Buletinul
**Bull.** - Bulletin, Bulletijn, Bulletino
**Bur.** - Bureau

**Calif.** - California
**Camp.** - Campagnes
**Canad.** - Canadian
**Cat.** - Catalana
**Centr.** - Centrale, Central(e)
**Chem.** - Chemistry; Chemical
**Cienc.** - Ciencias
**Circul.** - Circulaire, Circular
**Cl.** - Classe
**Col.** - Colonie, Colony; Colonial(e)
**Coll.** - Collegio, Collège, College
**Comit.** - Comitato
**Comm.** - Committee, Commission
**Commiss.** - Commissioner
**Comp.** - Comparata, Comparée, Comparative
**Conf.** - Conferentia, Conferenza, Conférence, Conference
**Congr.** - Congresso, Congrès, Congress, Congreso
**Cons.** - Consiglio, Conseil
**Contr.** - Contribution(s)
**Corr.** - Corriere
**C. R.** - Compte(s) Rendu(s)
**Cult.** - Cultura

**Direct.** - Direction, Directorate
**Dpt.** - Department
**Dtsch.** - Deutsch

**Econ.** - Economia, Economie, Economy
**Edit.** - Editore, Editeur, Editor
**Engl.** - English
**Eng.** - Engineer; Engineering
**Entomol.** - Entomology
**Erdk.** - Erdkunde
**Ergebn.** - Ergebnisse
**Españ.** - Español(a)
**Exp.** - Expérimentale, Experimental
**Exped.** - Expedition(s)
**Expéd.** - Expédition(s)
**Expl.** - Exploration(s)

**Fac.** - Facoltà, Faculté, Faculty
**Fenn.** - Fennica
**Fig.** - Figura(e)
**Fis.** - Fisica, Fisiche, Fisicas
**Fisch.** - Fischerei
**Fischerb.** - Fischerbote
**Fischereibl.** - Fischereiblatt
**Fischwirtsch.** - Fischwirtschaft
**Fish.** - Fishery, Fisheries; Fishing
**Fisiol.** - Fisiologia; Fisiologico(a)
**Fisk.** - Fiskeri
**Fol.** - Folia
**Foramin.** - Foraminifères; Foraminiferal
**Forh.** - Forhandlinger
**Förh.** - Förhandlingar
**Forsch.** - Forschung(en)
**Fragm.** - Fragmenta
**Franç.** - Français

**Gaz.** - Gazette
**Gen.** - Generale, General; Genootschap
**Gén.** - Général
**Geod.** - Geodesia, Geodesy, Geodäsie; Geodetico, Geodetical, Geodätisch
**Géod.** - Géodésie; Géodésique
**Geof.** - Geofisica, Geofisico
**Geogr.** - Geographia, Geografia, Geography, Geographie, Geografiia; Geografico(a), Geographical, Geographisch, Geografisk, Geograficeskîi
**Géogr.** - Géographie; Géographique
**Geol.** - Geologia, Geology, Geologie, Geologiia; Geologico(a), Geological, Geologisch, Geologiskîi
**Géol.** - Géologie; Géologique
**Geoph.** - Geophysics; Geophysic(al), Geophysisch
**Géoph.** - Géophysique
**Ges.** - Gesellschaft
**Gesch.** - Geschichte; Geschichtlich
**Giorn.** - Giornale
**Govmt.** - Government

**Handb.** - Handbuch
**Handl.** - Handlingar
**Hidrogr.** - Hidrografinen
**Hist.** - Historia, Histoire, History; Historique, Historical, Historisch
**Histol.** - Histologie, Histology; Histologique, Histological, Histologisch
**Hrsg.** - Herausgegeben
**h. t.** - hors texte
**Hydrobiol.** - Hydrobiologie; Hydrobiologica, Hydrobiologique
**Hydrogr.** - Hydrographie, Hydrography; Hydrographique, Hydrographic(al), Hydrographisch
**Hydrol.** - Hydrologie, Hydrology; Hydrologique, Hydrologic(al), Hydrologisch

**Ichtyol.** - Ichtyologie, Ichtyology; Ichtyologique, Ichtyological, Ichtyologisch
**Idrobiol.** - Idrobiologia; Idrobiologico(a)
**Ill.** - Illustrazione, Illustration(s)
**Imp.** - Imperial, Impérial
**Ind.** - Industria, Industrie, Industry; Industriale, Industriel(le), Industrial, Industriell
**Inst.** - Institut, Institute, Instituto, Instituut, Institutt
**Instit.** - Institution
**Int.** - Internazionale, International(e)
**Invest.** - Investigation(s)
**Ist.** - Istituto
**Istol.** - Istologia; Istologico(a)
**Ital.** - Italia; Italica, Italiano(a)
**Ittiol.** - Ittiologia; Ittiologico(a)
**Izv.** - Izvêstiia

**Jahresber.** - Jahresbericht(e)
**Jap.** - Japonica, Japonenses, Japonaise, Japanese
**Journ.** - Journal

**Kgl.** - Kongelig
**Kl.** - Klasse
**Kol.** - Kolonie ; Kolonial
**Komm.** - Kommission
**Kon.** - Koninklik
**Königl.** - Königlich
**Kungl.** - Kunglig

**Labor.** - Laboratorium, Laboratorio, Laboratoire, Laboratory
**Lám.** - Lámina(s)
**Lett.** - Lettere, Lettres
**Linn.** - Linnéen(ne), Linnean

**Magaz.** - Magazin, Magazine
**Malacol.** - Malacologia, Malacologie, Malacology ; Malacologico(a), Malacologique, Malacological
**Mar.** - Marina(o), Marine, Marinara
**Marit.** - Maritime
**Maritt.** - Marittimo(a)
**Matem.** - Matematica
**Mathem.** - Mathematics, Mathematik, Mathematic(al), Mathematisch
**Mathém.** - Mathématique
**Med.** - Medicina, Medicine, Medizin ; Medico(a), Medical, Medizinisch
**Méd.** - Médecine ; Médical(e)
**Medd.** - Meddelanden, Meddelelser
**Meded.** - Mededeelingen
**Mem.** - Memoranda, Memoria(e), Memoirs, Memorial, Memorias
**Mém.** - Mémoire(s)
**Meteorol.** - Meteorologia, Meteorology, Meteorologie, Meteorologîia ; Meteorologico(a), Meteorological, Meteorologisch, Meteorologisk, Meteorologiceskîi
**Météorol.** - Météorologie ; Météorologique(s)
**Microsc.** - Microscopie ; Microscopique, Microscopical
**Mikrosk.** - Mikroskopisch
**Minist.** - Ministero, Ministère, Ministry, Ministerium
**Miscell.** - Miscellaneous
**Mitt.** - Mitteilung(en)
**Mus.** - Museo, Muséum, Musée, Museum, Museu

**Nac.** - Nacional
**Nachr.** - Nachricht(en)
**Nat.** - National(e)
**Natur.** - Naturale, Naturel(le), Natural, Naturales
**Natural.** - Naturaliste, Naturalist
**Naturhist.** - Naturhistorisch, Naturhistorisk
**Naturv.** - Naturvidenskapelig, Naturvetenskaplig
**Naturwiss.** - Naturwissenschaft(en) ; Naturwissenschaftlich
**Naut.** - Nautico(a), Nautique, Nautical, Nautisch, Nautisk
**Naz.** - Nazionale
**Ned.** - Nederland, Nederländisch, Nederlandsch

**Néerl.** - Néerlandais(e)
**Norw.** - Norwegian
**Novit.** - Novitates

**Observ.** - Observatoire, Observatory, Observer, Observatorium, Observatorio
**Occas.** - Occasional
**Oceanogr.** - Oceanografia, Oceanography; Oceanographica, Oceanografico(a), Oceanographic(al), Oceanograficeskij
**Océanogr.** - Océanographie ; Océanographique
**Oesterr.** - Oesterreich ; Oesterreichisch
**Off.** - Office ; Officiel(le), Official, Offisiell
**Osserv.** - Osservatorio

**Palaeobiol.** - Palaeobiologia, Palaeobiologie ; Palaeobiologica, Palaeobiologisch
**Palaeontogr.** - Palaeontographia, Palaeontographie
**Palaeontol.** - Palaeontologia, Palaeontologie ; Palaeontologisch
**Paleontol.** - Paleontologia, Paleontology ; Paleontologico(a), Paleontological
**Paléontol.** - Paléontologie ; Paléontologique
**Parasitol.** - Parasitologie, Parasitology
**Parassitol.** - Parassitologia
**Pathol.** - Pathologie, Pathology ; Pathologique, Pathological
**Pêch.** - Pêcheries
**Perm.** - Permanent(e)
**Pescher.** - Peschereccio
**Philipp.** - Philippine
**Phys.** - Physique, Physics, Physik ; Physical, Physisch
**Physiol.** - Physiologia, Physiologie, Physiology ; Physiologique, Physiological, Physiologisch
**Piscicult.** - Piscicultura, Pisciculture
**pl.** - planche, plate
**Pol.** - Polonais(e), Polish, Polisch
**Pont.** - Pontificia
**pp.** - pagine, pages
**Proc.** - Proceedings
**Profess.** - Professionale, Professionnel, Professional
**Protistenk.** - Protistenkunde
**Protistol.** - Protistologia, Protistologie, Protistology
**Pr.-Verb.** - Procès-Verbal (Verbaux)
**Pubbl.** - Pubblicazioni
**Publ.** - Publication

**Quart.** - Quarterly
**Queensl.** - Queensland

**R.** - Reale, Regia, Royal(e)
**r.** - rekke
**Rapp.** - Rapporto, Rapport
**Rass.** - Rassegna
**Rec.** - Record(s)
**Rech.** - Recherches
**Rend.** - Rendiconto(i)
**Rep.** - Report(s)
**Res.** - Results
**Rés.** - Résumé
**Résult.** - Résultats
**Resúm.** - Resúmenes
**Rev.** - Revue, Review, Revista
**Ric.** - Ricerca
**Riun.** - Riunione
**Riv.** - Rivista
**Russ.** - Russian, Russisch

**S.** - Seite
**S** - South
**Sällsk.** - Sällskap
**Sc.** - Scientia, Scienza(e), Science(s)
**Scient.** - Scientifico, Scientifique, Scientific
**Selsk.** - Selskab
**Senckenb.** - Senckenbergisch
**Ser.** - Serie
**Sér.** - Série
**Sitz.-ber.** - Sitzungsbericht(e)
**Skr.** - Skrift(er)
**Smiths.** - Smithsonian
**Soc.** - Societas, Società, Société, Society, Sociedad, Sociedade, Societatia
**Sper.** - Sperimentale
**Stat.** - Station(s), Stationary
**Statist.** - Statistica, Statistics, Statistik ; Statistique, Statistical, Statistisch, Statisticeskîi, Statistikk
**Staz.** - Stazione
**Suppl.** - Supplemento, Supplément, Supplement

**Tabl.** - Table(s), Tableaux
**Taf.** - Tafel(n)
**Talassogr.** - Talassografico
**Tav.** - Tavole
**Techn.** - Technique(s), Technical
**Thalassogr.** - Thalassographique
**Tijdschr.** - Tijdschrift
**Trab.** - Trabajos
**Trans.** - Transactions
**Trav.** - Travail, Travaux

**Univ.** - Universitas, Università, Université, University, Universität, Universidad, Universidade, Universitet
**U. S.** - United States

**Ver.** - Verein
**Verh.** - Verhandelingen, Verhandlungen
**Veröff.** - Veröffentlichungen
**Vgl.** - Vergleichende
**Vidensk.** - Videnskabelig

**Wetensch.** - Wetenschap ; Wetenschappelijk
**Wirtsch.** - Wirtschaft
**Wiss.** - Wissenschaften, Wissenschaftlich

**Zap.** - Zapiski
**Zool.** - Zoologia, Zoologie, Zoology; Zoologica, Zoologique, Zoological, Zoologisch, Zoologiceski
**Ztg.** - Zeitung
**Ztrbl.** - Zentralblatt
**Ztschr.** - Zeitschrift

(—) - Dello stesso autore, Du même auteur, Of the same author, Von demselben Verfasser, Del mismo autor etc.

## IV. Piscatus

Piscatus oeconomia - Politica oeconomica - Legislatio . . . . . . . . . . . . . . . » 247
Biologia piscatui applicata - Hydrographia et Hydrologia locorum ad piscandum - Studia et inquisitiones - Congressus - Conventus - Doctrina . . . . . . . . . . . . . . . » 251
Portus ad piscaturam idonei - Navicularum quaestio de constructione et instrumentis - Classis piscatoria motoribus instruenda . . . . . . . . . . . . . . . . . . . . » 260
Methodus et Instrumenta - Retia . . . . . . . . . . . . . . . . . . . . . . . » 262
Loca ad piscandum idonea - Mare idem ac factor oeconomicus . . . . . . . . . . . » 265
Industria et commercium fructuum piscatus diversis regionibus . . . . . . . . . . . » 266
Residua, Olea, Axungiae, Farinae, Collae . . . . . . . . . . . . . . . . . . . . » 275
Fructus piscationis aestimatio alimentaris - Consummatio - Bacteriologia - Hygiene . . » 277
Conservatio in thecis - Technica refrigerationis . . . . . . . . . . . . . . . . . » 279
Species edules et commerciales . . . . . . . . . . . . . . . . . . . . . . . . » 283
Index Auctorum . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 297
Index Materiarum
*Oceanographia Physica et Navigatio* . . . . . . . . . . . . . . . . . . . . . » 309
*Oceanographia Biologica et Piscatus* . . . . . . . . . . . . . . . . . . . . . » 317

# I.

# GENERALIA NAVIGATIO.

## Navigationis historia - Itinera.

**Anderson R. C.** - The Bursledon Ship [*Navis ad* Bursledon *pertinens*]. 10 figs., 2 construction plans, Mar. Mirr., XX, 2, 158-170. London (1934). **a - 1**

Account on the investigations undertaken on an old wreck found in the Hamble River at the beginning of 1900. Detailed description and discussion as to its age.

**Ardley R. A. B.** - The Second Voyage of « Discovery II ». A Circumnavigation of the Southern Ocean [*Circumnavigatio australium marium a* Discovery II *suscepta*]. 3 figs., Mar. Obs., XI, 113, 9-12. London (1934). **a - 2**

**Aubert de la Rue Edgard** - Voyage aux Iles de la Désolation (Iles Kerguelen) [*Navigatio ad insulas* Kerguelen]. Le Globe, LXII, 12-13. Genève (1933). **a - 3**

Résumé du rapport lu par l'A. au cours d'une séance de la Société de Géographie Suisse sur la conformation, la morphologie, la géologie et la vie aux Iles Kerguelen.

**Ballard G. A.** - British Battleships of 1870. The « Audacious » [*Longae naves britannicæ a. 1870. De navi* Audacious]. 3 figs., 1 pl., Mar. Mirr., XX, 1, 5-23. London (1934). **a - 4**

Epoch of experiments under French influence with radical innovations as to offensive and defensive powers, proportions and measurements. Description and history of the « Audacious » ; comparison with the four other ships of the same epoch.

**Barlow Nora ed.** - Charles Darwin's Diary of the Voyage of H. M. S. « Beagle » [*Diarium navigationis in regia navi* « Beagle » *peractæ ad Carolum* Darwin *pertinens*]. maps, ills., The Macmillan Co., Univ. Press., xxx + 451 pp. New York & Cambridge (1933). **a - 5**

New complete edition of the diary, celebrating the centenary of Darwin's five-year voyage on the « Beagle ». The book contains some most important scientific items not previously published.

**Beonio V. & Brocchieri** - Dall'uno all'altro polo [*Agitur da navigatione quadam peracta a polo nordico ad polum merid.*]. 10 carte e 64 tav. in rotocalco, xi + 464 pp. Tip. Ind. Graf. Ital. Stucchi. Ulrico Hoepli Edit. Milano (1934). **a - 6**

Il volume diviso in tre parti comprende : 1°) Viaggio nell'inverno antartico ; 2°) traversata delle due Americhe ; 3°) verso l'estremo Nord.

**Bishop C. W.** - Chinese Voyages in the Indian Ocean in the Early Fifteenth Century [*De navigationibus Sinensibus in Oceanum Indianum in eunte seculo XV*]. Geogr. Rev., XXIV, 4, 672-674. New York (1934). **a - 7**

**Bisschop (de) Eric** - Chine : Lettre du capitaine..... et le Rapport n° 1 [*Sinensis Regio. Epistulae Navarcæ.... et relatio N° 1*]. 3 figs., 1 croquis, Géogr., Terre, Air, Mer, LXI, 5/6, 366-372. Paris (1934). **a - 8**

Lettre du capitaine de Bisschop qui avait fait construire une jonque pour parcourir avec plus de facilité, l'océan Pacifique de part en part, y visiter les terres mal connues, y rechercher s'il en existe encore d'inconnues et réaliser des recherches hydrographiques et ethnographiques. Description du voyage effectué suivie du I-er rapport scientifique sur la recherche du rocher indiqué sur les cartes marines comme étant par L. = 5°30' nord. G. = 122°03' est. (à suivre).

Lecture with lantern slides delivered on February 21st 1934 followed by discussion. The speaker emphasizes the urgent need of records of the old coastal types not having yet yielded the place to motor craft, and gives some suggestions how it can be done. Beginning with London River the Speaker proceeds along the British and Irish coasts describing and commenting the different types of craft met with.

**Chatterton Keble E.** - The Old East Indiamen [*De veteribus navibus Indiarum Orientalium*]. Rich & Corvan, Ltd. London (1933). **a - 16**

**Goeje De C. H.** - Suriname ontdekt [*De inventa* Surinama] (Rés. français). 1 fig., 2 carte, Tijdschr. Kon. Ned. Aardr. Gen., LI, 1, 51-85. Leiden (1934). **a - 29**

La scoperta dell'America. La scoperta della Guyana: spedizioni di Raleigh, Dydley, Keymis ed altri: colonizzazione olandese, inglese, francese, portoghese alla fine del 1500. La scoperta di Surinam 1667-1860: L'inizio delle esplorazioni nell'interno, questioni di limiti. Compimento della scoperta, esplorazioni continuate dell'interno, misurazioni esatte, topografia (1861-1933).

**Hayes J. Gordon** - The Conquest of the South Pole [*De Polo merid. explorato*]. maps., diagr., ills., Th. Butterworth, 318 pp. London (1932). **a - 30**

This book may be considered as a continuation of and supplement to Dr. H. R. Mill's « The Siege of the South Pole », which carried the story down to 1905. The expeditions dealt with are the following: Shackleton, 1907-1909; Charcot's second expedition, 1911-1912; Mawson in the « Aurora » 1911-1914; Shackleton in the « Endurance », 1914-1916; Shackleton's last voyage, 1921-1922; Norwegian whalers, 1923-1927; and « Discovery » Committee 1923-1931; Wilkins, 1928-1930; Byrd, 1928-1930; Mawson and Riiser-Larsen, 1929-1931.

**Helland-Hansen** - F. Nansen. Over Grønland og Polhavet [F. Nansen. *Ad Groënlandiam et Maria polaria*]. carte, nombr. fig., dessins et pl., 914 pp., III. Oslo (1930-1932). **a - 31**

Récits complets des voyages d'exploration de Nansen dans les régions arctiques. Le livre de Nansen sur la vie des Esquimaux.

**Henderson G. C.** - The Discoverers of the Fiji Islands. Tasman, Cook, Bligh, Wilson, Bellingshausen [*De inventoribus insularum* Fiji. T. C. B. W. B.]. ills., Facsim., & maps., xviiii + 324 pp., John Murray. London (1933). **a - 32**

The present volume deals with the successive stages in the discovery of the group of the Fiji Islands, on hand of the journals of various explorers, so far as they concern Fiji, as well as the information gathered from Admiralty charts and personal acquaintance with the region.

**Hildebrand J. R.** - The Greatest Voyage in the Annals of the Sea [*Navigationes perlongæ apud annales nauticos*]. ill., Nat. Geogr. Mag., LXII, Dec., 609-739. Washington (1932). **a - 33**

Description of regions discovered by Magellan.

**Hobbs William Herbert** - Discovery of a New Sketch of Cape Hudson in the Antarctic [*Inventio novæ adumbrationis promunturii* Hudson *in Antarctica regione*]. 2 figs., Geogr. Rev., XXIV, 1, 115-117. New York (1934). **a - 34**

A brief review of the history of the exploration in the region of Hudson Cape, on hand of two sketches, one made on board the « Peacock » on January 16, 1840, and the other from the « Aurora » on November 23, 1915.

**Holland Rose J.** - The Mediterranean in the Ancient World. (transl. by C. King) [*Mare Mediterraneum antiquis temporibus*]. 180 pp., Univ. Press. Cambridge (1934). **a - 35**

See Jules Sottas: « A Review of Dr. J. Holland Rose's Book » The Mediterranean in the Ancient World », Mar. Mirr., XX, 3, 338-348, 1934, containing the résumé of the six chapters of the book.

**Jane Cecil** - Select Documents Illustrating the Four Voyages of Columbus [*Selecta documenta quæ inlustrant navigationes quattuor Columbianas*]. 260 pp., II, (Hakluyt Soc.) B. Quaritch Ltd. London (1933). **a - 36**

**Jensen Christian** - The Polar Ship « Maud », Brief History of Building and Description [*Polaris navis, nomine* Maud. *Brevior descriptio*]. 5 figs., on 2 pls. 1 plan of construction, Norw. North Pol. Exp. « Maud » 1918-1925, Scient Res., I, 2, 1-13. Bergen (1933). **a - 37**

After a description of the construction and building of the « Maud » also with regard to differences from the « Fram » and other ships the A. cites some passages from Amundsen and Wisting as to the behaviour of the ship through the pack-ice.

**Jesse L.** - More Trips around the World (E. P. C. Geography Readers Book 2) [*Itinera per orbem terraqueum*]. 176 pp., Educational Publ. Co. Cardiff & Wrexham (1934). **a - 38**

**Kahel Paul** - Die verschollene Columbus-Karte von 1498 in einer türkischen Weltkarte von 1513 [*De amissa tabula Columbiana a. 1498 in atlante Turcarum a. 1513 reperta*]. 9 Karten i. T., 1 Karte a. T., 52 S., W. de Gruyter, Berlin & Leipzig (1933). **a - 39**

Beschreibung einer vor kurzem im Serail von Konstantinopel entdeckten türkischen Weltkarte, deren grösster Teil scheinbar von Columbus selbst oder mindestens unter seiner persönlichen Leitung gezeichnet worden ist. Die Karte hat infolgedessen die grösste Bedeutung für die Geschichte der ersten Entdeckungsreisen nach Amerika.

**Koch Lauge** - The Danish Three-Year Expedition to King Christian X Land [*Dania expeditio per tres annos ad terram Regis* Christian X]. 3 maps., Geogr. Rev., XXIII, 4, 599-607. New York (1933). **a - 40**

Account of the organization and work of a three-year expedition sent out for the investigation of Central East-Greenland, now known as King Christian X Land. The expedition was organized with three main objects in view: the mapping of the area between latitudes 70° and 77° N., geological field-work for the purpose of elucidating many regional problems of broad interest, and an inquiry into the ability of the region to support an Eskimo population. Résumé of the typical weather throughout the year; account of the echo-soundings and hydrographic and marine-biological work. Triangulation and topographic work. Icebergs and glaciers. Archeological investigations.

**Lacoste L. & Quemard C.** - Les ports antiques de l'Algérie [*De veteribus portibus Algarinis*]. 33 pp., Soc. Ed. Géogr., Marit. & Colon. Paris (1933). **a - 41**

La Division Navale de Mauritanie. Le Port Militaire Romain de Césarée (Cherchell). Esquisse archéologique et historique d'après les découvertes et sondages plus récents. Catalogue méthodique des vestiges de ports antiques sur la côte nord-africaine.

**Lane Chapin Frederic** - Venetian Ships and Shipbuilders of the Renaissance [*Naves navalesque artifices ad Venetias pertinentes ætate renovationis Græcitatis et Latinitatis*]. John Hopkins Press. Baltimore (1934). **a - 42**

Organisation of Venetian arsenal (1300-1600), ships constructed, building methods, discipline of the workers.

**Lane Chapin Frederic** - Venetian Naval Architecture about 1550 [*Veneta navalis architectura (a. 1550)*]. 7 figs., Mar. Mirr., XX, 1, 24-49. London (1934). **a - 43**

The ship carpenter Pre Theodoro de Nicolò, his principal treatises on shipbuilding and some other manuscripts on the subject, parts of which are reproduced in extenso. Introduction of the use of the great galley, the great galleon, commercial ships.

**Le Conte Pierre** - Au sujet de « La Couronne » [*De navi* La Couronne]. 1 tabl., Assoc. Amis Musée Marine, I-er Bull. Trim., 106-110. Paris (1933). **a - 44**

Date de lancement. Mort prématurée du constructeur. Coque et emménagement. Détails d'accastillage. Mature. Artillerie.

**Lefranc Georges** - Les grands voyages de l'antiquité. Les Argonautes, Habnon, Himilcon, Sataspés Carausius, l'Atlantide [*De longis itineribus antiquis temporibus. Argonautæ: Habnon. Imilcon, Sataspes, Caraupius. De Atlantide*]. 3 carte h. t., x + 272 pp., Libr. Nouv. Rev. Naut. Paris (1933). **a - 45**

Essai de préciser les connaissances nautiques des anciens et de déterminer de manière probable les découvertes maritimes faites par les Phéniciens, les Egyptiens, les Carthaginois, les Grecs et les Romains. Le dernier chapitre donne l'histoire de la formation de la légende de l'Atlantide depuis Platon jusqu'à M. Scott Elliot.

**Lothrop S. K.** - Aboriginal Navigation off the West Coast of South America [*Navigatio aborigena longe a litoribus occidentalibus Americæ Australis*]. Journ. R. Anthr. Inst., 62, 229-256. London (1932). **a - 46**

Description of the basic types of aboriginal seagoing craft along the West coast of South America ranged from south to north, which do not only reflect the character of the country, its resources and the state of culture of the inhabitants but also throw some light on their migration.

**Magnaghi A.** - Incertezze e contrasti delle fonti tradizionali sulle osservazioni attribuite a C. Colombo intorno ai fenomeni della declinazione magnetica [*Studia magneticæ declinationis ad Columbum assignata*]. Boll. Soc. Geogr., Ottobre, 595-641. Roma (1933). **a - 47**

**Manning G. C.** - Yangtze [*Navigatio per flumen* Yangtze]. U. S. Nav. Inst. Proc., LX, 372, 221-229. Annapolis, Md. (1934). **a - 48**

Generalities in the navigation along the Yangtze-river. Interesting remarks and rules.

**Marulli Yoel** - Gli Italiani nei traffici e nelle scoperte marittime [*De Italis apud historiam maritimam et commercialem*]. F. Zappa. La Spezia (1933). **a - 49**

**Mill Hugh Robert** - The Return of the « Lively » in 1831 [*Reditus naviculæ* Lively *a. 1831*]. Geogr. Journ., LXXXIII, 3, 231-233. London (1934). **a - 50**

Reproduction of the interesting part of the early newspaper-notices referring to « Lively » the cutter of 50 tons, which under the command of Captain Avery accompanied the « Tula » in her voyage in the Antarctic, and was then lost out of sight in the ice and later found and reconducted to Bull Bay.

**Modzalevskij V.** - Conveyance of River Steamers from the Yenissey into the Lena River [*Transductio classis fluviatilis a flumine* Yenissey *ad* Lena] (In Russ. & Engl.). Bull. Arct. Inst., 1, 8-9, 33-35. Leningrad (1934). **a - 51**

Account of the voyage of two river steamers from Omsk to Yakutsk which covered a distance of 7700 km., of which 3200 by sea, including 1000 km through ice, under the conveyance of the ice-breaker « Krassin ».

**Muncaster Claude** - Rolling Round the Horn [*De promunturio* Horn *circumnavigato*]. ills., Chas. E. Lauriat Co. Boston (1933). **a - 52**

Narrative of the author's experience as a deck hand on a voyage from Melbourne to Cardiff via the Horn. Sailing ships and sailor's life described: hard work, discomfort, poor food and wages.

**Murray Marischal** - Ships and South Africa: A Maritime Chronicle of the Cape with particular Reference to Mail and Passenger Liners from the early Days of Steam down to the Present. With a Foreword by General the Rt. Hon. J. C. Smuts [*Progressus navigationis inter Europam et Africam Meridionalem*]. photos of over 300 vessels, Oxford University Press, Humphrey Milford. London (1933). **a - 53**

This work includes a hundred years of steam navigation from the arrival of the S. S. Enterprise in Table Bay in October 1825 to the advent of the M. V. Carnarvon Castle in August 1926. Some important dates in the history of the development of the Cape as an important point for navigation with a special view of the commercial lines passing here.

**Nippoldt A.** - Zur Geschichte des Kompasses [*Historia buxidæ. Res collectæ*]. Naturwiss., XXI, 16, 306-307. Berlin (1933). **a - 54**

**Noroit M.** - De Marseille à Toulon par les antipodes [*Navigatio a Massilia ad Telonem per Antipoda*]. 71 clichés, 179 pp., Soc. Ed. Géogr., Mar. & Col. Paris (1933). **a - 55**

Note de bord à propos des colonies françaises.

**Nunn George E.** - Magellan's Route in the Pacific [*Cursus maritimus Magallani per Oceanum Pacificum*]. 1 map., Geogr. Rev., XXIV, 4, 615-633. New York (1934). **a - 56**

The foregoing analysis of the various contemporary accounts of Magellan's voyage reveals a most marked discrepancy in regard to the route of Magellan's expedition in the Pacific. On the basis of investigations and discussion of earlier documents the A. here gives the probable track on a map.

**O'Brien Conor** - Voyage and Discovery [*Navigatio et inventiones*]. ills., Will. Blackwood & Sons, 276 pp. Edinburgh & London (1933). **a - 57**

Description of the voyage on board a sailing boat to Gibraltar, the Mediterranean coast of Spain, the Balearic Islands, and Algeria.

**Olsen Örjan** - La conquête de la terre. Histoire des découvertes et des explorations depuis les origines jusqu'à nos jours. Traduit du norvégien par E. Guerre [*Historia de inventionibus et explorationibus ab origine in hodiernum tempus*]. nombr. fig., Payot, vol. I & II. Paris (1933). **a - 58**

Histoire de la découverte de notre globe depuis les plus lointaines origines jusqu'à la fin du XII-ème siècle, depuis ce moment jusqu'à la mort de Vasco de Gama à Cochin à la fin de 1524 et puis jusqu'au retour de Cristophe Colomb de son premier voyage au Nouveau Monde.

**Pineghine N.** - Relics of Barents. Expedition Found on Novaja Zemlja [*Relicta expeditionis* Barents *inventa in* Novaja Zemlja]. (In Russ. & Engl.), 1 fig., Bull. Arct. Inst., 12, 423-424, 460. Leningrad (1933). **a - 59**

Discovery by the Expedition of the Arctic Institute during the summer 1933 of the remnants of Barents' hut and of some things which undoubtedly belonged to Barents' Expedition as well as of the rest of a small boat, the fragment of a roughly made oar and a harpoon of an obsolete type. The articles found have been handed over to the Arctic Museum.

**Rasmussen Knud** - Heldenbuch der Arktis [*Navigationes ad polos. Liber de heroicis navigatoribus per regiones Arcticas*]. aus: « Tjidschr. Kon. Ned. Aardr. Gen. », LI, 2, 261-264. Leiden (1934). **a - 60**

1. Der Zug nach dem Norden: Pytheas' Beschreibung einer Reise nach dem geheimnisvollen Thule, Die Fahrten des Wikings Ottar von Halogaland. 2. Die antarktische Forschung in älterer Zeit, die grossen internationalen Südpolarexpeditionen, die Entdeckung des Südpols.

**Reeve Sydney A.** - Ship Evolution and Social Evolution [*Evolutio navium et hominum*]. 9 figs., Geogr. Rev., XXII, 1, 61-76. New York (1933). **a - 61**

The argument here stated in condensed form is elaborated in the author's three-volume work, « The Evolution of Social Crises » now in manuscript. He claims that a broad study of history as a record of social evolution reveals the ship as one of the most dominant factors in her propulsion and guidance. The following problems are dealt with: Evolution of individual and society contrasted. The secret of Rome's greatness. The scene shifts to the Northwest. The evolution of the cog. Appearance of the carack. The ocean opened to mariners. European civilization revolutionized. The Elisabethian ship. Improvement of land communications. Georgian and Victorian ships. Modern facilities for navigation.

**Reynolds J. Richardson** - The Polar Medal. Additional Notes [*Numisma polare. Notæ additiciæ*]. Pol. Rec., 6, 132-133. Cambridge (1933). **a - 62**

(See: « Pol. Rec., nº 5, 1933). Two letters containing additional information on the history of the Polar Medal.

**Robinson Gregory** - The Great Harry [*Navis nomine* Great Harry]. Mar. Mirr., XX, 1, 85-92. London (1934). **a - 63**

Critical review of a lecture held by Mr. L. G. Carr Laughton (M. M. April 1931, pp. 174-180), on the ship « Henry Grace à Dieu » (the « Great Harry »). The A. does not agree with the pretended idea of the enormous dimensions of the ship nor with its early date of building.

**Rostovskij L. O.** - A travers la tempête de neige et contre les ondes [*De navigationibus per nivis tempestates et undas*]. Ills., Inst. Arct. U. R. S. S., 74 pp. Léningrad (1933). **a - 64**

Récit romancé mais très exact de la tragédie de l'équipage du chalutier allemand « Johannes Thode » qui a subi une avarie près de la côte de Mourmansk et dont l'équipage a été sauvé par le personnel d'une station polaire scientifique située non loin du lieu du naufrage auquel l'A. du livre eut part.

Voyage of the « Mobahiss » from Bombay on a traverse of the Arabian Sea to Mombasa, to Zanzibar and return to Colombo. Observations at 12 stations. Topography and bottom deposits. Hydrographic observations. Biology.

**Spender Michael** - The Sixth and Seventh Thule Expeditions of Knud Rasmussen [*Expeditiones sexta et septima* Thule *nomine a* Knud Rasmussen *perfectæ*]. 1 phot., Geogr. Journ., LXXXIII, 2, 140-142. London (1934). **a - 70**

The Sixth Thule expedition was rather a reconnaissance than an expedition in itself being an attempt to cross the coast of south east Greenland in small craft equipped with power, in the present case a Norwegian « skerry-racer », « Dagmar ». The seventh Expedition has been undertaken with a motorship, the « Sh. Stauning » carrying an airplane, with the aim of surveying and mapping the south east coast of Greenland.

**Spilbergen (van) Joris** - De reis van-naar Ceylon, Atgeh en Bantam 1601-1604 [*Navigatio ad* Ceylon, Atjeh *et* Bantam]. (Bewerkt door F. C. Wieder, F. W. Stapel e. a.), Cartes, illustr. 's-Gravenhage (1933). **a - 71**

**Stagg J. M.** - The British Polar Year Expedition to Fort Rae, North West Canada 1932-33 [*Expeditio ad* Fort Rae, North West Canada]. Nature, CXXXIII, 3362, 517-518. London (1934). **a - 72**

Brief description of the preparation of the expedition and of the work performed.

**Stefansson Vilhjalmur** - An Eskimo Discovery of an Island North of Alaska [*Inventio ab* Eskimo *cuiusdam insulæ in maribus nordicis Alaskianis*]. 3 figs., 1 map., Geogr. Rev. XXIV, 1, 104-114. New York (1934). **a - 73**

Account of the discovery made by the 10-ton power sloop « Takpuk » under command of her owner of the same name and with a crew of seven or eight Eskimos of an island, whose location appears to be near 71º20'N and 145º 30' W. Exploration in the region. Hypothesis of the origin of the island: Earth or floating ice? Identification of Takpuk's Island with Keenan Land? Significance of the discovery.

**Stejneyer Leonhard** - An Early Account of Bering's Voyages [*De vetere enarratione navigationum a* Bering *peractarum*]. Geogr. Rev., XXIV, 4, 638-642. New York (1934). **a - 74**

On the two expeditions of Bering to the Kamtchatka and the North East of Siberia. Danish translation of the first report of Waxell, second in command under Bering on the « St. Peter », by Peder von Haven, a young theologist who had the opportunity to go to Russia when the survivors of that unlucky expedition had come back.

**Stewart-Brown R.** - Liverpool Ships in the Eighteenth Century [*Naves ad* Liverpool *pertinentes XVIII sæculo*]. Hodder & Stoughton. London (1932). **a - 75**

Increase and decline of the shipbuilding industry from 1709 to about 1850. Notes on all the ships constructed here between 1711 and 1811.

**Sykes Percy** - A History of Exploration: from the Earliest Times to the Present Day [*Historia explorationum ab origine in hodiernum*]. 25 pl., xiv + 374, Routledge & Sons, Ltd. London (1934). **a - 76**

The Author draws the attention to the exploration of Asia, the continent in which most of his own journeys have been made. America and Australia are also summarised in comparison.

**T'Ien-Tsê Chang** - Sino-Portuguese Trade from 1514 to 1644. A Synthesis of Portuguese and Chinese Sources [*Sinense-Lusitanum commercium ab a. 1514 ad a. 1644. Synthesis fontum Lu-*

*sitanarum et Sinensium*]. Late E. J. Brill Ltd. Publisher. Leiden (1934). **a - 77**

Ch. I. An historical sketch of China's maritime trade down to 1513. Ch. II. The early Sino-Portuguese commercial relations. Ch. III. The expulsion of foreigners from China and the prohibition of foreign trade. Ch. IV. Trade or no trade. Ch. V. The rise of Macao. Ch. VI. The arrival of other Europeans in the far East and the position of the Portuguese. Ch. VII. Macao in days of tribulation and the stagnation of Sino-Portuguese trade.

**Van Balen W.-J.** - De ontdekking van de Wereld. Vol. I & II [*Historia inventionum. Vol. I et II*]. nombr. fig. & pl., 358 & 390 pp. « Elsevier ». Amsterdam (1932). **a - 78**

Histoire de la découverte du monde, dans laquelle on distingue deux phases, d'abord la période que l'on pourrait appeler celle des découvertes, puis celle d'exploration.

**Verwey D.** - Boats of Scandinavian Type in East Prussia [*Naviculæ scandinavæ in Orientali Borussia*]. 1 fig., Mar. Mirr., XX, 1, 113-114. London (1934). **a - 79**

Some reflections on the Peise fishing boats on the shores of the Frisches Haff as being probable survivors of the ancient Northern Viking boats « skeith » dating from a period of Viking invasions to the islands of the Kurische Nehrung. (See also M. M. XX, 2, p. 234).

**Waters E. G. R.** - An Old Italian Version of the Navigatio Sancti Brendani [*Vetus translatio in italicam linguam libri navigationis Sancti Brendani*]. 1 facs. Publ. Philol. Soc. N° 10, 86 pp., Humphrey Milford. London (1931). **a - 80**

**Wells Forrest H.** - The Chinese Mariners' Compass, Charts and Methods of Navigation [*De antiquis sinensibus buxidis, chartis et rationibus navigandi*]. 1 fig. on tabl., U. S. Nav. Inst. Proc., LX, 373, 359-368. Annapolis, Md. (1934). **a - 81**

The paper principally deals with the ancient Chinese compass giving also some hints of navigational methods and charts.

**Wendel G.** - A declinaçào magnetica no Brasil na epoca da descoberta [*Declinatio magnetica in Brasilia inventionum temporibus*]. 17 figs. et cart., Bol. Astr. Geophys., 29, VI, 61. Sào Paulo (1933). **a - 82**

**Williamson James A. (Edit.)** - The Observations of Sir Richard Hawkins. Edited from the Text of 1622 with Introduction, Notes and Appendices [*Observationes a* Sir. R. H. *peractæ. ab exemplare quodam a. 1622 cum introductione, notis et appendicibus per* James Williamson]. 4 maps, The Argonaut Press. London (1933). **a - 83**

In this new reprint some controversial points as to the authenticity of the outlines of « Australia » on maps of the « Descelier's » type, and the identification of « Hawkins' Maiden-land » with the Falkland Isles are discussed with reference to the article of Admiral Chambers in the October 1933 number of Mar. Mirr.

**Wordie J. M.** - The Polar Medal [*Numisma polare*]. 1 pl., Pol. Rec., 5, 57-61. Cambridge (1933). **a - 84**

History of the Polar Medal, whose first announcement was made in the « London Gazette » January 30, 1857, and which has been awarded in 1932 to the members of Mr. Watkins' British Arctic Air Route Expedition, 1930-1931.

---

**Società (R.) Geografica Italiana** - Primo sommario commento alla Crociera Atlantica del Decennale [*Summarium prius de aëria navigatione per Atlanticum decimo recurrenti anno ætatis Fascium Italicorum*]. Boll. R. Soc. Geog. It., 7/8, 510-542. Roma (1933). **a - 85**

La R. Società Geografica ha avuto l'incarico di trasmettere i comunicati ufficiali radiofonici della Crociera Atlantica del Decennale: ciò che è stato fatto, ogni giorno di volo, via via che giungevano le notizie sulla tappa dal Comando della Seconda Squadra Atlantica. Per ogni tappa della Crociera il Presidente della R. Soc. Geogr. ha tenuto una breve conversazione alla radio, per un primo sommario commento della trasvolata. Si riportano i commenti.

---

**C. S. - G. C.** - La crociera intorno all'Africa dei sommergibili « A. Sciesa » e « Toti » [*Navigatio speculatoria per Africam navium submergibilium* « *A. S.* » *et* « *T.* »]. Riv. Maritt., Anno LXVII, 7/8, 33-51. Roma (1934). **a - 86**

Condizioni meteorologiche. Considerazioni sulla navigazione. Considerazioni generali. La visita alle Colonie italiane.

**F. G.** - Grandi Uomini di Mare della Storia (Sec. XIII e XIV) Ruggero di Lauria, Jean de Vienne [*De claris viris apud historiam navalem*]. Riv. Cult. Mar., IX an., 9/10, 299-307. Roma (1934). **a - 87**

**G. G.** - Traces of the Expedition on the Vessel « Willem Barents » [*Vestigia expeditionis in navi* « *W. B.* »] (In Russ. & Engl.). Bull. Arct. Inst., 352-353, 390-391. Leningrad (1933). **a - 88**

Account of the discovery, made by the expedition sent in summer 1933 by the Arctic Institute to the northern part of Novaja Zemlja, of an inscription on the western island belonging to the little Oranina group which records the expedition on « Willem Barents » in 1594.

**An.** - Victory [*Victoria adepta*] (In Russ. & Engl.). 1 phot., Bull. Arct. Inst., IV, 1/2, 205-206. Leningrad (1934). **a - 89**

Account of the successful accomplishment of the operations of rescue of the Russian explorers from the wrecked s/s « Cheliuskin ».

**An.** - Some Letters of Admiral the Hon. Samuel Barrington [*Epistulæ quædam navarcæ* Hon. S. B.]. Mar. Mirr., XX, 1, 67-84. London (1934). **a - 90**

The letters dating from May 1781 to August 1799 are for the great part Memoranda in Admiral Barrington's handwriting concerning official orders, accounts of councils held, private intelligence communications and writings to private persons.

**An.** - The Eskimo Kayak [*De navicula* Kayak *nomine*]. 2 pl., Pol. Rec., 7, 52-62. Cambridge (1934). **a - 91**

The Eskimo kayak as a new element of arctic exploration. Its successful use on the two Watkins expeditions to East Greenland. The value of learning the art of kayaking by the Europeans for the aim of polar exploration. First description by Hans Egede in 1745 of Eskimo kayaks and the method of rolling them. The variation of the kayak according to various localities. Its use in the several regions of Greenland. Description of Eskimo hunting methods while kayaking. The construction and management of a kayak. Building a kayak. Rolling the kayak. The Eskimo method.

**An.** - Croisière du « Mikyane » en Corse. Août 1933 [*Expeditio a* Mikyane *perfecta in Corsicam. Mense Augusto 1933*]. nombr. croquis, Yachts & Yachting, 5-e an., 50, 65-74. Paris (1934). **a - 92**

Le Mikyane est un yacht pointu à moteur auxiliaire.

## Navigatio plana et litorea - Navigatio astronomica - Instrumenta - Tabulae - Ephemerides - Navigatio radiogoniometrica - Studia pro navigatione.

**Akiyosi Tosio** - Observation of « Dip of Sea Horizon » on Board the « Kasuga » [*Observationes a navi* Kasuga *perfectæ de depressione horizontis*]. Suiro Yôhô (Hydrogr. Bull.), 12, 1-6. Tokyo (1933). **a - 93**

A brief summary of the observations of the dip of the sea horizon which have been hitherto carried out by the Japanese Navy, followed by the account of the result of the same observation made by the author on board H. I. J. M. S. « Kasuga », at a height of about 15 m., on her round cruise from Yokosika to Zinsen, Caireu, Shanghai and return, in September-October, 1932 ; the instrument used has been a Pulfrich's Kimmtiefmesser. From the data obtained at 80 spots on the sea an extended summary is given. (See also : Jap. Journ. Astr. & Geoph., XI, 3, abstr. 135, 41. Tokyo 1934).

**Alocco Giulia** - Magnetoresistenza longitudinale e trasversale e struttura magnetica dei ferromagnetici [*Magnetoresistentia longitudinalis et transversalis ac magnetica structura ferromagnetorum*]. 14 fig., Nuovo Cim., nuova serie, a. X, 9, 355-371. Bologna (1933). **a - 94**

Le relazioni fondamentali tra resistenza elettrica e processi reversibili di magnetizzazione nei ferromagnetici vengono utilizzate per mettere in evidenza una distribuzione coordinata dei singoli momenti elementari in un materiale policristallino. La ricerca, eseguita su sottili lamine di *Ni*, ha condotto ad individuare il vero aspetto degli effetti di magnetoresistenza longitudinale e trasversale, mostrando come essi restino in tutti i casi affini a quelli dei monocristalli purchè, tenendo conto della rifrazione delle linee di forza, si consideri l'orientazione del campo interno e della corrente di misura rispetto a particolari direzioni di anisotropia che in questi fenomeni rivestono la funzione di direzioni di facile magnetizzazione. (Vedi anche : Atti R. Ist. Ven. Sc., Lett. ed A., Venezia, Tomo XCII, disp. 10ª, 1932-33, pag. 1353-1371).

**Armellini G.** - Il diametro orizzontale del Sole nel 1931, nel 1932 e nel 1933 [*Horizontalis diametros Solis a. 1931, 1932 et 1933*]. Atti R. Acc. Naz. Lincei. Rend. Cl. Sc. Fis., Mat. e Nat., serie VI, XIX, 5, 268-272. Roma (1934). **a - 95**

Il R. Osservatorio del Campidoglio, a Roma, fin dal 1876, osserva ogni giorno, al passaggio al meridiano, il diametro orizzontale del sole, onde possiede ormai una serie quotidiana di sessanta anni di misure, tutte eseguite con lo stesso metodo, simultaneamente, da tre o quattro astronomi, i quali si controllano a vicenda. Ora l'A. espone i risultati delle osservazioni eseguite al Campidoglio nel 1931, 1932 e 1933 rilevando che, dal 1931 al 1932 tutti e tre gli astronomi incaricati delle misure hanno trovato una diminuzione del raggio solare di circa nove centesimi di secondo d'arco, mentre dal 1932 al 1933 gli stessi astronomi hanno trovato, tutti e tre, un aumento di circa quindici centesimi di secondo. Termina riepilogando i risultati delle misure eseguite dal 1924 al 1933.

**Banachiewicz Tad** - Sur un problème de géophysique [*De problemate geophysico*]. Acad. Polon. Sc., et Lettres, C. R. mens. Cl. Sc. Math. et Nat., 9, 3. Cracovie (1933). **a - 96**

L'A. traite du problème de la détermination de l'altitude H au zénith du point éclairé par les rayons rasants du Soleil. On suppose nuls le diamètre du Soleil et la réfraction, mais on tient compte de l'aplatissement de la Terre. Après avoir déduit l'expression exacte de H, l'A. en tire l'expression approchée, exacte aux termes négligeables de l'ordre de $Hc^2$, $H = H_0 (1 + K)$, où $H_0$ est l'altitude H calculée pour la terre sphérique, et K signifie une petite quantité, mise en tables par l'A., et qui dépasse rarement 1/500 dans les latitudes moyennes. D'autre part $H_0 = \sec h - 1$ peut être obtenue à l'aide des tables connues des hauteurs du Soleil. Pour résoudre commodément le problème posé, on n'a donc pas besoin des tables étendues particulières, comme celles p. ex. qui ont été projetées par M. Jean Lugeon. (Org. Météorol. Int., 10, p. 253). (Aut.).

**Beams J. W.** - Measuring a Millionth of a Second [*De milionesima parte secundi temporis dimensa*]. Scient. Monthly. Lancaster (1934). **a - 97**

The author outlines two of the numerous methods used by the physicist for observing things that happen in extremely short times. The argument may interest the naval astronomer.

**Bonamico Giulio** - Cenni sommari sulla navigazione costiera [*De navigatione geodetica*] (III Corso Magistrale marittimo peschereccio), 20 pp., Ist. Poligr. dello Stato - Libreria Edit. Roma (1934). **a - 98**

**Brown (Edit.)** - Nautical Almanac [*Ephemeris nautica*]. many figs., tabl., 739 pp., Brown, Son & Ferguson. Glasgow (1934). **a - 99**

The well known almanac of Brown contains a great deal of information useful, or better, necessary to navigators.

**Buchanan Wollaston H. J.** - On Methods for Fitting Curves to Observations, with Details of Some New Methods [*De methodibus quibus utendum est ut curvæ cum observationibus coincidant. Adiunguntur res particulares de novis quibusdam rationibus*]. 4 tabl., James Johnstone Mem. Vol., 324-339. Liverpool (1934). **a - 100**

The author considers the following mathematical methods for fitting equations to data : the Method of Least Squares, the Methods of Lowest Mean Ratio. He shows where the new Methods of Lowest Mean Ratio fit in with other least squares methods and gives a guide as to the kind of cases where different methods of fitting curves can be most usefully employed.

**Buda V.** - Nuove tavole di distanze marine [*Novae tabulæ distantiarum marinarum*]. Tip. Elzeviriana. Genova (1933). **a - 101**

Ogni tavola ha l'intestazione redatta in 5 lingue. La consultazione è facile e pratica.

**Calichiopulo Antonio** - Qualche considerazione sulla precisione dei telemetri monostatici [*De telemetris monostaticis. Considerationes de eorum præcisione*]. Suppl. Tecn. Riv. Art. e Genio, 1, 57-96. Roma (1934). **a - 102**

L'A. essenzialmente tratta del confronto tra i monostatici a coincidenza e quelli stereoscopici, interpretando alcuni risultati di esperienze condotte con diligenza e rigore dal Comand. Montauti della R. Marina, e pubblicate sulla *Rivista Marittima*. Prende anche occasione, qua e là, per toccare alcuni punti della teoria degli errori che dànno spesso luogo a poco rigorose considerazioni. Addentrandosi nell'analisi delle esperienze del comand. Montauti e del Gramont, per condizioni poco favorevoli di luce, ricava dati oggettivi tutti favorevoli al monostatico stereoscopico, registrandoli in sei specchi numerici. Per ultimo l'A. tratta delle esperienze di controllo mettendo in evidenza inesattezze e qualche esagerazione teorica ingiustificata.

**Camperio F.** - Lo stabilizzatore Sperry [*De apparatu pro navium stabilitate* Sperry]. Arti Grafiche Bertarelli. Milano (1934). **a - 103**

**Celli Vincenzo** - Lezione di attrezzatura navale [*De navibus instruendis*]. (III Corso Magistrale marittimo peschereccio). 4 fig., 14 pp., Soc. Tip. A. Manuzio, Ist. Poligr. dello Stato - Libreria. Roma (1933). **a - 104**

**Chambers B. M.** - Infinite Inexactitude of Longitude in 1622 [*De infinitis erroribus in longitudine determinanda, a. 1622*]. Mar. Mirr., XX, 3, 376-378. London (1934). **a - 105**

Answer to an article of Prof. Taylor, published in the April N° of Mar. Mirr., which criticises the author's statement « that longitudes (in the early seventeenth century) were capable of almost infinite inexactitude «, showing the existence of many errors (in 1622) after years of experimental traverses.

**Chave Benjamin** - Radio Direction Finder [*Radiogoniometrum*]. 2 figs., Mar. Obs., XI, 113, 12-13. London (1934). **a - 106**

On an instrument designed by The Radiomarine Corporation of America for operation on the bridge by the Navigator, which is independent of the ship's Wireless outfit and the wireless operators. Bearings may be taken without interfering with other radio traffic and without delay.

**Chung-Chi Wang** - La navigation du Yangtseu [*De navigatione per flumen* Y.]. 53 fig. et cartes, 315 pp., Thèse Fac. Lettres, Les Presses Modernes. Paris (1932). **a - 107**

**Conrad Fr.** - Astronomische Ortsbestimmung und Kimmtiefenmessung auf See [*Astronomicæ observationes et mensuræ depressionis horizontis in mari*]. 9 Taf., 110 pp., E. S. Mittler & Sohn. Berlin (1933). **a - 108**

**Crone Ernst** - Le Flambeau Reluisant, Vertaling van Gietermaker's Vergulden Licht der Zeevart [*De vetere manuale navigationis*]. 1 Taf., pl. h. t., Vereen. Nederl. Hist. Scheepv. Mus. te Amsterdam Jaarversl. 1931 en 1932, 81-85. Amsterdam (1933). **a - 109**

Récension d'un manuel de navigation du 17-e siècle qui fut longtemps le manuel principal pour ceux qui devaient passer l'examen de maître de navire. L'A. cite deux autres oeuvres traduites du flamand en français en 1667, qui, selon son avis, sont des versions du manuel de Gietermaker.

**De Haan J.** - Correction of Radio Bearings [*Correctio in relevamentis goniometricis*]. Naut. Mag., n° Apr., 382. Glasgow (1933).

(—) See also: Intern. Hydrogr. Bull., 5, 98, 1933. Monaco (1933). **a - 110**

Reproduction of a diagram constructed by author in order to obtain, by eye, the correction to apply to a radio-bearing in order to get the mercatorian bearing. It is based on the following formula: Correction = Half diff. Long. × Sin. Mid. Lat.

**Downes O. L.** - Anchoring Diagrams [*Diagrammata ad ancoras ponendas*]. 4 figs. on tabl., U. S. Nav. Inst. Proc., LX, 371, 73-74. Annapolis, Md. (1934). **a - 111**

On the solution of the problem of anchoring in a designed spot. Four anchoring diagrams are given here on table, developed on board the U. S. S. Lexington for the use of that vessel. The problem is the establishing of the position of the ship by three cross-bearings. This is effected by stretching three strings from fixed objects at known measured angles of corresponding arcs and observing where the intersection of strings on the anchorage chart takes place.

**Duest C. S.** - The Diurnal Variation of Wind at Sea during the South West Monsoon [*Diurna variatio venti marini dum halitat ventus Indicus* S. W.]. 1 diagr., Mar. Obs., XI, 115, 104. London (1934). **a - 112**

**Estrada R.** - De la navigación astronomica [*De navigatione astronomica*]. Rev. Gen. de Marina, Agosto. Madrid (1934). **a - 113**

**Eversmann Th.** - Längenmessungen mit optisches Hilfsmitteln unter Tage [*Mensuræ distantiæ opticis instrumentis*]. 2 Abb., 5 Taf., Ztschr. f. Instrumentenkunde, 10. Okt., 350-365. Berlin (1934). **a - 114**

**Fanselau G.** - Der Doppelkompass als magnetisches Universalinstrument [*Duplex bussola magneticum universale instrumentum*]. Veröff. Met. Instr., 395, 132-136. Berlin (1933). **a - 115**

**Farwell Raymond F.** - The Law in Fog [*Regulamenta navigationis tempore caliginoso*]. U. S. Nav. Inst. Proc., LX, 376, 784-795. Annapolis, Md. (1934). **a - 116**

Discussion on general rules in navigation with fog. The A. concludes with Dr. Lushington, Admiralty jurist of England, that the duty of every master of a ship, whether in intense fog or great darkness, is to exercise the utmost vigilance and to put his vessel under command, so as to secure the best chance of avoiding all accidents, even though such precautions may occasion some delay in the persecution of the voyage. (See: discussion in the same number p. 833).

**Fraser R. J. & Smith Goulding F. C.** - Aides pour la navigation sur la route de la Baie d'Hudson [*Subsidia ferenda navigatoribus praeter cursum ad bajam* Hudson]. Rev. Hydrogr., XI, 1, 115-117. Monaco (Princ.) (1934). **a - 117**

Extrait d'un article publié dans « The Canadian Surveyor », p. 3, Juillet 1933. Ottawa.

**Gatch T. L.** - A Neglected Navigational Short Cut. [*De quodam brevi navigationis problemate neglecto*]. U. S. Nav. Inst. Proc., LX, 374, 532. Annapolis, Md. (1934). **a - 118**

The Author draws the attention to the simplicity and shortness of calculations for observations of bodies on the prime vertical. See discussion by Commander J. R. Oldendorf in the same number p. 545.

**Ghernet E. S.** - Cartes de navigation maritime et aérienne, avec coordonnées supplémentaires [*Tabulæ navigationis maritimæ et aëriæ, cum coordinatis supplementaribus*]. (En russe). 4 fig., 6 schémas, 1 carte, Zap. Idrogr., 5, 25-43. Leningrad (1933). **a - 119**

L'A. met en évidence sur la base d'exemples pratiques la nécessité d'une élaboration de cartes spéciales de navigation pour les régions polaires.

**Giliberto O.** - Una nuova formola per la Correzione di Givry [*Nova formula pro* Givry *correctione*]. 11 pp., Litogr., Camogli (1934). **a - 120**

L'A. consiglia per la correzione di Givry finora espressa dalla formola:

$$\gamma = \frac{\Delta\lambda}{2} \operatorname{seu} \varphi_m$$

un'altra:

$$\gamma = \frac{\Delta\lambda}{2} \operatorname{seu} \varphi$$

ove $\varphi$ è la latitudine del punto per cui viene richiesto il valore di $\gamma$. Egli ne dimostra i vantaggi di precisione.

Questa, del resto, è la espressione originale data dal Givry. (N. d. R.).

**Hawks Ellison** - The Starry Heavens [*Coelum sidereum*]. 154 pp., T. C. & E. C. Jack, Ltd. London (1934). **a - 121**

**Hennessy J.** - The Route from the Cape of Good Hope to Australia [*Cursus maritimus ad promunturium Bonæ Spei*]. Mar. Obs., XI, 115, 146-150. London (1934). **a - 122**

Some information on the choice of the route. Maury's recommended route. The clippers. The first steamers. The records. Influence of the gold. Meteorological and oceanographical conditions of south seas. Great circle routes.

**Hopkins H. V.** - New Uses for Martelli's Tables [*Ratio nova tabularum* Martelli]. U. S. Nav. Inst. Proc., LX, 375, 651-654. Annapolis, Md. (1934). **a - 123**

By making slight modifications of these well known tables and on hand of many examples the A. shows new methods of employing them for computing altitude, time and altitude azimuth, amplitude, great circle course and distance, identifying unknown stars and finding the local hour angle.

**Hormazábal Manuel** - Tabla de Logaritmos a cinco decimales [*Tabula logarithmorum quinque notis decimalibus*]. Memorial Técnico (Ejercito de Chile), 969-970. Santiago de Chile (1934). **a - 124**

Volumen de 212 páginas. El autor ha trazado, clasificandolas en orden excelente y en diferentes colores 6 Tablas que son de uso constante. En un capitulo « Explicaciones » figura una serie de problemas de uso corriente.

**Hubbard L. S.** - Réfraction observée sur le Georges Bank en 1931 [*De refractione observata apud banchum* Georges *a. 1931*]. Rev. Hydrogr., XI, 1, 118-119. Monaco (Princ.) (1934). **a - 125**

Extrait du « Bulletin of the Association of Field Engineers », U. S. Coast & Geodetic Survey, nº 5, p. 58, 1932. Compte rendu des observations faites sur le Georges Bank pour déterminer l'influence que pouvait avoir sur la réfraction la différence entre la température de l'eau de surface et celle de l'air à l'emplacement de l'observateur. Instruments employés, méthode d'observations. Résultats. Conclusions : Cause de l'insuffisance des résultats obtenus.

**Immler W.** - Beobachtungen mit Libellensextanten im Flugzeug [*Observationes in aëroplano per sextantem libella præditum*]. 1 Tab., 1 Taf. a T., Ann. d. Hydrogr., LXII, 4, 165-167. Berlin (1934). **a - 126**

Notwendigkeit eines künstlichen Horizontes für Beobachtung an Bord der Flugzeuge, wo der natürliche Horizont versagt. Dieser künstliche Horizont, der mindestens für die Zeitdauer der Beobachtungen die Horizontale zu garantieren hat, muss für diese Dauer präzessions- und schwingungslos sein.

**Keeton H.** - Fog [*De caligine*]. 3 figs., tabl., Mar. Obs., XI, 114, 62-65. London (1934). **a - 127**

Formation of fog. Theoretical explanation. Practical prediction. Tables for finding the relative humidity and the dew point.

**Kent M. C.** - Calling Your Shots of Sun and Stars [*De identificatione stellarum*]. 1 fig., U. S. Nav. Inst. Proc., LX, 372, 246-247. Annapolis, Md. (1934). **a - 128**

Discussion on a paper by Lieutn. Davis on page 1463, October 1933. The author takes the opportunity to give some general rules on the best choice of stars for observation.

**Kwasan Observatory (Zodiacal Light Section)** - Preliminary Report of Zodiacal Light Observations for the Second International Polar Year [*Relatio prior observationum lucis zodiacalis secundo anno polari*]. Kwasan Bull. 265. Kwasan, Japan (1933). **a - 129**

Summary of results : number of observers, total numbers of observations. Conclusions : 1) confirmation of the pulsations of brightness and variations of forms of zodiacal lights ; 2) correlation between rain, brightness of zodiacal lights and dryness of atmosphere ; 3) study of the zodiacal band ; composition of zodiacal light ; 4) small areas of luminous matter about the zodiac ; correlation with the Milky Way ; 5) faint bands in the northern sky ; their apparent relationship with permanent aurora ; 6) annual variations of forms of Gegenschein. (s. also : Jap. Journ. Astr. & Geoph., XI, 3, abstr. 102, 36 by Yamamoto, Tokyo 1934).

**La Porte Florian** - Sur l'emploi des relèvements radiogoniométriques à grande distance [*De relevamentis radiogoniometricis perlongis distantiis*]. C. R. Acad. Sc., XIIC, 5, 447-449. Paris (1934). **a - 130**

Une méthode s'appliquant à tous les cas, avec de calculs assez simples. L'auteur cherche en quel point l'arc du grand cercle correspondant à l'azimut mésuré rencontre un parallèle de latitude déterminée celle du point estimé. Il considère aussi le cas où le même grand cercle rencontre le méridien du point estimé.

**Lecocq G.** - Le Segment capable sphérique [*De segmento sphærico capace*]. ill., 16 pp., Imprim. Nationale. Paris (1933). **a - 131**

**Lippman (von) Edmund O.** - Geschichte der Magnetnadel bis zur Erfindung des Kompasses (gegen 1300) [*Historia acus magnetici usque ad inventionem buxidæ* (*circa a. 1300*)]. Quellen und Studien zur Geschichte der Naturwiss. und der Medizin, III, 1, 49. Berlin (1932). **a - 132**

Einleitung. China. Indien. Klassisches Altertum. Araber. Europa (unter Ausschluss des hohen Nordens). Der Name der Magnetnadel. Der europäische Norden. Zusammenfassung. Nachträge. Namen- und Sachenverzeichnis.

**Markin N.** - Application du Réseau goniométrique dans la Navigation [*Retia goniometrica ad navigationem applicata*]. Zap. po Gidrogr., 1, 11-14. Leningrad (1933). **a - 133**

**Mason A. William** - Page Captain Lecky [*In memoriam navarcæ* Lecky]. U. S. Nav. Inst. Proc., LX, 376, 754-760. Annapolis (1934). **a - 134**

Statistical note on the progress of the new methods of navigation in U. S. Navy from which it is seen that the majority of the officers (54 %) are still using the obsolete chronometer on time-sight in their daily work.

**Mateos J.** - Método rápido y fácil para calcular y dibujar una proyección de la esfera celeste sobre el horizonte [*Problemata cartographica*]. Mem. y Rev. Soc. Cient. « Antonio Alzate », LXI, 3/10. Mexico (1929-1930). **a - 135**

**Meier H.** - Ueber Normung von Kompassrosen [*De standardisatione quadrantis buxidæ*]. 4 Tab., Ann. d. Hydrogr., LX, 12, 483-486. Berlin (1932). **a - 136**

Ergebnisse von etwa 1000 in Bezug auf die magnetischen und mechanischen Eigenschaften der Kompassrosen angestellten Beobachtungen, um grössere Gleichartigkeit in der Herstellung gewinnen zu können.

**Métral A.** - Sur la précession dans le phénomène gyroscopique [*De præcessione in phæno-*

*meno gyroscopico*]. C. R. Acad. Sc., CIIIC, 25, 1582-1584. Paris (1934). **a - 137**

Démonstration simple du résultat auquel arrivent Halphen, à l'aide des fonctions elliptiques et Hadamard, par la voie des imaginaires sur la rotation précessionelle et sur son signe. L'A. reste dans le domaine réel et s'inspire de la démonstration de Puiseux relative au pendule sphérique.

**Michler Herbert** - Der Sphärant, ein Instrument zur direkten Beobachtung von Stundenwinkel oder Breite [Sphaerant, *instrumentum ad observationes directas anguli horarii et latitudinis peragendas*]. 2 Abb., 1 Taf. a T., Ann. d. Hydrogr., LXII, 1, 26-30. Berlin (1934). **a - 138**

Ausführlicher und ergänzender Bericht zu den Ausführungen von H. B. Kaster in « The Hydrographic Review », VIII, 2, über ein Instrument, das die direkte Beobachtung von Stundenwinkel oder Breite gestattet. Das Instrument — Sphärant genannt — scheint geeignet zu sein, eine völlige Umwälzung in der Methode der astronomischen Ortung herbeizuführen. Instrumentelle Einrichtung, Beobachtungsmethode und Handhabung des neuen Instruments, auf die in Deutschland gebräuchlichen Begriffe und Formen umgestellt.

**Michler Herbert** - Kimmtiefenmessungen auf D. « Arucas » im Mai 1933 [*Mensuræ depressionis horizontis a navi* Arucas (*a. 1933*) *perfectæ*]. 3 Tab., 1 Taf. a. T., Ann. d. Hydrogr., LXII, 5, 208-214. Berlin (1934). **a - 139**

Ergebnisse der auf Veranlassung der Marineleitung vom Vf. auf einer Reise nach den Kanarischen Inseln ausgeführten Kimmtiefmessungen, die einmal zu Vergleichszwecken für Beobachtungen mit dem Libellensextanten dienten.

**Moutt Luis** - Algunas aplicaciones prácticas de interpolación [*De interpolatione*]. tablas, Memorial Tecnico (Ejército de Chile), 941-955. Santiago de Chile (1934). **a - 140**

Analisis para deducir las fórmulas de interpolación mas necesarias y importantes. Continuarà.

**Mori-Ubaldini** - Un nuovo metodo per il tracciamento della Retta d'Azimut [*De recta azimuthali*]. Ann. Ist. Sup. Nav., II, 2, Napoli (1933). **a - 141**

L'A., premessi alcuni cenni storici sull'argomento, considera un metodo di tracciamento prendendo come punto determinativo il punto d'incontro dell'azimut stimato con la curva d'azimut relativa all'osservazione.

**Musella P.** - La condotta della navigazione nelle tempeste [*De navigatione per tempestates*] (III Corso Magistrale marittimo peschereccio). 3 fig., 15 pp., Soc. Tip. A. Manuzio. Ist. Poligr. dello Stato - Libreria. Roma (1933). **a - 142**

**Musella Pietro** - Autocalcolatore Musella [*Apparatus autocalculator* Musella]. 2 fig., Filotecnica, 6, 278-280. Milano (1933). **a - 143**

È noto che i calcoli di navigazione stimata e costiera consistono nella soluzione degli elementi di triangoli piani rettangoli, le cui operazioni richiedono l'uso dei logaritmi e delle speciali tavole nautiche del punto. L'A., descritto lo strumento che risolve meccanicamente tutti questi problemi, illustra alcuni esempi di calcoli tipici che si possono prontamente risolvere per suo mezzo.

**Nakano Saburo** - Report of the Observations with the Meridian Cycle at The Tokyo Astronomical Observatory [*Observationes in cyclum meridianum in Observatorio astronomico in* Tokyo]. (In Jap.). Astr. Obs. Rep., 1, 69-78. Mem. Astr. Soc. Jap., 2, 79-88. Tokyo (1933). **a - 144**

Preliminary observations with the meridian cycle (3 m focal length and 205 mm. aperture) in December 1932. Twenty-two fundamental stars and the planets, Mars, Jupiter, and Neptune, have been observed during this time. The results compared with the Ephemerides prove to be satisfactory. (K. H., Jap. Journ. Astr. & Geoph., XI, 3, abstr., 29, Tokyo 1934).

**Nowak K.** - Himmels- Atlas in 9 Kartenblättern für den Bereich von Nordpol bis + 20° Deklination [*Coeli atlas. Declinationes + 20° ad + 90°*]. 9 pl., Dümmler Ferdinand. Berlin (1934). **a - 145**

**Parker Ralph C.** - Evaluating a Series of Bearings [*Examen cuiusdam seriei relevamentorum*]. U. S. Nav. Inst. Proc., LX, 371, 79. Annapolis, Md. (1934). **a - 146**

The Author advises to take as many radio bearings as practicable when in thick weather and to conclude from the evidence of several rather than on that of only two of them. He tries to solve the problem : How to evaluate this evidence ?

**Perlewitz Paul** - Zwei wissenschaftliche Ballonfahrten von Hamburg 1933/34 mit meteorologischen und bakteriologischen Untersuchungen, Versuchen mit einem neuen Kompass, Bestimmungen der Grösse der Wolkenelemente und kalorimetrischen Feuchtigkeitsmessungen [*Observationes meteorologicæ et bacteriologicæ in sphærico apud* Hamburg. *Experimentum buxidæ novæ etc.*]. 2 Abb., 2 Tab., Ann. d. Hydrogr., LXII, 9, 383-391. Berlin (1934). **a - 147**

Bericht über die zwei am 9. März 1933 und am 28. Februar 1934 unternommenen Ballonfahrten mit besonderer Berücksichtigung der Ergebnisse der meteorologischen Beobachtungen, der bakteriologischen und kolloidchemischen Luftuntersuchungen und kalorimetrischen Feuchtigkeitsbestimmungen, welche im Laufe der Fahrten ausgeführt worden sind. Ausserdem ist die Brauchbarkeit einer neuen Methode zur Messung der Grösse der Wolkenelemente in der Höhe nachgewiesen worden. Erprobung eines Luftfahrzeugkompasses, der gute Resultate gegeben hat.

**Pinto J. Carlos** - The « Simplex » Navigation & Avigation Tables [*Tabulæ navigationis maritimæ et aëriæ* Simplex *nomine*]. xxxii + 376, Oficina de Artes Graficas Fayal. Açores (1933). **a - 148**

These tables are the daughters of « Modern Navigation Tables » of the present author and Newton. They belong to the kind of tables with *assumed position*, but in these the assumed coordinates are near to the dead reckoning at a distance less than 15 miles. There are numerous auxiliary tables.

**Prato V.** - A proposito della determinazione automatica degli elementi della navigazione [*De elementis navigationis per instrumenta gyroscopica deductis*]. 2 fig., Riv. Maritt., Anno LXVII, 3, 289-292. Roma (1934). **a - 149**

L'A. ribatte alcune osservazioni fattegli a riguardo del suo lavoro, in proposito, del fascicolo di febbraio 1933.

**Puppo Agostino** - Un interessante procedimento grafico per il calcolo dell'altezza del Sole [*Graphica ratio ad agendum calculum altitudinis Solis*]. 1 fig., Meteor. pratica, 3, 137-142. Perugia (1933). **a - 150**

L'A. espone un metodo di determinazione grafica dell'altezza del sole sull'orizzonte a un istante qualsiasi, metodo dovuto al dott. K. Schütte. Dà le istruzioni e le costanti per la costruzione dell'abaco relativo, il quale può essere rapidamente tracciato ove si disponga di carta a graduazione sinusoidale. L'abaco può anche servire, con qualche variante nell'orditura della carta, per il rapido apprezzamento della durata del crepuscolo civile ed astronomico.

**Razikotsicas** - Astronomikai Ephemerides [*Ephemeris nautica*]. Ephém. & tabl., Service Hydrogr. Marine Hellénique. Athènes (1932). **a - 151**

La présente publication conserve sensiblement la même disposition que les années précédentes pour les diverses éphémérides et tableaux. A sa fin se trouve une liste des cartes et ouvrages publiés par le Service Hydrographique Hellénique.

**Repsold A. & Freiesleben H. C.** - Astronomische Ephemeriden für die Luftfahrt für das Jahr 1934 [*Ephemeris astronomica ad navigationem aëriam ducendam a. 1934*]. Ann. d. Hydrogr., LXII, 3, 109-111. Berlin (1934). **a - 152**

Bericht über ein aeronautisches Jahrbuch, welches unter dem Titel « Astronomische Ephemeriden für die Luftfahrt für das Jahr 1934 » von der Deutschen Seewarte Ende Februar 1934 herausgegeben worden ist und das für die Monate März bis Dezember 1934 Ephemeriden für die Sonne, den Mond, die Planeten Venus, Mars, Jupiter und Saturn und für 40 Fixsterne enthält. Ausserdem gibt es auch Hilfstafeln (zur Höhenbeschickung) und Tafeln für Sonnen, Mondaufgänge und Untergänge und Dauer der Dämmerung.

**Risson M. E.** - Glorious Stars [*Stellæ splendentes*]. 80 pp., Putnam & Co., Ltd. New York & London (1934). **a - 153**

**Ruggiero Raffaele** - Rette d'azimut [*Recta azymuthalis*]. 3 fig., Ann. R. Ist. Sup. Nav., II, 1, 134-148. Napoli (1933). **a - 154**

L'A. accennato brevemente ai metodi di tracciamento della retta d'azimut, tratta della teoria degli errori di queste rette, limitandosi alla determinazione del punto con due o tre rette d'azimut e alla dimostrazione delle proprietà della diagonale d'azimut.

**Scott K. L.** - Magnet Steels and Permanent Magnets [*Aciarum magneticum et magnetes stabiles*]. Electr. Eng., LI, 5, 320-323. New York N. Y. (1932). **a - 155**

**Simeon Giuseppe** - Trattato di Navigazione aerea. Parte Prima: Navigazione aerea piana [*Manuale pro navigatione aëria plana*]. 210 fig., 431 pp., Editrice « Moderna ». Napoli (1934). **a - 156**

Benchè destinato ai navigatori dell'aria, questo trattato contiene molte notizie, specialmente di carattere descrittivo di strumenti, utili al navigante di superficie. È aggiornato agli ultimi trovati della scienza e dell'industria.

**Sollenberger Paul** - Recent Expansion and Developments in the Time-service of the United States Naval Observatory [*De servitio horario Observatorii Navalis ad Americæ Prov. Fed. pertinentis. Questio de diffusione et progressu*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 52-54. Washington, D. C. (1933). **a - 157**

Improvement of the equipment of the time service after the increase of the number of daily time-signals to six or seven. The principal units of the equipment. Possibilities of further development of the Service.

**Sottas Jules** - L'astrolabe plan équinoxial [*Astrolabium planum æquinoxiale*]. 6 fig., Bull. Soc. Océanogr. de France, a. XIV, 79, 1377-1383. Paris (1934). **a - 158**

Histoire de l'astrolabe dès l'antiquité au XIX siècle. Construction de l'instrument, du plateau fixe et du disque mobile. L'araignée de l'astrolabe. La mère, dessins et graphiques de la face et du dos de la mère. La suspension. L'astrolabe nautique. Un astrolabe arabe. L'astrologie qui a donné lieu à l'astronomie.

**Steinert Hermann** - Der nördliche Seeweg Kanadas [*Cursus maritimus ad nordicas regiones Canadenses*]. Geogr. Ztg., XXXVIII, 30-32. Leipzig (1932). **a - 159**

**Tenani M.** - Sui principi costruttivi delle bussole magnetiche [*De constructione buxidarum magneticarum*]. Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis., Mat. e Nat., XVII, 8, 641-644. Roma (1933). **a - 160**

Si espongono le condizioni da soddisfare affinchè l'equipaggio mobile della bussola a liquido sia sottratto all'effetto perturbatore delle vibrazioni ed i risultati conseguiti con la loro applicazione a bussole marine ed aeree.

**Thellier E.** - Aimantation permanente des terres cuites [*De magnetisatione permanenti concoctarum terrarum*]. C. R. Acad. Sc., CIIIC, 23, 1399-1401. Paris (1934). **a - 161**

Les terres cuites (briques, poteries) dont le refroidissement a eu lieu dans un champ magnétique constant sont aimantées. Rappeler ce phénomène pour les matériales qui peuvent être près du compas.

**Thomas H.** - Nomogramme zur Bestimmung der Sonnenhöhe bei beliebiger geographischer Breite sowie der Aequivalent-temperatur und spezifischen Feuchtigkeit [*Nomogrammata ad calculum determinandum altitudinis solaris, temperaturæ æquivalentis et humiditatis specificæ*]. 8 Abb., 2 Tab., Meteorol. Ztschr., L, 10, 369-374. Braunschweig (1933). **a - 162**

Drei Nomogramme mit allgemein graphischen Lösungen der Gleichung $\sin h = \sin \varphi \sin \delta + \cos \varphi \cos \delta \cos t$. Anweisung zum praktischen Gebrauch. Tabellen zur Anlegung der Nomogramme für die Sonnenhöhe $h$ und für $\Delta t$ und $q$. (Vgl. Schütte und Awerkiew Meteorol. Ztschr.).

**Thorlen R.** - La fotografia infrarossa come mezzo di esplorazione [*De photographia infrarubra ac instrumentum explorationis*]. Tidskr. i. Sjöväsendet, Maggio. Stockholm (1933). **a - 163**

Articolo di attualità riguardante gli ultimi risultati conseguiti con la fotografia infrarossa a grande distanza mediante lastre molto sensibili. Fotografia con l'infrarosso degli aerei. Apparecchi fotografici delle navi. Materiale e personale necessari.

**Tosi A.** - Metodo grafico per il riconoscimento di un astro e risoluzione grafica di altri problemi di navigazione [*Ratio graphica pro agnitione cuiusdam astri ac resolutio graphica aliarum quæstionum ad navigationem pertinentium*]. 7 fig., Riv. Maritt., 6, 181-191. Roma (1933). **a - 164**

L'A. descrive una semplice costruzione grafica per il riconoscimento di un astro, la quale risponde alle seguenti caratteristiche: 1) È di uso generale, senza alcun limite di latitudine o di altezza; 2) Il metodo non richiede alcuna preparazione analitica; 3) I dati, la cui conoscenza è necessaria per il riconoscimento dell'astro, sono: la latitudine dell'osservatore; l'altezza dell'astro; il suo rilevamento alla bussola, da cui si passa all'angolo azimutale. L'A. illustra poi la risoluzione grafica di alcuni problemi correnti di navigazione, con costruzioni analoghe a quella su indicata.

**Tuzi Konozuke** - Observations of the Moon's Right Ascension with a Small Meridian Transit [*Observationes ascensionis rectæ Lunæ per parvum instrumentum transitus stellarum registrantem*]. (In Jap.). Tokyo Astr. Lab. Rep., 1, 79-90; Mem. Astr. Soc. Jap., 2, 89-100. Tokyo (1933). **a - 165**

Bamberg's 90 mm meridian transit was used by the author for the observations at Mitaka in 1932. Total number of

observations has been 62. The method of observations and reductions is described in the paper, and the discussions of the results are given. Compared with the ephemeris, a systematic error of the limb-bisection of about 0.4 is pointed out. (K. H., Jap. Journ. Astr. & Geoph., Abstr., XI, 3, 29. Tokyo 1934).

**Vaidge B. K.** - Reference Chart for the Apparent Motion of the Sun, Moon and Planets [*Tabula motus apparentis Solis, Lunæ, Planetarum*]. 1 fig., Nature, CXXXIII, 3349, 33. London (1934). **a - 166**

These apparent motions can be represented by plotting on a single sheet of paper the right ascension of these bodies corresponding with each day of the year. A figure shows such a chart for the year 1934.

**Verstelle J. Th.** - Méthode pour porter graphiquement le point au lieu d'utiliser le stigmographe [*Graphica ratio ad punctum navis determinandum sine statiographo*]. 6 fig., Rev. Hydrogr., XI, 1, 160-162. Monaco (1934). **a - 167**

Cas particuliers sur la méthode pour faire la construction graphique en utilisant un rapporteur transparent, divisé en degrés et en demi-degrés.

**Weems P. V. H.** - Speaking of Horizons [*De refractione*]. 2 figs., U. S. Nav. Inst. Proc., LX, 372, 202-204. Annapolis, Md. (1934). **a - 168**

Comparison of observations taken on true and false horizons. Examples.

**Wells F. H.** - The Chinese Mariners' Compass, Charts, and Methods of Navigation [*Buxidæ, tabulæ nauticæ et rationes navigandi apud Sinenses*]. U. S. Nav. Inst. Proc., March. Washington (1934). **a - 169**

Some interesting details concerning the compasses used on board Chinese junks, the origin of compass in China, and the methods of navigation, chiefly empiric, followed by the pilots of the junks.

---

**Accademia (R.) Navale** - Indicatore automatico di rotta [*Automaticus indicator cursus maritimi*]. 4 fig., 2 tav., 4 pp., Tip. SIAG (Stab. Italiani Arti Grafiche). Genova (1933). **a - 170**

In questo indicatore gli elementi di moto e di posizione vengono sempre riferiti ad un sistema di assi aventi l'origine coincidente con la posizione della propria nave, mentre risultano orientati in modo fisso nel piano orizzontale. Ne è descritto il funzionamento nel caso particolare in cui si desideri: « Portare la propria nave a una prefissata distanza dal bersaglio in modo che lanciando, l'angolo d'impatto abbia un valore prestabilito ».

**Bureau des Longitudes** - Annuaire pour l'an 1933 [*Annuarium a. 1933*]. viii + 706 + A 91 + B 78 + C 20 + D 7 + E 70. Gauthier-Villars et C.ie. Paris (1932). **a - 171**

**Bureau des Longitudes** - Annuaire pour l'an 1934, publié par... Avec des notices scientifiques [*Annuarium a. 1934*]. pl. et cartes h. t., 480 pp., Gauthier-Villars. Paris (1933). **a - 172**

**Deutscher Flotten-Verein (Herausg.)** - Deutsche Seefahrt [*Navigatio apud litora Germanica*]. Julius Beltz. Langensalza-Berlin-Leipzig (1933). **a - 173**

Taschenbuch für die deutsche Jugend.

**Deutsche Seewarte** - Nautisches Jahrbuch oder Ephemeriden und Tafeln für das Jahr 1934 [*Ephemeris nautica et tabulæ a. 1934*]. Deutsche Seewarte. Hamburg (1933). **a - 174**

Die Ausgabe des « Nautischen Jahrbuches » für das Jahr 1934 mit dessen Veröffentlichung die Deutsche Seewarte beauftragt worden ist, ist im März 1933 erschienen, und die Ausgabe für 1935 wird im März 1934 veröffentlicht werden. Die Daten über die Gezeiten, welche früher im « Nautischen Jahrbuch » erschienen, werden unter dem Titel « Gezeitentafeln » von der Deutschen Seewarte veröffentlicht werden.

**Hydrographic Department Tokyo** - Nomograms for Use in Navigation [*Nomogrammata navigationis*]. Publ. N° 227, Hydrogr. Dpt. Tokyo (1933). **a - 175**

**Istituto Idrografico della R. Marina** - Effemeridi Astronomiche ad uso dei naviganti per l'anno 1934 [*Ephemeris nautica a. 1934*]. 11 fig., tav. 217 pp., Ist. Idr., Genova (1933). **a - 176**

Il formato di questa nuova edizione delle « Effemeridi » è stato riportato al formato standard adottato recentemente per tutte le pubblicazioni nautiche dell'Istituto Idrografico della R. Marina e le tavole per la correzione delle altezze sono state estese fino all'elevazione dell'occhio dell'osservatore a 30 m. Il lavoro si chiude con un elenco dei segnali marconigrafici orari nel mondo intero.

**Istituto Idrografico della R. Marina** - Radioservizi per la navigazione. Vol. I. Stazioni radiogonometriche, radiofari, segnali orari e avvisi R. T. ai naviganti [*Radiogoniometricæ stationes, radiophari, signalia horaria et normæ pro navigantibus*]. (Aggiornato al 1° gennaio 1934 - A. XII) 12 fig., 2 carte f. t., viii + 196 pp., II, Tip. Ist. Idrogr. della R. Marina, Genova (1934). **a - 177**

La pubblicazione consta di due volumi. Il primo contiene gli elenchi delle stazioni radiogoniometriche, dei radiofari, dei segnali orari r. t. e delle stazioni di emissione degli avvisi urgenti ai naviganti.

**Ministero dell'Aeronautica - Direzione Superiore degli Studi ed esperienze** - Istruzione sull'apparato per il controllo delle bussole magnetiche [*Præcepta circa apparatus ad buxidas magneticas inspiciendas*]. 11 fig. f. t., 16 pp., Ist. Poligr. dello Stato. Roma (1934). **a - 178**

**Observatorio Astronomico de Madrid** - Anuario del... para 1934 [*Annuarium a. 1934*]. 374 pp., Talleres del Instituto Geográfico y Catastral. Madrid (1933). **a - 179**

La lista de estrellas facilita la preparación de la observaciones con el Astrolabio de prisma. El secundo trabajo special de este año se refiere al magnetismo terrestre y a datos de la declinación de España.

**Polske Hydrograficne Burze** - Tablice Nawigacyjne [*Tabulæ navigationis*]. 220 pp., Inst. Wydawniczy Panzt-Skoly Morskiej. Gdynia (1933). **a - 180**

Divisées en cinque parties: Généralités (Tables de logarithmes et trigonométriques); Astronomie; Navigation; Divers; Supplément (Contenant les tables Dreisonstok).

**United States Hydrographic Office** (origin. by Nathaniel Bowditch). - American Practical Navigator. An Epitome of Navigation and Nautical Astronomy. N° 9. Part I & II. [*Manuale* *artis navigandi*]. 86 figs., numer. tables, U. S. Govmt. Print. Off., 852 pp. Washington (1933). **a - 181**

Part I: Abbreviations. Ch. I. Definitions relating to navigation; II. Instruments and Accessories in navigation; III. The compass error; IV. Piloting; V. The sailings; VI. Dead reckoning; VII. Definitions relating to nautical astronomy; VIII. Instruments employed in nautical astronomy; IX. Time and the Nautical Almanac; X. Correction of observed altitudes; XI. The chronometer error; XII. Latitude; XIII. Longitude; XIV. Azimuth; XV. The summer line; XVI. The practice of navigation at sea; XVII. Marine surveying; XVIII. Winds; XIX. Cyclonic storms; XX. Tides; XXI. Ocean currents; XXII. Ice and its movements in the North Atlantic Ocean. Appendices.

Part II: Contains 50 tables of the American Practical Navigator as revised in 1880, 1903, 1914, 1924, 1926, 1928, and 1930 under the direction of the Hydrographic Office, Bureau of Navigation, Navy Department.

**United States Naval Observatory** - The American Ephemeris and Nautical Almanac for the Year 1935 [*Ephemeris nautica a. 1935*]. 825 pp., U. S. Govmt. Print. Off. Washington (1933). **a - 182**

**U. S. Naval Observatory** - Publications of the United States Naval Observatory. Second Series. Volume XIII [*Publicationes Observatorii Navalis Americæ Provinciarum Foederatarum. Series Altera. Vol. XIII*]. num. tables. U. S. Govmt. Print. Off., 5-365 pp. Washington D. C. (1933). **a - 183**

Introduction. High Ascensions. Declinations. Sun, Moon, and Planet Reductions. Formation of the Star Catalogue. Comparison with Other Catalogues. Revision of the 1900 Catalogue. Collected Observations of the Sun, Moon, and Planets. Catalogue of 9,800 Standard and Intermediary Stars. Miscellaneous Stars. Standard Stars 1925.0 and Comparison with Catalogues.

**United States Navy Department. Hydrographic Office** - Navigation Tables for Mariners and Aviators. Dreisonstok. Fourth Edition [*Tabulæ navigationis maritimæ et aëriæ.* Dreisonstok *auctore*]. 3 tabl., U. S. Govmt. Print. Off., H. O. nº 208, i-iv, 89 pp. Washington D. C. (1933). **a - 184**

The tables reproduced in this book are designed to facilitate the navigation of aircraft and surface craft. The method of solving navigational problems here given is applied to all problems regardless of the position of the heavenly body, be it sun, moon, planet, or star. The contents is as follows: Preface. Corrections to observed altitudes of sun, star or planet. Table I, II. Explanation of the construction and use of tables. Traverse Table. Table I and II are based on the formulas of the astronomical triangle in which a perpendicular falls from the observer's zenith to the declination circle.

---

**H. B.** - Le « Déviomètre » [*De Deviometro*]. 1 fig., Rev. Hydr. VIII, 1, 208-210. Monaco (1931). **a - 185**

Le « déviomètre » est un accessoire que la section des recherches de l'« Aeronautics Branch » du « Department of Commerce » des Etats-Unis a établi pour faciliter l'emploi du radiophare dirigé du type à indication visuelle. L'A. de la présente note donne une description détaillée de son emploi, grâce auquel le pilote est à même de suivre n'importe quelle route choisie entre certaines limites, de chaque côté de la ligne des signaux d'égale intensité pour laquelle l'émetteur du radiophare est réglé. Il indique aussi les résultats obtenus par la Section de Recherches qui a expérimenté de « déviomètre » dans un grand nombre de conditions, et les notices bibliographiques américaines concernant ce nouveau dispositif. (D'après les renseignements du Journ. of the Franklin Inst., Philadelphia, Pa.).

**An.** - Nautisches Jahrbuch oder Ephemeriden und Tafeln, 1934 [*Ephemeris nautica et tabulæ, a. 1934*]. 184 pp., Deutsche Seewarte. Hamburg (1933). **a - 186**

**An.** - Manuale dell' Ufficiale di Rotta. 2ª ed. [*Manuale pro pilotis. II Editio*]. Num. fig., tav. e 2 piani f. t. xiv + 638 pp., Tipolit. Ist. Idrogr. R. Marina. Genova (1934). **a - 188**

Edizione molto ritoccata ed aumentata del ben noto Manuale dell'Amm. Burzagli e del Comandante Grillo. Il capitolo delle girobussole è nuovo. Son date le caratteristiche generali di queste bussole e alcune norme e dati particolari per le bussole in servizio nella R. Marina. Pure nuovo è il capitolo sul radiogoniometro, a quello sulle maree. Aggiornate sono le informazioni sulle pubblicazioni nautiche delle varie Nazioni e riveduti e corretti tutti i capitoli.

**An.** - The Marine Observer's Log [*Notæ navigationis ex* Marine Observer]. Mar. Obs., X, London (1934). **a - 189**

nº 113 (Jan. Febr. March.): The Agulhas Current. Currents and sea temperature (Cape of Good Hope). Drift of native Canoe. St. Paul's Island (South Indian Ocean). Hurricane (South Pacific). Pampero (East Coast of South America). Smoke from a Bush Fire (South-West Coast of Australia). Mountain Cloud (South Coast of Spain). Cloud Arch (South Atlantic). Fog in the Gulf of Tehuantepec (North Pacific). Zodiacal light (North Atlantic). Aurora Australis (South Indian Ocean). Solar Haloes (North Indian Ocean). Meteor (South Atlantic).

nº 114 (April, May, June): Four Sailing Ships Sighted on Passage. Phosphorescence (New Zealand Waters), (North Atlantic Ocean), (South Pacific), Earthquake Tremors (South Pacific). Pampero (off Bahia Blanca). Weather Charts Made at Sea (South Pacific Ocean). Squall (South African Waters). Green Rays at Sunset (Arabian Sea). Sand Deposit (Mediterranean Sea). Lunar Ray (North Atlantic). Cloud formation (Bay of Bengal). Mirage (Red Sea). Meteors (North Atlantic Ocean), Meteor (New Zealand Waters), (South Pacific).

nº 115 (July, August, Sept.): Currents on the West and North West Coasts of Australia. Current Rips (Caribbean Sea), Phosphorescence (South Atlantic), White Water (Timor Sea). Weather Charts Made in West Indian Hurricane Region (A valuable Aid to Safe Navigation). Thunderstorm (Majorca). Pumping of Barometer (N. W. Coast of Spain). Mirage (Bristol Channel). Parital eclipse of the Sun (Mediterranean Sea). Halo phenomena (North Atlantic Ocean). Unusual Lunar Halo (North Indian Ocean). Meteor (North Atlantic), (Red Sea). A Call at Tristan da Cunha. To Tristan da Cunha from Rio de Janeiro.

nº 116 (October, November, December): Meteor Shower (North Atlantic). Bay of Biscay. Coast of Spain and Portugal. Mediterranean. West Coast of Africa. Meteor (Mediterranean Sea). Tornado (West Coast of Africa). Weather Charts Made at Sea (Eastern North Atlantic). South Pacific Ocean. Weather Charts Made at Sea (Red Sea), South African Water. Brickfielder (Melbourne, Australia). Currents and Weather (Tristan da Cunha). Cloud formation (South Atlantic). Waterspout (North Indian Ocean), (North Atlantic). Our youngest observer. Photograph of Albatross (Australian Waters).

Generalities.

**Carrara Nello** - Le onde cortissime e il loro impiego nelle radiocomunicazioni [*Undae ultrabreves in radiocommunicationibus adhibendae*]. 30 fig., Alta Fr., 3, 465-496. Milano (1933). **a - 212**

Rassegna storica delle ricerche e dei risultati ottenuti nel campo delle microonde di lunghezza inferiore al metro; descrizione dei dispositivi sperimentali, derivati dalle prime esperienze di Barkhausen e Kurz, per la produzione di oscillazioni elettroniche di altissima frequenza nell'interno dei triodi; esposizione dei fondamenti delle principali teorie e di tali oscillazioni elettroniche; descrizione di apparati per radiocomunicazioni con microonde. Con particolare estensione sono riferite le ricerche eseguite presso il Regio Istituto Elettrotecnico e delle Comunicazioni della Marina.

**Gneme G.** - Convenzione europea della radiodiffusione e Piano di ripartizione delle frequenze alle stazioni europee di radiodiffusione [*Conventiones in Europa subscriptae circa radiodiffusiones*]. Rass. Poste, Telegr. e Telef., 7, 1 cartina, 448-460. Roma (1933). **a - 213**

L'A. riferisce sui lavori della Conferenza radioelettrica di Lucerna (19 giugno 1933), tenutasi allo scopo di stabilire i principii generali per la redazione del Piano di ripartizione delle frequenze fra le stazioni di radiodiffusione europee. La Conferenza si occupò anche della Compilazione della Convenzione e del Protocollo finale, delle questioni giuridiche, della verifica dei pieni poteri e della redazione definitiva degli atti.

**Gori V.** - Sulla moderna tecnica dei centri radiotrasmittenti di grande potenza [*Centra radiotransmittentia maxima potentia eorumque hodierna technica*]. (Bibl.), 25 fig., Rend. della XXXVII Riunione Annuale dell'A. E. I. (Firenze). Suppl. a « L'Elettrotecnica », v. V della nuova serie, 287-298. Milano (1932). **a - 214**

Esaminate le proprietà caratteristiche delle onde lunghe e delle onde corte, si pone in evidenza quale sia l'orientamento della radiotecnica attuale per ciò che concerne i trasmettitori di grande potenza adibiti a servizio commerciale. Discussa la necessità di una frequenza di emissione rigorosamente costante, si studiano i vari tipi di trasmettitori comandati soffermandosi in modo particolare sul tipo a quarzo mettendone in risalto i vantaggi e gli inconvenienti. Illustrato il trasmettitore italiano per il servizio radiotelefonico commerciale transoceanico, si dà un cenno sui più recenti metodi di stabilizzazione della frequenza mediante lunghe linee di alimentazione. Si passa quindi a descrivere i vari tipi di sistemi irradianti direttivi, si studiano le proprietà caratteristiche delle linee di alimentazione degli stessi, e si dà un rapido cenno sui sistemi di equilibramento fra i primi e le seconde.

**Hasimoto Masao** - Rhythmic Time Service [*Servitium horarium rhythmicum*]. Astron. Bull. 76. Tokyo (1933). **a - 215**

In connection with the Second International Polar Year observations in 1932-33, a series of rhythmic time-signals has been emitted, twice a day at 2h and 12h G. T. every day, from the Naval Wireless Station at Hunabasi. The scheme of the service and the method of deduction of the correction are described in the note. The corrections of emitted signals for the months August, September, and October are also given. (K. H., Jap. Journ. Astr. & Geoph., XI, 3, abstr. 121, 39, Tokyo. 1934).

Résumé rapide des différents systèmes de liaison par T. S. F. entre les bâtiments de la flotte marchande soviétique sur la Baltique et la Mer Noire. Quelques indications sur les services particuliers dont sont chargés les radio-télégraphistes à bord et description de quelques types d'installation de T. S. F. sur les navires.

**Pellegrineschi A. V.** - La connessione radiotelegrafica della Somalia italiana [*Radio-communicationes in* Somalia *Italica*]. Riv. Col. It., VII, 6, Roma (1933). **a - 227**

**Pession G., Montefinale G. & Marzoli A.** - Il centro radiomarittimo di Coltano (1929-1932) [*Centrum radio-maritimum in* Coltano]. 38 fig., Rend. della XXXVII Riunione Annuale dell' A. E. I. (Firenze). Suppl. a « L'Elettrotecnica », v. V della nuova serie, 322-339. Milano (1932). **a - 228**

Ricordati i precedenti del Centro transcontinentale di Coltano, si accenna alle ragioni che ne promossero la trasformazione in Centro radiomarittimo di media e grande portata, illustrando i criteri seguiti nella scelta degli apparecchi e nell'organizzazione del servizio. Sono descritti dettagliatamente l'impiego principale ad onda corta da 14 kW, l'impianto ausiliario ad onda corta da 2 kW, gli impianti ad onda media di tipo navale e la stazione ricevente duplex di Modica. È fatto cenno dell'impianto radiotelefonico e di alcune misure eseguite. Infine sono riportate alcune norme sulla regolazione del complesso stabilizzatore di frequenza e dei vari amplificatori a ponte che costituiscono gli speciali circuiti dei trasmettitori ad onde corte.

**Ratto H. R.** - Los códigos de señales del Almirante Brow [*Codices signalationum navarcae* Brow]. Bol. Centro Nav., LII, 500. Buenos Aires (1933). **a - 229**

**Sacco Luigi** - Radiogoniometria militare [*Radio-goniometria militaris*]. (Conferenza al V Corso di Magistero R. T. presso l'Istituto Militare di R. T. ed E. T. Roma, settembre 1933), 12 fig., Boll. Radiotel. R. Eserc., 5/6, 199-231. Roma (1933). **a - 230**

Si descrive il funzionamento dei radiogoniometri a telaio girevole e di quelli del tipo Adcock. Si discutono le principali cause di errore nei rilevamenti e se ne deducono alcune norme di impiego dei radiogoniometri nel campo militare.

**Wedemeyer E. A.** - Zur Küstenbrechung der Funkstrahlen [*De refractione litorea radio-undarum*]. 3 Abb., Ann. d. Hydrogr., LXII, 7, 297-298. Berlin (1934). **a - 231**

Einige Betrachtungen über die Funkstrahlenablenkung, die Küstenbrechung, welche beim Uebergang vom Land zu Wasser bei schrägem Schnitt der Küste eintreten sollte, und welche als Erklärung früherer Messabweichungen verwendet worden ist, obwohl viele tausende systematische Versuche sie bis heute nirgends erweisen konnten. In der vorliegenden Notiz ist ihre Unwahrscheinlichkeit nachgewiesen.

---

**Bureau International de l'Union Télégraphique** - Règlement général des radiocommunications [*Regulamentum generale radio-communicationum*]. B. I. Union Télégr., Berne. Madrid (1932). **a - 233**

Nouvelle édition du Règlement Général des Radiocommunications annexé à la Convention international des Télécommunications, comportant le Règlement additionnel établi par les actes de la Conférence Radiotélégraphique internationale de Madrid, Décembre 1932. Diverses dispositions de ce Règlement intéressent certains documents nautiques, notamment ceux qui donnent les « Listes des Radiosignaux ».

**Chief Signal Officer** - Signal Corps Field Manual [*Liber pro signalatoribus*]. Volume II: Signal Corps Operations. 47 figs., tabl., Govmt. Print. Off., 1-206. Washington, D. C. (1931). **a - 234**

1) Wire lines; 2) Telephone Instruments; 3) Telephone Centrals; 4) Telegraph Communication; 5) Radio Communication; 6) Signal Corps Intelligence agencies; 7) Signal Corps Message Centers; 8) Storage Batteries and Charging Sets; 9) Pigeon-loft Management; 10) Field Photography; 11) Field Meteorology.

**Istituto Idrografico della R. Marina** - Elenco dei fari, fanali e segnali da nebbia, a giorno 1 Gennaio 1933 [*Index pharorum, lanternarum, signalationum caligine vitanda ad diem 1 Mensis Januarii 1933*]. Ist. Idrogr. della R. Marina. Genova (1932). **a - 235**

Nuova edizione completamente riveduta dell'Elenco dei Fari italiani dalla quale sono state interamente eliminate le informazioni sui segnali marittimi diurni che saranno trattate in un volume a parte di prossima pubblicazione, nel quale si troverà anche la descrizione dei semafori, dei radiofari e dei segnali orari. In questa nuova edizione sono state pubblicate indicazioni sui fari, fanali e segnali da nebbia nel Mediterraneo, il Mar Nero, il Mare d'Azov, il Mar Rosso, il Golfo di Aden e sulla costa orientale dell'Africa fino allo Zanzibar.

**Istituto Idrografico della R. Marina** - Elenco dei Segnalamenti Marittimi Diurni [*Signalationes maritimae diurnae. Index*]. Mediterraneo, mar Nero, mar d'Azof, mar Rosso, golfo d' Aden e Costa orientale d'Africa fino a Zanzibar, 467 fig. f. t., 182 pp., appendice 32 pp., Tip. dell'Ist. Idrogr. della R. Marina. Genova (1933). **a - 236**

Nel volume, aggiornato al 1° luglio 1933, sono elencati i segnali marittimi diurni, i semafori, i segnali orari ottici, ecc. Le boe da ormeggio e da tonneggio, sono elencate in un'appendice alla fine del volume.

**Nautische Abteilung der Marineleitung** - Verzeichnis der Leuchtfeuer und Signalstellen aller Meere [*Index pharorum stationumque signalationum omnibus maribus*]. Marineleitung. Berlin (1932). **a - 237**

Das Verzeichnis gilt für das Jahr 1933 und besteht aus den folgenden zwei Teilen; I. Ostsee; II. Gewässer zwischen der Ost- und der Nordsee. Der allgemeine Teil behandelt eingehend die Frage der Wracktonnen.

**Société des Nations** - Accord sur les bateaux-feu gardes se trouvant hors de leur poste normal. Signé à Lisbonne, le 23 octobre 1930 [*Conventio internationalis de navibus pharum ferentibus*]. Recueil Traités, CXLII, 1/2/3/4, 371. Genève (1933-1934). **a - 238**

**Société des Nations** - Accord relatif aux signaux maritimes. Signés à Lisbonne, le 23 octobre 1930 [*Conventio de signis maritimis*]. Recueil Traités, CXLII, 1/2/3/4, 379. Genève (1933-1934). **a - 239**

**Ufficio del Capo di Stato Maggiore della R. Marina (Reparto Servizi - Ufficio Comunicazioni)** - Codice internazionale dei segnali Ediz. italiana 1931. Vol. I: Segnalazioni ottiche ed acustiche, disegni, tavole, tabelle in nero a colori. Vol. II. Segnalazioni con la radiotelegrafia [*Codex internationalis signalationum. Editio Italica 1931. Vol. I. Signalationes opticae et acusticae. Vol. II Radiosignalationes*]. lv + 1007; viii + 1309 pp., Poligr. dello Stato, Libreria dello Stato. Roma (1933). **a - 240**

**United States Department of Commerce** - Annual Report of the Commissioner of Lighthouses [*Relatio annua Directoris pro pharorum muneribus*]. U. S. Dept. of Comm. Washington, D. C. (1932). **a - 241**

The present Report contains interesting information on the work of the Lighthouse Service and improvements introduced in the various apparatuses serving as aids to navigation and to their various accessories. A summary shows the different changes in buoyage and coast lighting introduced during the fiscal year and gives tabulations showing the number of aids maintained for every lighthouse district.

**United States Hydrographic Office** - The 1931 International Code of Signals. American Edition. Vol. I: For Visual and Sound Signalling [*Codex internationalis signalationum 1931. Editio Americana. Vol. I. Signalationes visibiles ac sonorae*]. 17 pls., num. tabl., H. O. N° 87, 362 pp., U. S. Govmt. Print. Off., Washington, D. C. (1933). **a - 242**

Preface. National colors worn by United States vessels. Special United States flags. Flags of different countries. International Code flags and pennants. Airplane markings. Signalling instruction. Appendix A: Ship and aircraft distress signals. B: Pilot signals. C: Quarantine signals. D: Towing signals. E: Miscellaneous. Live-saving organization on coast of the United Kingdom.

**United States Hydrographic Office** - The 1931 International Code of Signals. American Edition. Vol. II: For Radio Signalling [*Codex internationalis signalationum 1931. Editio Americana. Vol. II. Radiosignalationes*]. iii - xvii + 418 pp., U. S. Govmt. Print. Off. H. O. N° 88. Washington, D. C. (1933). **a - 243**

New edition of the code which is primarily intended for use by ships and aircraft and, via shore radio stations, between ships or aircraft and authorities ashore. It is not intended in any way to compete with or replace commercial codes. It contains radio signalling instructions, and explanation and instruction for the use of the code.

**United States Hydrographic Office** - 1933 Radio Aids to Navigation Including Details of Radio Direction Finder Stations, Radiobeacons, Weather Bulletins, Storm and Navigational Warnings, Time Signals, etc. Corrected to May 1, 1933 [*De radioauxiliis navigatoribus*]. ii-xi + 2-493 pp., U. S. Govmt. Print. Off., Notice Marin. 17. Washington, D. C. (1933). **a - 244**

Part I of this publication contains a complete list of radio stations throughout the world which perform services of value to navigation. Part II contains information such as general instructions codes, and tables.

Information sur l'envoi au B. H. I. d'une liste contenant des observations de visibilité des feux faites aux principaux phares du Danemark pendant l'année 1932.

**An.** - Wireless Reception in Naval Ships [*De radioreceptionibus in navibus*]. Nature, CXXXIII 3366, 693. London (1934). **a - 248**

In a paper read by Dr. W. F. Rawlinson before the Wireless Section of the Institution of Electrical Engineers on March 7, 1934 are discussed problems encountered in the reception of wireless signals in naval ships, and described certain features of the types of apparatuses which have been developed for this application. Three standard types of receivers are described.

# OPERAE MARITIMAE.

## Operae portuales - Tunnels - Canales maritimi - Effossiones fundi marini.

**De Buen Rafael** - Le tunnel sous-marin du Détroit de Gibraltar [Tunnel *submarinum per Sinum Gaditanum*]. Bull. Soc. Océanogr. France, 72, 1265-1274. Paris (1933). **a - 249**

Après avoir donné un résumé du développement réalisé et future des lignes de chemin de fer en Afrique et de leur importance pour la pénétration européenne en Afrique et pour la navigation transatlantique, l'A. illustre l'importance économique et politique que pourrait avoir un tunnel construit au-dessous du détroit de Gibraltar et démontre que sa construction ne présente aucune difficulté au point de vue technique. Histoire du projet de construction du futur tunnel de Gibraltar. Résumé des travaux préparatoires exécutés et en voie d'exécution. Modification de la composition de la Commission du tunnel après la terminaison des sondages géologiques moyennant l'incorporation parmi ses membres de spécialistes en questions ferroviaires. Les quatre Sous-Commissions du Comité. Le profil du tracé du tunnel. Les avantages qu'offrirait la construction du tunnel.

**De Vries & Jansen** - La nouvelle écluse de St-Andries [*Clausum, recentiore tempore ædificatum, in* St. Andries]. 4 fig., Ann. Trav. Publ., XXXV, sér. II, 4, 635-641. Paris (1934). **a - 250**

Cette construction constitue le commencement d'exécution du programme de travaux élaboré en vue de l'amélioration des capacités d'évacuation, des grands débits de la Meuse. Cette écluse mesure 14 m. de largeur, 110 m. de longueur.

**Giani Armando** - Risultamenti di studi idrodinamici, nautici e commerciali sul porto di Livorno e sul miglioramento ed ingrandimento del medesimo pel Comm. Alessandro Cialdi [*Resultatus ex studiis hydrodinamicis, nauticis, commercialibus ab Alexandro* Cialdi *peractis pro amplificatione Portus Liburni*]. 2 cartine f. t., Riv. Cult. Mar., IX an., 9/10, 377-395. Roma (1934). **a - 251**

Riesumazione di un antico scritto del 1852-1855 di carattere polemico-scientifico ancor oggi importante. Documentazione di primato italiano in applicazioni nautiche.

**Giordano A.** - Les progrès dans le port de Naples [*De progressibus in portu Neapolitano*]. La Mediterranée, a. V, 55. Paris (1933). **a - 252**

**Giordano A.** - Le port de Palermo [*Portus Panormitanus*]. La Méditerranée, a. V, 58. Paris (1933). **a - 253**

**Jaarsma W.** - De Friesche zeeweringen van 1825 tot 1925. Honderd jaren uit de geschiedenis van de zeedefensie in de provincie Friesland. Uitg. door het Provinciaal Bestuur van Friesland [*De molibus foraneis contra maris actionem ædificatis in* Friesland. *Auctoritates Provinciales Frislandicae curaverunt*]. 1 carta (pianta), 294 pp., Noord-Ned. Boekhandel. Leeuwarden (1933). **a - 254**

L'inondazione del 1825 e le sue conseguenze. Progetti per migliorare le dighe ; la loro realizzazione ; costi, difficoltà. Rapporti storici, dati ufficiali sulle dighe durante 1889-1925. In un appendice vengono trattate « Le dighe frise e l'ultimazione dello Zuiderzee » ; inoltre vi sono dati sui livelli massimi del mare nelle inondazioni durante il secolo sulla regolamentazione del 1888. Bibliografia.

**Karyghine N.** - Programme des travaux capitaux pour 1934 [*Ratio operum fundamentalium a. 1934*] (En russe). Vodn. Transp., 12, 24-25. Moskva (1933). **a - 255**

Liste abrégée des principaux travaux d'extension et d'amélioration exécutés dans les ports de l'U. R. S. S. ; informations sur la construction de nouveaux canaux, barrages, digues, écluses, etc., de nouveaux chantiers pour la reparation des bâtiments avariés ; indications concernant le programme technique et financier des travaux qui devront être exécutés en 1934.

**Lebedew A. F.** - Ueber den geschichteten Torf-Sandschirm in Sanddämmen und Deichen [*Præsidium stratificatum, sabula et torba constitutum, in sæptis et aggeribus arenosis*] (In russ., dtsch. Rés.). 2 Fig., 4 Tab., Mém. Inst. Hydrol., 2, 403-415. Léningrad (1933). **a - 256**

Ergebnisse einer im hydrotechnischen Laboratorium ausgeführten Untersuchung, im Zusammenhang mit dem Kanalbau zur Verbindung des Weissen und des Baltischen Meeres miteinander. Praktischer Vorschlag betreffend den geschichteten Sandschirm- und Sanddämmenbau. Vorzüge eines solchen Schirmes gegenüber dem reinen Torfschirme und gegenüber einem Schirme aus einer Mischung von Torf und Sand.

**Ourvantzev N. N.** - Sur la question de la construction d'un port dans l'embouchure du fleuve Léna [*De portu ad accessus fluminis* Lena

*ædificando*] (En russe). Arctica, 1, 187-188. Léningrad (1933). **a - 257**
En vue de l'organisation de voyages maritimes réguliers dans l'embouchure du fleuve Léna pour le transport des marchandises dans la République Soviétique de la Yakoutie et pour faciliter les exportations de cette région vers la métropole, la question a surgi de la construction d'un port dans le delta du fleuve. Dans la présente note quelques observations sont formulées sur la construction de ce port.

**Ourvantzev N. N.** - Sur la question de la construction d'un port charbonnier dans l'embouchure du fleuve Yénissej [*De portu pro muneribus carboniferis ad accessus fluminis* Yenissej *ædificando*]. Arctica, 1, 189-190. Leningrad (1933). **a - 258**
Quelques considérations au sujet de la construction d'un port dans la delta du fleuve Yénissej en relation avec le développement de la navigation sur la Voie Maritime du Nord et l'extraction du charbon des minières de la région.

**Randolph E. S.** - More Water for the Panama Canal Provided by the Madden Dam Project now under Construction on the Chagres River [*De canali Panamensi eiusque constructionibus additiciis*]. 8 phot. charts, diagr., Civ. Engineering, II, May, 283-288. Easton (1932). **a - 259**

**Sorokine P. P.** - Constructions portuaires [*Constructiones portuales*] (En russe). Vodn. Transp., 10, 15-16. Moskva (1933). **a - 260**
Les progrès dans les constructions portuaires de la Russie après la révolution. Description des travaux exécutés par le Gouvernement Soviétique dans les ports maritimes de l'Union en vue de l'amélioration des conditions de chargement du bois, du blé, du pétrole, du charbon et du minerai. Informations succinctes sur la construction de frigorifique, de môles, de débarcadères, de dépôts et sur les améliorations apportées au transport des passagers dans les différents ports de l'U. R. S. S.

**Sorokine P. P.** - Sur l'augmentation du coefficient du travail utile des grues portuaires pendant le travail du transbordement des chargements [*De grus portualibus earumque labore utiliter peracto, operibus perdurantibus*]. (En russe). 3 fig., 2 tabl. Vodn. Transp., 11, 35-37. Moskva (1933). **a - 261**
Quelques indications sur les moyens qui permettent d'intensifier le rendement des grues portuaires avec référence spéciale à la nécessité de mécaniser dans la mesure du possible tous les travaux de déchargement et de transbordement.

**Sousline P.** - Emploi des rectificateurs à mercure dans les ports maritimes [*De utilitate percipienda ex rectificatoribus mercurio præditis in portibus maritimis*] (En russe). 2 fig., Vodn. Transp., 10, 33. Moskva (1933). **a - 262**
Quelques données sur l'emploi des rectificateurs à mercure dans certains ports étrangers dans le but d'augmenter le coefficient de puissance des installations électriques portuaires.

**Stüwe** - Trockenlegung der Zuider-See und des Frischen Haffes. Vergleiche und Folgerungen [*De* Frisches Haff *et* Zuiderzee *exsiccatis. Comparationes et conclusiones*]. Schr. d. Phys.-ökon. Ges. Königsberg i Pr., LXVIII, 1, 107. Königsberg (1933). **a - 263**

**Thysse J. Th.** - L'influence de la fermeture du Zuidersee sur le régime des marées le long des côtes Néerlandaises [*De* Zuiderzee *exsiccato eiusque influentia in regimen æstuosum præter litora Hollandica*]. Bull. Assoc. Perm. Congrès de Navigat., Janv., 59-85. Bruxelles (1933). **a - 264**

**Veretenov V.** - Mécanisation du travail du chargement et du déchargement dans les transports par voi de l'eau [*Mechanisatio operum subvectionum per aquas*]. 4 fig., 1 tabl., Vodn. Transp., 10, 17-19. Moskva (1933). **a - 265**
Quelques informations sur les installations mécaniques construites pour le chargement et le déchargement du charbon, des métaux, des minerais, du blé, etc., dans les ports maritimes de l'U. R. S. S.

**Zinevitch D.** - Le nouveau « slip » d'Astrakhanj [*De novo « slip » ex* « Astrakhanj »] (En russe). 5 fig., Vodn. Transp., 5, 8-11. Moskva (1933). **a - 266**
Description des détails de construction d'un nouveau « slip » dans le port fluvial d'Astrakhanj qui est actuellement la plus grande construction existante de ce genre, vu les dimensions des bâtiments qu'il peut soulever et qui y sont introduits pour l'exécution des réparations nécessaires.

---

**M. L.** - Progetto di tunnel sotto lo stretto di Shimonoscki [*Ratio* tunnel *ædificandi per Strictum* Shimonoscki]. Riv. Maritt., a. LXVII, 2 (Suppl.), 31-32. Roma (1934). **a - 267**
Gli studi relativi a codesto tunnel sono stati abbandonati per timore di azioni di bombardamento.

**M. L.** - Base di Singapore [*Portus ac basis urbis* Singapore]. Riv. Maritt., a. LXVII, 5 (Suppl.), 28-30. Roma (1934). **a - 268**
Lavori recenti ad armamenti di questa potente base navale in continuo progresso.

**M. L.** - Progetto di un porto mercantile e militare a Mosca [*Ratio portus commercialis ac militaris Mosquæ ædificandi*]. Riv. Maritt., a. LXVII, 9 (Suppl.), 34. Roma (1934). **a - 269**
Progetto pel quale Mosca dovrebbe diventare un porto marittimo. Navi di più di 10.000 Tonn. potrebbero raggiungerlo.

**An.** - Lavori nel porto di Honolulu [*De operibus in portu* Honolulu]. Riv. Maritt., a. LXVII, 2 (Suppl.), 21-22. Roma (1934). **a - 270**
Stanziamenti di capitali per importanti miglioramenti portuali e fluviali.

## Operae submarinae - Mersiones - Scaphandrarii - Cava.

**Davis R. H.** - Deep Diving and Under-Water Rescue [*Immersiones in profundum ac rerum recuperationes in maris profunditatibus*]. R. Soc. Arts Journ., LXXXII, 4266/4267/4268/4269, 1032-1047, 1049-1065, 1069-1080, 1083-1101. London (1934).
(—) See also : Engineering, CXXXVII, 3555, 268-269 and 3557, 324. London (1934). **a - 271**
On diving appliances and their evolution. Historical review.

**Heyrelles François** - Recherches au fond de la mer au XIII-ème siècle [*Investigationes in fundum marinum sec. XIII°*]. 6 fig., Bull. Soc. Océanogr. France, 74, 1308-1309. Paris (1933). **a - 272**
Extrait du texte d'un traité du XIII-ème siècle qui semble contenir le témoignage de la première descente sur le fond de la mer dans un but scientifique.

**Osti Arrigo** - Relazione sul premio 1932 della fondazione nazionale tecnico-scientifica « Principe di Piemonte » [*Relatio de præmio pro a. 1932 Fundationis Nationalis technico-scientificæ* « Principe di Piemonte »]. VI, 1, 17-23. Roma (1934). **a - 273**

Apparecchio per ricevere segnali cablografici ad una velocità superiore del 30 % a quella consentita con gli apparecchi ora in uso. Apparecchio ricevitore di segnali cablografici e telegrafici capace di adempiere contemporaneamente o separatamente le funzioni tanto degli apparecchi riperforatori, quanto degli apparecchi ritrasmettitori.

**Pupin M. I.** - Impedance Curves of Composite Cable [*Curbæ impedentiæ in cavis compositis*]. Electr. Engr., LII, 2, 115-118. London (1933). **a - 274**

Analytical paper. Study for devising means of extending the range of high speed signalling. The submarine cable here dealt with is composed of both loaded and unloaded sections.

**Schwarz Albert** - Bewuchs an Schiffsböden [*De animalibus navium carinis noxiis*]. 2 Abb., Nat. u. Mus., LXIII, 12, 428-431. Frankfurt a. M. (1933). **a - 275**

Dieser Bewuchs bietet manchmals durch seine Dichte dem Schiff viele Schwierigkeiten dar, die eine erhöhte Maschinenleistung erfordern, wie es aus den mit amerikanischen Schlachtschiffen von dem « National Council of American Shipbuilders » angestellten Versuchen hervorgeht.

**Vogel** - Tiefseebergungen [*De vitæ rerumque conservatione maxima profunditate*]. Schiffbau, XXXIV, 24, 439-441. Berlin (1934). **a - 276**

Allgemeine Beobachtungen.

---

**An.** - Cables Across Belfast Harbour [*Cava submarina per Portum* Belfast]. Electr. Times, LXXXVI, 2235, 225-226. London (1934). **a - 277**

Submarine cables together with 12 pair pilot and telephone cable.

# VARIA.

## Res nauticae - Folklore - Historia politica, militaris et mercatoria marium - Vocabularia nautica - Legislatio nautica.

**Aiello G. L.** - Il mare nella vita e nella poesia di Lord Byron [*De mari ac arte navigandi apud* Byron]. Riv. Cult. Mar., a. IX, 9/10, 414-424. Roma (1934). **a - 278**

**Albitreccia Antoine** - La Marine Française en 1931 [*De classe Gallica a. 1931*]. Ann. de Géogr., 238, 416-417. Paris (1933). **a - 279**

Tonnage total de la marine marchande française ; l'âge de ses navires, le nombre des navires désarmés, diminution de l'activité des chantiers navals. Mêmes données comparées concernant les autres pays. Crise de l'armement en France et hors de la France.

**Ballard G. A.** - British Battleships of 1870 : the « Invincible », « Vanguard », and « Iron Duke » [*Longæ naves Britannicæ a. 1870*]. 2 figs., 3 pls., Mar. Mirr., XX, 3, 261-279. London (1934). **a - 280**

Description of design, service and history of the three ships.

**Becchi G. B.** - Osservazioni e note al progetto di Codice marittimo [*Codex maritimus. Observationes et notæ*]. Badino. Genova (1933). **a - 281**

L'A. presentò ai lavori della Commissione per la riforma del Codice per la Marina Mercantile alcune osservazioni ch'egli qui raccoglie. Si tratta di un piccolo volumetto.

**Bertonelli Francesco** - L'Oceano dal cerchio di fuoco [*De Oceano Pacifico*]. 360 pp., Bemporad. Firenze (1934). **a - 282**

L'A. prosegue in questo volume la serie degli studi politico strategici dei vari mari, iniziata con il Nostro Mare. L'Oceano dal cerchio di fuoco è il Pacifico, in quanto è circondato da vulcani sulle coste americane e sulle occidentali.

**Boudet E. L.** - Le Corps de Santé de la Marine et le Service médical aux colonies au XVII-ème et au XVIII-ème siècles (1625-1815) [*Corpus medicorum ad Classem pertinens ac Servitia Medica in Coloniis sec. XVII et XVIII (1625-1815)*]. Géogr., LXI, 3/4, 5/6, 212-231, 342-363. Paris (1934). **a - 283**

I. Le grand siècle maritime et colonial (XVII-ème) ; II. La première moitié du XVIII-ème siècle ; III. La seconde moitié du XVIII-ème siècle (à suivre). Aperçu historique du développement de l'Empire colonial français avec référence spéciale à l'activité du corps médical.

**Boudet E. L.** - Le Corps de Santé de la Marine et le Service médical aux Colonies au XVII-ème et au XVIII-ème siècle (1625-1815) (Fin.) [*Corpus medicorum ad Classem pertinens ac Servitia Medica in Coloniis sec. XVII et XVIII (1625-1815)*]. Géogr., LXII, 1/2, 44-52. Paris (1934). **a - 284**

Fin de l'article, dont les chapitres précédents ont été publiés dans les nn° mars-avril, p. 212 et mai-juin, p. 342, 1934 de la même revue. La Révolution et l'Empire.

**Guillen y Tato D. Julio F.** - Exvotos marineros, su origen, clases, arte y técnica [*Vota nautarum. Origines, classificatio, ars et technica*]. 48 tabl., Bol. Soc. Geogr. Nac., LXXIV, 1, 7-28. Madrid (1934). **a - 317**

Conferencia leida en la Sociedad Geogràfica Nacional el dia 5 de Junio 1933.

**Guillen y Tato D. Julio** - En la agonia de la marina de vela [*Exitus classis velicæ*]. Bol. Soc. Geogr. Nac., LXXIV, 3, 151-153. Madrid (1934). **a - 318**

Historia en sintesis de la agonia de la vela, de la brava agonia del velero, al que tanto deben la Geografia y la Cultura.

**Hornell James** - The Origin of the Junk and Sampan [*De naviculis* junk *et* sampan. *Quæstio de originibus*]. 3 pls., Mar. Mirr., XX, 3, 331-337. London (1934). **a - 319**

Historial account of the development of the junk and the sampan, whose every feature of structure reveals an origin different from that of the European type of sailing ship. This circumstance conducts the A. to the conclusions that sampans and junks are developments and descendants of shaped rafts and must have had a common ancestor.

**Jenkins J. Caldwell** - Shipping Legislation [*Legislatio navalis*]. U. S. Govmt. Print. Off., 6th Nat. Conf. Merch. Mar., Jan. 4-5, 1933, 89-94. Washington, D. C. (1933). **a - 320**

Latest development of the American shipping legislation with especial regard to the policy of the American Steamship Owners' Association, and the scope and duties of the American Shipping Board.

**Katz R.** - A zonzo per quattro continenti [*Navigatio per orbem*]. Soc. Ed. Genio. Milano (1934). **a - 321**

**Kent Fred I.** - International Trade and Shipping [*Commercium internationale ac navigatio*]. U. S. Govmt Print. Off., 6th Nat. Conf. Merch. Mar., Jan. 4-5, 1933, 52-60. Washington, D. C. (1933). **a - 322**

Correlation between the problems of the shipping industry and those concerned with the decrease of international trade. Necessity of an agreement between the nations for the good of all. General presentation of the great forces which have curtailed and are killing international trade 1. Excessive taxation, 2. Allied debts, 3. Depreciated currencies and 4. Trade barriers.

**Kenworthy J. M.** - Sailors, Statemen and others [*De quibusdam nautis ac viris politicis*]. Rich & Cowan. Ltd. London (1933). **a - 323**

**Kerr Mark** - The Navy in My Time [*De classe hodierno tempore*]. Rich & Cowan Ltd. London (1933). **a - 324**

The author who had been naval attaché at Constantinople, and later with the Greek Navy, had worked out with his staff a detailed plan for a Greek attack on the Dardanelles but was not consulted when the British attack was put under way. There are also some chapters of pure technical character.

**Kirkpatrick J. B.** - Little Ship Wanderings [*De navigationibus in navicula quadam*]. 254 pp., Edward Arnold & Co., London (1933). **a - 325**

The author conducts the reader through the Thames estuary, the Channel, the Bay of Biscay, and the North Atlantic in various crafts and companies. Each chapter of his book contains much sailing lore and a good deal of practical geography.

**Kühlwetter Frederick** - Skagerrak [*De Skagerrak*]. Ullstein. Berlin (1934). **a - 326**

Das Werk gibt ein klares Bild des Alltagslebens der Offiziere und Matrosen während des Krieges. Das deutsche Teilnehmen an der Schlacht bei Jutland.

**Le Fevre G.** - La croisière jaune [*Res nauticæ*]. Plon. Paris (1933). **a - 327**

**Leidenfrost Gyula** - A titänok harca [*Enarrationes fabulosæ*]. (En hongr.). 7 fig., A Tenger, XXIV, 1/6, 6-18. Budapest (1934). **a - 328**

Sur la base des travaux du moyen âge et des ouvrages contemporains l'A. décrit des batailles plus ou moins fabuleuses entre monstres marins et navigateurs.

**Le Mouel Eugène** - Mont Saint-Michel au péril de la mer [*De monte* Saint-Michel *cui maris periculum impendet*]. pl., 254 pp., La Renaiss. du Livre. Paris (1932). **a - 329**

**Lorsy** - L'appel de la mer [*Mare vocat*]. Yachts & Yachting, V ann., 50, 119-122. Paris (1934). **a - 330**

**Luards L.** - All Hands. Seven Stories of the Sea [*Enarrationes nauticae*]. Lane. London (1933). **a - 331**

**Lubbock Basil (Ed.)** - Barlow's Journal [*Diarium ad* Barlow *pertinens*]. 2 Vols. 8 col. pls. 64 reprod., Hurst & Blackett Ltd. London (1933). **a - 332**

This work is transcribed by the A. from the original manuscript formerly in the possession of Admiral J. S. Yorke. Description of Barlow's life at sea in King's ships, among East and West Indiamen and other merchantmen from 1659 to 1703 Finally there is a vivid description of the great gale of 1703 when half England was laid in ruins.

**Lubbock Basil** - The Opium Clippers [*De navibus opium ferentibus*]. 392 pp., Charles E. Louriat Co. Boston (1933). **a - 333**

The first Opium War (1839-42). Opium traffic (1825-60). Typhoons, shipwrecks, piracy, murder, mutiny, accidents. Beautifully illustrated.

**Makarov A. N.** - Précis de droit international [*Quæstiones juris internationalis*]. Marcel Giard. Paris (1933). **a - 334**

Nel primo anniversario della morte del Duca degli Abruzzi l'Ufficio Storico della R. Marina ha pubblicato un volume che tratta dell'attività marinara del Principe. Qui son riprodotte alcune pagine.

# II.

# OCEANOGRAPHIA PHYSICA.

## GENERALIA.

### Instituta oceanographica - Relationes publicae - Conventus et conferentiae - Oceanographiae historia - Ars docendi - Bibliographiae.

**Cassinis Gino** - V$^a$ Assemblea generale dell'Unione Internazionale geodetica e geofisica (Lisbona, settembre 1933). Relazione sui lavori dell'Assemblea [*V.us Conventus generalis Unionis Internationalis Geodeticæ et Geophysicæ (Olisippone mense Septembri 1933). Relatio de operibus*]. Ric. Scient., II, 12, 517-530. Roma (1933). **a - 439**

Premesse brevi notizie sulla cerimonia inaugurale e su questioni generali, l'A. dà un cenno sui lavori compilati dalle diverse Associazioni partecipanti al Congresso, e cioè: Associazione di Geodesia; Associazione di Sismologia; Associazione di Magnetismo e di Elettricità terrestri; Associazione di Vulcanologia; Associazione di Oceanografia fisica; Associazione di Idrologia scientifica; mettendo in rilievo il contributo dato dall'Italia.

**Chevey P.** - Rapport sur le fonctionnement de l'Institut Océanographique de l'Indochine pendant l'année 1931-1932 [*Relatio de activitate ac functione Instituti Oceanographici Indosinensis a. 1931-32*]. 2 graph. h. t., Inst. Océan. Indoch., Stat. Marit. Cauda, 21-e Note, 3-20. Saïgon (1932). **a - 440**

Constitution de la Commission de l'Institut Océanographique de l'Indochine. Personnel de l'Institut. Matériel. Recherches scientifiques et techniques (sept campagnes océanographiques et de pêche du « de Lannesan »). Océanographie physique et biologique (sondages thermométriques, coupes hydrologiques rectilignes, étude de la croissance des poissons du Grand Lac du Cambodge, présence de formes marines dans ce lac, étude des formes larvaires de divers poissons, recherches planktoniques, etc.). Pratique de la pêche. Traitement industriel des produits de la pêche. Rapports avec divers organismes scientifiques. Publications. État de la bibliothèque.

**Chevey P.** - Rapport sur le fonctionnement de l'Institut Océanographique de l'Indochine pendant l'année 1932-1933 [*Relatio de activitate ac functione Instituti Oceanographici Indosinensis a. 1932-1933*]. 4 pl., Inst. Océan. Indoch., Stat. Marit. Cauda, 22-e Note, 3-18. Saïgon (1934). **a - 441**

Personnel de l'Institut. Matériel. Recherches scientifiques et techniques. Océanographie physique et biologique (Coupes hydrologiques faites par le « de Lanessan » parallèles aux côtes de Cochinchine et du Sud-Annam. Rectifications opérées en 1933 sur la Carte Bathymétrique de 1930, Exploration de la vallée sous-marine du Donnai, mensurations de température - visites de toutes les îles de la région). Pratique de la pêche. Traitement industriel des produits de la pêche. Rapports avec divers organismes scientifiques. Publications.

**Cordier Henry** - Bibliotheca Indosinica. XVIII bis. G. Van Oest. Paris (1932). **a - 442**

Dictionnaire bibliographique des ouvrages relatifs à l'Indochine. Index par Mme. M. A. Roland Cabaton. Publications de l'Ecole française d'Extrême Orient.

**Debenham F.** - The Scott Polar Research Institute, Cambridge, England, Its History and Aims [*Institutum cui* Scott *est nomen investigationibus polaribus peragendis, Cantabrigiæ. Historia et rationes*]. (In Engl., Russ. summ.). Arctica, 1, 67-74. Leningrad (1933). **a - 443**

In this brief article the author explains what the Scott Polar Institute is, and what it attempts to do, in order to allow countries other than England to have a chance of learning something about its history and undertakings.

**De Buen Fernando** - Las publicaciones del Instituto Español de Oceanografia [*Institutum Hispanicum pro Oceanographia eiusque publicationes*]. Bol. Oceanogr. y Pesca, XVII, 1, 2-37. Madrid (1932). **a - 444**

Lista de publicaciones por orden de autores: (Memorias; Resultados de campañas, Trabajos, Notas y Resúmenes, y Boletin de Pesca o de Oceanografia y Pesca). Lista de cambios.

**De Buen Rafael** - Liste chronologique des croisières océanographiques [*Index chronologicus navigationum oceanographicarum*]. 73 pp., Manuel pour les observations océanographiques à la mer., I, 2, Offic. Grafiche Carlo Ferrari. Venezia (1934). **a - 445**

C'est la liste la plus complète publiée jusqu'à maintenant des croisières accomplies par les différents pays du monde entier. L'A. donne le nom du navire et le but de la navigation.

**De Buen Rafael** - El Instituto Español de Oceanografia y la labor que ha realizado [*Institutum Hispanicum pro Oceanographia. Opera peracta*]. Lam., Mem. Cons. Oceanogr. Ib. Amer., 9, 72. Madrid (1932).

(—) Véase: Notas y Resúm., Serie II, 62, 1-41. Madrid (1932). **a - 446**

La organisación del Instituto. Los Laboratorios Corteros. La Cooperación de la Marina de Guerra. Estudios del mar y sus aplicaciones a los problemas prácticos. Reglamento. Campañas. Bibliografia.

**Eggvin Jens** - A Norwegian Fat-herring Fjord. An Oceanographical Study of the Eidsfjord [*Agitur de fiordo quodam Norvego pinguibus aringis prædito. Studium oceanographicum ab* Eidsfjord *peractum*]. 11 figs., many tabl., Fiskerid. Skr. Ser. Hav-

unders., (Rep. Norw. Fish. Mar.), IV, 6, 3-22. Bergen (1933). **a - 447**

Results of the research work carried on during an oceanographical cruise between October 15th and November 9th 1932. Topography. Currents. Temperature and salinity. The oxygen contents. The phosphate contents. Explanation of tables. Literature.

**Esih Ivan** - More u Poljskoj Kujizevosti [*De mari apud litteras Polonas*] (En yougoslave). ill., 22 pp., Hrvatska Stamparija Gradske Stedionice. Split (1931). **a - 448**

Recueil de nouvelles littéraires et bibliographiques, sur publications polonaises presentées en forme artistique.

**Field R. M. Chairman** - Report of Committee on Geophysical and Geological Study of Oceanic Basins [*Relatio Comitati pro geophysica et geologia bacinorum oceanicorum*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 9-16, 1933. Washington, D. C. (1933). **a - 449**

Appointing of the Committee in April 1932 for the purpose of promoting the study of structural and stratigraphic problems relating to oceanic basins, continental margins, and oceanic islands, especially those forming island-arcs. Account of what the Committee has been able to accomplish during the first year of its work as to the following: I) the promotion of structural studies in oceanic basins; II) the study of available geophysical methods for work at sea; III) suggestions as to outstanding or fundamental problems, which, because of available machinery and technique, are reasonably certain of solution; IV) cooperation of existing agencies.

**Goegg Egmond** - Coup d'oeil sur la Société de Géographie de Genève [*Compendium rerum ad Societatem Geographicam Genavensem pertinentium*]. 5 phot., 69 pp., Soc. Gén. Impr. Genève (1933). **a - 450**

Ce fascicule a été rédigé à l'occasion du 75-ème anniversaire de la fondation de la Société et contient un compte rendu de l'activité scientifique, de l'organisation et du fonctionnement de la Société au cours de 25 années.

**Granqvist Gunnar** - Havsforskningsinstitutets verksamhet under år 1932 [*Opus peractum ab Instituto Oceanographico. a. 1932*]. Havsforskningsinst. Skr., 91, 1-14. Helsinki (1933). **a - 451**

Rapport du Directeur: Personnel et administration. Expéditions. Observations sur le niveau de l'eau. Observations thalassologiques dans les stations fixes. Conditions des glaces pendant l'hiver 1931-32. Travaux chimiques. Publications. Données statistiques. Instruments, meubles, bibliothèque.

**Grigoriev A. A.** - Le premier Congrès Géographique de l'U. S. S. R. [*Congressus prior Geographicus a Republica Sovietica habitus*]. Izv. Gos. Geogr., Obstsch. (Bull. Soc. Géogr. de l'Etat), LXV, 6, 475-495. Moskva (1933). **a - 452**

Compte rendu du Congrès qui a été convoqué du 11 au 18 Avril 1933 à Léningrad. Développement de la géographie soviétique. Inauguration et organisation du Congrès. Titres des rapports et résolutions adoptées concernant la géographie physique, la cartographie et la géographie mathématique, la géomorphologie et les disciplines connexes, l'hydrologie et la climatologie, la géographie biologique, la géographie économique, l'ethnographie, les problèmes de l'Arctique, l'enseignement de la géographie et l'organisation et fondation des instituts et des collections géographiques.

**Helland-Hansen Bjørn** - Det Geofysiske Institutt [*Institutum Geophysicum*]. Bergens Mus. Årsber. 1932-1933, 61-68. Bergen (1933). **a - 453**

Rapport concernant les savants qui ont entrepris des recherches auprès de l'Institut, publications. A. Section d'Hydrographie: Recherches entreprises dans plusieurs fiords, entre lesquelles sont à noter surtout celles par J. E. Fjeldstad sur les ondes internes et la conduction de chaleur dans la mer, analyse harmonique sur les marées. B. Section de météorologie technique: Nouvelle publication « Physikalische Hydrodynamik mit Anwendungen auf die dynamische Meteorologie ». La participation du Directeur, Prof. J. Bjerknes, au congrès de Chicago. Recherches aérologiques, ballons-sonde; publications. Section C. Magnétisme terrestre et physique cosmique. Conférences et cours, publications, mesurages magnétiques dans la Norvège méridionale et dans l'îsle de Mayen, instruments et équipement. La commission géophysique: Membres. La Société géophysique norvégienne: réunion annuelle.

**Huber A.** - Bericht über die 18. allgemeine Versammlung der Deutschen Meteorologischen Gesellschaft zu Hamburg vom 2-5. Oktober 1933. Feier des 50- jährigen Bestehens der Gesellschaft [*Relatio de conventu Societatis meteorologicæ Germanicæ Hamburgi habito a die 2 ad 5 octobris 1933, quinquagesimo recurrente jubilaeo*]. Meteorol. Ztschr. L, 12, 441-447. Braunschweig (1933). **a - 454**

Anwesende Mitglieder. Reden. Rechenschaftsbericht. Zahl der Mitglieder. Wahl der Ehrenmitglieder. Beschlüsse. Stiftung des Wigandpreises. Fachsitzungen und Vorträge, welche in diesem Heft in Auszügen mitgeteilt sind.

**Le Danois Ed.** - Rapport Administratif du Comité du Plateau Continental Atlantique [*Relatio ad administrationem pertinens Comitati pro Platea Continentali Atlantica*]. 1 tabl., Rapp. Pr.-Verb. Cons. Inst. Expl. Mer, LXXXIV, 5. Copenhague (1933). **a - 455**

Résumé des travaux accomplis par le Comité.

**Le Danois Ed.** - Rapport administratif sur le fonctionnement du Comité du Plateau Continental Atlantique [*Relatio ad administrationem pertinens de functione et activitate Comitati pro Platea Continentali Atlantica*]. Rapp. Pr.-Verb. Cons. Int. Expl. Mer, LXXXVII, 5. Copenhague (1934). **a - 456**

Compte rendu de l'activité du Comité en 1932; croisières effectuées; réunion tenue à Madrid et à Cadiz.

**Lewis H. Mabel** - The Physical and Chemical Oceanography of the Irish Sea. A Bibliography [*De oceanographia physica et chemica Maris Hiberni. Bibliographia*]. Journ. Cons. Int. Expl. Mer, IX, 1, 87-92. Copenhague (1934). **a - 457**

**Lugeon Jean** - L'institut National Météorologique de Pologne. Organisation du Bureau Central météorologique, Observatoire aérologique, Observatoire maritime, Station magnétique [*Institutum Nationale Meteorologicum Polonum. Observatorium aërologicum, observatorium maritimum, statio magnetica*]. 1 vol., 222 pp. Varsovie (1932). **a - 458**

L'A., directeur de l'Institut National météorologique de Pologne, réunit dans le présent volume, après un bref aperçu historique de l'Institut, une documentation très intéressante sur son organisation, son fonctionnement, ses travaux et sur les buts qu'il poursuit. En dehors des informations sur les institutions mentionnées dans le titre, l'ouvrage contient aussi des données sur l'organisation et le fonctionnement de la Station Centrale de Météorologie militaire et de l'Observatoire magnétique de Hell.

**Magrini G., Picotti M. & Revelli P. (Consiglio Nazionale delle Ricerche)** - Partecipazione italiana alla Mostra oceanografica Internazionale di Siviglia (1929) [*Expositio oceanographica internationalis Hispaliensis a. 1929. Participatio Italica*]. 216 pp., 21 tav. f. t., Tip. S. I. A. G. Stabi-

limenti Italiani Arti Grafiche. A cura di Paolo Revelli, Genova (1934). **a - 459**

Per il maggior sviluppo dell'oceanografia occorre rendere i diversi dati. raccolti nelle esplorazioni scientifiche compiute dai diversi paesi, paragonabili fra loro. Sorse da ciò l'iniziativa di riunire, in un'apposita Esposizione internazionale, gli strumenti per le ricerche oceanografiche e idrologiche usati nei diversi paesi per permettere ad una Commissione di esperti di conoscere e esaminarli insieme con i metodi di impiego e suggerire ai ricercatori quali di essi strumenti e metodi è opportuno preferire e quali avvertenze devonsi avere per rendere i dati raccolti confrontabili fra loro e utilizzabili in una sintesi generale. E questo fu lo scopo principale della Esposizione di Siviglia. La materia del volume è trattata nei seguenti capitoli: La partecipazione italiana alla Mostra Oceanografica Internazionale di Siviglia. La preparazione della Mostra Italiana ordinata dal C. N. R. in occasione del Congresso Internazionale oceanografico, idrografico ed idrologico di Siviglia. Catalogo della Mostra Italiana c. s. Elenco degli Istituti e degli Enti che in Genova, patria di Cristoforo Colombo, attendono a ricerche di idrografia marina e di oceanografia, o concorrono in vari modi e in varie forme, a promuovere studi sull'importanza del mare nella storia e nella vita d'Italia. Il laboratorio di biologia marina a S. Giuliano (Genova). Il Civico Museo Navale di Genova. Distribuzione geografica degli Enti e degli Istituti che hanno inviato strumenti, grafici, disegni e pubblicazioni alla Mostra, o ne hanno agevolato in varii modi l'ordinamento.

**Marmer H. A.** - Oceanography, the Science of the Sea [*De oceanographia*] (In Engl. and French) Scientia, a. XXVIII, vol. LVI, 267, 1-8, Suppl. 1-8. Bologna (1934).

**Migliorini Elio** - Bibliografia geografica della Regione Italiana [*Bibliographia geographica Italiæ*]. Boll. R. Geogr. It., 12, 803-936. Roma (1933). **a - 461**

Vengono elencate 1150 pubblicazioni italiane o straniere apparse sotto forma di volume o di articolo di rivista nel 1931 (ed eventualmente negli anni precedenti qualora non fossero state ancora segnalate), le quali trattano argomenti geografici oppure contengono dei materiali che possono essere utilmente consultati dal geografo. È dato anche un cenno del contenuto ed aggiunto un indice dei nomi che facilita la consultazione. La rassegna mantiene lo schema generale dei 7 fascicoli già pubblicati negli anni precedenti, i primi tre (1925-1927) sotto gli auspici del Comitato Nazionale per la Geografia del Consiglio delle Ricerche, i quattro seguenti (1928-1931) nel Bollettino della R. Società Geografica (serie VI, Volumi VI-IX, fascicoli di dicembre).

**Murray Luck J.** - The Seventeenth Annual Meeting of the Pacific Division. (American Assoc. Advanc. Science) [*De XVII° conventu annuo Sectionis pro Oceano Pacifico*]. Science, LXXVIII, 2024, 322-323. New York (1933). **a - 462**

Rôle of the freight conferences in the regulation of the trade. Their strong and weak points.

**Perrier Georges** - Bibliographie [*Bibliographia*]. Bull. Géod., 37, 101-114. Toulouse-Paris (1933). **a - 464**

Projet d'une bibliographie géodésique internationale. Etat actuel des travaux. Mise au point du premier volume. Propositions et règles générales adoptées. Collaborateurs de la bibliographie.

**Platania Giovanni** - Gli isogrammi. Proposta di revisione della terminologia [*De isogrammatis eorumque nomenclatura recognoscenda*]. Ann. del R. Ist. Sup. Navale, II, 2, 235-241. Napoli (1933). **a - 465**

Nella rappresentazione delle carte topografiche o meteorologiche, in generale nelle rappresentazioni cartografiche scientifiche, si adoperano non poche parole composte col prefisso *iso*. L'autore riprende in esame questi termini, adoperati in geofisica, sia perchè alcuni di essi non sono ben noti se non a speciali studiosi, sia perchè ritiene si debba fare una revisione di alcune di queste voci.

**Proudman J. & Doodson A. T.** - Liverpool Observatory and Tidal Institute [*Observatorium et Institutum pro maris aestibus ad* Liverpool *pertinentia. Relatio annua 1933*]. 1 phot., tabl., 16 pp. Liverpool (1934). **a - 466**

Governing Committee and scientific staff of the Observatory and the Institute. List of publications issued. Research conducted by the laboratory and the Institute. Machines and instruments. Tidal analysis and predictions. Meteorological summary for 1933.

**Richmond H. W.** - Naval Training [*Præcepta nautica*]. Oxford University Press. London (1933). **a - 467**

The A. was director of the Naval College of Greenwich. The book concerns principally the training of war naval officers.

**Schäfer Brenhilda** - Uniformity in Bibliography Particulars [*De præcipuitatibus bibliographicis unificandis*]. Nature, CXXXIII, 3358, 380-381. London (1934). **a - 468**

On the convenience of indexing the particulars of separates in an order which ought to be universally respected.

**Soler E. & Boaga G.** - Bibliographia Geodetica Italiana (1921-1930) [*Bibliographia Geodetica Italica (1921-1930)*]. Pubblicazioni della R. Commissione Geodetica It., nuova serie, n. 8, 71. Padova (1933). **a - 469**

La presente Bibliografia Geodetica Italiana, che riguarda il periodo 1921-1930, è una continuazione di quella pubblicata nel 1921 per iniziativa della R. Commissione Geodetica Italiana, ed è stata compilata per incarico della commissione stessa. Ogni pubblicazione porta tutti i dati bibliografici che possono servire a ritrovarla facilmente, ed è seguita da un sunto il più possibilmente esteso per dare un'idea chiara del contenuto.

**Toth G.** - Die Teilnahme Ungarns am Zweiten Internationalen Polarjahr [*II.us Annus Polaris Intern. Participatio Hungara*]. Az Idöjaras, 9, 150-155, 10, 181-182. Budapest (1933). **a - 470**

**Wedemeyer A. & Peter Chr.** - Der Rechenstab im Unterricht der Seefahrtschulen [*Regulus logaritmicus eiusque utilitas in scholis nauticis*]. Ann. d. Hydrogr., LXII, 2, 83. Berlin (1934). **a - 471**

Herr A. Wedemeyer behauptet, der Rechenstab und die Rechenmaschine seien für die Seefahrt ungeeignet, hauptsächlich weil sie weder dem Benutzer noch einer anderen Person die Möglichkeit der Prüfung der Rechnung gestatten. Dr. Chr. Peter bemerkt zu den vorstehenden Ausführungen, dass, seiner Ansicht nach, ohne die Meinung Herrn A. Wedemeyer zu bestreiten, der Rechenstab in der Navigation als Ergänzungs- und Kontrollmittel dienen sollte.

Résumé de la Conférence faite par M. l'amiral Loizeau sur le « IV-ème centenaire du Canada », qui illustre l'histoire de la découverte de ce Pays sur la base tout particulièrement des ouvrages de M. Biggar, chef-archiviste du Gouvernement canadien en Europe : « Les précurseurs de Jacques Cartier ; les voyages de Jacques Cartier ; Collection des documents relatifs à Jacques Cartier et au sieur de Roberval ». Le rôle de la France dans l'histoire du Canada. Sur la base de trois cartes l'A. fait la comparaison des routes transocéaniques, décrit les routes à la voile de Colomb et d'Alain Gerbault, du Zeppelin et fait des recherches du vent favorable pour la traversée, ainsi que des itinéraires des deux premiers voyages d'exploration faits au Canada en 1534 et 1535-36 respectivement.

**Society for Nautical Research** - Annual Report for the Year 1933, Rules, etc. [*Relatio annua pro a. 1933. Regulamenta etc.*]. xxiv pls. 135 pp., R. Nav. Coll., Greenwich (1934). **a - 486**

Pars VII.a De radiatione totali a Sole et a Coelo in* Sveanor (*79° 56', 5 N, 18° 18' E.*)]. Tabl., Geogr. Ann., 2/3, 147-156. Stockholm (1933). **a - 510**

Short note on preceding work in these regions. Description of the instruments. Tables giving the records of the measurements for every hour, comparison with values obtained from some other stations at high latitudes for the same month, values given in gram calories per square centimeter and minute.

**Apollonov D. M.** - The Voyage of the S/S « Smolny » to Franz-Joseph Land in 1933 [*De navigatione navis* « Smolny » *ad Terram Francisci Josephi a. 1933*] (In Russ. & Engl.). 2 figs., Bull. Arct. Inst., 11, 342-344, 383-385. Leningrad (1933). **a - 511**

The route of the vessel from Murmansk to the Franz-Joseph Archipelago. During the voyage a number of errors in the latest maps of Franz Joseph Land have been detected and several new islands discovered. Account of the corrections in the cartography of the region and the new land discovered.

**Astrova M.** - The Voyage of the Ice-Breaker « Russanov » to the Maria Pronchischeva Bay [*De navigatione navis glacieiruptricis* « Russanov » *ad Bajam* « Maria Pronchischeva »] (In Russ. & Engl.). Bull. Arct. Inst. 340-341, 385-387. Leningrad ((1933). **a - 512**

Account of the expedition which lasted from August to October 1933 and whose aim was to convey a party of hunters to the Maria Pronchischeva Bay in the eastern part of the Taimyr Peninsula. Observations on ice-conditions, on the temperature of the surface-layer of the water have been made, and samples taken for chemical analysis. Some meteorological and hydrobiological researches have also been performed.

**Belknap R. L.** - The Michigan-Pan American Airways Greenland Expedition. Preliminary Results [*De aëronavigatione* « Michigan-Pan American » *in Groënlandiam. Resultatus priores*]. 9 figs., Geogr. Rev., XXIV, 1, 205-218. New York (1934). **a - 513**

A brief account of the preliminary results of the University of Michigan-Pan American Airways Greenland Expedition, organized in the spring 1932 to make certain glaciological investigations and to take part in the Second International Polar Year Program. The base station of the expedition has been established on the Upper Nugssuak near the Cornell Clacier in the Upernivik district on the west coast of Greenland at about lat. 74° 19' N. and long. 56° 08' W. Some additions to the existing maps of the part of Greenland, where the expedition was located, have been made, a resurvey of the Cornell Glacier carried out and special studies conducted in connection with the study of glaciation.

Meteorologia, Fisica del mar, Quimica del mar, Registro general de observaciones y datos numéricos.

**Bigelow Henry B.** - Northwestern Atlantic in 1931 [*De Oceano Atlantico Nord-orientali a. 1931*]. 1 tabl., Rep. Comm. Submar. Config. & Ocean. Circ. Nat. Res. Counc., 1932, 26-54. Washington, D. C. (1932). **a - 515**

Account of oceanographic investigations carried out by the following organizations and vessels: Biological Board of Canada, Institution of Marine Biology of Laval University, serial records of temperature and salinity taken from the trawler « Cape Agulhas » at 92 stations over the region of the Grand Banks around the coasts of Newfoundland and northward

along the coast of Labrador to lat. about 54° ; the International Passamaquoddy Fisheries Commission, whose investigation covers physical hydrography, phytoplankton and chemistry, zooplankton and herring ; hydrographic expedition to the Bahama waters organized by the Bingham Oceanographic Foundation of Yale University ; cruises of the International Ice Patrol ; biological investigations of the New York Zoological Society ; activity of the North American Council for Fisheries Investigations ; expedition of the Princeton University in the West Indian region ; joint program of the United States Bureau of Fisheries and the Museum of Comparative Zoology. Woods Hole Oceanographic Institution : the maiden voyage of the « Atlantis », drift bottles experiment, 1931 ; projects of investigations commenced and carried on during 1931.

**Bordoni U.** - L'Istituto Nazionale di Ottica. Relazione alla I Riunione dell'Associazione Ottica Italiana [*Institutum Nationale Opticum. Relatio ad I.um Consessum Societatis Opticæ Italicæ*]. (Firenze 21-24 maggio 1934-XII). Ric. Scient., a. V, I, 9/10, 480-484. Roma (1934). **a - 516**

**Boyd Louise A.** - Further Explorations in East Greenland, 1933 [*Explorationes novæ in Groënlandia occidentali a. 1933*]. 12 figs., Geogr. Rev., XXIV, 3, 465-477. New York (1934). **a - 517**

This second expedition of the author to East Greenland was made for the particular study of the fjords and glacial marginal features. The Danish and Norwegian expeditions having practically completed the exploratory survey of the region, the American expedition planned to map small, critically selected areas in detail, using a Wild phototthoedolite. An account of this work is given here.

**Byrd Richard E. & Saunders Harold E.** - The Flight to Marie Byrd Land with a Description of the Map [*Navigato aëria ad* M. B. Land]. 29 figs., 1 sep. map., Geogr. Rev., XXIII, 2, 177-209. New York (1933). **a - 518**

Part I. The Flight (by Adm. R. E. Byrd) : The course set northeastward. Scott's Nunantakas. Other peaks of the Alexandra Mountains. Discovery of the Edsel Ford range. The continental shoreline in Marie Byrd Land. Glaciers and bergs. Appearance of islands in the Ross Sea. La Gorge Mountain group. Return to Little America. Results of the flight : developing of the details of King Edward VII Land, extension of the outline of the coast beyond by 200 miles, and filling in a great section of the map that had hitherto been blank. Part II. The Map (by H. E. Saunders) : The map considered as a preliminary reconnaissance survey. Identification of points. Methods of plotting employed. Plotting of bearings. Multiple-arm protractor for plotting. Orientation of photographs and plots. Scale determination. Determination of heights. Detailed plotting procedure.

**Evghenov N.** - Sur les travaux de la direction pour la Sibérie Occidentale du Service Hydrographique de l'Administration de la Voie Maritime du Nord en 1933 [*De operibus peractis a Directione pro Siberia Occidentali Servitii Hydrographici ad Administrationem Cursus Maritimi Nordici pertinentis a. 1933*] (En russe). Bull. Arct. Inst., 12, 418-419. Léningrad (1933). **a - 519**

Compte rendu des travaux au cours desquels une exploration systématique de la région à l'ouest du fleuve Yenissey a été accomplie, ainsi que la détermination de quelques points astronomiques de grande précision à l'aide de la T. S. F., dont quatre ont été déterminées sur le littoral continental sur le Cap Kouznetzkij, le Cap des Deux Ours, à Morzhovoje et dans l'embouchure de la rivière Pjasina, tandis que dix autres ont été faits sur l'Ile de Vilkitzkij, l'Ile de Néoupokoev, quelques îles dans la zone de la Baie de Pjasina et les îlots de Minine, ainsi que sur l'Ile de Scott-Hansen et l'Ile de Sverdrup. En outre des levés de reconnaissance très importants du relief du fond de la mer au nord-ouest de l'Ile de Dickson, et d'un des bras du delta du fleuve Obj, des travaux hydrologiques sur les marées, les courants, la température et la salinité des eaux, des observations magnétiques et la construction de signaux de navigation sur plusieurs points de la région explorée ont été effectués.

**Evghenov N.** - Expedition in 1933 of the Siberian Hydrographic Department of the Central Administration of the Northern Sea Route [*Expeditio a. 1933 peracta a Dipartimento Hydrographico Siberiano ad Administrationem Centralem pro Cursu Maritimo Nordico pertinente*] (In Russ. & Engl.). Bull. Arct. Inst., 1, 4-5, 35-36. Leningrad (1934). **a - 520**

Account of the expedition on six hydrographical research vessels divided into the three following detachments : 1) the Kara Sea party on board the « Circule » and the « Farvater » ; 2) the party of the Obj District on the « Chronometer » and the « Stativ », and 3) the party of the Yenissey District on the « Schturman » and « Shirota ». During the expedition hydrological and geographical survey has been performed, 15 astronomical points determined, and 21 navigation marks erected.

**Fleming J. A.** - Introduction [*Introductio*]. Nat. Res. Counc., Trans. Amer. Geophys. Union, 14th Ann. Meet., Apr. 27-29, 3-4. Washington, D. C. (1933). **a - 521**

Object of the American Geophysical Union ; the seven Sections of the Union ; Publications of the Union ; summary of the work of the 14th annual Meeting of the Union.

**Fleming J. A.** - Progress-Report on the International Polar Year of 1932-33 [*Relatio de progressibus scientificis peractis anno Polari perdurante 1932-33*]. 10 figs., 1 tabl., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., apr. 27-29, 1933, 145-146. Washington, D. C. (1933). **a - 522**

On hand of information printed in various publications, the author gives a summary of the program of the Second International Polar Year dealing especially with the program and activity of the College-Fairbanks station, and the other stations established by the United States and Canada. The distribution of temporary and permanent electric stations in the southern and northern hemisphere is indicated on two figures and a list is given of the stations of the international Polar year of 1932-33 and their approximate geographic position.

**Fleming John A.** - Progress Report on Compilation of Oceanographic Results of the « Carnegie » Cruise, 1928-29 [*Relatio de resultatibus Oceanographicis ex navigatione navis* « Carnegie » *1928-29*]. Rep. Com. Submar. Conf. & Ocean. Circ., Nat. Res. Counc., 1932, 83-88. Washington, D. C. (1932). **a - 523**

Further progress in the reductions and compilations of the oceanographic data obtained on the « Carnegie », which complete those published in Report Comm. Subm. etc. 1931. Summary of the results in physical and chemical oceanography to be published in separate volumes, as well as of gravity observations, pilot-balloon observations, meteorological data collected and biological investigations.

**Fleming John A.** - Oceanographic Work in the Polar Regions [*Opus oceanographicum peractum in regionibus polaribus*]. Rep. Comm. Submar. Config. & Ocean Circ., Nat. Res. Counc., 1932, 88-90. Washington, D. C. (1932). **a - 524**

Oceanographic measurements made during the Wilkins-Ellsworth Trans-Arctic Submarine Expedition ; magnetic determinations made during the « Graf Zeppelin » Expedition in July 1931 and oceanographic work of « Discovery II » and « Scoresby ».

**Fund Johnson** - Station Records of the First Johnson-Smithsonian Deep-Sea Expedition [*Inscriptio stationum ad I.am Expeditionem* Johnson-Smithsonian *maris abyssis studendis susceptam pertinentium*]. 1 pl., 1 chart on table, 31 pp., Smiths. Misc. Coll., XCI, 1. Washington, D. C. (1933). **a - 525**

**Gherardi W. R.** - Oceanographic Work of the Hydrographic Office and the United States Navy during the Past Year [*Opus oceanographicum peractum ab Officio Oceanographico et a Marina Provinciarum Foederatarum Americæ anno elapso*]. 6 figs., 1 tabl., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 180-193. Washington, D. C. (1933). **a - 526**

Naval surveys. Charts from United States naval surveys. Sonic sounding obtained by United States Naval vessels. Unsounded areas of the North Pacific Ocean. Bathymetrical chart of the North Pacific Ocean. Current-charts. Oceanic temperatures. Mechanical extraction of oceanographic data. Dynamic oceanographic surveys. International Scientific Expedition to West Indies. Navigator's Sailing Directions or Pilots. Navigational manual. Magnetic charts.

**Gorbatzkij G. V.** - The Work of the Expedition to the Northern Part of Novaja Zemlja [*Opus peractum ab expeditione in regionem septentrionalem Novæ Zemliæ*]. (In Russ., Engl. Summ.). Bull. Arct. Inst., 11, 335-337, 380-381. Leningrad (1933). **a - 527**

Account of the expedition, which, starting from Leningrad on July 15th 1933 followed the way of the White-Sea-Baltic Channel on board the « Iceberg ». The aim of the expedition was the geological exploration of the northern part of Novaja Zemlja. The instrumental-topographic survey of the area has greatly changed the former idea of the coastal profile of the northern part of Novaja Zemlja. Some very important corrections have also been made on the existing chart of the region under consideration.

**Heyrelles François** - « Le Président Théodore-Tissier ». Navire de recherches scientifiques de l'Office des Pêches Maritimes [*Navis cuius nomen* « Presidente Théodore-Tissier » *ad scientificas investigationes peragendas idonea*]. 1 fig., Bull. Soc. Oceanogr. France, 73, 1293-1295, 74, 1297-1298. Paris (1933). **a - 528**

Bref résumé de l'activité de l'Office technique et scientifique des Pêches maritimes. Quelques précisions sur les appareils mis à la disposition des savants pour leurs travaux à bord du nouveau navire de recherche de l'Office « Le Président Théodore Tissier » : Outillage hydrographique, outillage océanographique, outillage de laboratoire, outillage de pêche, outillage frigorifique.

**Hidaka K., Matudaira Y., Mizuuti M., Kubo T., Yasui Z., Kurasige H., Yanagisawa T. & Kato T.** - The Results of the Oceanographical Expedition of R. M. S. « Syunpu Maru » to the Northern Part of the Japan Sea in the Summer of 1931 and 1932 [*De resultatibus ex oceanographica expeditione navis* « Syunpu Maru » *in sectorem nordicum Maris Japonii æstate 1931 et 1932*]. 4 tabl., 101 pls. Journ. Oceanogr., VI, 1, 1-102. Kobe, Japan (1934). **a - 529**

The present report contains the results of the 4th and 5th expeditions of 1931 and 1934 (s. account of the previous expeditions in the Vols. II, III and IV of the Journ.) : 1) Stations and sections ; 2) Classification of the observations : 3) Tables ; 4) Water temperature ; 5) Density ; 6) Dynamic calculation ; 7) $0_2$, pH, Phosphates, silicates, nitrates and nitrites ; 8) Meteorological elements ; 9) Planktons ; 9) Terrestrial magnetism.

**Hoel Adolf** - Norwegian Expedition to Spitsbergen and East Greenland [*De navigatione a Norvegis suscepta in* Spitsbergen *et Groënlandiam Occident.*] (In Russ. & Engl.). Bull Arct. Inst., XII, 430-431, 443. Leningrad (1933). **a - 530**

Brief account of the work of the expedition sent out by Norges Svalbard-og-Ishavs- Undersökelser to Spitsbergen and East Greenland from June 24 to August 27, 1933 on the ship « Polarbjörn ». Building of a wireless station and lighthouses ; tne staff of the expedition ; the work performed.

**Horn Gunnar** - Norges Svalbard- og Ishavsundersøkelsers ekspedisjon til Sydøstgrønland med « Veslemari » sommeren 1932 [*De expeditione á Norvegis suscepta æstate 1932 navis* « Veslemari » *auxilio, inquisitionibus ducendis scientificis in* Svalbard *insulas ac mare Arcticum*]. 7 fig., Norsk Geogr. Tidsskr., IV, 7, 3, 409-441. Oslo (1933). **a - 531**

Le but de cette expédition était de continuer le travail commencé par les expéditions « Heimen » et « Signalhorn » au Groenland sud - est en 1931, c'est à dire, de passer par toute la région explorée par les Norvégiens de 60° 30' jusqu' au 63° 40' N. Equipement de l'expédition. Description détaillée du voyage.

**Hoyle R. M.** - Oceanographic Work of the Coast Guard in 1932 and Plans for 1933 [*Opus oceanographicum peractum a navibus litorum præsidiariis a. 1932. Rationes pro a. 1933*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 193-194. Washington, D. C. (1933). **a - 532**

Account of the work of the third of the three vessels assigned in 1932 to Ice Patrol duty, the « General Green », especially equipped for oceanographic investigation. Her duty was to make a preliminary observation-cruise to determine ice-conditions prior to the inauguration of the regular patrol and to make regular oceanographic surveys about the Great Banks of the critical ice-regions during the ice-season. Brief discussion of the practical use of the dynamic current-charts and isotherm charts in predicting ice-drifts.

**Iselin C. O'D. II** - Some Phases of Modern Deep-Sea Oceanography [*Res ad oceanographiam hodiernam abyssalem pertinentes*]. 1 fig., 4 pls. Smithsonian Rep. 1932, 251-267. Washington, D. C. Contr. 14, Woods Hole Oceanogr. Inst. Woods Hole, Mass. (1933). **a - 533**

After some general consideration on the aim and scope of the shallow-water and deep-sea oceanography, the author gives the description of the « Atlantis », which, operated by the Woods Hole Oceanographic Institution, is one of the most modern examples of a scientific research ship. Investigations made by the « Atlantis » during the past year concerned with the current system, the water movements (horizontal and vertical), the oceanic circulation and its foremost problems.

**Ivanov I. M.** - The Work of the Arctic Coal Trust at Spitzbergen [*De operibus peractis a Societate* «*anglice* Trust» *pro Carbone Arctico in* Spitzbergen]. Bull. Arct. Inst., 9/10, 286-288, 321. Leningrad (1933). **a - 534**

Results of the geological expedition to the region of Soviet mines on Spitzbergen during which some hydrographical, hydrological, and topographic work has been performed.

**John D. Dilwyn** - The Work of R. R. S. « Discovery II » 1931-33 [*De operibus navis inquirentis nomine* « Discovery II » *peractis 1931-33*]. 1 chart, Pol. Rec., 6, 128-131. Cambridge (1933). **a - 535**

Account of the second commission in Antarctic waters of the Royal Research Ship « Discovery II », which left London on October 3, 1931, and returned on May 5, 1933. Hydrological and plankton surveys of the waters of the Falkland Sector. Geographical limits of the surveys. Observations in the Weddel Sea with peculiar reference to its currents. Complete circumnavigation of the Antarctic. Records on weather and pack-ice. Cartographic work in the South Orkney Islands : survey of the group, correction of the coastal line on the map, geological and biological investigation of the islands. The loss of the Captain, Commander W. M. Carey, R. N.

*a. 1931-1933*]. 4 fig., 1 carta, Norsk Geogr. Tidsskr., V, 2, 72-94. Oslo (1934). **a - 547**

Le spedizioni del 1931, del 1932 e del 1933. Navi e partecipanti. Descrizione del viaggio. Risultati : determinazioni astronomiche della latitudine, della longitudine ed azimut ; rilievi per costruzione di carte geografiche ; osservazioni idrografiche, geologiche e biologiche.

**Rasmussen Knud** - Explorations in Southeastern Greenland. Preliminary Report of the Sixth and Seventh Thule Expeditions [*De explorationibus in Groënlandia Sud-orientali. Relatio prior sextæ ac septimæ expeditionis* Thule *nomine*]. 7 figs., Geogr. Rev., XXIII, 3, 385-391. New York (1933). **a - 548**

Course of the 1931 Expedition, a reconnaissance along the southeastern coast of Greenland, which owes its successful accomplishment to the unusual conditions obtained in 1931. Results of the Sixth Thule Expedition ; magnetic and cartographic work of the expedition. The Seventh Thule Expedition, 1932 : complete exploration (topographical, geological, and archeological) of the stretch from Umivik to Cape Farewell by means of some 20.000 km. of motor boat's travelling and 125 flyings hours of the seaplane.

**Ratmanov G. E.** - Expedition of the State Hydrological Institute to Bering Sea in 1933 [*Expeditio ad Mare* Bering *nomine ab Instituto Hydrologico nationali peracta a. 1933*] (In Russ. & Engl.). Bull. Arct. Inst., 3, 116-118. 155-157. Leningrad (1934). **a - 549**

Staff and program of work of a complex expedition equipped by the State Hydrological Institute together with the Pacific Fisheries Institute in 1933 in order to continue the work begun in 1932 in the northern part of the Bering Sea, in the Bering Strait and in the Chukchee Sea. Route of the expedition from Vladivostok to the Bering and Chukchee Seas. Results of the observations, and the hydrological sections with especial reference to the determination of the boundaries of the cold Anadyrj spot and the water-temperature in the region under consideration. Verification of the current chart of 1932 which proved to be correct. Ice conditions, and discovery of a circular current in the SW part of the Chukchee Sea.

**Samoilovitsch R. L.** - L'expédition allemande au Groënland et ses travaux scientifiques [*De expeditione a Germanis suscepta in Groënlandiam eiusque operibus scientificis*] (En russe). 5 fig., Arctica, 1, 31-40. Léningrad (1933). **a - 550**

But de la « Deutsche Grönland-Expedition Alfred Wegener ». Les trois stations de l'expédition. Le personnel de l'expédition. Principaux résultats des travaux scientifiques de l'expédition : mesure de l'épaisseur de la couche de glace continentale de la rive Est jusqu'à la station centrale de l'expédition, levé du profil de la calotte glaciaire du Groenland, mesures gravimétriques exécutés sur cinq points du littoral, étude des propriétés physiques, de la température, du poids spécifique, de la stratification et de la structure de la glace, mouvements des glaces continentales. Observations météorologiques et aérologiques. Description de la méthode séismique pour la détermination de la structure et de l'épaisseur de la glace.

**Samojlovitsch R. L.** - Expeditions equipped by the Arctic Institute and the Chief Administration of the Northern-Sea-Route in 1933 [*Expeditiones peractæ ab Instituto Arctico ac Directione Centrali pro cursu Maritimo Nordico a. 1933*] (In Russ., Engl. Summ.). Bull. Arct. Inst., 9/10, 269-274, 312-316. Leningrad (1933). **a - 551**

General account of the work of exploration concerned with the Northern Sea-route made since 1928. Sea-expedition of the « Stalin », the « Volodarskij » and the « Pravda », sent from the West to the mouth of the Lena River. The repetition of the last year's voyage of the « Sibirjakov » by the newly built ice-breaker « Tscheljuskin ». The work of the ice-breaker « Krassin ». The expedition of the « Sedov ». Account of the air-service in the Arctic. For the first time in the history of Arctic explorations in 1933 over 40 ships of various types (including the vessels of the Kara Expedition) were navigating there.

**Samoilovitsch R. L.** - Observations géomorphologiques et glaciologiques au cours de la navigation du dirigeable « Comte Zeppelin » en été 1931 [*Observationes geomorphologicæ et glaciologicæ peractæ expeditione perdurante aëronavis* « Graf Zeppelin » *æstate 1931*]. 3 fig., Trans. Arct. Inst., XII, 5-23. Leningrad (1933). **a - 552**

But de l'expédition. Observations générales : Le but de l'expédition organisée par la Société Internationale « Aéroarctique » a été l'exploration des zones peu connues ou inconnues de la région polaire sur la base des recherches géographiques et géomorphologiques, et des prises de vue aériennes. Compte rendu sur le vol Friedrichshafen-Berlin- Arkhangel. Ile Morzhovetz. Péninsule Kanine ; Terre de François-Joseph : Observations glaciologiques sur la Terre du Prince Georges et Alexandre. Les Iles Belyjé. Severnaja Semlja : Position géographique. Section horizontale. Observations géomorphologiques. Réseau hydrographique. Formes de congélation. Péninsule Tajmyr. Novaja Zemlja : Formes et limite de congélation. Matotchkine Char. Ile Joushnyj. Conclusions : Importance et avantages de l'emploi du dirigeable pour l'exploration des régions polaires. Installations et aménagement de la gondole en vue des observations à effectuer.

(—) Voir : Bull. Hydrogr. Int., 1, 12-15 et 3, 67-72. Monaco (1934) **a - 557**

Short résumé of the work carried out during the first three months of the expedition. Topography and bottom deposits. Physico-chemical results. Biological observations.

**Slayton C. C.** - Oceanography and the Navy [*Oceanographia*]. 5 figs., and 2 on tabl. U. S. Nav. Inst. Proc., LX, 371, 33-43. Annapolis, Md. (1934). **a - 558**

On the importance of the oceanography to the Navy. Contribution of the Navy to science. Some historical hints. Navy's work. Examples. Progress. Programs. (See discussion on the same number p. 99 by Adm. W. R. Gherardi U. S. N.).

**Sverdrup H. U.** - General Report of the Expedition [*Relatio generalis ad expeditionem pertinens*] 12 figs., on 2 pls., The Norw. North Pol. Exped. « Maud » 1918-1925. Scient. Res., I, 1, 1-22. (1933). **a - 559**

Amundsen's initiative, preparatives and object of the expedition. Equipment, description of the voyage. List of publications dealing with the expeditions.

**Thompson David G.** - Some Relations between Ground-Water Hydrology and Oceanography [*De quibusdam correlationibus inter hydrologiam aquarum subterranearum et oceanographiam*]. Nat. Res. Counc., Trans. Amer., Geoph. Union, 14th Ann. Meet., 27-29 Apr. 1933, 30-33. Washington, D. C. (1933). **a - 560**

Some brief remarks which show that the ground-water hydrologist has a very definite interest in certain phases of oceanography, but that unfortunately he is able to offer little in return to the oceanographer. Some examples are given which illustrate the geologic and hydrologic conditions that govern the occurrence and movement of ground-water in areas along the sea-coasts.

Vortrag von Prof. Kurt Wegener mit einleitenden Worten von F. Schmidt-Ott. Da ein vorläufiger allgemeiner Bericht anlässlich der Gedenkfeier für Alfred Wegener schon gegeben worden ist, (Ztschr. d. Ges. f. Erdk. 3, 4, Berlin, 1932) werden hier nur die rein wissenschaftlichen Ergebnisse in Bezug auf : 1). Meteorologie ; 2) Geodäsie ; 3) Seismik und Glaziologie mitgeteilt.

**Wiese W.** - The Voyage of the Ice-Breaker « Sibirjakov » to Cape Cheliuskin in 1933 [*De navigatione navis glacieruptricis* « Sibirjakov » *ad Caput* Tscheljuskin *a. 1933*] (In Russ., Engl. Rés.). Bull. Arct. Inst., 9/10, 274-278, 316-319. Leningrad (1933). **a - 568**

Account of investigations carried out on board the icebreaker on the way from Archangel to Cape Tcheliuskin and back. Observations on the ice-conditions. Investigation and hydrological survey of the southern shore of the group of islands discovered in 1932 by the « Russanov » expedition. Discovery of a new land named « Arctic Institute Land » whose astronomical position has been determined (preliminary coordinates Lat. 75° 29' N, Long. 89° 24' E.).

**Wiese W.** - Oberflächenbeobachtungen im Barents- und Karischen Meer in Sommer 1930 [*Observationes in stratus superficiales aquarum Maris Barentii et Maris Karensis, æstate, 1930*]. (In Russ., deutsch. Rés.). 7 Abb., u. Kart., Scient. Res. Arctic Exped. on the « Sedov » in 1930. Hydrol. & Meteorol., Trans. Arct. Inst., 1, 1-42. Leningrad (1933). **a - 569**

Ergebnisse der während der Fahrt des Eisbrechers « Sedow » im Sommer 1930 nach Nowaja Zemlja, Franz-Joseph Land und Sewernaja Zemlja jede Stunde ausgeführten Oberflächenwassertemperaturmessungen und Bestimmungen von Chlorgehalt und Alkalinität, sowie der von den Schiffen « Sibiriakow », « Murmanetz » und « Belucha » im Barents- und Karischen Meere ausgeführten Beobachtungen. Zum Schlusse gibt der Vf. eine Liste der vom Eisbrecher « Sedow » ausgesetzten Bojen sowie eine Tabelle an Bord des Schiffes « Murmanetz » ausgeführten Oberflächenwasserbeobachtungen.

**Wiese W. J.** - Die Fahrt des Eisbrechers « Malygin » nach Franz-Joseph Land 1931 [*De navigatione navis galcieiruptricis* «Malyghin» *ad Terram Francisci Josephi a. 1931*] (In russ. mit deutsch. Auszug.). 1 Taf., Trans. Arct. Inst., VI, 1-12. Leningrad (1933). **a - 570**

Kurze Zusammenfassung der Ergebnisse der wissenschaftlichen (meteorologischen, Oberflächenwasser-, erdmagnetischen und Eis-Beobachtungen, welche an Bord des Eisbrechers « Malygin » während seiner arktischen Touristenfahrt nach dem Franz-Joseph Land vom 19. Juli bis zum 20. August 1931 ausgeführt worden sind. Während des Aufenthaltes des Eisbrechers bei Franz-Joseph Land sind auch einige Verbesserungen der Karte des Archipels gemacht worden.

**Wiese W. J.** - Die Expedition mit dem Eisbrecher « Sibirjakov » 1932 [*De navigatione navis glacieiruptricis* « Sibirjakov » *a. 1932*]. (In Russ., deutsch. Rés.). 15 Abb., Trans. Arct. Inst., X, 5-37. Leningrad (1933). **a - 571**

Bericht über die von dem Arktischen Institute organisierte Expedition in die Nordost-Passage, deren Hauptziel war, während einer Saison die Durchfahrt von Archangelsk bis zu dem Stillen Ozean auszuführen. Obwohl die Ausführung wissenschaftlicher Arbeiten nicht als Ziel der Expedition galt, wurden an Bord des Eisbrechers verschiedene Forschungs- und Beobachtungsarbeiten unternommen, über welche in der vorliegenden Zusammenfassung auch kurz berichtet wird.

**Zoubov N. N. & Popov S. V.** - La navigation du « Knipovitsch » en automne 1932 [*De navigatione navis* « Knipovitsch » *autumno 1932*]. Izv. Gos. Geogr. Obstsch. (Bull. Soc. Géogr. Etat), LXV, 1, 72. Léningrad (1933). **a - 572**

Bref compte rendu sur l'armement et le trajet du navire océanographe « Knipovitsch », parti le 18 Août 1932 de Poljarnyj sur la côte de Mourmansk et qui a visité l'Ile Djilos, la Terre d'Alexandre (Archipel François-Joseph), l'Ile Victoria et Belaja Zemlja. Exécution des levés topographiques, de 75 stations océanographiques et de 400 mesurages de profondeur. Conclusions concernant la possibilité des prévisions de l'état des glaces dans la Mer de Barents et dans la région entre la Terre de François-Joseph et la Severnaja Zemlja, deux années à l'avance, sur la base de la température du courant du Cap Nord sur le méridien de Kola.

**A. L.** - Explorations hydrologiques effectuées par l'Institut Arctique sur le Cap Tchéljouskine, dans le Matotchkine Char et sur le Cap Dezhnev en 1932-33 [*De explorationibus hydrologicis in promunturio* Tscheljuskin, *in* Matotschkin Schar *et in promunturio* Dezhnev *peractis per Institutum Arcticum*]. (En russe). Bull. Arct. Inst., 12, 412-414. Leningrad (1933). **a - 576**

Résultats des levés hydrologiques effectués dans le but d'étudier le régime hydrologique du détroit de Vilkitzkij qui représente une des zones les plus importantes au point de vue de la navigation de la Voie Maritime du Nord. Compte rendu des sections effectuées, des déterminations de la température, de la salinité, de l'oxygène dissout, de la concentration d'ions hydrogènes, des observations sur les courants et sur les conditions des glaces.

**M. K.** - The Work of the Polar Station of the Second International Polar Year on Cape Dejnev [*De operibus peractis a Statione polari in promunturio* Dejnev, *perdurante secundo Anno polari in-*

*ternationali*]. (In Russ. & Engl.). Bull. Arct. Inst., 12, 424-425, 463-464. Leningrad (1933). **a - 577**

Short account of the work carried out by the Expedition of the Second International Polar Year at the Cap Dejnev. Considering the unfavourable condition of work and the unsuitability of Cape Dejnev for investigation, the question was raised of transferring the Station to Uellen, previously fixed in view of the work of the Polar Year.

**N. E.** - Le retour des vaisseaux de l'Expédition Nord-Orientale de 1932 [*Reditus navium velis euntium ad expeditionem nord-orientalem a. 1932 peractam pertinentium*]. (En russe). Bull. Arct. Inst., 9/10, 279-283. Léningrad (1933). **a - 578**

Après l'hivernage (v. « Bull. Arct. Inst., n° 5, 118-124, 1933) des vaisseaux faisant part de l'expédition, on renouvela la tentative de retourner à travers le détroit de Bering vers leur point de départ de l'expédition.

Description de ce voyage de retour, à la fin duquel seulement le brise-glace « Litke » èt quatre des bâtiments des six qui composaient l'expédition, ont réussi à se frayer le chemin de retour. Deux bateaux ont du s'arrêter et passer un second hiver dans l'Arctique. Compte rendu du voyage avec référence spéciale à l'état des glaces observé.

**V. E.** - Expédition scientifique et industrielle de l'Institut Arctique à la Novaja Zemlja en 1933 [*De expeditione scientiæ industriæque causa ad Novam Zemliam, a. 1933 ab Instituto Arctico peracta*]. (En russe et angl.). Bull. Arct. Inst., 9/10, 283-284 & 320. Leningrad (1933). **a - 579**

Compte rendu des résultats des travaux accomplis pendant l'expédition. Le programme concerne presque toutes les branches de l'exploitation industrielle de la Novaja Zemlja. Des observations hydrologiques et hydrobiologiques ont été effectuées, ainsi que l'exploration du littoral de l'île méridionale entre la baie de Brandt et la baie Neznaemaja.

**An.** - On Board the S/S « Tscheljuskin » [*De navigatione in navi Sovietica* « Tscheljuskin » *nomine*] (In Russ. & Engl.). Bull. Arct. Inst., 1, 3-4, 32-33. Leningrad (1934). **a - 580**

Information received by radio on the drift of the « Tscheljuskin » in the Chukchee Sea begun on October 11th, 1933 ; report of the drift received from the hydrologist of the expedition ; account of hydrological and hydrographical work carried out in the Kara, Siberian and Laptev Sea.

**An.** - Année Polaire Internationale [*Annus Polaris Internationalis*]. (En russe). Bull. Arct. Inst., 3, 135-137. Leningrad (1934). **a - 581**

Activité des stations : de la station anglaise dans le Fort Ray, des stations canadiennes à Coppermine, Minuken, Houp-Edwans, Chesterfield Inlet, de la station allemande à Arsouka (Groenland), de la station autrichienne à Jean-Mayen, de la station hollandaise à Reikjawik, de la station suisso-danoise à Snefelsjökul (Islande), de la station suédoise à Bellsund (Spitzbergen) et sur la montagne de Nordenskjöld. Participation du Chili par la construction d'une station dans le détroit de Magellan.

**An.** - Les travaux des expéditions de Knud Rasmussen en 1931 et 1932 [*De operibus peractis perdurantibus expeditionibus a* Knud Rasmussen *susceptis a. 1931 et 1932*] (En russe). Bull. Arct. Inst., 9/10, 299-302. Leningrad (1933). **a - 582**

A compléter les informations publiées dans le n° 4 du Bull. Arct. Inst. dans le présent compte rendu on donne des détails ultérieurs sur les travaux très fructueux de l'expédition de Tule sur la base des nouvelles parues dans le journal The Polar Record.

**An.** - L'expédition sur le vapeur « Tchéljuskin » [*De expeditione in navi vaporali* Tscheljuskin *nomine*] (En russe, rés. angl.). Bull. Arct. Inst., 12, 401-402, 444-445. Leningrad (1933). **a - 583**

(V. « Bull. Arct. Inst., n° 6/7, p. 161, 1933). Compte rendu de la première partie de l'expédition du « Tchéljouskine » dans la Mer de Kara. Informations sur l'état des glaces dans la deuxième décade du mois de juillet 1933. Levé de l'Ile Oujédinénijé. Passage dans la Mer Sibérienne Orientale. L'arrêt du vapeur das les glaces et sa dérive dans la région au nord du détroit de Bering.

**An.** - Oceanographic Survey in the Western Part of the North Pacific Ocean-Levés océaniques dans la partie occidentale de l'Océan Pacifique Nord [*De relevamentis oceanicis sectoris occidentalis Oceani Pacifici Nordici*] (En angl. & franç.). Trattatello di geologia generale con intenti di volgarizzazione.

**Bebiano J.** - A geologia do Arquipélago de Cabo Verde [*De geologia in archipelago* Cabo Verde]. Nombr. fig. et cartes, croquis, coupes et phot., 277 pp., Separata das Comunicaçoẽs dos Serviços Geológicos de Portugal, XVIII, Oficina Grafica L.da. Lisboa (1932). **a - 598**

**Bemmelen (van) R. W.** - Die neogene Struktur des Malayischen Archipels nach der Undationstheorie [*De structura neogena archipelagi Malesiæ ex theoria undationis*]. Proc. Kon. Akad v. Wet., XXXV, 10. Amsterdam (1933). **a - 599**

**Bemmelen (van) R. W.** - Versuch einer geotektonischen Analyse Australiens und des Südwestpazifiks nach der Undationstheorie [*De analisi geotectonica Australiæ et Oceani Pacifici Meridionalis ex theoria undationis*]. Proc. Kon. Akad. v. Wet., XXXVI, 740. Amsterdam (1933). **a - 600**

**Chubb L. J.** - Geology of Galapagos, Cocas, and Easter Islands [*De geologia in insulis* Galapagos, Cocas *et in Insula* Easter *nomine*]. Bernice P. Bishop Mus. Bull. 110. Honolulu (1933). **a - 601**

Results of the investigations of the St. George Expedition of 1924-25. Three phases in the building of the Galapagos: the great volcanoes, minor eruptions producing the enormous number of parasitic cones and the third phase still in progress, represented by emission of lava from fissures in the flanks of the major volcanoes. Structural resemblance between the Galapagos and the Marquesas. Comment on the absence of coral reefs about the Galapagos.

**Cipolla Francesco** - Singolari forme topografiche del quaternario siciliano [*De peculiari topographia ætatis quaternariæ Siculæ*] (Le montagnole tra Villabate e Bagheria). 3 fig., 2 tav., Boll. Assoc. Miner. Sicil., 5/8, 32-42. Palermo (1932). **a - 602**

L'A. si propone di illustrare alcuni interessanti rilievi della Sicilia, tipicamente modellati dai mari dei vari livelli del quaternario. In questa nota si occupa solo degli speroni terrazzati dei monti a SE della città di Palermo aventi relazione più o meno palese, con altre collinette scolpite a cupola, a cono o a calotta dalla stessa azione marina.

**Combaluzier Ch.** - Le Miocène de la Basse-Provence [*De miocenica ætate in Provincia inferiore*]. 26 fig., 4 cartes h. t., 1 carte pliante, Bull. Serv. Carte géolog. de France, XXXV, 182, 1-183. Paris (1932). **a - 603**

Étude de détails contenant une revision de la classification des étages du système miocène et une description de la surface de base du Miocène et de la nature des mouvements post-miocènes. Les mouvements des eaux de la mer et les mouvements tectoniques qui ont eu lieu aux différents moments de l'époque miocène que l'A. illustre sur la base de l'étude des surface d'aplanissement éogènes des replats ou plateaux d'érosion de la Basse-Provence.

**Cozzaglio Arturo** - Note illustrative della Carta Geologica delle Tre Venezie. Fogli : Peschiera e Mantova. Parte I : Geologia. Parte II : Idrografia [*Charta geologica regionis italicæ* Tre Venezie. *Folia :* Peschiera *et* Mantova : *Pars Ia : Geologia. Pars IIa : Hydrographia*]. Ministero dei Lavori Pubblici - Ufficio Idrografico del R. Magistrato alle Acque - Sez. Geolog., 6 + 3 tav. e ill., 130 + 69 pp., II, Soc. Coop. Tipogr. Padova (1933). **a - 604**

**De La Rüe Aubert E.** - Esquisse géologique des Iles Saint-Pierre et Miquelon [*De geologia in insulis* Saint-Pierre *et* Miquelon]. Bull. Mus. Nat. Hist. Natur., V, Série 2e, 1. Paris (1933). **a - 605**

Résultat d'un travail de six semaines exécuté par l'A. pendant un voyage dans cet archipel. L'A. annonce la nécessité d'entreprendre d'autres recherches pendant le 1933 et de modifier certaines des vues exposées aujourd'hui.

**Devigne R.** - L'Atlantide [*De Atlantide*]. Les oeuvres réprésentatives. Paris (1933). **a - 606**

**Drilhon-Courtois** - Y a-t-il eu d'autres Atlantides ? [*Inquisitiones in Atlantidem*]. 2 cartes, Bull. Soc. Océanogr. France, 75, 1313-1319, Paris (1934). **a - 607**

Après avoir relevé que « si l'on jette les yeux sur la carte du Pacifique, on demeure surpris du nombre considérable de points, îles, îlots ou récifs, à côté de l'emplacement desquels on trouve les deux lettres E. D., symboles abréviatives de existence douteuse, et des espaces situés en dehors des grandes lignes de navigation comme aussi en dehors de la route des voiliers qu'on peut à juste titre nommer les déserts du Pacifique », l'A. démontre que l'établissement d'une carte géologique de cet océan serait encore plus ardu que celui de sa carte géographique et donne un aperçu très bref des déformations, à la suite desquelles s'est établie la figure actuelle du Pacifique (à suivre).

**Edemsky M. B.** - The Kanin Geological Expedition of the Institute for the Scientific Exploration of the North and the Academy of Sciences of the U. S. S. R. in 1930 [*De expeditione geologica ad pæninsulam* Kanin *per Institutum regionibus nordicis explorandis et Academiam Scientiarum ad Rempublicam Sovieticam pertinentes a. 1930*] (In Russ., Engl. Summ.). 18 figs., Trans. Arct. Inst., XII, 117-182. Leningrad (1933). **a - 608**

Account of exploration and surveying work performed on the eastern coast of the Kanin Peninsula between the Vijas River, Chisha River and Cape Ludovatyj. Geological structure of the coast visited. The fauna contained in the limestone. The primary formations emerging at ebb-tide. The origin and period of the formation of different strata observed.

**Feruglio Egidio** - La glaciazione attuale, le fasi glaciali quaternarie e i loro rapporti coi terrazzi marini nella Patagonia [*De hodierna glaciatione. Phases glaciales quaternariæ earumque correlationes cum solariis marinis in Patagonia*]. 10 fig., Boll. Comit. Glac. It., 13, 59-90. Torino (1933). **a - 609**

Dopo avere osservato che l'attuale glaciazione della Cordigliera patagonica, per la sua intensità ed estensione, offre somiglianze con quella alpina durante le fasi glaciali, l'A. accenna come le morene che in più cerchie concentriche circondano ad E. i laghi landini si possano riunire in due sistemi, mentre i terrazzi costieri appartengono a 5 ordini distinti, di cui il primo e più elevato (m. 165-195) è probabilmente anteriore al Quaternario. Un quadro stratigrafico riassume le successive fasi ed oscillazioni glaciali finora riconosciute in Patagonia e le loro probabili corrispondenze coi depositi costieri della stessa regione.

**Feruglio Egidio** - I terrazzi marini della Patagonia [*Solaria marina in Patagonia*]. (Bibl.). 25 fig., 11 tav. f. t., Giorn. di Geol. (Ann. R. Museo di Bologna), 2 Serie, VIII bis, 3-288. Bologna (1933). **a - 610**

L'A. divide la presente trattazione in quattro parti, di cui la prima contiene alcune notizie d'ordine generale e un riassunto degli studi eseguiti dai precedenti osservatori. La seconda parte consiste in una descrizione dei singoli giacimenti, in gran parte nuovi ed esposti in ordine geografico da nord a sud. La terza, più importante, comprende un esame circonstanziato della costituzione e posizione dei diversi gruppi o sistemi di terrazzi e la discussione delle loro faune, con le relative conclusioni generali. L'ultima parte contiene un breve esame della serie pampiana, con speciale riguardo agli orizzonti marini intercalativi, dei quali l'A. ha unito anche un elenco dei fossili raccolti dai vari autori e da lui stesso ; e infine vi è un riassunto delle osservazioni finora eseguite sui terrazzi costieri del Cile e del Perù da un lato, dell'Uruguay e del Brasile dall'altro e un raffronto con la successione dei terrazzi costieri di altre parti della Terra.

**Fontana Zanco Fanny** - Nuove osservazioni sul Piano Tirrenico nei dintorni di Cagliari [*Observationes novæ Plani Tyrrhenici apud Caralim*]. Rend. del Sem. di Sc., III, 3, 116-125. Cagliari (1933). **a - 611**

L'esistenza del Quaternario marino in Sardegna è stata accertata fin dalla metà del secolo scorso, quando il Lamarmora descrisse una serie di lembi di arenarie sicuramente marine (« gres quaternario »). L'autore ha ripreso in esame, dal punto di vista stratigrafico, qualcuno dei giacimenti dei dintorni Cagliari, e vi ha raccolto fossili in modo da potere distinguere i depositi veramente postpliocenici da quelli più recenti, estendendo le ricerche anche a qualche località attigua, dove appariva probabile l'esistenza di affioramenti quaternari.

**Freyberg (v.) B.** - Das Eindringen des kambrischen Meeres in Schweden [*De mari cambriano in Suetia*]. 4 Abb., Nat. u. Mus., LXIII, 4, 113-117. Frankfurt a. M. (1933). **a - 612**

Die bei dem schwedischen Tafelberg « Kinnekulle » beobachteten kambrischen Ablagerungen geben einen deutlichen Beweis dafür, dass die Transgression sehr geschwindig vor sich gegangen hat ohne das unterliegende Festland zu zerstören. Im Gegenteil hat das Meer neue Sedimente dahin geführt.

**George P.** - Les surfaces d'aplanissement dans la région du Bas-Rhône. Rôle topographique. Date. Représentation cartographique [*De superficie æquata in regione inferiore fluminis Rhodani. Momentum topographicum. Tempus. Repræsentatio carthographica*]. 4 fig., Ann. de Géogr., 239, 477-488. Paris (1933). **a - 613**

Après avoir relevé la complexité des plissements que l'on peut observer dans la Basse-Provence, l'A. considère séparément les surfaces prémiocènes, la nature de l'aplanissement prémiocène, les dégradations des surfaces prémiocènes, les niveaux cycliques pliocènes, les formes prémiocènes et les formes pliocènes. Il conclut en donnant un résumé de l'histoire morphologique de la basse vallée du Rhône, en illustrant les mouvements d'avancement et de recul de la mer et donne enfin une esquisse tracée sur le 1 : 200.000 d'une carte morphologique de la région qu'il a étudiée.

**Gorbatsky G. W.** - Buried Glaciers in Cross Bay, Novaja Zemlja [*Glaciaria subterranea (Fossilia) in Baja* Krestovaja, Novaja Zemlja] (In Russ., Engl. Summ.). 3 figs., 2 tabl., 1 map., Arctica, 1, 41-65. Leningrad (1933). **a - 614**

After a brief account of previous observations referring to the buried glaciers in Cross Bay, the author communicates the results of his own exploration and work carried out during the expedition to Novaja Zemlja sent out by the Arctic Institute in 1931. Distribution, morphology and formation of the fossil glaciers on the strandflat of Cross Bay. Orientation of

the glaciers. Oscillation of the surface of the sea during the glaciation periods which succeeded in the region. Variations in the climate of the Novaja Zemlja. Results of the survey on the actual relief of the Cross Bay.

**Hazzard John C. & Crickmay Colin H.** - Notes on the Cambrian Rocks of the Eastern Mohave Desert, California with a Paleontological Report [*De saxis ac rupibus cambricis in desertica regione oriental.* Mohave *nomine* (*in California*). *Relatio adiungitur palaeontologica*]. 1 fig., 1 pl., 1 map., Univ. Calif. Publ., Bull. Dpt. Geol. Sc., XXIII, 2, 57-80. Berkeley, Ca. (1933). **a - 615**

This report is based on studies of the Cambrian rocks of the Marble, Ship and Providence mountains in the eastern Mohave Desert region, California. The section and detailed rock description pertain principally to the area of the Marble Mountains. The collection of fossils found in the Lower and Middle Cambrian rocks of the area are described by Dr. Colin Crickmay who has written the report on the paleontology. Of the described fossils, one species, *Paedeumias mohavensis* sp. n., is new to science.

**Hess Harry H.** - The Gravity Measuring Cruise of the U. S. Submarine S-48 : Interpretation of Geological and Geophysical Observations [*Navigatio gravimetrica navis submergibilis S-48 ad Classem Americanam pertinentis. Interpretatio observationum geologicarum et geophysicarum*]. 16 figs., 1 map., U. S. Hydrogr. Off. Navy-Princeton Gravity-Exped. West Indies, 1932, 27-54. Washington, D. C. (1933). **a - 616**

General statement. Geological interpretation of gravity anomalies. The East Indian strip of strongly negative anomalies. Scientific results of the expedition. Bartlett Trough region. The Bahama region. Summary and conclusion.

**Hume W. F.** - Geology of Egypt, Volume II. Part I [*De geologia in Aegypto. Vol. II.um Pars I.a*]. 96 pl., xv + 297 + 124 pp., Govmt. Press. Cairo (1934). **a - 617**

The fundamental pre-Cambrian rocks of Egypt and the Sudan, I. The metamorphic rocks. Book magnificently illustrated, forming the first part of the second volume. The first volume dealing with surface features and their determining causes published in 1925.

**Isachsen Fridtjov** - Terrassemalinger i Nord-Odal [*De mensuris in solariis marinis regionis Norvegicæ* Nord-Odal]. 16 fig., Norsk Geogr. Tidsskr., V, 1, 33-52. Oslo (1934). **a - 618**

L'A. esamina il diagramma di differenti livelli di Tanner basato sulla teoria di trasgressione (marina) della Fennoskandia ammessa da parecchi ricercatori nordici, concludendo che non è ancora provato il parallelismo fra le terrazze quaternarie della zona di Oslo e quelle della Norvegia occidentale e settentrionale. Analisi delle terrazze del Nord-Odal sotto e sopra il livello marino.

**Knight Brookes J.** - A Salt-Marsh Study [*De palude quadam salsa*]. 5 figs., Amer. Journ. Sc., XXVIII, 165, 161-181. New Haven, Conn. (1934). **a - 619**

The study of a salt marsh on the shore of Long Island at Killam's Point near New Haven Connecticut revealed a section preserving the hitherto unrecorded early stages of a New England salt marsh developed in accordance with Shaler's classic theory, coupled with later stages developed in accordance with the theory first proposed by Mudge and later reproposed and elaborated by Davis. Detailed description of the marsh and its setting. Brief discussion of the fauna (fossil within the marsh). List of species recorded. Certain aspects of the origin of coastal marshes of the New England type are briefly discussed.

**Loczy (v.) L.** - Zur Geologie des Nordboengkoes und des Bongkagebietes von Ostcelebes [*De geologia regionum* Boengkoe *septentrionalium et regionis* Bongka *in* Celebes *orientalibus*] (In ungar., u. dtsch.). 7 Abb., 2 Kart.-Beil. Földtani Közlöny (Geol. Mitt.), LXII, 1/12, 130-164. Budapest (1933). **a - 621**

Nach stratigraphischen und tektonischen Gesichtspunkten hat der Vf. das durchforschte Gebiet in 5 Zonen eingeteilt, welche hier charakterisiert werden. Die paläogeographische Zusammengehörigkeit des Ostarmes von Celebes mit dem Bogen der Inselreihe : Misol, Boeroe, Ceram und Timor wird bestätigt. Ueberblick der hauptsächlichen geologischen Ablagerungen. Fossilien.

**Menjschikov N.** - Work of the Geomorphological Party of the Anadyr Chukchee Expedition of the Arctic Institute in 1931-1933 [*De operibus peractis a Sectione Geomorphologica, perdurante expeditione ad regiones* Anadyr *et* Tschoukhotskaja *ab Instituto Arctico suscepta a. 1931-1933*]. Bull. Arct. Inst., 1, 40-42. Leningrad (1934). **a - 622**

English translation of a paper published in Russian in nº 12, 1933 of the « Bulletin », pp. 416-417.

**Meyerhof Howard A.** - Geology of Puerto Rico [*De Geologia in* Puerto Rico]. Maps, diagrs., ills., Monogr. Univ. Puerto Rico, Ser. B, 1, 306 pp., Rio Piedras, P. R. (1933). **a - 623**

Grown out of a series of lectures given to the University of Puerto Rico, 1931-1932 : geological background, geological history (volcanic core, ancient mountains, coastal plain, present form), geological materials.

**Minucci Enzo** - Il mare pliocenico nella Campania [*Mare pliocenicum in Campania*]. Mem. Geol. e Geogr. di Giotto Dainelli, 2 carte f. t., III, 229-346. Firenze (1932-33). **a - 624**

Contributo regionale alla conoscenza delle condizioni del mare pliocenico e quaternario in Italia. La regione considerata comprende gran parte della Campania tra i corsi del Volturno e del Sele, nonchè le isole prossime alla terraferma, Ischia e Capri. Nella zona costiera di questa regione hanno grande sviluppo i depositi quaternari marini con i quali sono commisti elementi o depositi vulcanici. L'esame delle faune plioceniche e quaternarie fu fatto al solo scopo di indagarne le originarie condizioni di vita, pertanto furono distinte le seguenti zone batimetriche . litorale, sino a 60 m. di profondità, suddivisa in tre orizzonti (superiore, medio e inferiore), sublitorale, fra 60 e 200 m., profonda, oltre 200 m. di profondità. Il presente studio, non è limitato solo all'esame dei terreni marini pliocenici, ma si estende anche alla considerazione dei terreni marini posteriori al Pliocene. Essi hanno dato motivo di trattare, a proposito della regione qui considerata, dei movimenti del suolo, rispetto al livello marino, succedutisi dopo il Pliocene a variare la configurazione del mare quaternario nella Campania. Il materiale considerato comprende gli elementi offerti dalle perforazioni eseguite nel sottosuolo Campano.

**Obroutchev Serge** - Sur l'orographie de l'Ile de Vrangel [*De orographia in insula* Vrangel] (En russe, rés. en espéranto). Arctica, 1, 150-156. Leningrad (1933). **a - 625**

Résultats des observations géomorphologiques exécutées en été 1932 au cours d'un vol de 24 heures effectué dans le but d'approvisionner les colons établis sur l'île qui ont été privés par les glaces de toute communication avec la terre ferme. Quelques corrections de la carte de Berry et considérations sur l'origine de l'île et sur le mouvement des glaces de la mer environnante.

**Obroutchev S.** - Recherches géologiques organisées par l'Institut Arctique sur le littoral polaire de la circonscription de Tchoukhotsk en 1933-34 [*Investigationes geologicæ ab Instituto Arctico susceptæ in litoribus polaribus apud* Tschukhotsk *a. 1933-34*] (En russe). Bull. Arct. Inst., 12, 414-415. Leningrad (1933). **a - 626**

Compte rendu des travaux exécutés en 1933 et du programme des travaux projetés pour 1934, pour l'étude géologique et cartographique de la région entre la chaîne d'Anadyr et le littoral de la Mer Polaire entre la Baie Koljutschinskaja et le Cap Severnyj.

**Rovereto G. & Airoldi M.** - Note geomorfologiche e petrografiche sull'Isola di Capraia [*Notæ geomorphologicæ et petrographicæ in insula* Capraia] 5 fig., 3 tav. f. t. e una carta. Mem. R. Acc. Naz. Lincei - Rend. Cl. Sc. Fis., Mat. e Nat., serie VI, v. V, fasc. IX, 319-410. Roma (1934). **a - 629**

Nella prima parte del presente studio, il Rovereto illustra le condizioni geomorfologiche dell'isola di Capraia, soffermandosi all'esame del terreno e del clima, a considerazioni sulle condizioni del vulcanismo antico e all'età dell'isola. Dà alcuni cenni sulla Tirrenide, sul Vulcanesimo quaternario, sulle forme del complesso Monti e Vadi, sui colli e il laghetto dello Stagnone, e sulla Costa marina. Nella seconda parte, l'Airoldi fa l'illustrazione petrografica strutturale e genetica dell'isola, dividendo lo studio delle rocce per località e facendo precedere la descrizione delle condizioni di giacitura.

**Rutten L.** - Resultados de la investigación geológica de la Misión cientifica holandesa en Cuba [*Resultatus ex investigatione geologica missionis scientificæ Hollandicæ in Insula Cuba*]. Rev. Soc. Geogr. de Cuba, Año VI, 2/3, La Habana (1933). **a - 630**

Short review of preceding works on this subject. Geological formation. Topography : glacial, glacio-fluvial and marine deposits. The different layers of earth. Résumé on the deposits of Hallingsdalsbreen south of Gulsvik. Bibliography.

**Schütte Heinrich** - Die Wurten als Urkunden der Küstengeschichte. I. Die Wurten, ihr Bau und Alter. II. Was lehrt uns der Untergrund und der Aufbau der Wurten ? [*De sabulosis cumulis* « Wurten » *nomine quæ testantur historiam litorum Maris Nordici*]. 17 Abb., Nat. u. Mus. 224-237, LXIII, 6/7, 181-192. Frankfurt a. M. (1933). **a - 632**

Beschreibung der sog. Wurten, der kleinen Marsch-Eilande im nordfriesischen Wattenmeer : die Besiedlung, der zerstörende Einfluss des Meeres und der Kampf der Einwohner dagegen. An Hand geschichtlicher Urkunde, Ausgrabungen und Studium der geologischen Schichten der Wurten ist es dem Vf. gelungen, auf die Hebung und Senkung der Nordseeküste während einiger Jahrtausende Licht zu werfen.

**Schwarz Albert** - Meerische Gesteinsbildung I. [*De saxis et rupibus in mari. Quomodo formantur*]. 20 Abb. a. T., Senckenbergiana, XV, 1/2, 69-160. Frankfurt a. M. (1933). **a - 633**

Mit meerischer Gesteinsbildung versteht der Vf. die unter Mitwirkung meerischer Kräfte erfolgende Bildung von Gesteinen, nicht etwa eine nur im engsten Sinne meerische, z. B. innerhalb des Meeres erfolgende. 1) Umlagerungs- und Gesteinsbildungsvorgänge an einem Gezeitenmeer (Nordsee) : A. Frachtung, die Tendenz der Meerestätigkeit ; Umlagerung das Ergebnis der Meerestätigkeit ; B. Ursache, Bedingungen und Ort der frachtenden Meerestätigkeit ; C. Die Bedeutung der Mittelhochwasserlinie für die frachtende Meerestätigkeit. D. Die vorwiegend frachtende und ablagernde Meerestätigkeit oberhalb M. H. W. ; E. Die umlagernde Meerestätigkeit unterhalb M. H. W. ; F. Meerische Abtragungsvorgänge ; G. Die Umlagerungsvorgänge und Ereignisse im nordfriesischen Meeresgebiet. Schriftenverzeichnis.

**Sorrentino Stefano** - Alcune caratteristiche di geo-morfologia del versante adriatico dal fiume Potenza al Pescara [*De geomorphologia a flumine* Potenza *ad flumen* Pescara]. 8 fig., Boll. Soc. dei Nat. in Napoli, XLV, 321-335. Napoli (1933). **a - 634**

Si espone in un esame generale, la morfologia dei terreni neogenici del versante adriatico tra i fiumi Potenza e Pescara, facendo seguire alcune considerazioni sullo sviluppo degli abitati. In appendice è descritta la cattura avvenuta fra i due torrenti Fiastrone-Fiastra.

**Sorrentino Stefano** - Storia geologica del Mediterraneo Orientale (Mare Egeo) [*Historia geologica Maris Mediterranei Orientalis* (*Mare Aegæum*)]. Riv. di Fis., Mat. e Sc. Nat., 5, 229-234. Napoli (1934). **a - 635**

Si esamina lo sviluppo dei principali terreni geologici del Mediterraneo Orientale e le relazioni tettoniche esistenti fra essi.

**Vardanjantz L. A.** - Sur l'histoire de la Mer Noire [*De historia Pontica*] (En russe). Izvest. Gosoud. Ghéogr. Obstsch. (Bull. Soc. Géogr.), LXV, 4, 335-339. Leningrad (1933). **a - 636**

Rapport à l'Académie des Sciences à la séance du 25 février 1933. Dans son exposé, l'A. après avoir cité quelques passages de l'article de A. D. Arkhangheljskij « Court résumé de l'histoire géologique de la Mer Noire, 1932 », démontre qu'il est nécessaire pour comprendre les contradictions apparentes

dans le texte du Prof. Arkhangheljskij, de considérer l'adoucissement répété du bassin de la Mer Noire en son rapport génétique avec les soulèvements de ses parties périphériques et avec les glaciations, ainsi qu'en relation avec les variations du climat qui se sont manifestées par suite des procès susmentionnès. C'est à cette interprétation de l'histoire de la Mer Noire dans son ensemble qui constitue le contenu de la note de M. Vardanjantz.

**Vinassa De Regny Paolo** - La carta geologica d'Italia [*Charta geologica Italiæ*]. Ric. Scient., I, 3, 140-144. Roma (1933). **a - 637**

Dopo aver fatto la storia dell'ufficio per il rilievo della carta geologica d'Italia, annesso al Corpo reale delle Miniere, creato in seguito al decreto del 15 giugno 1873, espone le direttive a cui dovrebbe ispirarsi l'ufficio per un logico e coordinato lavoro.

I : Ricerche sulle variazioni delle spiagge italiane [*Exploratio prior recentiorum variationum lineæ orariæ litorum Italicorum. I. Investigationes in variationes orarum Italicarum*]. Consiglio Nazionale delle Ricerche - Comitato Nazionale per la Geografia (Bibl.). 95 pp., 4 tav. f. t., Tip. Anonima Romana Editoriale. Roma (1933). **a - 641**

La presente indagine preventiva ha lo scopo di presentare un quadro sommario dell'estensione del fenomeno stesso e delle sue fasi, prospettando le varie ipotesi finora avanzate per spiegare i ritiri dei singoli tratti di spiaggia. In appendice a questo studio è pubblicata la Guida questionario per le ricerche locali a cura del prof. Toniolo.

**Barton Donald C. & Hickey Maude** - The Continental Margin at Texas-Louisiana Gulf Coast [*De margine continentis præter litora Sinus* Texas-Louisiana]. 4 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, Append. A. Rep : Comm. Ocean Basins, 16-20. Washington, D. C. (1933). **a - 642**

The present report gives the results of some preliminary calculations concerning the three hypothesis as to the cause of the really extensive gravity-minimum of considerable amplitude lying axially along the Gulf Coast, suggested by the senior writer a year ago (D. C. Barton : « Torsion-balance surveys in Southwest Louisiana and Southeast Texas », Trans. Amer. Geoph. Union, 13th Ann. Meet., 40-42, 1932).

**Carter Neal M.** - Fiords and Fiord Formation [*De fiordis. Quomodo formantur*]. Ann. Rep. Biol. Board Canada, 78-79, 1932. Ottawa (1933). **a - 643**

Results of systematic soundings in Jervis inlet, Toba inlet and Princess Louisa inlet, made in order to investigate the unusual depths of this area of the coastal waters. These three depressions lie some thousand feet below the bounding thresholds. Evidence of almost corrosive glaciation on the Cretaceous granito-diorite threshold, which corroborates the glacial origin of Princess Louisa and Jervis inlets in particular.

**Castaldi Francesco** - Forme di erosione eolica nei Campi Flegrei. I. Erosioni nei tufi di Porto Miseno [*De erosione eolica in* Campi Flegrei. *I. Erosiones in tophis ad* Porto Miseno *pertinentibus*]. Riv. di Fis., Mat. e Sc. Nat., a. VIII, serie II, 6, 403-418. Napoli (1934). **a - 644**

L'autore si occupa, in una accurata indagine, delle forme di erosione eolica, che hanno contribuito, nei Campi Flegrei, alla disgregazione di alcuni apparati eruttivi ; ha prescelto, quale inizio, il cratere di Porto Miseno, il centrale dei tre apparati vulcanici situati all'estremo limite del golfo di Napoli.

**Caubet Paul** - Les plages de galets et de sable à l'Ile de la Réunion [*De oris maritimis saxis ac sabula formatis in insula Reunionis*]. 1 carte, Bull. Soc. Océanogr. France, 74, 1299-1303. Paris (1933). **a - 645**

Morphologie côtière de La Réunion, dans laquelle les côtes basses dominent : I. Les trois types de plages réunionnaises : A) Les plages de galets ; B) les plages de sable noir ; C) les plages de sable blanc. II. L'influence des plages de galets et de sable sur la vie réunionnaise. Leur triple utilisation : stations balnéaires, fabrication de la chaux, production de nitrates.

**Charles M. Fl.** - Observations sur la morphologie des côtes de la Mer Noire dans la région houillère de Zongouldak et environs (Turquie) [*Observationes in morphologiam litorum Ponti Euxini in regione carbonifera* Zongouldak *et propinquitatibus*]. 3 fig., Bull. Soc. Océanogr. France, 71, 1257-1261, 72, 1275-1276. Paris (1933). **a - 646**

Généralités : Etymologie de l'expression Mer Noire. Régime des brusques changements des conditions météorologiques sur la Mer Noire. Régime régulier des tempêtes de la Mer Noire. Description des trois ports qui servent de bons abris sur la partie de la côte qui va d'Alaplı jusqu'à Chakras, Héraclée, Amsra et Zongouldak. Développement et morphologie du littoral dans les zones qui s'étendent entre les ports susmentionnés, surtout en ce qui concerne leurs relations avec les phénomènes géologiques.

**Dainelli Giotto** - Memorie Geologiche e Geografiche [*Memoriæ geologicæ et geographicæ*]. 86 fig., 2 carte f. t., III, 347 pp. Tip. Mariano Ricci R. Ist. Geologico Edit. Firenze (1932-1933). **a - 647**

Il presente volume contiene le seguenti memorie : 1) Giotto Dainelli. Studi sull'Arno a Firenze ; 2) Ardito Desio. Osservazioni geografiche e geologiche compiute dalla spedizione della

Reale Accademia d'Italia nel Deserto Libico e nel Fezzàn orientale (1931); 3) Giuseppe Caraci. Osservazioni geologiche e morfologiche in Bulgaria (Il litorale bulgaro sul Mar Nero e le sue formazioni lacustri e lagunari); 4) Ardito Desio. Nuovi dati sulla geologia della Libia; 5) Enzo Minucci. Il mare pliocenico nella Campania.

**Dzens-Litovskij A. I.** - Les tombolas et les langues de sable des lacs salés de la Crimée [*De lacubus salsis in Crimea*] (En russe). 10 fig., Izv. Gos. Geogr. Inst. (Bull. Inst. Géogr. Etta), LXV, 6, 585-595. Moskva (1933). **a - 648**

Résultats de l'exploration hydro-géologique des lacs salins de la Crimée effectuée par les expéditions de l'Institut d'Hydro-Géologie et de Géologie appliquée au Génie, dont le but spécial a été d'étudier les barrages des groupes des lacs salins d'Evpatorija et de Tarankoutsk. Dans le présent article l'A. donne la description du littoral de la Mer Noire aux environs d'Evpatorija au point de vue géologique et pétrologique.

**Gervasio M.** - I rapporti tra le due sponde dell'Adriatico nella età preistorica [*De correlationibus inter duas oras hadriaticas ætate præhistorica*]. Atti Soc. Progr. Sc. XXII, Riun. (Bari, 12-18 ott. 1933-XI), IV, 132-150. Roma (1934). **a - 649**

È riassunto quanto finora è stato accertato sui rapporti culturali ed etnici tra le regioni della costa orientale dell'Adriatico con quelle delle coste occidentali; più precisamente lo studio si limita alle coste pugliesi.

**Giere Werner** - Morphologie der estländischen Nordküste [*De morphologia in litoribus nordicis Estoniæ*]. 8 Abb., 12 phot. carte, 105 pp., Veröffentl. Geogr. Inst. d. Albertus-Universität zu Königsberg i Pr., N. F., Reihe Geogr. Nº 6, Gräfe & Unzer. Königsberg i. Pr. (1932). **a - 650**

**Gočev P.** - Geologische Beobachtungen an der Küste des Schwarzen Meeres zwischen der Mündung der Kamcija und Kap Emine [*Observationes geologicæ circa litora Pontica inter fauces fluminis* Kamcija *et Caput* Emine]. Karte, Spisanie na Bâlgarskoto Geol. Druzestvo, IV, 3, 200-211. Sofia (1932). **a - 651**

**Gorbatsky G. W.** - The Postpliocene and Relief of the South-East Coast of the Kanin Peninsula [*De stratibus postpliocenicis deque relevamento litorum sud-occidentalium pæninsulæ* Kanin] (In Russ., Engl. Summ). 1 fig., tables, 3 maps. Izv. Gos. Gheogr. Obstsch., LXIX, 6, 447-480. Leningrad (1932). **a - 652**

Results of the work of an expedition sent out by the Institute for the Exploration of the North in order to carry out a geologic-morphological exploration of the south-eastern shore of the Kanin Peninsula. Geological structure and postpliocene deposits of the area under consideration; results of the mechanical, chemical and diatom analysis of samples collected during the expedition from the clay deposits of the Peninsula. The coastal terraces. Hypothesis of an immense lake of glacial origin which covered the whole south portion of the Kanin Peninsula. The forms of the coastal micro-relief. The effect of the sea-erosion at the Kanin coast.

**Krempf Armand** - Inscription marégraphique des cycles de rétrogradation des noeuds de la lune par certains Coraux constructeurs de récifs [*Inscriptio mareographica cyclorum retrogradationis nodorum lunarium in coralliis vada ædificantibus*]. 1 fig., C. R. Acad. Sc., CXCVIII, 19, 1708-1710. Paris (1934). **a - 653**

Observations portées sur une colonie d'Astraeidé, du genre *Favia*, qui offre, inscrits par son squelette, six cycles lunaires, représentant un total d'environ 112 années. Analyse d'un de ces enregistrements et sa genèse. Importance de ces études au point de vue de la paléontologie, de la géologie et de l'astronomie.

**Majo Ester** - Le crespe di sabbia. (Morfologia del litorale Campano) [*Rugæ arenosæ. Morphologia litoris Campani*]. 4 fig., Riv. di Fis. Matem. Sc. Nat., 1, 3-10. Napoli (1933). **a - 654**

Per le diverse località si hanno diversi valori relativi alle dimensioni delle crespe. Le dimensioni di queste aumentano in seguito al moto ondoso, però il rapporto $\frac{L}{H}\left(\frac{\text{lunghezza}}{\text{altezza}}\right)$ resta sensibilmente costante. Spesso si riscontrano crespe intercalate di piccolissime dimensioni, specialmente a Miliscola verso riva.

**Matthews E. R.** - Coast Erosion and Protection. Third Edition revised, with an Additional Chapter and an Appendix by Dr. Brysson Cunningham [*Erosio litorum eorumque tutela*]. 36 pl., xviii + 228 pp., Charles Griffin & Co. Ltd. London (1934). **a - 655**

Erosion and accretion are dealt with. Action of sea water on concrete examined and discussed. Harbor protections.

**Murray J. W.** - Richesse minière de l'Egypte sur les côtes de la Mer Rouge et dans le Sinai [*De metallis in litoribus Maris Rubri et in* Sinai]. Bull. Soc. R. de Géogr. d' Egypte, XVIII, 3/4 345-347. Le Caire (1934). **a - 656**

Résultats d'une inspection du Ministre des Finances du Gouvernement égyptien sur les côtes de la Mer Rouge.

**Obrutschev S.** - Geological Prospecting of the Polar Coast of the Chukchee District by the Arctic Institute in 1933-1934 [*Prospectus geologicus litoris polaris in districtu* Chukchee *ad Institutum Arcticum pertinente*]. Bull. Arct. Inst., 1, 37-39. Leningrad (1934). **a - 657**

Account of the geological and topographical survey of the Polar Coast covering an area of 8000 sq. km. The object of the survey was to determine the common minerals encountered in the area and the geological mapping of the area between the watershed of the main Anadir Ridge and the shore of the Polar Sea, the East limit being the Koluchinskaja Bay and the West-Cap Severnyj.

**Rothé J. P.** - Observations morphologiques au Scoresby-Sund [*Observationes morphologicæ in* Scoresby-Sund]. C. R. Acad. Sc., CIIIC, 23, 1443-1444. Paris (1934). **a - 658**

Observations à caractère géologique de la Terre de Liverpool et de la Terre de Jameson, au cours de la mission française de l'Année Polaire.

**Scherber Rudolf** - Erosionswirkungen an der toskanischen Felsküste [*Erosiones in litoribus saxeis Tuscis*]. 6 Abb., Natur. u. Mus., LXII, 7, 231-234. Frankfurt a. M. (1932). **a - 659**

Die hier mit deutlichen Abbildungen dargestellten Erosionswirkungen haben ihren Grund in dem hohen Salzgehalt des überspülenden Meereswassers.

**Schwarz Albert** - Grundsätzliches zur Meeresgeologie, Tatsächliches und Grundsätzliches zur Küstensenkungsfrage [*Principia geologiæ maris. Res ac principia problematis depressionis litoreæ*]. Senkenbergiana, XIV, 1/2, 40-70. Frankfurt a. M. (1932). **a - 660**

I. Der Gegenstand der Meeresgeologie; II. Begründung für die Notwendigkeit einer eindeutig klaren meeresgeologischen Ausdrucksweise; III. Die natürliche Ordnung der

Erscheinungen » als Grundlage der Begriffumreissungen; IV. Die Aufgabe und Stellung der Meeresgeologie gegenüber dem meeresgeologischen Fragenkreis; V. Wegener's Küstensenkungs-Gegenbeweis und die natürliche Ordnung der Erscheinungen; VI. Die grundsätzlichen Mängel absoluter Zahlenangaben; VII. Die ausschlaggebenden « Senkungs » - umstände. VIII. Die Deutung der Hallig-profile. Anhang: Meeresgeologische Ausdrücke und Begriffsbestimmungen.

**Tayama Risaburô** - Boso Hanto no Tikei toku ni Siusyokumen no Taihi ni tuite [*De morphologia pæninsulæ* Boso *deque correlationibus inter superficies erosionis*]. 18 fig., 3 cartes h. t., 13 tabl. 64 pp., Sendai Zaidan Hôzin etc., IX, Juillet. Sendai (1930). **a - 661**

**Utida Yutaka & Hagimoto Yosimune** - On the Forms of Coast Lines [*De lineis litoreis earumque formis*]. Abstr. in Jap. Journ. Astr. & Geoph., XI, 3, 53-54. Tokyo (1934). **a - 662**

On the suggestion of Prof. T. Terada, the authors investigated the angles subtended between two consecutive straight coast lines, and studied the influence of erosion of ages on those angles.

**Wade Arthur** - Note on the Geology of the Ionian Islands [*De geologia insularum Joniarum*]. Journ. Inst. of Petrol Technol., XVIII, Sept., 779-785. London (1932). **a - 663**

**Wilhelmy Herbert** - Die morphologischen Probleme der Neogenbucht von Varna [*De problematis morphologicis in sinu neogenico* Varna]. Ztschr. f. Geomorphol., VII, 4/5, 231-245. Leipzig (1932). **a - 664**

**Yamaguti Sadao** - The Seacliff of the Idu Islands [*De præcipitiis insularum* Idu]. Geogr. Rev. Japan, 9, 91-108. Tokyo (1933). **a - 665**

These islands are surrounded by high seacliffs which are very prominent, especially on the basaltic andesite cones, such as Osima, Tosima, Miyakezima and Hatizyozima. Differences in the heights explained by prevailing winds, and by doyonami (large swells).

## Sedimenta.

**Blumberg O. K.** - Die photometrische Methode der mechanischen Analyse der feinkörnigen Geschiebe [*Methodus photometrica pro analysi mechanica detritorum tritorum*] (In russ., dtsch. Rés.). 6 Abb., Mém. Inst. Hydrol., X, 65-73. Léningrad (1933). **a - 666**

Die Einführung der photometrischen Messungen zum Zwecke der Geschiebeuntersuchungen ermöglicht die Anwendung einer neuen Methode der mechanischen Analyse von feinkörnigem Geschiebe und Schlamm, die infolge ihrer hohen Präzision die anderen Methoden weit überragt. Es werden die Vorzüge des Kompensations-Photometers von Joben hervorgehoben, das in einer Reihe von Untersuchungen die Idee der der natürlichen Fraktionen-Grenzen von Prof. V. G. Glouchkoff zu beweisen gestattete. Die weitere Entwicklung der Methode soll einen Uebergang von der Verhältnismasse zur Absolutmasse gestatten.

**Buffault Pierre** - Les dunes de la Nouvelle-Zélande [*Dunæ seu cumuli arenosi in Nova Zelandia*]. 4 pl., phot., Rev. des Eaux et Forêts, 30e année LXX, 25-41. Paris-Nancy (1932). **a - 667**

**Dropsy U.** - Sur l'origine des sables des plages des Iles de Los (Guinée Française) [*De origine sabulæ in ora maritima* Iles de Los (*Guinea Gallica*)] 1 fig., Bull. Mus. Nat. Hist. Natur., VI, 2e ser., 3, 310-314. Paris (1934). **a - 668**

Généralités. Prélèvement des échantillons avec liste. Hypothèses sur l'origine des sables. Ouvrages consultés.

**Field Richard M.** - The Gravity Measuring Cruise of the U. S. Submarine S-48. Introduction [*De navigatione, mensuris gravitatis ducendis, a navi submergibili* S-48 *peracta. Introductio*]. U. S. Hydrogr. Off., The Navy-Princeton Gravity Exped. 1932, 1-2. Washington, D. C. (1933). **a - 669**

Hints concerning the organization, the staff and the scope of one of a series of expeditions called « International Expeditions to the West Indies », which were initiated by the Department of Geology of Princeton University in 1926, for the purpose of studying the regional problems in sedimentation and diastrophism.

**Field Richard M. & Hess Hammond Harry** - A Bore-hole in the Bahamas [*De perforatione in* Bahamas]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29. 1933, 234-235. Washington, D. C. (1933). **a - 670**

Results of observations made after a boring on the Island of New Providence, the Bahamas, whose purpose was to collect data on the following problems: (1) the origin of certain types of limestone; (2) dolomitization; (3) the stratigraphy of the Bahamas, and (4) relation of the calcareous rocks to the deeply submerged valleys.

**Lopatin S.** - Ueber die Tätigkeit des Büros für Geschiebenuntersuchung [*De activitate Officii Hydrologici circa investigationes de sedimentationibus*] (In Russ., dtsch. Rés.). Mém. Inst. Hydrol., XI, 197-200. Léningrad (1933). **a - 671**

Forschungsarbeiten des Hydrologischen Büros auf dem Gebiete der Geschiebeforschung nach dem Arbeitsplan des Direktors, Herrn Prof. S. Woskressensky.

**Lüders K.** - Sediment und Strömung [*De sedimentationibus et currentiis*]. Senckenbergiana, XIV, 6, 387-390. Frankfurt a. M. (1932). **a - 672**

Nach allgemeinen Betrachtungen über Stromgeschwindigkeit und Sedimentverteilung laut den Forschungen von Schoklitsch, Pratje, Schütte, von Correns u. a. schliesst der Vf., dass eine Abhängigkeit des vorhandenen Sedimentes von der heutigen Strömung nur ausnahmsweise bewiesen werden kann.

**Markov K. K.** - La Mer Yoldienne et le problème du détroit entre la Mer Baltique et la Mer Blanche à la fin de la période glaciaire [*De Mari Joldico deque problemate circa strictum inter Balticum et Mare Album, exeunte periodo glaciali*] (En russe). 8 fig., Izv. Ghéogr. Obstsch. (Bull. Soc. Géogr.), LXV, 4, 369-384. Leningrad (1933). **a - 673**

L'A. expose l'hypothèse de H. Munthe sur la Mer Yoldienne, considérée comme une phase initiale (post-glaciaire) de la Baltique, émise vers la fin du siècle précédent, mais qui n'a rien perdu de sa signification. Les derniers travaux de H. Munthe lui-même, ainsi que ceux de Thomasson, Sauramo et Tanner, ont complété cette hypothèse, mais sont restés presque inconnus aux savants soviétiques. Le présent article contient le résumé de ces nouvelles modifications de l'hypothèse fondamentale de Munthe, surtout en ce qui concerne les eaux du bassin Yoldien qui occupaient le territoire de l'Union Soviétique. L'A. illustre la position de la superficie isobasique de la Mer Yoldienne, détermine la date des dépôts yoldiens à l'aide des données sur le pollen des plantes et étudie des sédimentations yoldiennes sur l'isthme de Carélie. Il conclut en affirmant que rien n'autorise la supposition de l'existence à l'époque considérée d'un détroit entre la Baltique et la Mer Blanche.

**Piggot C. S.** - Radium Content of Ocean-Bottom Sediments [*De radio in sedimentis oceanicis*]. Amer. Jour. Sc., XXV, 147, 229-238. New Haven, Conn. (1933). **a - 674**

**Schwarz Albert** - Der tierische Einfluss auf die Meeressedimente (besonders auf die Beziehungen zwischen Frachtung, Ablagerung und Zusammensetzung von Wattensedimenten) [*De animalium influentia in sedimenta marina præcipue pro correlationibus inter subvectionem, sedimentationem et sedimentorum compositionem in bassis fundis æstibus exsiccatis*]. 28 Fig. a. T. mit Erklär., Senckenbergiana, XIV, 3, 118-172. Frankfurt a. M. (1932). **a - 675**

In der Schlussfolgerung nach den folgenden Kapiteln wird die Abhängigkeit des Sedimentes und der Sedimentation von der Fauna bestätigt: I. Anfrachtung und Ablagerung der Sedimentteilchen als voneinander unabhängige Folgen wesensverschiedener physikalischer und biologischer Erscheinungen; II. Sedimentbewegung und Sedimentbildung in Abhängigkeit von den Bewegungszuständen des Sedimentbringers; III. Sedimentbewegung und Sedimentbildung in Abhängigkeit von tierischen Einwirkungen; IV. Beispiele fossiler Kotanreicherungen und Bedeutung dieser Kotanreicherungen für den chemischen und mineralogischen Charakter des Sediments.

**Selwell H. R.** - Chemical Studies of the Submarine Sediments [*Studia chimica sedimentorum submarinorum*]. Woods Hole Ocean. Inst., Rep. 1930-32, 34-35. Woods Hole, Mass. (1933). **a - 676**

Brief summary of the results of a critical study of certain physical-chemical characteristics of sediments of the coastal shelf, undertaken with the object of evaluating the relative importance of the sea bottom as a source of supply to the chemical fertility of the waters of the Woods Hole region.

**Stetson H. C.** - Scientific Results of the « Nautilus » Expedition, 1931. Part V, The Bottom Deposits [*Resultatus scientifici ex navigatione navis* « Nautilus » *a. 1931. Pars V.a Deposita*]. Papers in Physical Oceanography and Meteorology, II, 3, 17-37. Woods Hole, Mass. (1933). **a - 677**

**Stetson H. C.** - Investigation of the Distribution of Marine Sediments from the Shore Line out to the Continental Shelf [*Investigationes in distributionem sedimentorum marinorum a linea litorea ad plateam continentalem*]. Woods Hole Ocean. Inst., Rep. 1930-32, 35-36. Woods Hole, Mass. (1933). **a - 678**

Description of a new type of bottom sampler devised by C. Iselin, its use and some experiments made with pans for collecting sediments.

**Stetson H. C.** - Investigation of the Sediments of the Continental Shelf and Their Environment [*Inquisitiones in sedimenta plateæ continentalis et propinquitatum*]. Woods Hole Ocean. Inst., Rep. 1930-32, 48-49. Woods Hole, Mass. (1933). **a - 679**

Summary of the results of mechanical analysis of sediments collected along traverses from the shore to the edge of the continent at the following places, samples being taken approximately every mile: Martha's Vineyard, Block Island and Ocean City, Md., with three short traverses, one off Atlantic City, N. J., and two off the outer side of Cape Cod.

**Szàdeczky-Kardoss v. E.** - Zur Kenntnis der Mediterranen Konglomerate von NW-Siebenbürgen [*De conglomeratis mediterraneis regionis* Siebenbürgen *nord-occidentalis*]. 2 Abb., Tab., Földtani Közlöny (Geol. Mitt.), LXII, 1/12, 165-186. Budapest (1933). **a - 680**

Analytische Untersuchung der helvetischen Konglomerate Siebenbürgens, teilweise in Tabellen wiedergegeben. Die bisherige Auffassung in Bezug auf die Herstammung dieser für helvetisch gehaltenen Konglomerate wird hier widerlegt. Voraussetzung vulkanischer Tätigkeit und einer Transgression des miozänen Meeres.

**Taliaferro N. L.** - The Relation of Volcanism to Diatomaceous and Associated Siliceous Sediments [*Relatio de vulcanismo in sedimentis diatomæarum et in conglomeratis siliceis*]. Univ. Calif. Dpt. Geol. Sc. Bull. XXIII, 1, 1-56. Berkeley Calif. (1933). **a - 681**

Submarine outpourings and explosions of volcanoes create a favorable milieu for rapid growth and deposition of siliceous organisms, chiefly diatoms, which contribute to make part of tertiary formations of California.

**Umbgrove J. H. F.** - Tijd en type der tertiaire plooiingen binnen de zone van sterk negatieve afwijkingen der zwaartekracht in den indischen Archipel [*De ætate ac typo rugarum tertiariarum in zona deviationum quæ maxime negant gravitationem in Archipelago Indico*]. Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam, LI, 1, 20-34. Leiden (1934). **a - 682**

Riferendosi alle ricerche di Verbeek, Weber, Terpstra e Kemmerling nel gruppo di isole Timor-Boeroe e nelle isole all'ovest di Sumatra l'A. dà un sommario riguardante l'epoca di corrugamento delle isole che si trovano dentro la zona delle deviazioni negativi della gravitazione, come anche delle informazioni sulla facies e sulla densità degli strati terziari delle suddette regioni. Seguono: uno schema stratigrafico sul gruppo delle isole all'ovest di Sumatra basato sulle ricerche di Terpstra, sulle isole di Kei secondo gli studi di Weber, alcune notizie sulle isole Ceram, Boeroe, Batang doea (Per il braccio orientale di Celebes l'A. si riferisce a questa rivista pp. 813-814, 1932).

**Vogt Thorolf** - Late-Quaternary Oscillations of Level in Southeast-Greenland [*De livelli oscillationibus, ætate quaternaria perdurante, in Groënlandia sud-occidentali*]. 14 figs., Norg. Svalbard- o. Ishavsunders., Skr. om Svalbard o. Ishavet 60, 1-44. Oslo (1934). **a - 683**

Raised shore-lines in Southeast-Greenland. Raised shorelines in other parts of Greenland. The climatic conditions during the formation of the raised shore-lines. Comparison between the Greenland and Fennoscandia areas of upheaval: Connection of the raised shore-lines. The gradients. The depression of Greenland in the sub-atlantic time. Some further consequences.

**Wanenmacher J. M., Twenhofel W. H. & Raasch G. O.** - The Paleozoic Strata of the Baraboo Area, Wisconsin [*De stratibus palaeozoicis in area* Baraboo]. Amer. Journ. Sc., XXVIII, 163, fifth ser., 1-30. New Haven, Conn. (1934). **a - 684**

Results of studies made during 1931 and 1932. General geologic history: submergences, formation of a ring of islands in the Cambrian seas having a great influence upon the nature of the sediments deposited in its vicinity, erosion. The paleozoic strata and their different formations and fossils. Provenance of the paleozoic sediments.

**An.** - Growth of the Madreporic Reefs - Croissance des récifs madréporiques [*De accretione in scopulis matreporicis*] (En franç. et angl.). Bull. Hydrogr. Int., 1, 9-10. Monaco (1933).

(—) See also: Bull. Hydrogr. Int., 11, 258. Monaco (1933). **a - 685**

Quelques observations au sujet de la note, ayant le titre ci-dessus, parvenues au Bureau Hydrographique International

de la part du Capitaine de Vaisseau J. L. Luymes, Directeur d'Hydrographie des Pays-Bas sur la différence existant entre la croissance des coraux et celle des récifs, sur lesquels poussent les premiers.

**An.** - Rate Growth of Coral Reefs - Croissance des récifs madréporiques [*De accretione in scopulis matreporicis*] (In Engl. & French). 1 tabl., Bull. Hydrogr., Int., 4, 81-82. Monaco (1933). **a - 686**

After a recapitulatory table of the results obtained by Mr. J. Th. Verstelle in his study published in the Miscellany « Treubia », Buitenzorg, Java, Dec. 1932, p. 117 on the rate of growth of the coral, in which are reproduced, with a few changes, the observations already given by him in « De Zee », there is given a postcriptum to the table by Dr. J. Verwey dealing with the causes of the « rising » and « sinking » of the coral reefs.

## Topographia submarina - Marini fundi configuratio.

**Arkangelskij A. D. & Strachov N. M.** - Geologitcheskaia istoria Tchernogo Moria [*Historia geologica Ponti Euxini*]. (Rés. angl.). pl., Bull. Soc. Nat. Moscou, Sect, géol., X, 3-104. Moscou (1932). **a - 687**

Le fond de la Mer Noire. Résultats des explorations commencées en 1924 et achevées en 1930. Les AA. en établissant l'existence d'une série de bassins qui se remplaçaient successivement, cherchent à déterminer les conditions physico-géographiques de cette Mer dans le temps. Bibliographie.

**Baschin O.** - Submarine Täler und Schluchten [*Valles et abyssi submarini*]. Naturwiss., XXII, 4, 63. Berlin (1934). **a - 688**

Beispiele submariner Täler im Atlantischen Ozean; ihre Entstehung mit Zustimmung der von Wegener ausgesprochenen Theorie von Spalten im Kontinentalrand, wahrscheinlich in Verbindung mit Erdbeben in der Jetztzeit.

**Collin M. L.** - Les vallées sous-marines du Nord-Ouest du Finistère [*De vallibus submarinis in regione nord-occidentali Finisterræ*]. 3 fig., Bull. Soc. Océanogr. France, 69, 1217-1222, 70, 1233-1241. Paris (1933). **a - 689**

I. La plate-forme littorale; II. Les ruisseaux du nord de la région; III. L'Alber-Ildut; IV. Chenal du Four et chenal de la Helle; V. La vallée sous-marine du plateau de Molène; VI. Le Fromveur.

**Collin M. L.** - Les vallées sous-marines de la côte Ouest du Finistère [*De vallibus submarinis in litoribus orientalibus regionis Finisterræ*] (Suite et fin). Bull. Soc. Océanogr. France, 78, 1361-1370. Paris (1934). **a - 690**

Suite et fin de la description des vallées sous-marines des environs de Douarnenez. Considération concernant l'origine et le mode de formation de ces vallées; III. Le cap Sizun, la baie des Trépassés, la chaussée de Sein. Morphologie de la région, sa formation. Conclusions: Reconstruction du continent dans la région ouest du Finistère aux dernières époques antépléistocènes. Divers mouvements positifs et négatifs de la mer dans la région considérée. Plages soulevées, falaise fossile. Bibliographie.

**Davis W. M.** - Submarine Mock-valleys [*De falsis vallibus submarinis*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 232-234. Washington D. C. (1933).

(—) See also: « Submarine Mock-valleys », « The Geogr. Rev. », XXIV, 2, 297-308, New York (1934). **a - 691**

The author gives a definition of what he calls « mock-valleys » and claims that it is illogical to insist that submarine valleys can have been originated only in one way. He gives a brief description of the submarine valley some 15 miles southeast of the Santa Monica Coast, the valley which heads in Monterey Bay 70 miles south of the Golden Gate and shows that the valleys have been originated not by subaerial stream-erosion, but formed on the surface of the Earth during the lower stand of the ocean, during the Glacial Epoch.

**De Buen Fernando** - Croisière du « Xauen » dans les eaux de Guipuzcoa [*De navigatione navis* « Xauen » *ad* Guipuzcoa]. 13 fig., 1 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXVII, 8-16. Copenhague (1934). **a - 692**

Compte rendu d'une croisière effectuée pendant les mois de Juillet et Août 1932 dans le but d'exécuter un sondage intensif dans les eaux de la région de Guipuzcoa qui marquerait, avec la plus grande précision possible, les limites du plateau continental, délimitant les zones où l'on peut mettre à l'eau les engins de pêche. L'étude se limita à montrer l'étendue du plateau continental le long des côtes de la province basque de Guipuzcoa, spécialement le golfe, délimité par un saillant vers l'ouest, le Cap Machichaco, et le fond de la Mer Cantabrique au commencement de la côte Française. Liste des sondages effectués.

**De Buen Rafael** - Caractères océanographiques du Secteur Sud (Plateau Continental Atlantique) [*Caracteristicæ oceanographicæ ad Sectionem merid. pertinentes* (*Platea Continentalis Atlantica*)]. 24 fig., Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXVII, 33-44. Copenhague (1934). **a - 693**

Compte rendu de quatre croisières effectuées par le bateau océanographique « Xauen » dans le Détroit de Gibraltar. Étude des caractéristiques du relief sous-marin, et spécialement de la crête de hauts-fonds qui traverse la région centrale du Détroit. Influence extraordinaire du relief du fond modifiant profondément le courant méditerranéen inférieur. Déterminations des profondeurs du détroit dans la barrière centrale qui se trouve entre Punta Paloma et Punta Altares. Les données acquises expliquent les phénomènes dynamiques de la région et ont une grande valeur pour la connaissance exacte du profil favorable pour construire le tunnel de Gibraltar. Résultats des sections effectuées en mai, février, septembre et novembre. Salinités, températures et densités de l'eau observées. Importance des résultats acquis.

**Dons Carl** - Ein Tiefpeilapparat für Dredgungen [*De apparatu ad relevamenta fundi idoneo, actione verrenti perdurante*]. 2 Abb., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 54, 203-205. Trondheim (1934). **a - 694**

Beschreibung eines vom Vf. erfundenen Apparates, der sich besonders für Untersuchungen von Korallenhügeln eignet, wo die Strömungen fast immer zu stark sind um genaue Lotwürfe zu ermöglichen.

**Gruvel A. & Besnard W.** - Recherches sur la nature des fonds de la côte occidentale du Maroc [*Investigationes de natura fundi marini in litoribus occidentalibus Mauretanicis inter caput* Cantin *et Caput* Ghiz]. C. R. Acad. Sc., CIIIC, 25, 1675-1676. Paris (1934). **a - 695**

Les AA. ont relevé sur cette côte occidentale du Maroc certains faits particulièrement intéressants et indispensables à connaître pour assurer, sans trop de risques, le travail des chalutiers sur cette partie de la côte.

**Hess Harry Hammond** - Submerged River-valleys of the Bahamas [*De vallibus fluviatilibus submersis ad* Bahamas *pertinentibus*]. 2 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th

Ann. Meet., Apr. 27-29, 1933, 168-170. Washington, D. C. (1933). **a - 696**

Additional data and results of further studies accomplished by the International (Navy-Princeton) Expedition to the West Indies on the great submarine valleys of the Bahamas: Brief description of the valleys, their threefold origin, the possible hypothesis of valley-like depressions below the sea, transverse profile of the valley, showing steep « reef-cliffs »; hypothesis of the building up, rather than building out of the valleys. Age of the valleys.

Bericht über die Ergebnisse der von dem Vf. im Frischen und Kurischen Haff veranstalteten Untersuchungen zur Klärung der Frage, wie eine Verlängerung der zu kurz ausfallenden Proben erzielt werden könne, bzw. der Ursachen der Verkürzung derselben. Vorschriften um möglichst lange, einwandfreie Profile erhalten zu können.

**Rallier du Baty R.** - Montagnes et vallées sous-marines du Golfe de Gascogne [*De montibus et vallibus submarinis Maris Cantabrici*]. Journ. Cons. Int. Expl. Mer, IX, 2, 181-195. Copenhague (1934). **a - 704**

Compte rendu des résultats des sondages acoustiques effectués par l'A. dans le Golfe de Gascogne et qui semblent renforcer singulièrement l'hypothèse émise par lui dans une communication au 52-ème Congrès de l'Association Française pour l'Avancement des Sciences qui envisage la possibilité, au cours de nombreuses oscillations relatives qu'a subi le niveau marin sur notre globe, d'une surrection régionale de l'écorce terrestre, ou d'un abaissement de la mer, laissant entièrement sêche la cuvette du Golfe de Gascogne, dont le fond est à 5000 m. au dessous du zéro actuel. Reconstruction d'une zone comprise géographiquement entre 45° et 50° de latitude Nord, bathymétriquement entre 100 et 2000 m. et de tracés schématiques de nombreuses dépressions assimilables à des vallées fluviales qui paraissent être le prolongement sous-marin des fleuves et des rivières qui viennent se jeter dans le Golfe.

**Rathjens Karl & Wissmann (von) Herrmann** - Morphologische Probleme im Graben des Roten Meeres [*De problematis morphologicis in fossis Maris Rubri*]. 22 Karten, Phot., Taf., Peterm. Mitt., LXXIX, 5/6, 7/8, 113-117, 183-187. Gotha (1933). **a - 705**

**Shepard Francis P.** - Submarine Valleys [*Valles submarinæ*]. 8 figs., Geogr. Rev., XXIII, 1, 77-89. New York (1933). **a - 706**

Canyons of Georges Bank. Distribution of submarine valleys. Origin of the valleys. The diastrophic explanation. Submarine currents. Solution channels. Recent origin of valleys. Landslides. Tests of the hypothesis. Explanation of valley-free shelves. Importance: practical and theoretical.

**Shepard Francis P.** - Geological Misconceptions Concerning the Oceans [*De erratis geologicis interpretationibus oceanorum*]. 1 fig., Science, LXXVIII, 2027, 406-408. New York (1933). **a - 707**

The author explains the reason why our knowledge about ocean floor is so restricted. Continental shelf profiles, deep inlets along glaciated coasts, submarine valleys, high terraces, and deep ocean floors are dealt with here.

**Shepard F. P.** - Investigations of Submarine Valleys [*De exploratis vallibus submarinis*]. 1 fig., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 170-173. Washington, D. C. (1933). **a - 708**

Rôle of the introduction of echo-sounding and the use of bombs to determine positions in the discovery of many new submarine valleys. Some results of recent surveys which indicate that at least many of the submarine valleys are the production of river-erosion. Use of current-meter in order to see whether waves or currents are important in excavating or maintaining the valleys. Study of the topography of submarine valleys by means of buoys. Results of the study of bottom-samples of submarine valleys. Need of verification of the evidence which suggests that submarine landslides periodically reopen the submarine valleys.

**Tånning A. Vedel** - A Supposed Submarine Ridge along the South-East Coast of Greenland [*De elatione quadam submarina præter litus Sud-orientale Groënlandiæ*]. 2 figs., Nature, CXXXIII, 3357, 326. London (1934). **a - 709**

Soundings made by the Danish Research Ship « Diana » which point to a continuous ridge off the coast south of Angmagssalik. More close investigations are however necessary.

Brief description of the evolution of the inlet on hand of aerial photographs taken at monthly intervals by the U. S. Army Air Corps, of which two are reproduced on a plate.

**Hoover J. W.** - The Littoral of Northern California as a Geographic Province [*De ora maritima Californiæ Septentrionalis sicut provincia geographica*]. 12 figs., Geogr. Rev., XXIII, 2, 217-229. New York (1933). **a - 731**
Description from the physical, commercial, physiographical point of view of the littoral between Point Reyes and Cape Mendocino. The coast and its harbors. The bench lands. Anomalies of the climate. Settlement and industries of the region, between which fishing is less important than lumbering dairying or grazing.

**Huxley Aldous** - Beyond the Mexique Bay [*Trans Sinum Mexicanum*]. viii + 319 pp. Chatto & Windus. London (1934). **a - 732**

**Kimble George H. T.** - The « Nec plus Ultra » of the West African Coast in the Middle Age [*De litoribus Africæ orientalis Medio ævo*]. 3 pls., Mar. Mirr., XX, 3, 280-292. London (1934). **a - 733**
Quotation of the narratives of Ibn Sid of his African voyage (1214-76) and of the trade in salt, the thirteenth-century voyages of Vivaldi brothers, the narrative of the enigmatic Spanish Franciscan, author of the « Libro del Conoscimiento de todos los regnos y tierras (written c. 1350). Some cartographic evidence of pre-Portuguese knowledge of West Africa : West African Portion of the Portolan Chart of Angelino Dulcert, 1339, the Laurentian World Map of c. 1351. Summarizing, the author concludes that, despite the dearth of confirmatory cartographical evidence, and the firm Portuguese belief to the contrary, the mediaeval knowledge of West Africa extended to well within tropical latitudes. The exact location of the « nec plus ultra » must, so it seems, remain a moot question.

**Leblond Marius-Ary** - Madagascar, création française [*Insula Madagascariensis ac opera a Gallis peracta*]. 1 carte, Plon, xxxvii - 255 pp. Paris (1934). **a - 734**
Le livre se compose de deux parties distinctes, dont l'une est descriptive et l'autre critique et constructive. Dans la première nous trouvons la description des abords et des rivages du Madagascar.

**Loppens K.** - La région des dunes de Calais à Knocke [*De regione dunosa a* Calais *ad* Knocke]. 5 pl., Laborat. du Litt., 230 pp. Coxyde (village) (1932). **a - 735**
Étude géologique, archéologique et historique des dunes du littoral flamand.

**Magrini Giovanni** - La Laguna di Venezia. Monografia [*Lacuna Venetiarum. Monographia*]. Vol. I, parte II, tomo III. Delegazione italiana della Commissione per l'esplorazione scientifica del Mediterraneo, 26 fig., XXXIII tav. f. t., 305 pp, Tip. Carlo Ferrari. Venezia (1933). **a - 736**
Nel volume sono trattati i seguenti argomenti : Le osservazioni meteorologiche. I fenomeni meteorologici. Il clima. Fenomeni meteorologici straordinari in Venezia e nei dintorni ricordati dai cronisti (dal secolo VIII ai tempi nostri).

**Mawson Sir Douglas** - The Kerguelen Archipelago [*Archipelagus* Kerguelen]. 7 phot., 1 map. on tabl., Geogr. Journ., LXXXIII, 1, 18-29. R. Geogr. Soc. London (1934). **a - 738**
The object of this paper, read at the meeting of the Royal Geographical Society on 6 March 1933, is to give a short summary of the present knowledge concerning the Kerguelen Archipelago. It deals especially with cartography, hydrology, and biology. The author's observations did not extend beyond the south-eastern quarter of the group. In that area some material additions have been made to du Baty's map of the Kerguelen Islands. Story of the discovery of the Archipelago. Geographical and geological features of the Archipelago. A map of South-Eastern Kerguelen accompanies the paper, based upon the surveys of H. M. S. « Challenger », supplemented by the charts of du Baty and de la Rue, and improved in some details in the area explored with a motor launch and on hand of aerial photographs.

Formazione geologica. Importanza per le comunicazioni fra l'Europa e il Nuovo Mondo. Clima. Vegetazione. Fauna. Condizioni etnografiche e popolazione.

**Association de Géographes Français** - Bibliographie Géographique Internationale 1932 (XLII Bibliographie annuelle) [*Bibliographia Geographica Internationalis 1932* (*XLII Bibliographia annua*)]. 581 pp., Librairie Armand Colin. Paris (1933). **a - 754**

2820 numéros. Index des auteurs ou voyageurs analysés ou cités. Table des matières.

**Koninklijk Nederlandsch Aardrijkskundig Genootschap** - *Nomina Geographica Neederlandica* onder redactie van A. A. Beekman (et 4 collaborateurs). 188 & 160, VII & VIII. E. J. Brill. Leiden (1930 & 1932). **a - 755**

**An.** - Transcription of Geographic Names - Transcription des noms géographiques [*De nominibus geographicis eorumque transcriptione*] (In Engl. & French). Bull. Hydrogr. Int., 4, 79-80. Monaco (1933). **a - 756**

Summary of the content of the second edition of the publication of the Royal Geographical Society, R. G. S. Technical Series, n° 2, the title of which is : « Alphabets of Foreign Languages ». The work of the Permanent Committee on Geographical Names for British Official Use (P. C. G. N.). The results of the revision of the R. G. S. system for the phonetic representation of native sounds by Latin alphabet and the production of the R. G. S. II system.

**An.** - Change of Geographical Name - Hispaniola. Changement de nom géographique : Hispaniola [*De variatione nominis geographici* « Hispaniola »]. (In Engl. & French.). Bull. Hydrogr. Int., 12, 210. Monaco (1933). **a - 757**

Information on a decision taken by the U. S. Geographic Board, dated 29th June, 1933, of the change of the name of the island of Haiti to Hispaniola in all official documents.

**An.** - Geographical Positions - Poland. Positions géographiques - Pologne [*Positiones geographicæ: Polonia*] (In Engl. & French). 1 tabl., Bull. Hydrogr. Int., 2, 27-29. Monaco (1934). **a - 758**

Correction to Special Publication n° 24 a, Geographical Position, Part II February 1931, pp. 25 and 26.

**An.** - Australia. New Zealand and the Islands of the Pacific (Catalogue N. S. N° 12). Periodica (Catalogue N° 13) [*Australia. Nova Zelandia. Insulæ Oceani Pacifici*]. 70 pp. & 12 pp., Dawson & Sons, Ltd. London (1934). **a - 759**

## Geographia Polaris.

**Balabin F. I.** - The Work of the Station on Rudolph Islands in 1932/33 [*De operibus a Statione in insula Rudolphi peractis a. 1932/33*] (In Russ. & Engl.). Bull. Arct. Inst., 4, 173-175. Leningrad (1934). **a - 760**

Account of the program of the work of the station. The work performed: meteorological work, biological work, topographic survey of Rudolph Land and adjacent islands, observations on the movements of glaciers, snow-cover measurements, entomological, botanical and ornithological collections, collections of parasites of mammals (seal) and birds, discovery of the remnants of the equipment belonging to the American Expedition Ziegler-Fiala, buried under a thick layer of frozen snow.

**Bauer H. A.** - « Arctica » A New Magazine of the Arctic Institute of the U. S. S. R. [*Periodicus novus* « Arctica » *ad Institutum Arcticum Sovieticum pertinens*]. Geogr. Rev., XXIV, 3, 499-500. New York (1934). **a - 761**

Comments and summaries of the principal papers published in the first volume of « Arctica », a new magazine issued by the Arctic Institute of the U. S. S. R. (Leningrad), under the editorship of the Professors R. L. Samoilovitch and W. J. Wiese.

**Brown R. N. Rudmose** - Recent Polar Work. Some Criticism [*Novissimæ polares explorationes*]. Pol. Rec., 5, 62-66. Cambridge (1933). **a - 762**

Technique of travel as the more striking difference between the polar work of to-day and that of twenty or thirty years ago. Use of airplane and radio, application of mechanical power to transport. Account of some books published relating polar discoveries. The risk taken nowadays by the young explorers. Discussion about priority of discovery and rivalry in placenames about some late discoveries which unfortunately rob exploration of its disinterestedness.

**Chadrine N.** - Transports aquatiques de l'Extrême Nord [*De subvectionibus per aquam in extremis regionibus Nordicis*] (En russe). Sov. Sever., 6, 69-74. Moskva (1933). **a - 763**

**Deacon E. R.** - Die Nordgrenzen antarktischen und subantarktischen Wassers im Weltmeer [*De limitibus septentrionalibus aquarum antarcticarum et subantarcticarum in Oceano*]. 3 Abb., 1 Taf. m. 3 Abb., Ann. d. Hydrogr., LXII, 4, 129-136. Berlin (1934). **a - 764**

Wiedergabe eines Vortrags, den der Vf. am 12. Januar 1934 in der Deutschen Seewarte gehalten hat. Die Ausführungen des Vf. gründen sich auf die Ergebnisse der ozeanographischen Messungen der Königl. Britischen Forsschungsschiffe « Discovery », « William Scoresby » und « Discovery II ». Die Nordgrenzen antarktischen und subantarktischen Wassers im Weltmeere haben den Vf. wegen ihres engen Zusammenhanges mit der Frage der Plankton-Verteilung besonders interessiert. In diesem Vortrag schildert der Vf. den Verlauf der antarktischen und der subtropischen Konvergenz um die Südhemisphäre herum, die Bewegungen des ozeanischen Tiefenwassers, die Reichweite des antarktischen Zwischenwassers nach Norden, das antarktische Bodenwasser und den zirkumpolaren Verlauf der potentiellen Bodentemperatur.

**De La Rüe Edgar Aubert** - Étude géologique et géographique de l'archipel de Kerguelen [*Studium geologicum et geographicum archipelagi* Kerguelen]. ill., cartes, diagr., Rev. Géogr. Phys. & Géol. Dyn., 5, 1-231. Paris (1932).

(—) V. aussi : G. W. Tyrrell : « A Monograph on the Kerguelen Archipelago », Geogr. Rev., XXIV, 1, 167-168. Washington (1934). **a - 765**

Après une introduction, dans laquelle il décrit ses expéditions de 1928-29 et de 1931 à l'archipel de Kerguelen, l'A. donne un résumé des travaux traitant de cet archipel et discute sa cartographie. Il passe ensuite à l'étude géographique, et donne un aperçu historique de la découverte et de l'exploration des îles composant l'archipel. Les parties successives de l'ouvrage sont dédiées à la géologie, pétrologie, minéralogie, paléobotanique et climatologie de la région considérée. La dernière partie traite de la morphologie de l'archipel de Kerguelen avec référence spéciale au relief et profil de ses côtes, à son hydrologie, glaciologie et les vents. En illustrant la biogéographie de Kerguelen, l'A. adopte la thèse de la dérive continentale de Wegener, dont il se sert comme hypothèse de travail concernant la raison de la séparation de l'archipel de Kerguelen du continent Antarctique.

**Evghenov N.** - Le détroit de Long ou de de Long [*Fretum* Long *seu* de Long *nomine*] (En russe). Bull. Arct. Inst., 9/10, 294. Leningrad (1933). **a - 766**

Rectification concernant la dénomination du détroit qui porte le nom du capitaine américain Long qui l'a traversé pour la première fois en 1867 sur la baleinière « Nil » et que l'on doit distinguer de l'Ile de Long qui porte le nom du lieutenant de Long de la Marine américaine.

**Evghenov N.** - Vingtième anniversaire de la découverte de la Severnaja Zemlja [*De* Severnaja Zemlja *ventesimo recurrenti anno eius inventionis*] (En russe). Bull. Arct. Inst., 9/10, 290-293. Leningrad (1933).

(—) Voir trad. angl. Bull. Arct. Inst., 11, 377-379. Leningrad (1933). **a - 767**

Histoire de la découverte de l'Archipel par les navires hydrographes « Tajmyr » et « Vajgatch » en 1913. Confirmation de l'éxistence de la Severnaja Zemlja par les travaux de G. A. Ouchakov et de N. N. Ourvantzev et résultats des dernières explorations de cet archipel.

**Ivanov I. M.** - Quelques données sur les oscillations du niveau du bassin polaire [*Dati circa livelli oscillationes bacini polaris*] (En russe). 4 fig., 1 tabl., Zemlevedenije, XXXV, 4, 363-368. Leningrad (1933). **a - 768**

**Kanotorovitsch V.** - Le bolchévique dans l'Arctique [*Fides bolscevica in regionibus Arcticis*] (En russe). 5 fig., Naschi Dositzh., 1, 128-140. Moskva (1934). **a - 769**

Episodes des explorations de G. A. Ouchakov. Description des hivernages sur l'Ile de Wrangel et sur la Severnaja Zemlja.

**Kartzev G., Serghievskij B. & Evghenov N.** - Carte de la Mer Polaire du Nord [*Charta maris Polaris Nordici*]. 3 feuilles, Hydrogr. Dpt. Northern Sea Route, nº 1283. Leningrad (1934). **a - 770**

La carte a été dressée sur une échelle de 1 : 3.000.000 sur le parallèle 75º (Projection de Mercator) et comprend la région entre 54º et 84º lat. N. et 30º - 210º long. W.

(v. Réc. de K. Salistschev, Bull. Arct. Inst., 4, 192-193, 1934).

**Koschkin V. N.** - Present State of the Hut of the « Maud » Expedition on Cape Cheliuskin [*Expeditio ad Promunturium* Cheliuskin] (In Russ., Engl. Summ.). Bull. Arct. Inst., 3, 126-128, 163-164. Leningrad (1934). **a - 771**

Description of the actual state of the « Maud » hut on Cape Cheliuskin which represents a memorial of Amundsen's expedition. Discovery of a note-book, containing the diary of Paul Tessem. Good preservation of the hut. Its exact position 45 km. east from the station on Cape Cheliuskin.

**Kourilovitsch A.** - La Grande Route Maritime du Nord et son importance pour l'économie socialiste de l' U. R. S. S. [*De cursu maritimo nordico eiusque momento pro oeconomia socialista in U. R. S. S.*] (En russe). 1 carte, Plan. Khoz., 1/2, 155-171. Moskva (1933). **a - 772**

**Moltchanov P. A.** - Conditions aérométéorologiques de l'Arctique. Les voies aériennes du Nord [*De condicionibus aërometeorologicis regionum arcticarum. Cursus aërii nordici*] (En russe). Sov. Asija, Recueil d'articles, 411-419. Moskva (1933). **a - 773**

**Osterman H.** - Sjeldne aktstykker fra 18de aarhundredes Grønland [*De raris quibusdam documentis circa Groënlandiam sec. XVIII*º]. Norsk Geogr. Tidsskr., IV, 7, 3, 442-454. Oslo (1933). **a - 774**

Der Vf. gibt hier in extenso einige während seiner Studien im Reichsarchiv zu Kopenhagen gefundene Urkunde wieder, welche die grönländische Besiedlung und die Schiffahrt im Arktischen Meere dazumal beleuchten. Kurze Erläuterungen des Textes.

**Ostroglazov G. I.** - Nouveaux points sur la carte de l'U. R. S. S. [*De novis punctis in tabulis Sovietorum*] (En russe). ill., 222 pp., Edit. Etat, « Molod. Gvardia ». Moskva (1934). **a - 775**

Igarka. Route Maritime du Nord. Expéditions dans la Mer de Kara. Entreprise combinée de l'Igarka.

**Pineghin N.** - Encampment of Schmidt's Expedition on the Ice of the Chukchee Sea [*Castra expeditionis* Schmidt *in glaciebus Maris* Chukchee]. (In Russ. & Engl.). 1 map, 1 fig., Bull. Arct. Inst., 3, 111-115, 148-151 ; 4, 169-173, 206-209. Leningrad (1934). **a - 776**

Account of the story of rescue of Schmidt's party after the wreck of the ice-breaker « Cheliuskin » in the Chukchee Sea. Organization of the rescue, and life in the encampment on the ice-cover of the sea.

**Retovskij L.** - Description of the North-East Passage Expedition on a Soviet Ice-Breaker [*De expeditione per transitus nord-occidentales in navi sovietica glacieiruptrici*] (In Jap.). Nin sei chi ri (Geogr. & Ethnogr.), 1, 18-35. Tokyo (1933). **a - 777**

**Rudakov P. A.** - Norwegian Building on Franz-Joseph Land [*Aedificatio quœdam a Norvegis peracta in terra Francisci Josephi*] (In Russ., Engl. Summ.). 1 fig., Bull. Arct. Inst., 3, 125-126 & 163. Leningrad (1934). **a - 778**

Discovery in 1932 by Captain N. P. Vorotilov of the s/s « Leningrad-soviet » on Cape Forbes, Franz-Joseph Land belonging to Den Norske Frans-Josef Ld. Expedition. Brief description of the building.

**Samoilovich R. L.** - Arctica. Foreword [*Introductio*] (In Russ. & Engl.). Arctica, 1- 3-5. Leningrad (1933). **a - 779**

Foreword to the first volume of a non-periodical magazine, published by the Arctic Institute of U. S. S. R., which would open its pages to papers and short articles that for the character of their contents could not appear in the other publications of the Institute.

**Samoilovitsch R. L.** - Le problème des transports dans l'Arctique Soviétique [*De subvectionibus in regiones arcticas Sovieticas*] (En russe). 3 fig., Boj za Techn., 2, 18-20. Moskva (1934). **a - 780**

**Schoo J.** - De geografische plaatsbepaling van Ptolemaeus aan de Hollandsche Kust [*Determinatio geographica Ptolemaica litorum Hollandicorum*]. 2 Abb., 1 carta, Tijdschr. Kon. Ned. Aardr. Gen., Amsterdam, LI, 1, 35-50. Leiden (1934). **a - 781**

Discussione sui dati di longitudine e latitudine offerti da Tolomeo ; alcune correzioni, spiegazioni ed identificazioni dei nomi geografici. Conclusione dell'A. a riguardo della costa olandese-belga da sud-ovest dello sbocco del Reno a Katwijk, basata su questo studio.

**Swick C. H.** - Progress in Research in Antarctic Waters [*De progressibus in aquis antarcticis inveniendis*]. Geogr. Rev., XXIV, 4, 666-668. New York (1934). **a - 782**

The extraordinary rise in Antarctic whaling in the last decade has occasioned important progress in the knowledge of Antarctic water. Some hints are given here.

**Tchernjak B.** - Chronique des navigations arctiques en 1933 [*Chronica navigationum ad regiones Arcticas a. 1933*] (En russe). Sov. Sever., 6, 89-90. Moskva (1933). **a - 783**

**Teichert Curt** - Ostgrönlands Fjorde. Bilder von der Dreijährigen Dänischen Ostgrönlandexpedition unter Leitung von Dr. Lauge Koch [*De fiordis in Groënlandia orientali. De expeditione a Danis tres annos suscepta in Groënlandiam orientalem, Doct.* Lauge Koch *directore*]. 8 Abb., Nat. u. Mus., LXIII, 12, 407-415. Frankfurt a. M. (1933). **a - 784**

Die Fjorde Ostgrönlands, die zu den grössten der Erde gehören, hat man erst am Ende des 19. Jahrhunderts auszuforschen angefangen. Beschreibung von Scoresby Sund, Kaiser-Franz-Joseph Fjord, Godthaab-Golf u. a. Besiedlung, Expeditionen, Eisverhältnisse, geologische, hydrologische und zoologische Verhältnisse, Entstehung der Fjorde.

**Wiese W. J.** - Andrejew Land [*De terra Andreev*] (In russ., deutsch. Rés.). 2 Abb., Arctica, 1, 7-30. Leningrad (1933). **a - 785**

Ausführliche historische Uebersicht aller Versuche das Gebiet des Andrejew Landes zu erreichen und zu erforschen (1733-1923). Zum Schluss berichtet Vf. über die indirekten Angaben, welche sich zum Vorhandensein oder zum Nichtvorhandensein dieses Landes beziehen, und schliesst seine Arbeit mit der Betrachtung, dass die heutige Entwicklung der Luftschiffahrt sicher das Problem des Andrejew Landes bald lösen wird.

**Wiese W.** - Trading Navigation in the Kara Sea [*De navigatione commercii causa in Mare Karense*]. 1 tabl., Pol. Rec., 6, 90-94. Cambridge (1933). **a - 786**

History of the trade navigation in the Kara Sea which has begun in the XVIth century ; development of trading navigation in the Kara Sea in the last century and at the beginning of the XXth century. First steps taken to establish a regular navigation in the Kara Sea : organization of meteorological radio stations on its shores, giving the possibility to judge of the ice conditions in the sea and to forecast the distribution of the ice during the season of navigation. Measures taken to ensure successful navigation in the Kara Sea. Exploration work carried on in order to enlarge the route of navigation in the Kara Sea. Development of this navigation since 1921.

**Zimmerman M.** - Géographie Universelle : Tome III. Etats Scandinaves, Régions Polaires Boréales [*Geographia universalis. Tomus III.us Nationes Scandinavæ. Regiones Polares Boreales*]. ill., 328 pp., Armand Colin. Paris (1933). **a - 787**

Description de la Norvège et de ses fjords, du Spitzberg, du Groenland, de l'Irlande, de la mer Polaire, de la banquise et de tous les mystères connus et inconnus des régions polaires boréales.

---

**Académie des Sciences** - L'Académie des Sciences au XVII-ème Congrès du Parti Communiste. II. Activité expéditionnaire. Compte rendu du Conseil pour l'étude des ressources de l'Union R. S. S. [*De Academia Scientiarum eiusque activitate circa expeditiones scientificas relata ad Congressum XVII.um habitum a fautoribus aequationis bonorum*]. 2 cartes, 64 pp., Acad. Sc. U.R.S.S. Léningrad (1934). **a - 788**

Les régions septentrionales: Novaja Zemlja, Ile Kolgoujev, l'embouchure du fleuve Petchora, l'Oural Subpolaire, les bassins des rivières Mezenj, Poutjatj, Pinega et Kouloj. Bref compte rendu des travaux d' exploration des régions sus-indiquées (16-17). République de la Yakoutie. Liste des travaux exécutés dans la Yakoutie depuis 1925 jusqu'à 1933 (59-62).

## Relevationes hydrographicae (geodeticae, topographicae, bathymetricae) - Instrumenta hydrographica et bathymetrica - Naves hydrographicae.

**Adams Oscar S.** - Plane Coordinates Systems [*De systhematis coordinatarum planarum*]. U. S. Dpt. Comm., Coast & Geod. Surv., Ser. nº 562, 1-6. Washington, D. C. (1933). **a - 815**

The author studies the possibility of establishing plane coordinates systems for more extended area, as it has been used until now, so as to provide the advantages of plane coordinates and at the same time to make possible a perfect coordination of the work of different engineers throughout the whole region for which one system is adequate.

**Albertario L.** - Un nuovo teodolite topografico Salmoiraghi [*Teodolitis novus topographicus e systhemate* Salmoiraghi]. La Filotecnica, 6, 181-190. Milano (1932). **a - 816**

Descrizione delle caratteristiche e del funzionamento dell'istrumento.

**Argentieri D.** - Verifica e rettifica trigonometrica d'un obbiettivo [*Inspectio et emendatio trigonometrica lenticulæ photographicæ*]. La Filotecnica, 6, 187. Milano (1932). **a - 817**

Limitandosi al caso semplice di un obbiettivo da cannocchiale, che deve rispondere a solo quattro condizioni, si dà un esempio pratico del procedimento da seguire per la messa a punto di tale sistema ottico.

**Avers N. G.** - The Determination of Elevations [*Elevationum determinatio*]. Bull. Nat. Res. Counc., 78. 212-220. Washington (1931). **a - 818**

After a demonstration of the importance of determination of elevations, the author describes the various methods of levelling and determination of relative elevations, the classification of levelling, the fundamental level net, its reference to mean sea-level and the deviations of the mean sea-level surface from a level surface, which are small, but introduce a complicating factor in the geodesist's work of spreading nets of precise level lines over large areas. The fact of the deviation and its magnitude are discussed in the last part of the paper.

**Beer Arthur** - Hochseepegel [*De scandaliis in mare altum*]. 5 Abb., 1 Tab., Naturwiss., XXI, 51, 890-894. Berlin (1933). **a - 819**

Eingehende Beschreibung eines neuen ozeanographischen Apparates, des neuen Askania-Hochseepegels nach Rauschelbach, der die Ermittelung der vertikalen Komponente der Gezeiten des Meeres ermöglicht und der gerade dort angewendet werden kann, wo die Aufstellung normaler Registrierpegel nicht möglich oder nur mit grossen Kosten verbunden ist. Kurze Uebersicht der Gezeitenlehre und der damit zusammenhängenden Instrumente.

**Beltchenko K.** - Sur la hydrologie du Golfe de Karkinit [*De hydrologia Sinus* Karkinit]. Rev. üb. Hydrogr., 2. Leningrad (1933). **a - 820**

**Bianchi D'Espinosa Rodolfo** - Nuovi studi ed orientamenti nell'attività dell'Istituto Geografico Militare [*Studia nova orientationesque Instituti geographici Militaris*]. Atti Soc. It. Progr. Sc., XXII Riun., II, 1933, 83-101. Roma (1934). **a - 821**

Rassegna delle attività dell'Istituto Geografico Militare nel campo geodetico e geofisico. Revisione della rete geodetica di primo ordine. Nel campo delle determinazioni magnetiche. Partecipazione dell' Istituto Geogr. Militare alla Campagna internazionale delle longitudini. Nel campo della fotogrammetria terrestre ed aerea. Macchine di presa. Fotogoniometro Santoni, Triangolatore, triangolazione aerea. Il restitutore. Applicazioni fin qui fatte dall'aerofotogrammetria. Il metodo Santoni dal punto di vista dell'esattezza raggiungibile. Lavori per la tenuta al corrente della cartografia militare. Cenno sulle novità più salienti nell'Ist. Geogr. Militare. L'Ist. Geogr. Militare nella predisposizione dei lavori di più diretta utilità nazionale.

**Blokhin N.** - Lunette des passages transportable de Bamberg avec micromètre impersonnel pour la détermination du temps. Recherches sur son degré de précision [*Telescopium transitus registrans, micrometro impersonali praeditum*] (En russe). 5 fig., 14 tabl. Sborn. Stat. Astron. Géod. Vopros., App. à la revue « Ghéodézist », 12-60. Moskva (1932). **a - 822**

L'A. renvoie pour la description de la lunette elle-même à la publication d'Ambroun dans l' « Astronomische Instrumentenkunde » et s'arrête particulièrement sur la description et le fonctionnement du micromètre impersonnel dont il illustre les erreurs progressives, les erreurs périodiques de la jauge, détermine la largeur du contact électrique et la marche à vide. Les chapitres IV et V traitent des recherches sur le niveau et des bases de la méthode de la détermination du temps à l'aide de la lunette des passages sur le méridien avec référence spéciale à l'équation fondamentale, à l'erreur accidentelle dans l'observation du passage des astres, à la détermination de l'inclinaison de l'axe horizontal, à celle de l'erreur moyenne admise a priori d'une détermination de la correction de l'horloge, et aux observations et calculs exécutés avec le micromètre impersonnel avec leurs vérifications a posteriori.

**Borden F. S.** - United States Coast and Geodetic Survey [*Relevamenta geodetica et litorea Provinciarum Foederatarum Americæ*]. Rep. Comm. Submar. Config. & Ocean. Circul., Nat. Res. Counc, 1932, 19-22. Washington, D. C. (1932). **a - 823**

Improvement of technique : further development of radio acoustic methods for fixing position for soundings in offshore areas. General statement : 76.000 miles of sounding lines comprising an area of 93,000 square miles have been run by the vessels of the U. S. Coast and Geodetic Survey, and over 780.000 soundings have been taken in North Atlantic Ocean, Western Pacific, Philippine Islands, and Northeast Pacific.

**Bowie W.** - The Use of Laplace Azimuths in the Adjustment of Triangulation [*De utendis azimut Laplacianis ad triangulationem corrigendam*]. Bull. Géod., 39, 237-249. Paris-Toulouse (1933). **a - 824**

After a brief summary of the different systems to perform triangulation work the author emphasizes in his conclusions the following three points : 1) Although the use of Laplace stations in triangulation adjustments may not entirely prevent the swerving of arcs of triangulation from true directions, the results are so nearly perfect that one may accept the present method of using Laplace azimuths as being quite accurate ; 2) The adopted position of Meades Ranch is very close to the ideal value ; 3) The use of the Clarke instead of the Hauford spheroid has not in any way affected the usefulness of the triangulation data for engineering, surveying and mapping purposes.

**Bowie W.** - Surveying and Mapping the United States [*Relevamenta et chartæ ad Americæ Provincias Foederatas pertinentes*]. Milit. Engr., Sept.-Oct., 386-389. Washington (1933). **a - 825**

**Buchar E.** - Un appareil simple pour mesurer l'équation personnelle dans les observations aux instruments des hauteurs égales [*Apparatus simplex ad æquationem personalem mensurandam in observationibus per instrumenta æquali altitudine*]. Bull. Géod., 38, 167-172. Toulouse-Paris (1933). **a - 826**

**Campa Maria** - Studio delle viti di un apparecchio Troughton e Simms [*De cochleis cuiusdam apparatus e systhemate* Troughton *et* Simms]. Mem. Soc. Astr. It., VII, 1, 51-58. Milano (1933). **a - 827**

È una ricerca eseguita allo scopo di determinare gli errori progressivi e periodici delle due viti di misura (ascensione retta e declinazione) di un micrometro adoperato durante l'ultima opposizione del pianetino Eros (1930-31). Il metodo è basato sulla misura di un intervallo costante, eguale a poco più di una rotazione, per tutti i passi e nei due sensi delle viti, in corrispondenza di posizioni del micrometro differenti di 180°. Gli errori progressivi e periodici sono stati ricavati dallo stesso insieme di misure raggruppate e trattate differentemente nei due casi.

**Campo Michele** - La scuola di Topografia dell'I. G. M. [*De schola topographica ad Institutum Geographicum Militare pertinens*]. 2 fig., 7 tav. f. t. L'Universo, 10, 575-586. Firenze (1932). **a - 828**

L'A. espone ampiamente i programmi e i metodi seguiti nei corsi di topografia che si tengono annualmente all'I. G. M.; mette in evidenza ed illustra i risultati che si conseguono e dimostra che la scuola è più che utile, necessaria alla formazione non solo di provetti operatori, ma anche di esperti capi sezione.

**Cassinis Gino** - L'opera di Ignazio Porro documentata all'Esposizione di Chicago [*De operibus Ignatii* Porro *ex documentis in expositione Cicagensi*]. La Filotecnica, n° 4. Milano (1933). **a - 829**

Contributo di Ignazio Porro al perfezionamento degli strumenti topografici e dei metodi di misurazioni geodetici, che ha una importanza universale ; descrizione dei modelli originali degli strumenti costruiti dal Porro esposti a Chicago.

**Cassinis G. & Dore P.** - Tables fondamentales pour les réductions des valeurs observées de la pesanteur [*Tabulæ fundamentales pro reductione valorum gravitatis observatorum*]. (Édition provisoire présentée à la Commission internationale de la Pesanteur. Lisbonne 1933). R. Comm. Geod. Italiana. Milano (1933). **a - 830**

Il fascicolo contiene in edizione provvisoria con le pagine non numerate, le tavole per le riduzioni dei valori della gravità per la Terra sferica. Nella premessa gli AA. dànno qualche ragguaglio sul procedimento seguito nei calcoli e sul modo d'impiego delle tavole nei differenti casi.

**Chandon E., De Volontat R. & Gougenheim A.** - Appareils de mesure de l'équation personnelle absolue dans les observations à l'astrolabe à prisme [*Apparatus ad æquationem absolutam personalem mensurandam in observationibus, astrolabii prismatici auxilio solutis*]. 4 fig., 4 tabl., Bull. Géod., 40, 285-305. Paris-Toulouse (1933). **a - 831**

Notions précises sur l'équation personnelle dans les observations à l'astrolabe à prisme. Historique des appareils de mesure des équations personnelles. Méthode d'expérimentation. Principe commun aux appareils destinés à mesurer cette équation personnelle. Appareils à collimateur. Appareils visuels. Comparaison des résultats fournis par les divers appareils et conclusions.

**Colman J.** - The Woods Hole Oceanographic Institute. Sonic Soundings [*Institutum oceanographicum in* Woods Hole. *Scandalia acustica*]. Geogr. Journ., Oct., 326-336. London (1933). **a - 832**

**Conti Mario** - L'analisi fisica dei vetri [*De analysi physica vitrorum*]. 17 fig., Ind. Vetro e Ceram., seconda serie, n. 1, 2, 5, 6, 7, 26-29, 55-59, 202-205, 230-234, 294-298. Milano (1933). **a - 833**

L'A. tratta dell'analisi fisica dei vetri, delle varie prove tecniche interessanti l'industria vetraria, e precisamente della determinazione del coefficiente di dilatazione dei vetri. Tratta poi delle altre prove relative all'analisi fisica e cioè : le prove di omogeneità che l'A. divide in due categorie : prove visuali e prove fotografiche ; e lo studio delle relazioni tra caratteristiche fisico-ottiche e chimiche dei vetri.

**Del Lungo Carlo** - Nuova livella idropneumatica sensibilissima [*Livella nova hydropneumatica ipersensibilis*]. 1 fig., Ric. Scient. (Boll. Com. Naz. It. per la Geol. e Geof., II, 5/6, 50-52. Roma (1933). **a - 834**

Viene descritto un dispositivo di grandissima sensibilità costruito dall'A. alcuni anni fa per misurare piccole variazioni di inclinazione del suolo o di direzione della verticale.

**Digiesi Domenico** - Studio sul passaggio fra due reti geodetiche di stadi limitrofi [*De transitu inter duas retes geodeticas nationum finitimarum*]. 1 fig., 1 graf. f. t., Universo, a. XIII, 6, 299-308. Firenze (1932). **a - 835**

L'A. partendo dalle serie di Legendre, ottiene, differenziando, due formule che permettono il passaggio tra due reti geodetiche di Stati limitrofi, e calcola le coordinate geografiche ellissoidiche di Monte Thabor, nel sistema italiano, partendo da quelle note nel sistema francese.

**Digiesi Domenico** - Sulla forma e dimensioni della Terra [*De Terræ forma ac dimensionibus*]. Studio sui primi metodi di ricerca e sui lavori eseguiti, 1 fig., Universo, a. XV, 7, 565-569. Firenze (1934). **a - 836**

Accennando alle prime due ipotesi sulla forma della Terra, l'A. passa in rassegna le diverse misure eseguite dai tempi di Eratostene a quelle del secolo XVIII, con particolare trattazione del metodo proposto da Tolomeo. Per la misura eseguita da Posidonio dimostra che il risultato fu di 180.000 stadii ; con riferimenti esatti, fa poi rilevare che Cristoforo Colombo usò il valore della misura araba, valore noto in Italia già dai tempi di Dante.

**Field Richard M.** - Gravity Expedition in Cuba [*De expeditione quadam ad Insulam Cubam gravimetriæ causa*]. Science, LXXVIII, 2010, 7. New York (1933). **a - 837**

Short note on the 79 gravity stations completed in Cuba between January 7 and May 3, principally in the Provinces of Havana, Matanzas, Santa Clara and Camagüey.

**Flechter Alfredo** - Rilevamenti aerofotogrammetrici dell'Istituto Geografico Militare [*Relevamenta aëriophotogrammetrica ab Instituto Geographico militari peracta*]. 2 fig., 5 f. t., una cart., Universo, 8, 605-613. Firenze (1933). **a - 838**

L'A. enumera ed illustra i lavori di rilievo aerofotogrammetrico compiuti dall'Istituto fra il 1927 e il 1932 col sistema Santoni, e ne trae argomento per lumeggiare le brillanti applicazioni per le quali l'aerofotogrammetria ormai si impone nei rilievi della superficie terrestre.

**Forni G.** - Sulle coordinate geografiche dei punti della Corsica [*De coordinatis geographicis aliquorum punctorum in Corsica*] Riv. Maritt., 3, 295-300. Roma (1933). **a - 839**

Premesso un rapido cenno storico sull'idrografia della Corsica, l'A. riferisce i risultati delle sue ricerche intorno a pubblicazioni francesi dell'ing. Hart, e di Helbronner su coordinate geografiche di punti della costa della Corsica.

**Garner C. L.** - Progress of Geodetic Work During the Past Year [*De progressibus in operibus geodesicis anno elapso*]. 2 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 58-63. Washington, D. C. (1933). **a - 840**

Account of the geodetic work, consisting largely of the work of the United States Coast and Geodetic Survey and comprising the determination of gravity, astronomical latitudes, longitudes and azimuths, observations for the variation of latitude, base-measurements, triangulation, and levelling. Accomplishment for both field and office work for the past year, 1932.

**Gennaro A. & Pacella G. B.** - La latitudine dell'Osservatorio di Trieste [*De latitudine Observatorii Tergestini*]. Pubbl. R. Oss. Astr. di Trieste, I, 1, 1-14. Trieste (1934). **a - 841**

Sono descritti i lavori svolti ed il metodo prescelto per la determinazione, con tutto il rigore consentito agli AA. dai mezzi a loro disposizione, della latitudine dell'Osservatorio di Trieste, di cui finora non si aveva che un valore provvisorio.

**Gennaro Ida** - Collegamento geodetico della nuova Specola dell'Università di Genova alla rete di 1° dello Stato [*De colligatione geodetica novæ Speculæ Universitatis Genuensis cum rete nationali primi gradus*]. Atti R. Acc. Sc. Torino (Cl. Sc. Fis., Mat. e Nat.), LXVIII, 1/2/3, 24-34. Torino (1933). **a - 842**

In questo lavoro viene riferito sulle operazioni e sui calcoli, per ricavare le coordinate geografiche della nuova Specola geodetica della Università di Genova. La deduzione in sostanza è la riduzione al nuovo centro delle coordinate della vecchia Specola precedentemente determinate dal prof. U. Barbieri nel 1908.

**Gherardi W. R.** - Travaux océanographiques effectués par le Service Hydrographique et par la Marine des Etats-Unis d'Amérique au cours de l'année 1932 [*De operibus oceanographicis peractis a Servitio Hydrographico atque Classe Provinciarum Foederatarum Americæ a. 1932*]. Rev. Hydrogr., XI, 1, 31-34. Monaco (Princ.) (1934). **a - 843**

Extrait et traduit des « Transactions of the American Geophysical Union », 14th Annual Meeting, April 27-29, 1933, p. 180. Washington D. C. (1934).

**Giaquinta S.** - Campo di visione nelle lenti bifocali e loro esatto montaggio [*Visus in vitris bifocalibus. Agitur etiam de eorum perfecta dispositione*]. 5 fig., La Filotecnica, 2, 122-124. Milano (1932). **a - 844**

Viene mostrata la tecnica del montaggio affinchè le due zone di visione abbiano ad essere conciliate insieme nel modo migliore.

**Gougenheim A.** - Mission Hydrographique de l'Indo-Chine 1930-1931 [*De missione hydrographica Indo-Sinensi 1930-1931*]. ill., 48 pp., Imprim. Nat. Paris (1933). **a - 845**

**Gruber (von) O.** - Collected Lectures and Essays [*Collectio conferentiarum et publicationum*]. ills., 470 pp., Chapman & Hall. London (1932). **a - 846**

**Grupelli Enrico** - Rilevamento topografico in Sicilia [*Relevamenta topographica in Sicilia*]. 5 fot. Universo, 12, 771-719. Firenze (1932). **a - 847**

Relazione sui lavori — diretti dall'A. — che l'Istituto geografico militare riprese nel 1931 per i rilevamenti topografici in Sicilia, e che erano stati sospesi nel marzo 1930. Furono eseguite rilievi al 25.000 ed anche rilievi al 5.000 per conto dell'Ente Autonomo degli Zolfi.

**Guarducci F.** - Sulla osservazione di stelle nell'Almucantár del Polo [*De stellarum observatione*]. Memorie Soc. Astron. Ital., VII, 3. Milano (1933). **a - 848**

Memoria postuma in cui sono descritti metodi semplici per determinazioni, isolate o associate, di latitudine, azimut e tempo. Detti metodi si basano sulla osservazione al filo orizzontale del reticolo di una stella ad una distanza zenitale uguale alla colatitudine del luogo di stazione (passaggio all'Almucantár del Polo). L'A. dà gli sviluppi analitici dei metodi e le norme pratiche per la preparazione delle osservazioni.

**Henry J.** - Réduction d'une sonde [*De reductione cuiusdam scandalii*]. 1 fig., Bull. Soc. Océanogr. France, 78, 1371. Paris (1934). **a - 849**

Illustration, suivie d'un exemple pratique, d'une méthode graphique qui permet de réduire rapidement une sonde, lorsqu'on connaît : l'heure de la pleine mer, l'unité de hauteur et le coefficient de la marée.

**Hinks Arthur R.** - Maps and Survey [*Chartæ et relevamenta*]. maps, diagr., ills., xiv & 283 pp. Univ. Press. Cambridge. The Macmillan Co., New York (1933). **a - 850**

Third, for the most part rewritten, edition of the study of maps and the processes of survey by the secretary of the Royal Geographical Society, containing also a brief history of early maps as a preface to the chapter on the modern map. The author describes then the published maps : British official maps, international maps, maps of Europe, other foreign maps, and charts and atlases. The rest of the book is devoted to survey operations and the final chapter deals with survey instruments developed since the war. It includes the new theodolites, prismatic astrolabes, geodetic pendulums, and stereoplotters.

**Hristoff Wl. K.** - Einige Bemerkungen zu Krügers Koordinaten-Transformationen [*Notæ de conversione coordinatarum Krugerii*]. Ztschr. f. Vermessungswesen, 15 Juli, 329-331. Stuttgart (1933). **a - 851**

**Iselin Columbus** - Summary of Hydrographic Observations Taken from « Atlantis » on Voyage from Plymouth, England, to Woods Hole [*Com-*

*pendium observationum hydrographicarum navi « Atlantis » peractarum perdurante navigatione a Plymouth ad Woods Hole*], Woods Hole Ocean. Inst., Rep. 1930-32, 32-33. Massachusetts (1933). **a - 852**

**Jelstrup Hans S.** - Détermination astronomique de Mygg-Bukta au Groenland oriental [*Determinatio astronomica regionis* Mygg-Bukta *in Groënlandia orientali*]. 7 fig., 1 carte, Norg. Svalbard o. Ish.-unders, Skr. Svalbard, o. Ish., 50, 1-44. Oslo (1932). **a - 853**

I. Partie descriptive. Avant-propos. Description des appareils. Travaux préparatoires aux observations. Méthodes d'observation. Méthodes de calcul ; II. Séries complètes de déterminations astronomiques. Détermination de quelques constantes instrumentales. Détermination de latitude. Détermination de longitude et d'azimut. Tableau des résultats obtenus. Remarques finales.

Impressioni dell'ascensione al cratere centrale. Sommaria descrizione dei lavori aerofotogrammetrici svolti nel 1932 nella zona Etnea. Cenni sulla particolare utilità della carta dell'Etna.

**Marin Alberto** - Algunos problemas de fácil solución [*De quibusdam problematis perfacile solvendis*]. Memorial Técnico (Ejércita de Chile), a. II, 7, 887-916. Santiago de Chile (1934). **a - 862**

Variados problemas de topografía cuya solución es acompañada por medio de cálculos y por sencillos gráficos. Medición indirecta de distancias por medio de un anteojo Zeiss de campaña, cuyo uso es frecuente en operaciones militares.

**Marti P.** - Méthodes acoustiques (5-ème rapport) [*Methodus acustica. (Relatio Va)*]. Rapp. Proc.-Verb. Cons. Expl. Mer, VIII, 163-166. Paris (1934). **a - 863**

Établissement d'un matériel nouveau pour profondeurs courantes. Quelques études relatives à l'exploitation plus précise des résultats dans le sondage aux grandes profondeurs. I. Sondage aux petites profondeurs. A. Sondeur ultra-sonore pour petites profondeurs. B. Sondeur par coups de marteau pour petites profondeurs. II. Sondage aux profondeurs courantes. A. Sondeur allemand dit « Echographe ». B. Sondeur par coups de marteau pour petits bâtiments, sondage « cadencé ». III. Sondage aux grandes profondeurs.

**Marussi A.** - Sulla legge di frequenza degli errori di osservazione in strumenti a cerchio graduato [*Lex de frequentia errorum, observationum causa, in instrumentis cum circulo in gradus diviso*]. Universo, Agosto. Roma (1934). **a - 864**

**Masserano G.** - Campagna topografica 1933 [*De operibus topographicis a. 1933*]. 1 carta. Boll. Geogr. (Gov. della Cirenaica), 16, 7-14. Bengasi (1933). **a - 865**

La campagna topografica 1933 in Cirenaica comprende due tipi di rilievi : *a)* Rilievi al 400.000 nella zona delle oasi meridionali ; *b)* Rilievi regolari al 100.000 della parte settentrionale della Colonia. È riferito per esteso il programma, l'organizzazione della campagna, i procedimenti.

**Maurer H.** - Echolotungen [*Scandalia sonora*]. Tab., Nachr. f. Seefahrer, 51. Berlin (1932). **a - 866**

Als Beilage zu nº 51, 1932 der « Nachrichten für Seefahrer » ist diese Brochure veröffentlicht worden. Sie enthält die Ergebnisse der Echlotungen, welche an Bord der Kreuzer « Emden » (1929-31) und « Karlsruhe » (1931-32) ausgeführt wurden, sowie an Bord des Vermessungsschiffes « Meteor », der Norddeutschen [illegible] und der Dampfer « Europa » und « Kolumbus » (Lloyd), sowie des Dampfers « Cap Arcona » der Hamburg-Süd-Amerikanischen Dampfschiffahrts-Gesellschaft (1932). In der Einleitung zu der vorliegenden Brochure schildert der Vf. die Bearbeitungsmethode der erhaltenen Peilungsergebnisse.

**Median Manuel** - The Progress of Geodetic Work in Mexico During Recent Years [*De progressibus in operibus geodesicis regionis Mexicanæ proximis annis*]. 3 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 54-58. Washington, D. C. (1933). **a - 867**

Present state of the geodetic triangulation in Mexico. Instruments and methods of observation. Geodetic astronomy. Precise levelling. Gravity-observations. Topography and photogrammetry.

**Modona A. N.** - La topografia antica [*De topographia vetere*]. Universo, An. XIV, 12. Firenze (1933). **a - 868**

**Musella F.** - Brevi cenni di Idrografia [*Compendium hydrographicum*]. 14 fig., Boll. di Pesca, Pisc. e Idrobiol., 3, 371-394. Roma (1933). **a - 869**

Dopo aver accennato allo scopo che si propone l'Idrografia, l'A. parla delle misure geodetiche di triangolazione e livellazione, del rilievo sottomarino, dei segnali e strumenti per le operazioni geodetiche e topografiche; della determinazione magnetica, degli scandagli; delle macchine a scandagliare, della rappresentazione grafica dei punti della terra e letture delle carte marine, e della nave idrografica. Completa questo cenno di idrografia con la terminologia geografica relativa alla configurazione orizzontale della terra emersa, al livello del mare e alle profondità marine.

**Nares J. D.** - Embarcations pour l'hydrographie (Suite) [*Naviculæ ad investigationes hydrographicas idoneæ*]. 5 fig., 1 pl., Rev. Hydrogr., XI, 1, 19-20. Monaco (Princ.) (1934). **a - 870**

Informations sur le Service Hydrographique Norvégien, contenant les détails de quelques unes de ses embarcations. Supplément aux informations sur le même sujet, concernant le Canada.

**Neviani Antonio** - Pantografo ottico [*De pantographo optico*]. Boll. Soc. Geol. It., LI, 1, 81-84. Roma (1932). **a - 871**

Semplice apparecchio atto alla riproduzione di qualsiasi piccolo disegno od oggetto che, con disposizione opportuna di due tavolette mobili (l'una che funziona da porta oggetti e l'altra da piano del disegno), si ottiene ingrandito o impicciolito, od anche delle medesime dimensioni. La parte ottica, che rappresenta il centro del dispositivo è data dalla comune camera lucida Abbe.

**Nielsen Niels** - Contribution to the Physiography of Iceland, with Particular Reference to the Highlands West of Vatnajökull [*Contributio in physiographyam Islandiæ. Agitur particulatim de altitudinibus in regione occidentali* Vatnajökull]. maps., diagrs., ills., Mém. Acad. R. Sc. & Lettres Danemark. Sect. Sc. Sér. 9, IV, 5, 183-187. Copenhague (1933).

(—) See also: M. A. Peacock, « The Physiography of Iceland », Geogr. Rev., XXIV, 2, 345-346. New York (1934). **a - 872**

Summary of the results of author's season's work (1927) which allowed to discover some striking errors in the position and extent of important topographic features of Iceland as represented of the best available topographic map (map of Th. Thoroddsen 1 : 600,000, Copenhagen, 1901). The author also offers a valuable and readable contribution to Iceland geomorphology and insists on the tectonic and volcanic control of relief in Iceland.

**Nosei Amedeo** - Sul « Cleps » coloniale Salmoiraghi [*De coloniali instrumento* « Cleps » *nomine, e systhemate* Salmoiraghi]. 1 ill., La Filotecnica, 5, 175. Milano (1932). **a - 873**

Breve illustrazione dello strumento.

**Ogilvie N. J.** - The Application of Radio to Astronomical Longitude-Determinations of the Geodetic Survey of Canada [*De radioapplicationibus pro determinationibus astronomicis longitudinis apud Servitium Geodesicum Canadense*]. 1 table, Nat. Res. Counc., Trans. Amer. Geoph., Union, 14th Ann. Meet., Apr. 27-29, 1933, 44-47. Washington, D. C. (1933). **a - 874**

Historical account of the development of the use of the radio in connection with longitude-determinations since 1914 by the Geodetic Survey of Canada. Description of the equipment used for the purpose. Various types of receivers and antennas. Reducing of the coast of geodetic survey resulting from the application of radio, which has revolutionised and simplified the technique of astronomical longitude-determination.

**Parker W. E.** - Use of Range-Finders for Hydrographic Surveying. L'emploi du télémètre pour les levés hydrographiques [*De adhibendo telemetro ad relevamenta hydrographica*]. Rev. Hydrogr., XI, 1, 120. Monaco (Princ.) (1934). **a - 875**

Extrait et traduit du « Bulletin of the Association of Field Engineers », U. S. Coast & Geodetic Survey, n° 5, p. 79, Juin 1932. Description de l'emploi du télémètre dans le repérage radioacoustique.

**Paroli Alfredo** - Gli errori di chiusura delle poligonali e la legge di frequenza di essi [*De erroribus in clusura poligonalium ac lege de eorum frequentia*] (Bibl). 6 fig. e 3 tav., Ric. d'Ingegneria, 1, 1-15. Roma (1934). **a - 876**

Espressi gli errori di chiusura di una poligonale in funzione dei suoi elementi geometrici e di coefficienti ricavabili sperimentalmente, l'A. verifica, mediante ripartizione statistica degli errori di un sistema di poligonali, l'accordo fra la frequenza matematica e quella effettiva di essi e fra la loro distribuzione teorica e quella concreta rispetto alle ellissi d'errore, applicando poi i risultati ottenuti allo studio critico dei limiti di tolleranza.

**Perrier Georges** - Travaux de la Section de Géodésie de l'Union Géodesique et Géophysique Internationale [*De operibus Sectionis Geodesicæ ad Unionem Geodesicam et Geophysicam Internationalem pertinentis*]. VIII, Au Secrétariat de la Section. Paris (1931). **a - 877**

Rapports généraux établis à l'occasion de la quatrième assemblée générale à Stockholm 1930.

**Persico Enrico** - Geofisica e Cosmogonia [*De Geophysica et Cosmogonia*] (Prolusione al Corso di Geodesia e Geofisica nella R. Università e R. Scuola di Ingegneria di Torino), 4 fig., Confer. di Fis. e Matem. tenute nell'Anno Accad. 1930-31. R. Luigi Avalle, 79-93. Torino (1932). **a - 878**

Difficoltà a cui viene a trovarsi il geofisico di fronte all'indagine della struttura interna della terra in relazione alle limitate possibilità di dati che sono a sua disposizione. Fonti e mezzi per trarre ciò che può aiutare nell'indagine in questione. Si impianta il problema cosmogonico nelle sue linee generali, mettendone in luce le attribuzioni e i mezzi di indagine.

**Piazzola-Beloch Margherita** - Sulla risoluzione di un problema di aero-fotogrammetria [*De solutione cuiusdam problematis aëriophotogrammetrici*]. Atti. R. Acc. Naz. Lincei (Rend. Cl. Sc. Fis., Mat., e Nat.), serie VI, XVIII, 1/2, 12-17. Roma (1933). **a - 879**

Nella aero-fotogrammetria ha particolare importanza la determinazione del punto di stazione e dell'altezza sul piano di stazione del centro di vista da cui è stata presa una data fotografia da un velicolo in volo (altezza di volo), non potendosi questi elementi misurare direttamente, come avviene per la

fotogrammetria terrestre, in cui l'apparecchio fotografico è solidamente appoggiato in un punto ben determinato del terreno. I metodi che a tale scopo vengono comunemente usati si fondano nel cosidetto procedimento a vertice di piramide. Nel presente studio, l'A. considera un caso particolare del problema, riducibile dal quarto al secondo grado, e lo risolve con metodi analitici rigorosi e graficamente, con riga e compasso.

**Potter A. J.** - The Earliest Geodetic Triangulation [*De priore triangulatione geodetica*]. Empire Surv. Rev., I, 3, 100-109. London (1932). **a - 880**

The present article deals with the report of the geodetic operations carried out by Willebrord Snellius Van Roien, the Dutch astronomer and geometrician, 1591-1625, a description of which is given in the remarkable book entitled: « Erathosthenes Batavus: De Terra ambitus vera quantitate, a Willebrordo Snellio Suscitatus ». Lugduni Batavorum (Leyden), 1617. This attempt of Snellius to define the shape of the earth, by using triangulation to measure the arc of meridian between Leyden and Soeterwoude, was actually the first to be made with any degree of precision.

**Ramella Giuseppe** - Nuovi orientamenti nella costruzione dei livelli a cannocchiale [*Cogitationes novæ in construendis libellis cum perspicillo*]. 6 fig., Il Geometra Italiano, 2, 19-24. Trieste (1932). **a - 881**

Proprietà dei livelli a cannocchiale, tipi principali di questi, ultime creazioni in fatto di livelli a cannocchiale.

**Ronchi Vasco** - Sul collaudo dei binocoli [*De comprobatione binoculorum*]. 3 fig. n. t. e 1 tav. f. t., Boll. Ass. Ott. It., 2/3, 87-99. Firenze (1933). **a - 882**

Nozioni generali per inquadrare il problema in modo preciso; saggio di quello che è l'esame approfondito di uno strumento ottico e particolarmente di un binocolo.

**Salmoiraghi A.** - Errori dipendenti dall'eccentricità della rotazione dell'alidada rispetto alla graduazione [*Errores dependentes ab excentricitate rotationis alidadae pro graduatione*]. Filotecnica, a. IV, 2, 309-311. Milano (1934). **a - 883**

In questo articolo, dopo aver ricordato il ben noto teorema secondo il quale gli errori nelle misure angolari, provenienti dall'eccentricità dei centri graduati, possono eliminarsi con il semplice artificio di due letture diametrali con due vernieri o microscopi a 180°, si stabilisce in quali casi sia sufficiente la lettura degli angoli fatta con un solo verniero o con un solo microscopio.

**Sigematu Ryôiti** - A Brief Note on the Depths of the Sea in the Vicinity of the Mariana Islands [*Nota brevior de maris altitudine apud insulas* Mariana]. 1 pl., Rec. Oceanogr. Works Jap., 5, 99-104. Tokio (1933). **a - 884**

In this paper the writer illustrates the bathymetric chart of the sea near Mariana Islands. The most striking features of the Mariana trench are pointed out in the chart; the cross sections of the trench are also considered (Author).

**Soholt A.** - Ekkolodd [*Scandalium per echum*]. Norsk Tidsskr. för Sjövesen, Dec., 460-466. Horten (1933). **a - 885**

**Solaini L.** - Su di un caso particolare del problema del vertice di piramide [*De problemate verticis cuiusdam pyramidis. Agitur de casu quodam peculiari*]. Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis., Mat. e Nat., XIX, 4, 242-248. Roma (1934). **a - 886**

Viene studiata la risoluzione sia rigorosa sia approssimata del problema del semplice vertice di piramide nel caso particolare in cui sono noti due punti del terreno fotografico e una direzione. La risoluzione rigorosa viene dedotta da quella relativa al caso generale di cui il presente problema può essere considerato come caso limite. Dalle formule ottenute se ne ricavano altre che permettono di determinare i valori delle incognite per mezzo di successive approssimazioni. Viene infine indicato un procedimento grafico numerico di risoluzione.

**Soler E.** - Alcuni ricorsi storici sopra un certo problema geodetico [*De recursibus historicis cuiusdam problematis geodesici*]. Mem. Soc. Astr. It., nuova serie, VIII, 1, 7-12. Pavia (1934). **a - 887**

L'autore, riprendendo l'argomento delle relazioni mutue tra la espressione della gravità sopra una superficie supposta di equilibrio e la equazione della superficie stessa, argomento trattato in altra nota inserita in queste Memorie, espone i precedenti storici del detto problema, che risale al Laplace e mette in rilievo delle deduzioni interessanti che si traggono dalla trattazione fattane dal Pizzetti.

**Soler E. & Cassinis G.** - L'attività del Comitato Nazionale per la Geodesia e la Geofisica, del Consiglio Nazionale delle Ricerche, durante l'anno 1933 [*Comitatus Nationalis pro Geodesia et Geophysica ad Consilium Nationale Investigationum Scientificarum pertinens eiusque activitas a. 1933*]. Ric. Scient., a. V., I, 5. 253-257. Roma (1934). **a - 888**

Relazione sulla Riunione Plenaria del Consiglio Nazionale delle Ricerche dell'8 marzo 1934-XII.

Letzte Neuigkeiten in Bezug auf die Technik der Zeitsignale.

**Stetson H. T.** - Further Results in the Study of Apparent Variations of the Vertical with the Hour-Angle of the Moon [*Resultatus ulteriores ex studio variationum apparentium verticalis cum angulo horario lunari*]. 5 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., April, 27-29, 1933. 47-52. Washington, D. C. (1933). **a - 890**

Further results of studies in the variation of latitude which have been continued at the Perkins Observatory subsequent to the last report (Nat. Res. Counc., Trans. Amer. Geoph. Union, 13th Ann. Meet., 85-88, 1932). Determination of reduction-curves for Tschardjui and Mizusawa for the years 1910 and 1911. Mean curves for the station at Gaithersburg Cincinnati, Ukiah, and Carloforte, showing the latitude variation with moon's hour-angle and declination. Variation in vertical component of tidal force, equilibrium-tides, latitude 40°, with moon's hour-angle for moon south, on equator and north have also been tabulated. Some considerations concerned with the tidal phenomena are given.

**Stocks Theodor** - Der Südantillen-Bogen im Lichte neuerer Erkundungen [*Arcus Antillarum meridionalium ac recentiores inquisitiones scientificæ*]. Ztschr. Ges. f. Erdkunde (Sonderabdr. 2), 5/6. Berlin (1932). **a - 891**

Neueste Ergebnisse der Erforschung des Südantillen-Bogens im Laufe der letzten Expeditionen nach dem Süd-Atlantischen Ozean. Bathymetrische Analyse des an der Weddelsee liegenden Beckens. Ein ausgedehntes bibliographisches Verzeichnis schliesst die Arbeit.

**Strand E. & Ozolins V.** - Hydrographische Untersuchungen der Hydrobiologischen Station im Rigaer Meerbusen und im Baltischen Meere [*Inquisitiones hydrographicae in Statione in Sinu Cylipeno et in Baltico mari*]. Fol. Zool. et Hydrobiol., V, 315-323, Riga (1934). **a - 892**

**Survey of India** - Geodetic Report, vol. VIII, from 1st October 1931 to 30th September 1932 [*Relatio geodetica. Vol. VIII a die 1-X-1931 ad diem 30-IX-1932*]. 23 pl., 2 charts, xvii - 118 pp., Dehra Dun. (1932).

(—) S. also: Int. Hydrogr., Bull., 9, 159-160. Monaco (1933). **a - 893**

The present report contains an account of the triangulation work performed in India during the period under consideration, and gives information on two geodetic index charts produced and included in the Report: the Index Chart of Geodetic Surveys in India and neighbouring countries on the scale of 1/6 millionth, which shows all the operations of geodetic interest performed in India, Burma, and Siam, French Indo-China, Malaya and Ceylon, and Geodetic Survey between India and Australia on the scale of 1/10 millionth (approx.). Observations have also been made of tides, latitude variation, longitude, and the height of snow peaks.

**Tardi P.** - Traité de Géodésie. Fascicule I, Généralité sur la Géodésie. Fascicule II, Astronomie Géodésique de Position [*Geodesiæ tractatus. Fasciculus I.$^{or}$ Generalia. Fasc. II. Astronomia, Geodesia*]. xxx + 422, xi + 425-730 pp. Gauthier-Villars. Paris (?). **a - 894**

Commissione Geodetica Italiana tenuta a Roma il 10 ottobre 1932-X [*Acta scripta consessus Romæ habiti die 10/10/32 a Regia Commissione Geodesica Italica*]. Pubblicazioni della R. Commissione Geodetica Italiana, nuova serie, 7, 39 pp. Padova (1933). **a - 914**

Processo verbale della seduta della R. Comm. Geodetica italiana tenuta a Roma il giorno 10 ottobre 1932-X. Relazione sui lavori compiuti da G. Cassinis. Relazione sui lavori per la costruzione delle tabelle per le riduzioni delle misure di gravità e sui lavori per la riduzione delle misure italiane. Lavori compiuti dall'Istituto di Geodesia della R. Università di Palermo nel biennio 1929-30. Notizie sui lavori dell'Istituto di Geodesia della R. Università di Genova. Lavori gravimetrici compiuti sul Monte Rosa. Relazione sull'attività dell'Istituto Idrografico nel campo astronomico-geodetico durante l'anno scorso. Lavori gravimetrici e geofisici dell'Istituto di Geodesia della R. Università di Padova nella regione delle Grotte di Postumia. La Stazione dei pendoli orizzontali nelle R. Grotte di Postumia. Relazione sull'attività scientifica della R. Stazione Astronomica di Carloforte durante l'anno 1931.

**Consiglio Nazionale delle Ricerche - Comitato Nazionale Italiano per la Geodesia e la Geofisica** - Rapporti sull'attività del Comitato nel triennio 1930-32 presentati alla V Assemblea generale dell'Unione geodetica e geofisica internazionale (Lisbona 1933) [*Relatio de triennali activitate Comitati (1930-32) relata ad V.um Consessum plenarium Unionis Geodesicæ et Geophysicæ internationalis Olisippone a. 1933*]. 1 fig., 24 tav. e 5 carte f. t., 113 pp., Tip. del Seminario. Padova (1933). **a - 915**

Il volume contiene soltanto i rapporti sull'attività esplicata dall'Italia durante il triennio 1930-32 nel campo della Geodesia e della Geofisica. I detti rapporti rappresentano un documento dell'intensificazione e del progresso delle ricerche geodetiche e geofisiche in Italia e sono brevemente illustrati dal Presidente del Cons. Naz. It. per la Geodesia e la Geofisica, prof. Emmanuele Soler, nella premessa al volume stesso. Gli argomenti trattati sono: Rapporto sull'attività esplicata nel triennio 1930-1932 nel campo della geodesia. La stazione dei pendoli orizzontali nelle R. Grotte di Postumia. Elenco delle principali pubblicazioni edite in Italia dal 1930 al 31 dicembre 1932, aventi per argomento questioni inerenti alla geodesia. Relazione sull'attività dei meteorologisti italiani nel triennio 1930-32. Relazione sul servizio meteo-aerologico di aeronautica dal 1930 al 1933. Rapporto sull'attività in Italia nel triennio 1930-33 nel campo del magnetismo e dell'elettricità terrestri. L'Osservatorio magnetico dell'Istituto idrografico della R. Marina in Genova. Rapporti sull'attività esplicata dall'Italia nel triennio 1930-33 nel campo della sismografia. La stazione sismica di Trieste nella sua nuova sistemazione. La Stazione geofisica di Mogadiscio. Le ricerche vulcanologiche in Italia durante il periodo 1930-33. Istituto geofisico del R. Comitato talassografico di Trieste. Rapporto sull'attività svolta nel campo dell'oceanografia fisica nel triennio 1930-33. Rapporto sul Servizio idrografico italiano con particolare riguardo all'attività svolta nel triennio 1930-33. L'attività del Comitato glaciologico italiano nel triennio 1930-33.

**Japanese Hydrographic Department** - On the Results of Soundings in the Vicinity of the « Yamato Bank » [*De resultatibus scandaliorum in propinquitatibus regionis* Yamato Bank]. 1 pl., Suiro Yôhô Hydrogr. Bull., 12, 427-428. Tokyo (1933). **a - 919**

Results of sounding carried out in the vicinity of a shallow of depth of 465 m. reported in 1930 in latitude 39° 46' N, longitude 133° 39' E in the central part of the Sea of Japan by the surveying ship « Yamato », I. J. N. Two banks not deeper than 600 m. were found to extend in NE and SW directions. To the northwest the bottom of sea falls very steep to a deepness over 2000 m. To the southeast of the bank, another bank, known as « Yamato Bank », the minimum depth of which is 285 m., extends in a direction nearly parallel to that of the former, from which it is separated by a furrow deeper than 2000 m. (S. abstract 139, by S. Ogura, Jap. Journ. Astr. & Geoph., XI, 3, 42-43 Tokyo 1934).

**Barbier Olinto** - La carta internazionale del mondo alla scala di un milionesimo [*De charta internationali orbis ex modulo 1 : 1000.000*] 2 carte geogr. f. t., Universo, 5, 235-244. Firenze (1932). **a - 957**

Come nacque e come si affermò l'idea di una rappresentazione cartografica di tutta la superficie terrestre. Notizia delle caratteristiche della carta e delle norme di esecuzione fissate al Congresso di Parigi del 1913, rivedute e definite nel Congresso del Cairo del 1925 e in quello di Cambridge del 1928. L'Ufficio per informazioni e controllo, che ha sede a Southampton presso l' « Ordnance Survey Office », il quale pubblica annuali rapporti sull'andamento della pubblicazione. Il rapporto del 1930 (l'ultimo venuto alla luce) annuncia che i fogli fino allora pubblicati in piena conformità alle risoluzioni adottate erano 109 e 304 quelli che, pur non rispondendo rigorosamente a tutte le risoluzioni, potevano tuttavia esser compresi, in attesa della compilazione definitiva. Cenno sul contributo arrecato dall'Istituto Geografico Militare ai lavori in corso per la parte riguardante la cooperazione dell'Italia.

**Bourgonnier C.** - Note au sujet d'une Projection et d'un Diagramme pour l'étude et le tracé du Segment capable sphérique [*Agitur de proiectione quadam nec minus de diagrammate ad studendum inscribendumque segmentum capacem sphæricum*]. 12 pp., Imprim. Nat.. Paris (1933). **a - 958**

**Cahill B. J. S.** - La carte-papillon ou système de projection octaédrique du globe sur un plan [*Agitur de systhemate proiectionis ottoedricæ orbis*

*in planum*]. 1 fig., Géogr., LXI, 3/4, 284-286. Paris (1934). **a - 959**

Description d'une nouvelle méthode pour l'établissement d'une carte du monde d'une précision générale comparable à celle des atlas, continue comme un globe, sans les variétées d'échelles d'un atlas ordinaire, mais sans l'incommodité d'un globe, en coupant ce dernier par trois plans à angles droits les uns par rapport aux autres, l'un étant le plan de l'équateur et les autres, deux plans de méridiens.

**Caraci Giuseppe** - Di una nuova carta di Lopo Homen [*Charta nova ad Lopo Homen pertinens*] Riv. Geogr. Ital., IV/V, 149-168. Firenze (1933). **a - 960**

Si discute la questione sull'autenticità della carta Morrison attribuita a Lopo Homen. Gli archivi di Lisbona hanno consentito di trarre qualche frutto, sin dai primi ritrovamenti del Cortesao. L'interesse di questa scoperta consiste nella possibilità di illuminare, coi nuovi documenti, il progresso delle esplorazioni portoghesi in Oriente, ed i riflessi che queste esplorazioni trovano nella cartografia. La datazione del nuovo cimelio (Carta di Lisbona) aiuta poco a determinare quella della carta pisana propria del Lopo, dove il disegno si limita al territorio del cosidetto « portolano normale ». I soli elementi concreti che la carta somministri, inducono a credere che il disegno sia stato compiuto fra il 1536 e il 1551. Se l'analogia dello stile può dare qualche indizio sulla data, il confronto tra la pergamena di Lisbona e quella di Pisa dà l'impressione che esse siano quasi contemporanee.

**Chatterton Keble E.** - The Yachtsman's Pilot [*Liber de navigatione pro gubernatore pamphiliorum*]. 42 large scale plans and particulars of over 800 harbours and anchorages. Hurst & Blackett, Ltd. London (1933). **a - 961**

Breve esame delle carte e mezzi ausiliari per la navigazione ortodromica, specialmente in merito alla navigazione aerea.

**Gilette D. H.** - Superimposed Relief Maps [*Chartæ superpositæ pro relevamentis*]. Milit. Engr., Sept.-Oct., 436. Washington (1933). **a - 964**

**Grasso Renato** - Nuovi orientamenti della cartografia aerea internazionale [*Res novæ ac studia chartographiæ aëriæ internationalis*]. 8 fig., Riv. Aeron., 11, 205-233. Roma (1933). **a - 965**

L'A. esamina, illustra e commenta le recenti deliberazioni della Commissione Internazionale per la Navigazione Aerea che rinnovano completamente e determinano con maggiore precisione le precedenti risoluzioni adeguandole al progresso della tecnica cartografica, dell'aeronavigazione ed alle nuove esigenze del traffico aereo. Passa in rassegna critico-descrittiva i nuovi segni convenzionali, suggerisce alcune varianti alla tabella e dà un breve cenno esplicativo in forma piana, senza formule, sui diversi sistemi di proiezione adottati per le nuove carte.

**Guarnieri Giuseppe Gino** - Il Mediterraneo nella storia della Cartografia Nautica Medievale [*De Mari Mediterraneo pro historia chartographiæ nauticæ internationalis*]. Con un catalogo delle carte portolaniche, 6 tav. f. t., v + 132 pp., Stab. Tip. Editoriale Toscano. Casa Editrice « S. T. E. T. ». Livorno (1933). **a - 966**

Le origini. La carta nautica e le sue caratteristiche esteriori. I caratteri intrinseci delle carte nautiche. I precursori. Il primato italiano nella cartografia nautica mediterranea. Le scuole cartografiche italiane. I prototipi cartografici mediterranei. La configurazione del Mediterraneo secondo le carte nautiche medioevali. L'opera scientifica di Gerardo Kremer (Mercatore) nella cartografia nautica. Il tramonto della cartografia nautica medioevale. Catalogo delle carte nautiche mediterranee: A) fine del secolo XIII; B) Secolo XIV; C) Secolo XV; D) Secolo XVI; E) Secolo XVII. Elenco dei « Portolani scritti » del Mediterraneo.

**Gunn J. (edit.)** - Nelson's World Gazetteer and Geographical Dictionary with Map Supplement by Bartholomew [*Vocabularium geographicum universale* Nelson *nomine, omnia geographica continens. Adiungitur supplementum tabularum geographicarum per* Bartholomew *redactum*]. 575 pp. + 64 pp. of maps., Thomas Nelson and Sons, Ltd. London (1932).

(—) Abstr. by J. H. R. in Geogr. Journ. LXXX, 2, 169. London (1932). **a - 967**

**Hakkel J.** - Materials to the Cartography of the Kara Sea [*Res comparatæ pro chartographia Maris Karensis*] (In Russ., Engl. Summ.). 3 fig. & charts., Trans. Arct. Inst., X, 165-175. Leningrad (1933). **a - 968**

Results of the investigation which conducted to modifications in the cartography of the following islands of the Kara Sea: Sverdrup Island, Sidorov Island, Ujedinenije Island and Schmidt Island.

**Heck Conrado** - Costas do Brasil, Roteiro. 1ª Parte. 2ª Ediçao. Do Cabo Orange (Estado do Parà) ao Cabo S. Agostinho (Estado do Pernambuco) [*Litora Brasiliensia. Præcepta de cursu maritimo. Pars I.ª Editio altera*]. Direct. de Navegaçao, Div. de Hydrogr., Minist. de Marinha dos Estados Unidos do Brasil. Rio de Janeiro (1932). **a - 969**

Cette nouvelle édition des « Instructions Nautiques » contient des renseignements nouveaux sur le Service radio-météorologique des côtes brésiliennes, sur les services de prévision du temps et sur les signaux horaires radio-télégraphiques.

**Henney Frederic A.** - Photomapping Method used in Europe [*De relevamentis photographicis quibus in Europa utitur*]. Milit. Engr., May-June, 238-243. Washington (1931). **a - 970**

The A. shows that, by the improvements of the photo apparatus, the photomapping tends to substitute completely the ancient methods of mapping. He gives a description of the more usual methods of photomapping.

**Hermannsson Haldor** - The Cartography of Iceland [*De cartographia Islandica*]. Islandica, XXI, (1931).
(—) Abstr. in Geogr. Rev. XXII, 3, 490. New York (1932). **a - 971**
Historical notes on the cartography of Iceland.

**Hinks Arthur R.** - Maps and Survey [*Chartæ ac relevamenta*]. ills., diagrs. & facsimile-maps, University Press, xii + 284 pp. Cambridge (1933). **a - 972**
The present third edition of the book, following those printed in 1913 and 1923, has been largely rewritten by the author. The I Chapter gives a brief summary of the history of early maps with a description of some of them. The II chapter contains a discussion of the modern map and in one section, the new Ordnance Survey alphabets. One chapter is devoted to Exploratory Survey, and in the others the reader finds an account of Trigonometrical Survey, Property Surveys, Geodetic Survey, Photographic Surveying, and a description of certain Survey Instruments, including the prismatic astrolabe, and a brief account of the machinery of mechanical plotters for the use of making maps from air photographs.

**Kahle Paul** - A Lost Map of Columbus [*De amissa quadam charta Columbiana*]. 2 figs., Geogr. Rev., XXIII, 4, 621-638. New York (1933). **a - 973**
Description of a map discovered in 1929 in the Seraglio at Constantinople which probably is the very map presented by Piri Re'is to Sultan Selim I at Cairo in 1517. The present article considers only the Columbian features of this map, i. e. the long inscription on the Map, the Lesser Antilles, Haiti (Cipango) and Cuba, the date of Columbus map incorporated by Piri Re'is in his map, the Islands with the Parrots, and the literal translations of the legends on Piri Re'is map.

**Kahn L.** - Sur une extension de la Projection de Mercator : Les nouvelles cartes aériennes [*De extensione quadam proiectionis Mercatorianæ. Tabulæ aëriæ*]. Com. Mem. Acad. d. Marine, VIII, 63-79. Paris (1929). **a - 974**

**Kimble George H.** - The Catalan World Map of the Reale Biblioteca Estense at Modena [*Orbis tabula catalana in Bibliotheca Estensi Mutinensi*]. 1 map in 4 sheets., R. Geogr. Soc., 12 pp. London (1932). **a - 975**
Adequate picture of one of the more important mediaeval maps made prior to the great advance inaugurated by the Prince Henry the Navigator. It belongs to the group of Catalan maps, remarkable for the fairly accurate knowledge they display not only of the coasts frequented by European sailors but of the more remote interior parts of the Old World.

**Kimble George H.** - Portuguese Policy and Its Influence on Fifteenth Century Cartography [*Res politicæ Lusitanorum earumque influentia in chartographiam sec. XV°*]. Geogr. Rev., XXIII, 4, 653-659. New York (1933). **a - 976**
The author tries to explain the scarcity of map material bearing on African exploration in the fifteenth century by the policy of Portuguese Kings who decided on the suppression of all information likely to excite the interest or jealousy of other countries. West Africa on Fra Mauro's Planisphere and the national secret of the Portuguese in the fifteenth century.

**Koch Lauge** - Map of North Greenland, 1 : 300.000 [*Tabula Groënlandiæ Septentrionalis 1 : 300.000*]. 18 sheets and suppl. sheet in case, Geodet. Inst. Denmark., Copenhague (1933). **a - 977**
Surveyed by Lauge Koch in the years 1917-1923, the map covers the whole coastal belt of the extreme northwestern and northern Greenland between Cape York and Denmark Fjord.

**Kozhevnikov M. J. (Red.)** - Carte de la République Soviétique Autonome de la Jakoutie [*Charta Reipublicæ Sovieticæ Autonomæ Jakoutianæ*]. 1 carte, s. 6 feuilles. Acad. Sc., U. R. S. S. Léningrad (1932).
(—) Voir Réc. dans : Bull. Arct. Inst., 12, 433-435, 1933 par K. Salistschev). **a - 978**
Carte à l'échelle 1/2,000.000 de la République Soviétique de la Jakoutie, qui englobe une grande partie de la Sibérie Orientale et de la Mer d'Okhotsk.

**Laborde J.** - Sur les diverses méthodes permettant de réaliser rapidement une cartographie solide dans les pays tropicaux, principes généraux et application à Madagascar [*De methodibus variis quæ rapide carthographiam solidam in regionibus tropicalibus concedunt. Principia generalia applicationesque ad insulam* Madagascar]. La nouvelle carte au 10.000° et les cartes à grande échelle du Service géogr. du Madagascar, Bull. Géod. 31, 269-270. Paris-Toulouse (1931). **a - 979**
Aperçu de communication présentée à l'Un. Géod. Int. par l'A., du Serv. Géogr. de l'Armée franç., et de l'Artill. colon., rédigée pour informer des travaux faits par lui au Madagascar.

**Levrero Undelio** - Matteo Vinsoni. Contributo alla storia della cartografia genovese del secolo XVIII [*Matthæus* Vinsoni. *Contributio in historiam cartographiæ Genuensis sec. XVIII°*]. Genova, 12, 1165-1172. Genova (1932). **a - 980**
L'A. illustra la vita e l'opera dell'insigne cartografo ligure.

**Locchi D.** - Atlante geografico moderno [*Atlas geographicus modernus*]. 35 tav., G. B. Paravia e C., Torino (1932). **a - 981**
Edizione di Atlante scolastico per i testi di Geografia secondo i programmi delle Scuole medie.

**Longhena Mario** - L'Opera cartografica di L. F. Marsili [*Opus chartographicum Aloysii Ferdinandi* Marsili]. Sotto gli auspici del Comitato Nazionale Italiano di Scienze Storiche. (Pubblicazioni dell'Istituto di Geografia della R. Università di Roma. Serie A, n. 3). 4 tav. f. t., viii + 84 pp., Tip. Soc. An. Tip. « Leonardo da Vinci », Città di Castello. Roma (1933). **a - 982**
Si procede alla catalogazione, secondo le norme prescritte dalla Commissione di Geografia storica, di tutte le carte e dei piani delineati dal famoso geografo bolognese L. F. Marsili (conservati, in uno con tutti i voluminosi manoscritti marsiliani, nella Biblioteca Universitaria di Bologna) limitatamente alla parte riguardante territori non italiani.

**Luncke Bernhard** - Norges Svalbard- og Ishavs- Undersøkelsers Luft-kartlegning i Eirik Raudes land 1932 [*Relevamentum topographicum in Terra* Eirik Raude (*Groënlandia*) *peractum a. 1932 a Servitio pro inquisitionibus Norvegicis ecc.*]. 7 figs., Norsk Geogr. Tidsskr., (IV, 6), 2, 347-361. Oslo (1933). **a - 983**
The work of drawing maps has been going on here since 1929 comprising tide observations, photogrammetric and stereophotogrammetric measurements as well as measurements of the coastal outlines etc. The expedition described here in the Summer of 1932 had the opportunity of having Consul Lars Christensen's aeroplan « Oarrtsiluni » at its disposal. Instruction as to the drawing of maps. Equipment of the Aero-expedition. The course of the expedition. Results. Construction of the maps.

**Manley G.** - Saxton's Survey of Northern England [*Relevamenta e systhemate* Saxton *in Anglia nordica*]. Geogr. Journ., April, London (1934). **a - 984**

The maps by Christopher Saxton published between 1574 and 1579 provided material for English maps for a long period. From an historical and scientific point of view the study of these maps gives some interesting suggestions.

**Maslov V.** - Le microrelief et le levé aérophotographique [*De microrelevamentis deque relevamentis aëriophotographicis*]. 2 fig., Izv. Gos. Geogr. Obstsch. (Bull. Soc. Géogr. Etat), LXV, 2, 147-150. Leningrad (1933). **a - 985**

Deux exemples de levé aérophotographique qui démontrent que ces levés peuvent être des auxiliaires précieux pour l'étude des détails du microrelief des zones soumises à l'étude et à l'exploration géomorphologique, hydrogéologique et autres recherches analogues.

**Melluish R. K.** - An Introduction to the Mathematics of Map Projections [*Introductio in res mathematicas proiectionis cartographicæ*]. viii + 144 pp., University Press. Cambridge (1931). **a - 986**

**Monfreid Henry** - Secrets of the Red Sea (Translated by Helen Buchanan Bell) [*De mysteriis Maris Rubri*]. vii + 317 pp., Faber & Faber, Ltd. London (1934). **a - 987**

**Oortgijsen Kl. F.** - Historisch Genootschap « De kop van Noord-Holland met de eilanden Texel, Vlieland en Terschelling » [*Societas historica.* « *Pars superior Hollandiæ nordicæ insularumque* Texel, Vlieland *et* Terschelling]. 1 carta, Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam, L, 1, 127-129. Leiden (1933). **a - 988**

Breve informazione sulla esposizione delle carte e dei disegni tenutasi a Amsterdam nel Settembre 1917, dove sono state esposte alcune carte antiche del 1300, specialmente della parte settentrionale dell'Olanda e delle isole menzionate nel titolo, da cui si vedono la trasformazione della costa e la formazione di nuovi « polders ». Inoltre vi sono delle carte riguardanti le dune, le dighe, per difendersi contro il mare, carte idrografiche, carte di porti, di isole e di canali. Proposta di formare una società storica chiamata secondo il titolo di sopra.

**Rude Gilbert T.** - Mapping the Ocean Floor [*De chartographia fundi oceanici*]. 7 figs., U. S. Nav. Inst. Proc., LX, 374, 509-521. Annapolis, Md. (1934). **a - 989**

Paper of historical character concerning world nautical charts. Improvements since the World War, both in methods and instruments. Progress of Hydrography: echo sounding.

**Salistschev K. A.** - Levé visuel à bord d'avion et son rôle dans l'élaboration de la carte à 1/1.000.000 [*Relevamenta ex aëroplanis. Quæstio de eorum momento pro elaboratione cuiusdam chartæ 1/1.000.000*]. Arctica, 1, 139-143. Léningrad (1933). **a - 990**

Importance de l'élaboration d'une carte au millionième des régions arctiques soviétiques; possibilité de l'emploi de l'avion pour les levés en vue de l'exécution de la carte; quelques considérations sur la méthode du levé visuel aérométrique. Avantages et désavantages de la méthode. Perspectives de son application dans le Nord soviétique.

**Salistschev K. A.** - L'Ile de Wrangel et ses cartes [*De insula Wrangelii eiusque chartis*] (En russe). 1 carte, Arctica, 1, 145-150. Léningrad (1933). **a - 991**

Histoire de la découverte de l'Ile de Wrangel; les premiers débarquements sur cette île en 1881; premier levé cartographique de l'île exécuté en 1911 par le navire hydrographe russe « Vajgatch »; autres expéditions postérieures qui ont visité l'île après la fondation d'une colonie stable par le gouvernement soviétique en 1927; élaboration d'une carte préliminaire de l'Ile Vrangel reproduite dans le texte de la note; nécessité de levé et d'exploration supplémentaires pour pouvoir dresser une carte exacte de l'île.

**Tortorici Pietro** - Intorno ad un problema sulle carte geografiche [*De problemate quodam circa chartas geographicas*]. Rend. Circ. Mat. di Palermo, LVII, 2, 210-234. Palermo (1933). **a - 992**

L'A. premette che A. Korkine determinò tutte le maniere di rappresentare sul piano una superficie di rotazione, in modo che aree corrispondenti fossero in un rapporto costante prefissato e, inoltre, che al sistema dei meridiani e dei paralleli corrispondesse, nella rappresentazione, un doppio sistema ortogonale. Suceessivamente V. Reina esaminò lo stesso problema con la condizione ulteriore che, sul piano, il sistema corrispondente ai meridiani ed ai paralleli fosse isotermo e lo affrontò con un metodo diretto, notevolmente semplice ed agile. È evidente che le soluzioni di questo secondo problema costituiscono una sottoclasse delle soluzioni del primo e l'A. si propone di caratterizzarla, riuscendo anche a ricondurre l'effettiva determinazione delle soluzioni della sottoclasse alla integrazione d'un sistema differenziale ordinario del primo ordine.

**Urvantzev N. N.** - The Cartography of Severnaja Zemlja (Northern Land) [*De chartographia in* Severnaja Zemlja] (In Russ., Engl. summ.). 1 chart, 5 tabl., Izv. Gos. Geogr. Inst. (Bull. Inst. Géogr. Etat), LXV, 6, 496-515. Moskva (1933). **a - 993**

An account of the exploration of Novaja Zemlja made by the expedition of the ice-breaker « George Sedov » in 1930-32. Results of astronomical, meteorological and other observations carried out and description of the apparatus used. Data of the topographic survey performed as compared with those of the Hydrographic Expedition of 1913. Description of Novaja Zemlja on hand of the map elaborated.

**Vivielle J.** - La carte des Côtes de Provence de M. de Séguiran (1633) [*Litorum Provincialium tabulæ ad M. de* Séguiran *pertinentes (1633)*]. 2 fig., Géographie, Terre, Air, Mer, LVII, 5, 397-403. Paris (1932). **a - 994**

Résumé du texte de l'enquête menée en 1633 par Henri de Séguiran sur les côtes de Provence par ordre du Cardinal de Richelieu dans le but de rechercher le lieu le plus favorable à l'installation d'un port pour les vaisseaux du roi, reproduit dans le tome III de la « Correspondance d'Henri Sourdin » publiée par Eugène Sue. Description d'une carte sur vélin conservée aux Archives du Service hydrographique de la Marine dessinée par I. Marets qui semble être la carte décrite par Honoré Bouche et qui, ainsi que les plans particuliers reproduits et mentionnés dans le présent article, était jointe au procès-verbal de sa mission par M. de Séguiran.

**Wagner Karl-Heinrich** - Die unechten Zylinder-Projektionen, ihre Anwendung und ihre Bedeutung für die Praxis [*De erratis proiectionibus cylindri. Quæstio de usu et momento pro practica*]. Abb. u. Taf. im Anhang., Aus d. Arch. Dtsch. Seewarte, 51, 4, 5-68. Hamburg (1932). **a - 995**

Nachdem der Vf. die Definition Tissot's der unechten Zylinderprojektionen wiedergegeben hat, schildert er die geschichtlichen Grundlagen der Projektionen und zwar die älteren Projektionen bis 1890, die moderne Entwicklung von 1890 an und formuliert die Probleme, deren Lösung die vorliegende Arbeit dienen soll: « Die grosse Mannigfaltigkeit und z. T. auch Zusammenhanglosigkeit der bis heute vorliegenden Entwürfe macht es notwendig, dass eine einheitliche, mathematische Form für diese Projektionsgruppe gefunden wird, die es gleichzeitig gestattet, alle weiteren Möglichkeiten der Bildung neuer Projektionen zu übersehen, und gegebenenfalls aus der Anzahl der noch möglichen Entwürfe den bisherigen in der einen oder anderen Hinsicht überlegenen zu entwickeln». Es wird ausserdem die Technik der unechten Zylinderprojektionen besprochen, wobei die Konstruktion auf graphischem Wege besonders berücksichtigt ist.

**Wedemeyer** - Bemerkung zur Arbeit: « Der meridianständige Littrowsche Kartenentwurf zum Gebrauch in polnahen Breiten ». Von W. Immler [*De observato opere: Proiectione inversa e systhemate* Littrow *qua utendum est in latitudinibus prope polos.* W. Immler *auctore*]. Ann. d. Hydrogr. XL, 5, 221. Berlin (1932). **a - 996**

Der Vf. der vorliegenden Bemerkung macht darauf aufmerksam, dass weder in der im Titel erwähnten Arbeit (s. « Ann. d. Hydrogr. », 1931, s. 462-465) noch in einer anderen desselben Verfassers: « Zur Zeichnung der Azimutgleiche in der Polarkarte » (« Arktis », 1931, 67-71) erwähnt wird, dass Wedemeyer bereits in den « Ann. d. Hydr. », 1918, 209-215, den Immlerschen Netzentwurf ausführlich behandelt und gezeichnet hatte, und dass schon auf Grund seiner Arbeit eine Karte für die Arktis-Fahrt des Zeppelins ausgeführt worden ist.

---

**American Geographical Society** - A Catalogue of Maps of Hispanic America [*Catalogus chartarum Americæ Hispanicæ*]. 15 charts, xv + 287 + 254 + 217 + 295 pp. Maps of Hispanic America. Publ. N° 3, IV. New York (1930-1933). **a - 997**

Compiled from the collections of scientific periodicals, books, sheets and maps of several scientific institutions of America. The maps described number more than 15.000. See: Platt Raye R. Catalogue of Maps of Hispanic America. Geogr. Rev., XXIII, 4, 660-663. New York (1933).

**British Hydrographic Department** - Persian Gulf Pilot [*Portulanus Sinus Persici*]. 5 tabl., 8th ed. London (1932). **a - 998**

New volume of Sailing Directions cancelling the Seventh Edition, 1924, of the Persian Gulf Pilot, and supplement. A special appendix contains information on Tidal Streams, illustrated by 5 tables which give the rates of the semi-diurnal constituents of the stream at Springs and of the diurnal constituent due to the moon's greatest declination. Table V gives factors by which these rates are to be multiplied in order to obtain the rates at other astronomical conditions.

**British Hydrographical Department,** etc. - Use of the Terms « New Edition », « Reprint », etc. Emploi des expressions « Nouvelle Edition », « Nouveau Tirage », etc. [*Quo modo utitur locutionibus « Editio nova » ac « Nova exemplaria impressa », etc.*]. (En angl. & franç.). 1 table, Bull. Hydrogr. Int., 2, 19-24. Circulaire n° 1. Monaco (1934). **a - 999**

Information received from the British Hydrographic Department, the coast and Geodetic Survey and the Hydrographic Office of the United States of America with reference to resolution Charts, 2 and 2a, adopted by the Third International Hydrographic Conference, 1932.

**Bureau Hydrographique International** - A Standardised Form of Notices to Mariners Proposed by the Directing Committee of the I. H. B. Modèle type d'Avis aux navigateurs proposé par le Comité de Direction du B. H. I. [*Modulus typus libri in quo continentur præcepta ad usum navigatorum. Modulus proponitur a Comitato pro Directione Officii Hydrographici Internationalis*] (En angl. & franç.). Bull. Hydrogr. Int., 1, 6-9. Monaco (1934). **a - 1000**

Suggestions concernant les simplifications et les unifications susceptibles de fournir aux navigateurs de toutes nationalités des renseignements meilleurs, plus précis, plus commodes et plus intelligibles. Opportunité d'un ordre de séquence universel des détails et de l'adaptation d'une forme-type universelle pour les Avis aux Navigateurs. Résumé des points dont un plus grand compte doit être tenu pour accroître la valeur des Avis au point de vue international.

**Departamento Cartografico (Chile)** - Proyección conforme cilindrica, llamada Proyección de Mercator. Generalidades [*Proiectio Mercatoriana. Generalia*]. 5 anexos, Memorial Tecnico (Ejército de Chile), a. II, 7, 929-939. Santiago de Chile (1934). **a - 1001**

Carta confeccionada por el Instituto Geografico Militar. Esta abarca el territorio comprendido entre Arica y Puerto Montt.

**Directoria de Navegaçao** - Roteiro das Costas do Brasil. Do Rio de Janeiro ao Rio da Prata. P. III. I.a Ed. [*Præcepta nautica. Litora Brasiliensia a* Rio Janeiro *ad* Rio da Prata. *P. III*ª]. Direct. de Nav. Rio de Janeiro (1933). **a - 1002**

Ce nouveau volume complète la série des instructions nautiques des côtes du Brésil et contient des indications générales sur le Service radiométéorologique sur ces côtes, ainsi que sur les signaux horaires radiotélegraphiques de l'observatoire National de Rio de Janeiro.

**Hydrographic Office** - [*Portulani*]. London (1933). **a - 1003**

Volumes of Sailing Directions (revised) and Supplements.

**Hydrographic Office** - Naval Air Pilot Mexico, Corrected to May, 1, 1933 [*Liber navigationis aërionavalis. Regio Mexicana. Editio correcta ad diem 1 mensis Maii 1933*]. figs. & maps., U. S. Govmt. Print. Off., H. O. N°. 1932, ii - iii, 1-95. Washington, D. C. (1933). **a - 1004**

Part I: General information concerning routes, distances, regulations, etc. Part II: Detailed information on seaplane anchorages and landing fields.

**Hydrographic Office** - List of Lights in Siamese Waters for the Year 1934 [*Liber pharorum pro navigatione per mare ad* Siam *pertinens. a. 1934*]. Tables, Hydrogr. Off. Siam. Bangkok (1934). **a - 1005**

The arrangement of this new edition of the List of Lights in Siamese waters is in conformity with the decision of the last International Hydrographic Conference. The publication is printed in Siamese and English: a List of Light Buoys and Radio Time Signals is appended.

**Hydrographic Department** - [*Portulani*]. Tokyo (1933-34 & 1934-35).

**U. S. Department of Commerce. Coast & Geodetic Survey** - Supplement to United States Coast Pilot. Alaska. Part II: Yakutat Bay to Arctic Ocean. Third (1931) Edition [*Supplementum ad portulanum litoreum Provinciarum Foederatarum Americæ. Regio Alaskiana. Pars II.ª A Baja* Yakutat *ad Oceanum Arcticum. Editio III.ª (1931)*]. U. S. Govmt. Print. Off., Coast & Geod. Surv. Ser. nº 507-2, 1-26. March 27, 1933. Washington, D. C. (1933). **a - 1030**

**U. S. Department of Commerce. Coast & Geodetic Survey** - Supplement to United States Coast Pilot. Alaska. Part I: Dixon Entrance to Yakutat Bay, Edition of 1932 [*Supplementum ad portulanum litoreum Provinciarum Foederatarum Americæ. Pars I.ª Accessus ad Fretum* Dixon *et Bajam* Yakutat. *Editio 1932*]. U. S. Govmt. Print. Off., Coast & Geod. Surv., Ser. nº 545-2, 1-5. Febr. 20, 1933. Washington, D. C. (1933). **a - 1031**

**U. S. Department of Commerce. Coast & Geodetic Survey** - United States Coast Pilot. Atlantic Coast. Section B. Cape Cod to Sandy Hook. Third Edition. [*Supplementum ad portulanum litoreum Provinciarum Foederatarum Americæ. Sectio II.ª a Capite* Cod *ad* Sandy Hook. *Editio III.ª*]. 2 maps., num. tabl., 400 pp., U. S. Govmt. Print. Off., Coast & Geod. Surv. Ser. nº 556. Washington, D. C. (1933). **a - 1032**

This publication covers the Atlantic coast from Race Point, Cape Cod, to Sandy Hook, including Nantucket, Vineyard, and Long Island Sounds, New York Harbor, Hudson River, and tributaries. It is based mainly upon the work of the U. S. Coastal and Geodetic Survey, including the results of a special examination in 1932.

**U. S. Department of Commerce. Coast & Geodetic Survey** - United States Coast Pilot. The Hawaiian Islands, Second Edition [*Portulanus litoreus Provinciarum Foederatarum Americæ. Insulæ Hawaianæ. Editio altera*]. sever. tables, 1 map., 128 pp., U. S. Govmt. Print. Off., Coast & Geod. Surv., Ser. nº 558. Washington, C. D. (1933). **a - 1033**

This publication includes the islands and reefs extending westward to Midway and Kure Islands. The aids to navigation are corrected to January 10, 1933. Its contents is as follows: Index map. General information. Descriptions and sailing directions, Hawaii. Appendix: Coast Pilots and field stations of the Coast and Geodetic Survey. Navigational aids and the use of the charts. Remarks on the use of charts. Use of oil for modifying the effect of breaking waves. Rules of the road. international Harbor regulations, Territory of Hawaii. Meteorological table.

**U. S. Department of Commerce. Coast & Geodetic Survey** - United States Coast Pilot. Atlantic Coast Section A. St. Croix River to Cape

Cod. Third Edition [*Portulanus litoreus Provinciarum Foederatarum Americæ. Litora Atlantica. Sectio A. Flumen Sanctæ Crucis. Caput* Cod. *Editio III.ª*]. tabl., U. S. Govmt. Print. Off., Coast & Geod. Surv. Ser. nº 561, 322 pp. Washington, D. C. (1933). **a - 1034**

This publication covers the coast from St. Croix River to Race Point, Cape Cod, including Cape Cod Bay. It is based mainly upon the work of the United States Coast & Geodetic Survey, including the results of a special examination in 1932 The aids to navigation are corrected to May 20, 1933.

**U. S. Department of Commerce. Coast & Geodetic Survey** - Supplement to United States Coast Pilot. Gulf Coast. 1926 Edition. Key West to Rio Grande [*Supplementum ad portulanum litoreum Provinciarum Foederatarum Americæ.* Gulf Coast. *Editio 1926*]. tabl., U. S. Govmt. Print. Off., Coast & Geod. Surv., Ser. nº 324-8, 1-53. Dec. 14, 1933. Washington, D. C. (1934). **a - 1035**

**U. S. Department of Commerce. Coast & Geodetic Survey** - Supplement to United States Coast Pilot. Alaska. Part I: Dixon Entrance to Yakutat Bay. Eight (1932) Edition. [*Supplementum ad portulanum litoreum Provinciarum Foederatarum Americæ. Regio Alaskiana. Pars Iº. Accessus ad Fretum* Dixon *et Bajam* Yakutat. *Editio VIII 1932*]. U. S. Govmt. Print. Off., Coast & Geod. Surv., Ser. nº 545-2, 1-11. Febr. 12, 1934. Washington, D. C. (1934). **a - 1036**

**U. S. Department of Commerce. Coast & Geodetic Survey** - Supplement to United States Coast Pilot. Atlantic Coast. Section B: Cape Cod to Sandy Hook. Third (1933) Edition [*Supplementum ad portulanum litoreum Provinciarum Foederatarum Americæ. Litora Atlantica. Sectio B. A capite* Cod *ad* Sandy Hook. *Editio IIIº (1933)*]. U. S. Govmt. Print. Off., Coast & Geod. Surv., nº 556-1, 1-13. Jan. 31, 1934. Washington, D. C. (1934). **a - 1037**

**U. S. Hydrographic Office** - Sailing Directions for the Southwestern Coast of Africa from Cape Palmas to Cape of Good Hope. Third Edition [*Portulanus pro navigatione in litora sudorientalia a Capite* Palmas *ad Caput Bonæ Spei*]. tabl. & maps., U. S. Hydrogr. Off., nº 105. Washington, D. C. (1932). **a - 1038**

The present supersedes the second edition of the volume H. O. 105 dated 1923, and contains a number of innovations. A certain number of paragraphs have been brought up to date, and at the end of the volume there is a special chapter on ocean passages describing them in detail. A sketch map shows the tracks followed by steamships and distances across the Atlantic and Indian Oceans.

**Assante Arturo** - Il porto di Napoli. Saggio storico, geografico, economico. Guida descrittiva, amministrativa, tariffaria e commerciale [*Portus Neapolitanus. Compendium historicum, geographicum, oeconomicum*] (Sotto gli auspici del Consiglio Provinciale dell'Economia Corporativa). 16 fig., 1 tav. f. t., 629 pp., Tip. Stab. Ind. Edit. Merid. Morace Edit., Napoli (1934). **a - 1048**

Il presente saggio è un primo tentativo di uno studio completo sull'emporio marittimo di Napoli. L'A. fa precedere alla « guida pratica » un sintetico studio storico, geografico, economico, che, passando in rassegna le caratteristiche del porto, attraverso i vari secoli, analizza e mette in rilievo due punti: *a*) Quale è il retroterra effettivamente servito dal porto di Napoli e quale il traffico che ha possibilità di essere incrementato; *b*) Secondo il concetto moderno di « specializzazione » cui tendono gli empori marittimi, quali sono i coefficienti del traffico — merci e passeggeri — degni di essere vagliati e sorvegliati.

Description d'un nouveau système de canaux qui permet de réduire de 4000 km. le parcours entre la Baltique et la Mer Blanche. Topographie de la région traversée par les canaux ; sa géologie ; quelques détails de construction des écluses faisant part de la voie navigable et quelques indications concernant le système d'alimentation du canal. Description succincte des digues et barrages et principales caractéristiques des travaux hydro-techniques exécutés au cours de la construction du canal, dont la longueur, qui est de 227 km., est supérieure à la longueur de toutes les voies navigables artificielles existantes, telles p. ex. le canal de Suez et le canal de Panama. Néanmoins sa construction a pu être achevée en 20 mois seulement, battant ainsi tous les records précédents.

Brief summary report of the oceanographic researches conducted in connection with the study of whales and whaling in the Falkland Islands Dependencies in the South Atlantic and Southern oceans since 1925 by the Discovery Committee. The author discusses the temperature, salinity, and oxygen, phosphate, and nitrate content of the waters of the region under consideration. Some hints on the currents existing in the area.

**De Buen Fernando** - Les caractères des eaux de Guipuzcoa [*De aquis apud* Guipuzcoa *earumque peculiaritatibus*]. 11 fig., Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXVII, 49-53. Copenhague (1934). **a - 1134**

Compte rendu des résultats d'observations méthodiques des variations des conditions de température et de salinité des eaux côtières de la province basque de Guipuzcoa, effectuées pendant une série de mois en 1915 et en juillet-août 1932.

**De Buen Rafael** - Nuevos datos sobre caracteres oceanográficos del mar de España y costas del Portugal (Campañas del « Xauen » en 1932) [*Dati novi circa peculiaritates oceanographicas maris ad Hispaniam litoraque Lusitana pertinentis a. 1932*]. 6 fig., Inst. Esp. Oceanogr. Notas y Resúm., Serie II, 75, 1-14. Madrid (1933). **a - 1135**

Estudio sobre algunos datos que se obtuvieron aprovechando los viajes que el guardacostas « Xauen » tuvo que efectuar en junio de 1932, para transladarse desde el Cantábrico al Mediterráneo. Temperaturas, salinidades, densidades.

**De Buen Rafael** - Régime hydrologique dans la Mer d'Espagne et sur les Côtes Portugaises, en 1932 [*Regimen hydrologicum maris ad Hispaniam litoraque Lusitana pertinentis a. 1932*]. 6 fig., Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXVII, 45-48. Copenhague (1934). **a - 1136**

Résultats des stations effectuées en juin et août dans la Mer d'Espagne et le long des côtes Portugaises. Déterminations de la température, de la salinité et de la densité des eaux entre la surface et 500 mètres de profondeur. Caractéristiques du régime hydrologique de la région.

**Demel Kazimierz** - Z pomiarów termicznych Baltyku [*De temperatura in aquis Polonis Maris Baltici*]. 1 carte h. t., Kosmos, LVII, 1/4, 97-119, 159-177. Lwów (1932).

(—) Trav. Stat. Marit. de Hel (1932-1933). **a - 1137**

Les observations ont été faites en deux points strictement déterminés (54° 36' N, 18° 47' 5 E) et (54° 37' N, 18° 51' E) chaque fois en 5 profondeurs. Les moyennes thermiques sont présentées sur un dessin. Les observations ont permis de constater une périodicité des variations thermiques dans les couches profondes de l'eau, correspondant à la périodicité de l'apparition des dépressions dans l'atlantique Nord.

**Dons Carl (Edit.)** - O. Nordgårds målinger av havvannets temperatur i Trøndelag 1922-1930 [*De mensuris peractis a* O. Nordgård *de temperatura in aqua marina apud* Troendelag *1922-1930*]. 4 Tab., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 5, 16-19. Trondheim (1934). **a - 1138**

I risultati delle misurazioni eseguite in 4 stazioni nel Trondhjemsfjord durante 1906-1910 in confronto a quelle degli anni 1922-1930 esposti in tavole. La temperatura media annuale, molto difficile a determinare a causa delle grandi variazioni di temperatura dell'acqua nel Trondhjemsfjord, è stimata a 7,2° C. a una profondità di più di 200 m. Influenza sul clima attorno al fjord.

**Dons Carl (Edit.)** - O. Nordgårds målinger av havvannets temperatur i Nord-Norge 1929 [*De mensuris temperaturæ aquæ marinæ Norvegiæ septentrionalis a. 1929 per* O. Nordgård *peractis*]. 3 Tab., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 6, 20-23. Trondheim (1934). **a - 1139**

Le tavole sui risultati delle misurazioni nel 1929 e per una parte anche dal 1899 danno le temperature e le loro variazioni nelle acque fra Trondheim e Hammerfest. L'influenza della temperatura sulla presenza di *Lophohelia*.

**Geissler H.** - Untersuchungen an der Pyknosonde während der Kattegat-Fahrt mit der «Hunte» im Herbst 1931 [*Inquisitiones, pykno-scandalii auxilio, in navi* Hunte *peractæ autumno 1931, perdurante traiectu per* Kattegat]. 1 Tab., 2 Taf., Ann. d. Hydrogr., LXII, 8, 322-326. Berlin (1934). **a - 1140**

Bericht über das Ergebnis der an der Pyknosonde an Bord der « Hunte » ausgeführten Versuche, Salzgehalt und Temperatur der Wassersäule allein mit der Pyknosonde zu bestimmen, und über den gesetzmässigen Fehler der Pyknosondemessung, aus welchem es hervorkommt, dass die Pyknosonde weniger geeignet ist, exakte Salzgehalts- oder Dichtewerte zu liefern, dass man aber vielleicht bei geschickten Arbeiten mit ihr imstande sein kann, periodische Aenderungen im Aufbau einer Wassersäule mit gut ausgebildeter Sprungschicht festzustellen.

**Geissler H.** - Zur Korrekturformel für die Richterschen Kippthermometer [*De formula ad corrigendum thermometrum reversibile e systhemate* Richter]. Ann. d. Hydrogr., LXII, 9, 378-382. Berlin (1934). **a - 1141**

An Hand der Arbeiten von Schumacher, Hidaka und dem Vf. wird die Genauigkeit der verschiedenen Korrekturformeln für das Richtersche Kippthermometer besprochen. In einem Nachtrage werden die Formeln von Hidaka und von W. Hansen zwischeneinander verglichen.

**Gila y Esteban Frutos A.** - Sobre el empleo de distinta « Agua Patron » y Buretas, en la determinación de Halógenos (método Mohr-Knudsen) en el agua del mar [*De utendis ampullulis in determinandis halogenis aquæ marinæ*]. Estudio de la posibilidad de utilización de la agua normal de Copenhague y de otra agua patron para las investigaciones en los mares de Málaga y de Santander. Soluciones tipos. Determinaciones.

**Granqvist Gunnar** - Regelmässige Beobachtungen von Temperatur und Salzgehalt des Meeres Juli 1931-Juni 1932 [*Observationes temperaturæ ac salis continentia in aqua marina a mense Julio 1931 ad mensem Junium 1932*]. Tab., 2 Kart.,

Merentutkimuslaitoksen Julkaisu (Havsforskn. Inst. Skr.) 1-44. Helsinki (1933). **a - 1143**

Die Beobachtungsorte. Die Beobachtungen und die Instrumente. Die Bearbeitung der Beobachtungen und die Aufstellung des Beobachtungsmateriales. Tiefenbeobachtungen an den Jahresstationen 1931-VII - 1932-VI. Tiefenbeobachtungen an den Sommerstationen 1931-VII - 1932-VI. Oberflächenbeobachtungen an den Sommerstationen 1931-VII - 1932-VI.

**Granqvist Gunnar** - The Thalassological Summer Cruise in 1932 [*Navigatio thalassologica æstate 1932*]. Tabl., 1 map., Merentutkimuslaitoksen Julkaisu (Havsforskn. Inst. Skr.), 89, 16 pp. Helsinki (1933).

(—) The Thalassological Summer Cruise in 1933 90, 16 + v pp. Helsinki (1933). **a - 1144**

The results are expressed in tables concerning temperature, salinity, density ($\sigma_t = (S_t - 1)\ 1000$), hydrogen ion activity (PH), oxygen contents, percentage of oxygen saturation and alcalinity as well as meteorological data for different depths, temperature, and salinity of surface water.

**Granqvist Gunnar** - Regular Observations of Temperature and Salinity in the Seas around Finland, July 1932-June 1933 [*Observationes temperaturæ et salsedinis marium quæ Finlandiam circumdant a mense Julio 1932 ad mensem Junium 1933 peractæ*]. 2 figs., Merentutkimuslaitoksen Julkaisu (Havsforskn. Inst. Skr.), 92, 45. Helsinki (1934). **a - 1145**

After a general survey concerning the localities of observation, the instruments used and the computation of observations and arrangements of tables, the values concerning observations in the depth at year-stations and summer-stations, 1932-VII - 1933-VI as well as surface observations at year-stations and summer-stations, (temperature and salinity), 1932-VII - 1933-VI are expressed in tables.

**Hachey H. B.** - Hydrography of the Waters of the Halifax Area [*De hydrographia regionis* Halifax]. Ann. Rep. Work. Biol. Board Canada, 1932, 24. Ottawa (1933). **a - 1146**

Observations on the salinity and temperature of both off-shore and in-shore waters of the Halifax area ; the three distinct bodies of water noted ; the upward trend of the temperature ; fluctuation of the bottom and surface temperatures in the in-shore area within fairly wide ranges.

**Hachey H. B.** - Comparative Surface Water Temperatures [*Comparationes inter temperaturas aquarum ad superficiem*]. 1 table, Ann. Rep. Work. Biol. Board Canada, 1932, 24-25. Ottawa (1933). **a - 1147**

Results of the observations made at a number of stations established at representative points along the Atlantic coast. Table showing the monthly means of the surface water temperatures for August and February of 1931 for various points illustrating the differences observed in general throughout the period of observations, 1929 to 1932.

**Harwood E. Monroe & Brook Charles F.** - Monthly Sequence of Sea-Surface Temperature on the New York-San Juan Steamship Route [*Series menstruæ temperaturæ aquarum superficialium præter cursum pyroschaforum inter* New York *et* San Juan]. 2 figs., 3 tabl., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Nat. Meet., Apr. 27-29, 1933, 173-180. Washington, D. C. (1933). **a - 1148**

Comment of the record provided since April, 1926, by the steamship « Coamo » of the Puerto Rico Line, New York to San Juan of the surface-temperature at the depth of the ship's sea-water intake, determined by means of a Negretti and Zambra sea-water thermograph. Tables of average sea-water temperature, 1927-1932, and of monthly surface-temperature departures in degrees centigrade, 1927-32. Tables containing statements on monthly air-temperatures at the Blue Hill Observatory, monthly sea-surface temperatures taken on steamships of Puerto Rico Line, 1927-32, monthly departures from 5-year means of air-temperatures at the Blue Hill Observatory, and of sea-surface temperatures on the same steamships, 1927-32. Table with data on the widths in nautical miles of six temperature-divisions for route New York to San Juan, 1929-1932.

Kritische Bemerkungen zu den Ausführungen von K. Hidaka und A. Schumacher über neue Korrektionsformeln zur Umkippthermometer Ablesung. (S. « Ann. Hydr. », 1933, S. 75 ff., « Mem. Imp. Mar. Obs. ». Kobe Japan, V, 1, 11, 1932).

**Helland-Hansen Björn** - The Sognefjord Section. Oceanographic Observations in the Northernmost Part of the North Sea and the Southern Part of the Norwegian Sea [*Sectio in* Sognefjord. *Observationes oceanographicæ in extrema regione septentrionali Maris Nordici et in regione meridionali Maris ad Norvegiam pertinentis*]. 7 figs., James Johnstone Mem. Vol., 257-274. Liverpool (1934). **a - 1150**

I. Earlier investigations ; II. Investigations in later years ; III. Variations in temperature and salinity, especially of the Norwegian Atlantic Current ; IV. Local variations ; V. Dynamic calculations.

**Idrac P.** - Recherches sur les mouvements et fluctuations de température des eaux sous-marines en Méditerranée [*Investigationes in motus ac fluctuactiones temperaturæ aquarum submarinarum Maris Mediterranei*]. 11 fig., Ann. Inst. Océanogr., XIV, 2, 21-35. Paris (1934). **a - 1151**

Etude systématique des mouvements et fluctuations de température des eaux sous-marines en divers points de la baie de Villefranche-sur-Mer et de celle de Monaco à diverses profondeurs, accomplie non pas seulement par des sondages périodiques, mais en s'efforçant d'obtenir des enregistrements continus, permettant de relever la forme et l'allure des courbes de variations thermiques des eaux profondes. A ce but l'A. y joint l'étude des mouvements verticaux des eaux de la mer. Il a construit deux nouveaux appareils : un enregistreur instantané ultra-sensible de température sous-marine et un mesureur de courants verticaux, dont il donne la description, ainsi que d'un thermographe bilame moins couteux et de construction plus simple que le premier des deux appareils susmentionnés. Il donne aussi des renseignements sur l'utilisation et l'amarrage des appareils et illustre, sur la base des résultats obtenus, la répartition des courants profonds.

**Idrac Pierre** - Thermographe enregistreur Idrac de haute précision pour les observations océanographiques sous-marines [*Agitur de thermographo registratore* « Idrac » *maxima præcisione ad observationes oceanographicas submarinas ducendas*]. 8 fig., Bull. Inst. Océanogr., 636, 1-7. Monaco (Princ.) (1933). **a - 1152**

Description d'un thermographe basé sur le principe du thermomètre à résistance électrique où ont été supprimées les difficultés qui faisaient obstacles à l'emploi de ce thermomètre à la mer. L'enregistrement est obtenu photographiquement. Indications sur la mise en route de l'appareil et sur le chargement de l'appareil photographique à la chambre rouge.

Works of the Woods Hole Institution.

**Iselin Columbus** - The Distribution of Temperature and Salinity in the Western North Atlantic [*De distributione temperaturæ et salsedinis in regionem occidentalem Atlantici Nordici*]. Woods Hole Ocean. Inst., Rep. 1930-32, 42. Woods Hole, Mass. (1933). **a - 1154**

Brief account on work performed during 8 cruises of the «Atlantis» since January 1st 1932. List of operations involved in the reduction of the observations to a suitable form and index of a preliminary report, drafted on hand of the material collected and the diagrams elaborated.

**Jacobsen J. P.** - Temperature and Salinity at the Surface of the North Sea and the English Channel [*Temperatura et salsedo ad superficiem Maris Nordici et Freti Britannici*]. 9 figs., tabl., Cons. Perm. Int. Expl. Mer, Publ. Spéc. 3-20. Copenhague (1934). **a - 1155**

Description of the methods used in preparing the Atlas published in 1933 by the Service Hydrographique of the Bureau of the International Council for the Exploration of the Sea. I. Introduction ; II. General remarks ; III. Detailed description : 1. The temperature means for the North Sea ; 2. The salinity means for the North Sea ; 3. The temperature and salinity means for the English Channel ; 4. The standard deviation of the salinity observations in the North Sea ; 5. Conclusions regarding values of standard deviation of salinity.

**Jacobsen J. P. & Thomsen Helge** - Periodical Variations in Temperature and Salinity in the Straits of Gibraltar [*Variationes periodicæ temperaturæ et salsedinis in Freto Gaditano*]. 8 figs., 4 tabl., James Johnstone Mem. Vol. 275-293. Liverpool (1934). **a - 1156**

On the basis of material collected from the «Dana» in 1921 and 1928, it has been found that in the eastern part of the Straits of Gibraltar at depths from 100 to 200 meters, the isothermal and isohaline levels rise and sink rhythmically with the semidiurnal periods of the tide. The results of observations on the rising and falling of these levels, which are not regular, are reported in the paper.

**Kalle K.** - Meereskundliche chemische Untersuchungen mit Hilfe des Zeissschen Pulfrich-Photometers. III. Mitteilung : Methodische Untersuchung der Phosphatgehaltbestimmung [*Inquisitiones oceanographico-chemicæ photometri* Pulfrich *auxilio. Communicatio III°. Studium methodicum determinationis continentiæ phosphati*]. 17 Tab., 1 Tabellentaf. u. 2 Taf. a. T., Ann. d. Hydrogr., LXII, 2, 65-74, 3, 95-101. Berlin (1934). **a - 1157**

Vf. hat eine methodische Untersuchung der Phosphatgehaltbestimmung mit Hilfe des Zeisschen Pulfrich-Photometers in distilliertem Wasser und künstlichem Meerwasser von 35 ‰ Salzgehalt durchgeführt. Er berichtet über die speziell untersuchte Abhängigkeit der Phosphatreaktion von : *a*) der Wellenlänge des Untersuchungslichtes im Photometer ; *b*) der Zusammensetzung und der Menge des Molybdänschwefelsäure-Reagenses, *d*) der Temperatur, *e*) der Zeit zwischen Reagenzzusatz und Ablesung der Farbtiefe, *f*) Licht und Luft. Vf. konnte teilweise sehr interessante Gesetzmässigkeiten von grossem praktischem Werte zu den obigen Faktoren gestatten und berichtet ausserdem über die Gesichtspunkte der praktischen Ausführung der Phosphatbestimmung.

**Kondyrev N. V.** - Manuel pour les déterminations hydrochimiques sur mer [*Liber de determinationibus hydrochimicis marinis*] (En russe). 10 fig., nombr. tabl., 79 pp., Bur. Hydrogr., Léningrad (1933). **a - 1158**

Préface. Détermination du chlore. Détermination de l'oxygène. id. de l'alcalinité. id. de l'hydrogène sulfuré. id. de la réaction active de l'eau de mer. Titrations colorimétriques. Détermination de la conductivité électrique de l'eau de mer. Tableaux.

**Kupata Tosirô** - On the Temperature of Sea Water and Meteorological Elements Observed at the East Coast of Korea [*De temperatura aquæ marinæ deque elementis meteorologicis observatis apud litora occidentalia regionis* Korea]. Abstr. in Jap. Journ. Astr. & Geoph., XI, 3, 51. Tokyo (1934). **a - 1159**

By means of self-recording instruments the author observed the water temperatures at depths of 1 m., 30 m., and 50 m. as well as air temperature atmospheric pressure, and waterstand at Kosindo, near Seisin on the east coast of Korea. Certain precautions have been taken in order to secure accuracy of records. Part of them is reproduced in the text. The temperatures observed have a remarkable relation to the number and quality of fishes caught in the net lowered at the places of observations.

The hydrographic features of this Gulf-temperature, salinity, aud dominant concentration of its waters are now known. Ocean biologists and scientists have devoted their attention to this area of the Gulf of Maine, particularly favorable for such detailed studies. Descriptions and results are given here.

**Rakestraw Norris W.** - Studies of the Physical Chemistry of Sea Water [*Studia chimico-physica aquæ marinæ*]. Woods Hole Ocean. Inst., Rep. 1930-32, 33. Woods Hole, Mass. (1933). **a - 1179**

Summary of the chemical work carried on at the Woods Hole Oceanographic Institution during the summer of 1931, consisting for the most part of a general chemical survey of the waters of the region, with respect to the following factors: chloride, phosphate, nitrate, nitrite, and oxygen.

**Rakestraw Norris W.** - Studies of the Chemistry of Sea Water [*Studia chimica aquæ marinæ*]. Woods Hole Ocean. Inst., Rep. 1930-32, 42-43. Wodds Hole, Mass. (1933). **a - 1180**

Summary of the results of the following chemical projects: 1. A more comprehensive study of the place and significance of nitrites in the nitrogen cycle in the sea; 2. A preliminary study of the occurrence of arsenic in sea-water; 3. Critical examination of methods for determining copper and iron in sea-water; 4. Substantial beginning of a method for the positive determination of dissolved nitrogen in sea water; 5. Preliminary work on the adaptation of quantitative spectrographic methods to the analysis of sea water; 6. Improvements of one of the methods for determining the « buffer capacity » (alkalinity) of sea water.

**Retowski L. O.** - Eine Beobachtung über den winterlichen Haushalt des Reliktensees Mogilnoje [*Agitur de quadam observatione circa hiemale regimen lacus* Mogilnoje] (Russ. Text., Dtsch. Rés.). 2 Abb., 1 Tab., Trans. Arct. Inst., U. R. S. S., III, 2, 47-49. Leningrad (1933). **a - 1181**

Die Ergebnisse der ersten im Jahre 1929 ausgeführten Apriluntersuchung über die thermischen und Salinitätsverhältnisse werden hier auch an Hand Tabellen und Kurven mitgeteilt. Vergleich mit den im März gemachten Beobachtungen.

**Riel (van) P. M.** - The Snellius Expedition [*De expeditione navis* « Snellius »]. 1 fig. & 2 charts, Journ. Cons. Expl. Mer, VII, 2, 212-217. Copenhague (1932). **a - 1182**

The present communication concludes those of prof. van Everdingen published in vol. V, N° 3 of the « Journal etc. » in which some extracts from the reports of the expedition in the Dutch East Indies of the « Snellius » have been given. On an annexed chart (N° 1) the whole track of the ship is indicated with the various stations where serial observations of wire soundings have been carried out. During 16 months about 33,700 sea miles have been covered, 32,450 echo soundings made and plotted after corrections on large-scale depth charts. Approximatively 2,000 samples of surface-water have been collected and salinity and temperature determinations made. 10,000 and 5,000 samples have been titrated for salinity and oxygen content respectively, 7,000 chemical determinations have been carried out, a great number of coral samples and animals has been collected, and other oceanographic work performed. On a second chart are indicated the three vertical sections made and a figure shows the salinity distribution in three vertical sections, along which the interchange of water with the Pacific Ocean is possible.

**Robinson Rex J. & Wirth Henry E.** - Report on the Free Ammonia, Albuminoid Nitrogen and Organic Nitrogen in the Waters of the Puget Sound Area, during the Summers of 1931 and 1932 [*Relatio de ammoniaca libera, azoto albuminoidi, azoto organico in aquis nomine* Pouget-Sound, *æstate 1931 et 1932*]. Journ. Cons. Expl. Mer, IX, 1, 15-27. Copenhague (1934). **a - 1183**

Determination of the free ammonia, albuminoid nitrogen and organic nitrogen in the waters of the Puget Sound area during the summers of 1931 and 1932 are reported. The average content of free ammonia was found to be less than 0.02 milligram of ammonia nitrogen per liter. The albuminoid nitrogen content averaging about 0.10 milligram per liter in the waters, studied, does not show the regular correlation with organic nitrogen that might be expected. The organic nitrogen content decreases with depth. No regular variation of total nitrogen with locality was found. This quantity increases with depth, but in an irregular manner. (Author).

**Robinson Rex J. & Wirth Henry E.** - Free Ammonia, Albuminoid Nitrogen, and Organic Nitrogen in the Waters of the Pacific Ocean off the Coasts of Washington and Vancouver Island [*De ammoniaca libera, azoto albuminoidi et azoto organico in aquis Oceani Pacifici longe a litoribus urbis* Washington *et insulæ* Vancouver]. 2 figs., 5 tabl., Journ. Cons. Expl. Mer, IX, 2, 187-195. Copenhague (1934). **a - 1184**

1. The quantity and the distribution of ammonia in the Pacific Ocean off the Washington coast corresponds to those found in other oceans; 2. The amount of albuminoid and organic nitrogen is less than that found in the inland waters of this region; 3. Other investigators have reported much larger values for albuminoid nitrogen in the Mediterranean and North Seas; 4. The vertical distributions of albuminoid and organic nitrogen show minima at eight hundred to one thousand meters with greater values at surface and bottom.

R. & Seiwell Gladys** - Investigation of the Phosphorus Cycle and Associated Factors in the North Atlantic Basin [*Inquisitiones in cyclum phosphori ac factores cum phosphoro consociati in bacino Atlantici nordici*]. Woods Hole Oceanogr. Inst., Rep. 1930-32, 46-48. Woods Hole, Mass. (1933). **a - 1188**

Summary of the observations made during the cruises of « Atlantis » in 1932 between the Bermuda Islands and the North American Coast, between Bermuda and the Nova Scotia coast and between Bermuda and Chesapeake Bay. In general, the observational program has consisted in determination of soluble phosphoric acid, total phosphorus, oxygen and pH at stations and depths wherever practical. Chemical analysis of marine plankton and investigation of the phosphorous cycle in marine sediments have also been carried on.

**Seiwell H. R. & Seiwell G. E.** - Ueber den Gesamtphosphorgehalt des Seewassers im westlichen Nordatlantischen Ozean [*De summa phosphorica in aqua marina in regione occidentali Atlantici Nordici*]. 2 Tab., 1 Karte, 1 Taf., Ann. d. Hydrogr. LXII, 1, 7-13. Berlin (1934). **a - 1189**

Die Beobachtungen, welche diesem vorläufigen Bericht zugrunde liegen, stammen von einer Fahrt der « Atlantis » im Nordwest-Atlantischen Ozean von Februar bis März 1932. Die wiedergegebenen Ergebnisse dürften die ersten ihrer Art sein, die aus dem offenen Ozean für die Oberfläche und das Tiefenwasser veröffentlicht werden. Bedeutung des Phosphats für die Fruchtbarkeit des Seewassers. Beschreibung des Analysenverfahrens, welche die Methode von Robinson und Kemmerer in etwas modifizierter Form darstellt. Die vertikale Verteilung des organisch gebundenen Phosphors.

The specific conductance of sea water has been measured over the entire range of concentrations found in nature. The measurements have been made at five-degree intervals from 0° to 25° inclusive. The data obtained by experiment have been analyzed by the method of least squares and interpolation formulas for the calculation of intermediate values have been derived for all of the temperatures at which the measurements were made. Tables have been calculated giving the specific conductance for every integral value of the chlorinity between 1 ‰ and 22 ‰ inclusive at each of the temperatures. (Author).

The present paper attempts to review the status of the problem of the distribution of dissolved oxygen in the waters of the oceans and to supplement the existing knowledge, particularly of the North Pacific Ocean. It contains a comprehensive treatment of oceanic circulation, which is necessary for a complete explanation of the well defined zones of minimum oxygen which are known to exist at various depths. The data reported in the accompanying tables, together with the results obtained by the « Dana », the « Carnegie », and the « Catalyst » show that the intermediate zone of a minimum oxygen is a characteristic property of a relatively large portion of the north and northeast Pacific. A summary of the causes which may effect changes in the quantity of dissolved oxygen are given, together with a brief description of the physical conditions of the northern Pacific, which produce situations that are entirely different from the conditions found in the North Atlantic. The relation of the dissolved oxygen to other constituents of sea water is also discussed.

**Thomsen Helge** - The Distribution of Phosphate and Nitrate in the North Sea in May 1932 [*De phosphatis et nitratis maris Nordici, mense Majo 1932. Quæstio de distributione*]. 8 figs., 1 tabl., Rapp. & Pr.-Verb., Cons. Expl., Mer, LXXXV Append. 42-46. Copenhague (1933). **a - 1202**

From April 29 to June 10 the R. S. « Dana » carried out fishery investigations in the North Sea under the leadership of Professor Johs. Schmidt. In addition to the fishery investigations, hydrographic investigations were made by the writer at 47 stations. These investigations consisted of determination of temperature, salinity, and phosphate and nitratecontent at various depths from the surface to the bottom.

**Tomiyama T.** - On the Stick Antimony Electrode for the Determination of pH. [*De electrodo antimonii ad pH determinandum*]. 7 fig., 4 tabl., Journ. Imp. Fish. Inst., XXIX, 1, 29-46. Tokyo (1933). **a - 1203**

The author studies the factors governing the potential of stick antinomy electrode such as shaking the electrode, temperature, time of immersion, presence of NaCl and their bearing on pH-E. M. F. curve. From the data obtained some explanations and criticism are also given of the divergency of results obtained by different workers.

Flacher Bezirk, Tiefen bis nur 24 m. Bodenarten, Wasserdurchsichtigkeit, Farbe, Salzgehalt, Eis-und Stromverhältnisse.

**Utterback C. L.** - Light Penetration in the Waters of Southern Alaska [*De lucis penetratione in aquas regionis Alaskianæ meridionalis*]. 2 fig., 1 tabl., Journ. Opt. Soc. Amer. (Univ. Wash. Publ. Oceanogr. Suppl., ser. N° 14), XXIII, 10, 1-5. Washington (1933). **a - 1205**

The data and results presented constitute a report of a continuation of the work of the preceding paper. The interesting new feature of the waters of Southern Alaska is definite evidence of layering. In addition to photosynthetic action it is probable that this is caused, in part at least, by the discharge of rivers and by glacial effects. (Author).

**Utterback C. L.** - Variations in Visible Solar Light during Submarine Measurements [*De variationibus lucis solaris perdurantibus mensuris submarinis*]. Science, LXXVII, 118-119: London (1933). **a - 1206**

**Utterback C. L. & Jorgensen, Wilhelm** - Absorption of Daylight in the North Pacific Ocean [*De lucis diurnæ absorptione in Oceano Pacifico Nordico*] 6 fig., 2 tabl., Journ. Cons. Expl. Mer, IX, 2, 197-209. Copenhague (1934). **a - 1207**

The total vertical absorption coefficients, as here used, are found to be a good index of the transparency of the water. While sources of errors in the measurements are appreciable, the results are typical for the waters studied. There is a definite and marked decrease in the transparency of the water proceeding from the open ocean to inshore and lake waters. This is true for all wave-lengths studied. In the open ocean the red light is mostly absorbed in the first few meters leaving a deficiency of the red in the deeper waters. The region of greatest transparency is in general in the blue in ocean waters. This is in contrast to the inshore waters, where the greatest transparency is in the green. (Author).

**Utterback C. L., Thomas G. & Thomas Bertram D.** - Refractivity-Chlorinity-Temperature Relationships of Ocean Waters [*Correlationes inter refractionem, tenorem chlori et temperaturam aquarum oceanicarum*]. 2 tabl., Journ. Cons. Int. Expl. Mer, IX, 1, 35-38. Copenhague (1934). **a - 1208**

The purpose of this investigation was to study the relations between the chlorinity of ocean water and the refractive index ($d = 5893$) at various temperatures. Samples of water used. Experimental work shortly described. Results. Tables.

**Wiese W. & Laktionow A.** - Tiefseebeobachtungen [*Observationes hydrologicæ maris aquarum peraltarum*] (In Russ., dtsch. Rés.). 40 Abb. u. mehr. Tab., Sc. Res. Arct. Exped. on the « Sedov » in 1930. Hydrol. & Meteorol., Trans. Arct. Inst., I, 43-108. Leningrad (1933). **a - 1215**

Im Sommer 1930 besuchte der Eisbrecher « Sedow » den nördlichen noch gänzlich unerforschten Teil des Karischen Meeres, in welchem Tiefseebeobachtungen auf 25 Stationen ausgeführt wurden. Unter dem Namen Karischen Meere versteht Vf. die Gewässer, deren Grenzen folgendermassen bestimmt worden sind: im Süden- der Kontinent; im Nordwesten- die Linie, welche die Nordspitze von Nowaja Zemlja mit dem äussersten südöstlichen Teil von Franz-Joseph Land verbindet; im Norden- die Kontinentalstufe und im Osten- Sewernaja Zemlja. In der vorliegenden Arbeit sind die Ergebnisse der Beobachtungen über Temperatur, Salzgehalt, Alkalinität, Wasserstoffionenkonzentration und den Gehalt in Sauerstoff, Phosphaten, Sulfaten, Nitraten, Calcium und Magnesium der Gewässer des Meeres zusammenfassend wiedergegeben.

**Wirth Henry E. & Robinson Rex J.** - Photometric Investigation of Nessler Reaction and Witting Method for Determination of Ammonia in Sea Water [*Investigationes photometricæ in reactionem secundum* Nessler *ac methodus* Witting *ad ammoniacam in aqua marina determinandam*]. 3 figs., Ind. & Eng. Chem. Anal. Ed. (Univ. Wash. Publ. Oceanogr. Suppl. ser. N. 12), V, Sept. 15, 293. Easton, Pa. (1933). **a - 1216**

Examination of Nessler reagents according to four methods: Ringer and Klingen, Raben, Standard Methods of Water analysis, and Treadwell. Results compared with these obtained in sea water with the Witting reagents. Defense of the Witting method.

**Woerner H.** - Die Brauchbarkeit der funktelegraphischen Seeobsmeldungen zur Bestimmung von Wassertemperaturen [*De utendis notitiis marconigraphicis a navibus velicis transmissis ad aquæ temperaturam determinandam*]. 1 Abb., 1 Tab., 1 Taf. a. T., Ann. d. Hydrogr. LXII, 3, 103-109. Berlin (1934). **a - 1217**

Möglichkeit nach der allgemeinen Einführung der funktelegraphischen Uebermittlung von Wettermeldungen der Ozeandampfer eine grosse Anzahl Temperaturmessungen aus allen Teilen des Nordatlantik zu haben. Zwei verschiedene Methoden der Auswertigung des vorhandenen Materials. Untersuchung über die Wassertemperatur des Nord-Atlantik während der Monate: August, Oktober und November 1932 und Februar 1933. Möglichkeit die Temperaturanomalien mit Hilfe der beschriebenen Untersuchungsmethode festzustellen.

**Wüst G.** - Ueber die Bedeutung von Bodentemperaturmessungen für die ozeanographische, morphologische, chemische und geologische Erforschung der Tiefsee [*De mensuris temperaturæ fundi marini earumque momento pro studio oceanographico, morphologico, chimico, geologico aquarum abyssalium*]. 2 Taf., 1 Tab., James Johnstone, Mem. Vol., 242-256. Liverpool (1934). **a - 1218**

Auf Grund der Ergebnisse, welche dank der Mitarbeit der Vermessungsschiffe und Kabeldampfer erzielt werden konnten, zeigt Vf., dass der Wert und die Bedeutung von Bodentemperaturmessungen viel höher für die Meeresforschung zu veranschlagen ist, als man bisher im allgemeinen annahm. In der vorliegenden Arbeit bespricht er (I) den Stand der Forschung in der Atlantischen Tiefsee; (II) die Bedeutung der potentiellen Bodentemperaturen für die ozeanographische und morphologische Erforschung der atlantischen Tiefsee und (III) die Beziehungen zwischen dem antarktischen Bodenstrom und dem Kalkgehalt der Tiefsee-Sedimente des Bodenwassers in den drei Ozeanen.

**Wüst Georg** - Salzgehalt und Wasserbewegung im Suezkanal [*De continentia salina et motibus aquæ canalis* Suez]. 3 Abb., Naturwiss., XXII, 26, 447-450. Berlin (1934). **a - 1219**

Der Suezkanal nimmt in hydrographischer Hinsicht unter den Meeresstrassen eine Sonderstellung ein. Da Strommessungen nicht vorliegen, sind hier, unter Berücksichtigung der jahreszeitlichen Verschiebungen, des Salzgehaltes im Inneren des Kanals, der meteorologischen Faktoren, des Wasserstandes und der Fernwirkungen der Obenflächenzirkulation des Indischen Ozeans drei jährich verschiedene Strombilder indirekt abgeleitet worden.

Unter Hinweisung auf seine zusammen mit Prof. Helland-Hansen ausgeführten Forschungen, besonders in Bezug auf die Temperaturschwankung im Biscaya-Gebiet, gibt der Vf. einige erläuternde Bemerkungen über die Wärmezufuhr und Wärmeleitungsfähigkeit des Meeres, die Temperaturverteilung, die Strömungen, den Austausch von Temperatur und Salzgehalt usw. und behandelt dann an Hand Formeln und Gleichungen das Wärmeleitungsproblem, die numerische Berechnung der Lösung und die Wärmeleitung mit veränderlichem Wärmeleitungskoeffizienten.

**Kitagawa Kingoro** - Sur le trajet d'un rayon sonore dans une couche peu profonde d'eau de mer [*De radio quodam sonoro per stratum marinum haud altum transeunte. Quæstio de eius traiectu*]. Mem. Coll. Sc., A, 16, 287-295. Kyoto (1933). **a - 1236**

Etudiant au point de vue des variations de la température les lois de croissance linéaire de la compressibilité et de la densité des eaux de mer suivant leur profondeur dans la mer, on en déduit une formule sur la vitesse de propagation des ondes sonores comme fonction de la profondeur. En conséquence, on arrive à une équation exprimant le trajet du rayon sonore dans la mer, dont la forme est tout à fait semblable à celle que l'on a déjà récemment trouvée. (Auteur).

Nel presente lavoro l'autore riassume i concetti della teoria dell'estinzione delle radiazioni per assorbimento e diffusione in un mezzo omogeneo; egli estende questa teoria alla propagazione delle radiazioni nell'acqua, deducendo le formule rappresentative del fenomeno e precisando quali siano i dati d'osservazione che debbono essere determinati per la completa conoscenza dei caratteri ottici del mezzo considerato. Quindi illustra anche il metodo di osservazione che deriva dalla teoria summenzionata.

La station principale de 1931 fut choisie au SE de Gotland à la profondeur de 140 mètres, de manière à se trouver au centre du bassin le plus vaste et le plus profond possible. A une distance de 40 kilomètres autour de la station la valeur minima de la profondeur est encore environ de 100 mètres ; les côtes de Gotland et de Lettonie en sont éloignées d'à peu près 70 kilomètres. Les mesures des courants furent exécutées principalement à l'aide de trois instruments enregistreurs Pettersson. Le navire employé par l'expédition fut le Skagerrak. Les valeurs sont recueillies en tables.

Account of experiments conducted in a small tank in the laboratory of the Atlantic Biological Station St. Andrews, N. B. in order to demonstrate the horizontal movements set up by the mixing of stratified water. The results of the experiments warrant some conclusions concerning the dynamic gradients set up by the mixing of stratified waters, causing systems of « making » currents, and the effect of the wind blowing towards the mixing point, which considerably modifies the above systems. The differential movements set up in the tank under various conditions are comparable with observed movements under similar conditions in nature.

**Nomitsu Takaharu** - On the Density Current in the Ocean. I The Case of No Bottom-Current [*De currentia densitatis in Oceano. I. Nihil currentiæ in fundo oceanico*]. Mem. Coll. Sc., A. 16, 261-274. Kyoto (1933). **a - 1262**

The writer defines a « density current » as such a current as would be produced by a local difference in density alone and not attended by any sloping of the sea-surface. He first finds the density-current in a uniform solenoidal field and show that current produced by the sudden generation of a local difference in density will attain its steady value in only a few hours, or days at most. But the density of the actual water in the real sea does not change sensibly during a few days and shows only the yearly variation, so that the density current may be considered as always having a steady value corresponding to the gradient of density from time to time.

Next the « convection current » composed of a density and a slope current influenced by land is discussed. The convection current of Ekman's type corresponds to the case of a long straight coast perpendicular to the density gradient. The writer corrects some errors in Ekman's result, and discusses several other cases of convection current. (Author).

**Nomitsu Takaharu** - A Theory of the Rising Stage of Drift Current in the Ocean. The Case of No Bottom-Friction [*Theoria circa stadium sublationis currentiæ oceanicae declinationis. Nihil attritus in fundo oceanico*]. Mem. Coll. Sc., A. 16, 275-287. Kyoto (1933). **a - 1263**

The author compares the results obtained supposing that the water is uniformly viscous but that there is no friction for slipping on the bottom with those in the previous case of « no bottom-current », and concludes: 1) For a very deep sea the current coincides exactly with that in the previous case ; 2) The shallower the sea, the stronger is the current and the larger becomes the angle of deflection from the direction of the wind, just contrary to the previous case ; 3) The velocity of the current oscillates around the steady value with a period of 12 pendulum hours as before, but it does not attain a definite value even when $t = \infty$, and the hodograph has an asymptotic circle whose radius is inversely proportional to the depth of the sea ; 4) The time required for the current to attain a quasi-steady state is about one third the time required for it to become steady in the previous case.

The real sea must of course be between the two extreme cases of « no bottom-velocity » and « no bottom-friction ».

**Nomitsu Takaharu** - On the Density Current in the Ocean. II. The Case of No Bottom-Friction. [*De currentia densitatis in Oceano. II. Nihil attritus in fundo oceanico*]. 4 figs., Mem. Coll. Sc., A. 16, 383-396. Kyoto (1933). **a - 1264**

First the « density current » in an open boundless sea with uniform solenoidal field and the « convection current » influenced by land are discussed under the condition of « no bottom-friction ». The writer thus finds that Ekman's current-diagram put forward by him as the fundamental convection current, represents nothing but the currents in an *enclosed sea* with no bottom-*friction* and that all the other current diagrams given by Ekman are more or less erroneous. As the source of these errors the writer enumerates four weak points in Ekman's theory (Author).

**Nomitsu Takaharu & Takegami Tohichiro** - A Theory of the Rising Stage of Drift Current in the Ocean. III. The Case of a Finite Bottom-Friction Depending on the Slip Velocity [*Theoria circa stadium sublationis currentiæ oceanicae declinationis. III. Attritus definitus in fundo ex velocitate lapsionis*]. Mem. Coll. Sc., A. 16, 309-331. Kyoto (1933). **a - 1265**

Having found that in a shallow sea there would be too grave a difference between the currents in the two cases of « no bottom-current » and « no bottom-friction » already dealt with, the writers treat the problem again on the assumption most probable for a real sea, that there can exist a bottom-velocity $V_h$ and bottom-friction

$$R_s = fp\,V_h^2 \text{ or } f'p\,V_h$$

according to the strength of $V_h$. The results show that : 1) For a deep sea, the current is approximately equal to those in the two cases of « no bottom-current » and « no bottom-friction ».

2) For a shallow sea, the mode of generation and distribution of the current will be very different according to the wind velocity and the turbulence of the sea. For a strong wind the current approaches that in the case of « no bottom-current », and for a weak wind that in the case of « no bottom-friction » ; 3) At a given latitude, the greater the wind velocity Q or the smaller the viscosity of water, the greater is the ratio of the bottom velocity $V_H$ to Q ; but this ratio cannot exceed a limited value, even if the wind velocity becomes infinite ; 4) The greater the depth of the sea, the smaller is the ratio $V_H/Q$ and it becomes zero for an infinitely deep sea. (Authors).

**Nomitsu Tahakaru & Takegami Tohichiro** - On the Development of the Slope Current and the Barometric Current in the Ocean. II. Different Bottom-Conditions Assumed [*De progressione currentiæ declivitatis deque currentia barometrica in Oceano. II. Diversæ condiciones fundi marini considerantur*]. Mem. Coll. Sc., A, 16, 333-351. Kyoto (1933). **a - 1266**

For the same reasons as those given in the writers' second and third reports upon the drift current in the ocean, the slope current is treated again on two different assumptions with regard to the bottom condition : (1) that there is « no bottom-friction » and (2) that there acts a finite resistance depending on the bottom-velocity. In the case of « no bottom-friction », the whole water from surface to bottom must have the same velocity and it coincides with the motion of the surface water of an infinitely deep ocean with « no bottom-current ». In the case of a « finite bottom-friction » due to the bottom-velocity, the mode of generation and distribution of the current will differ very much according to the magnitude of the surface slope and the viscosity of water. For a large slope and a small viscosity, the current approaches that seen in the case of « no bottom-current » ; and for a small slope and a large viscosity it approaches that seen in the case of « no bottom-friction ». Further, the current possesses a character similar in many other respects to that of the drift current found in the case of similar bottom-conditions, explained in the previous papers.

To put it briefly, the effect of a bottom-friction is to add to the current found in the case of « no bottom-friction » such a « no bottom-friction » drift current as would be produced by a wind traction equal to the given bottom-friction and acting there. (Authors).

**Nomitsu Takaharu & Takegami Tohichiro** - On the Density Current in the Ocean. III. The Case of a Finite Bottom Friction Depending on the Slip Velocity [*De currentia densitatis in Oceano. III. Attritus definitus fundi oceanici ex velocitate lapsionis*]. 6 figs., Mem. Coll. Sc., A. 16, 397-408. Kyoto (1933). **a - 1267**

The density current in a uniform solenoidal field is here treated again on the assumption most probable for a real sea, that there acts a finite bottom-friction depending on the slip velocity. The distribution of the steady current and the mode of development of the current are bound to be very different according to the magnitude of the density-gradient and the turbulence of the sea. For a large density-gradient and a little turbulence, the current approaches that seen in the case of « no bottom-current » ; and for a small density gradient and a large viscosity it approaches that seen in the case of no « bottom-friction ». (Authors).

Two dynamical current charts of the Okhotsk Sea in summer season are prepared, one from the result of hydrographical observations in 1916 of the « Unyô Maru », Imperial Fisheries Institute, and the other from that in 1917. In these charts, a south-going current is revealed in the middle part of the sea. One part of this current returns northward off the west coast of Kamtchatka, and the remaining part runs out to the Pacific through the middle part of the Kurile Islands. In the western part of the sea, some systems of vortical currents are expected. (Author).

**Wiese W. J.** - Die Triften des «Sibirjakow» im Tschuktschen-Meere [*De navi* «Sibirjakow» *eiusque declinatione per Mare nomine* Tschukhotsk] (In Russ., Dtsch. Rés.). 4 Kart., 2 Tab., Trans. Arct. Inst., X, 103-124. Leningrad (1933). **a - 1282**

Bericht über die während der Eistrift des «Sibirjakow» vom 18. September bis zum 1. Oktober 1932 von der Insel Idlidja bis ungefähr Kap Deschnew ausgeführten Positionsbestimmungen, Windmessungen, Eisverhältnissebeobachtungen, usw. Die Analyse der Eistrift gibt eine Andeutung über das Vorhandensein östlich vom Kap Ikigur eines antizyklonalen Wirbels, dessen Entstehung vom Vf. durch das Zusammentreffen einer nordwestlichen Strömung aus der Bering-Strasse mit der südöstlichen Strömung längs der Tschuktschenküste erklärt wird. Eine zweite kleine Eistrift machte der «Sibirjakow» zwischen der Insel Koljutschin und dem Kap Onman am 11-16. September.

**Witting Rolf** - A Current-meter, its Use and some Results [*De quodam apparatu ad currentias mensurandas. Quæstio de usu ac resultatibus*]. 8 figs. & diagrs., Journ. Cons. Expl. Mer, VII, 2, 218-232. Copenhague (1932). **a - 1283**

The paper describes a current-meter, its construction and the methods for the reduction of observations, and gives the results of some measurements made in the Kattegat during the summer of 1932. These results indicate that the currents can be rather complicated. Strata of rapid kinematic transition-where eddying and almost gliding occur-divided the sea into several layers within which pulsations of the current were to be assumed.

**Wüst G.** - Deep Water Circulation of the Atlantic [*De circulatione aquæ peraltæ Oceani Atlantici*]. Nature, CXXXIII, 3361, 484-485. London (1934). **a - 1284**

**Abbot C. G.** - The Rotation of the Earth [*De rotatione terrestri*]. Science, LXXIX, 2055, 454. New York (1933). **a - 1293**

Brief discussion of the author on the effect of Earth's rotation on the expansion of the atmosphere. Question about the sun's retarding influence on the tides.

**Bauer Hubert A.** - A World Map of Tides [*Aestuum totius mundi tabula*]. 1 map, 3 tabl., Geogr. Rev., XXIII, 2, 259-270. New York (1933). **a - 1294**

The author gives an analysis and description of a *geographical* map of the world's tides elaborated in order to meet the deficiency of a geographic representation of the results of the work of a tidal mathematician, who has developed tidal knowledge, especially prediction, to a degree almost beyond the limits of practical needs. In the paper are discussed the technical basis, the general interpretation of the map, the additional hydrodynamic laws involved, as well as mixed tides and their distribution, semidiurnal tides, diurnal tides and tideless regions. In the tables are given three lists of stations with semidiurnal tides, stations with diurnal tides and stations with mixed tides.

La plupart des appareils marégraphiques, détruits au cours des hostilités 1914-1918, ont été rétablis.

**Cline Isaac M.** - Tides and Coastal Currents Developed by Tropical Cyclones [*Aestus atque currentiæ litoreæ cyclonibus tropicalibus excitatæ*]. Monthly Weath. Rev., 61, 2, 36-38. Washington, D. C. (1933).

(—) Voir extrait en franç. dans : Union Géod. & Géoph. Int., Ann. Comm. Raz de Marée, 3, 19-21. Paris (1933). **a - 1297**

The author has been convinced by personal experience that the high tides developed by the hurricane winds on the coast are not only the greatest destructive agents but also one of the outstanding indicators of the intensity and the extent of the storm and the place towards which it is moving. In the present paper he gives some examples of the above phenomenon and a summary of his work on « Relation in changes in storm tides on the coast of the Gulf of Mexico to the center and movement of hurricane », elaborated on hand of the automatic tide records and meteorological and other data which had been recorded in tropical cyclones from 1900. He also deals briefly with development of coastal currents by the swells sent out by the winds of the right-hand rear quadrant of the cyclone.

**Grace S. F.** - The Principal Semi-Diurnal Constituent of Tidal Motion in the Gulf of Mexico [*De præcipuo constituente semidiurno motus æstuum Sinus Mexicani*]. 1 fig., sev. tabl., Monthly Not. R. Astron. Soc., Geophys. Suppl., 3, 3, 156-162. Edinburgh (1933). **a - 1305**

The diurnal ($K_1$) tidal motion of the Gulf of Mexico has been examined by the author in a previous paper (S. F. Grace: « The Principal Diurnal Constituent of Tidal Motion in the Gulf of Mexico », M. N. R. A. S., Geophys. Suppl., 3, 70-83, 1932). In the present paper the $M_2$ tidal motion is considered, with the same method as that in the first paper; it refers to the four subsidiary motions, the combination of the subsidiary motions and contains a co-tidal chart which differs entirely from that given by Harris. It resembles more that of Sterneck.

**Marmer H. A.** - The Importance of Tide-Observations [*Aestuum observationes earumque momentum*]. Nat. Res. Counc., Trans. Amer. Geogr., Union, 14th Ann. Meet. Apr. 27-29, 1933, Comm. Ocean Basins, Append. C, 21-22. Washington, D. C. (1933). **a - 1319**

Two directions in which the systematic and continuous observations of tides at a number of places are important in connection with the problems of the geophysical and geological study of oceanic basins, possibility of an accurate determination of basic data from which both heights of land and depths of the sea may be measured, and furnishing of quantitative data for determining coastal stability. The author emphasizes also another interesting question, upon which the above observations may throw light, i. e. the stresses within the Earth.

**Marmer H. A.** - Las caracteristicas de la marea [*Aestuum peculiaritates*]. Rev. Gen. Mar., LVI, Junio/Julio. Madrid (1933). **a - 1320**

**Marmer H. A.** - The Greatest Daily Tide [*De maximo æstu diurno*]. Geogr. Rev., XXIV, 2, 334-335. New York (1934). **a - 1321**

Information on hand of observations made by Russian and Japanese investigators which show that the Okhotsk Sea is to be added to the regions in which daily tides occur. These tides have a special interest, because they have large range, i. e. the average range is of 22 feet and on one day even a range of 37 feet has been reported. These tides, writes the author, represent the greatest daily tides in the world.

**Marmer H. A.** - Phénomènes de marée dans l'East River, Port de New York [*De æstuum phænomenis in* East *flumine, in portu* New York]. 4 fig., Rev. Hydrogr., XI, 1, 98-106. Monaco (Princ.) (1934). **a - 1322**

Résultats d'une étude complète des marées et des courants des chenaux du port de New York faite conjointement par le Coast and Geodetic Survey et par le Corps des Ingénieurs de l'Armée des Etats Unis d'Amérique, au cours de laquelle les marées ont été observées à environ 80 emplacements distribués sur les deux rives des 14 Milles marins de l'East River; ces observations ont permis d'enregistrer le caractère local de la marée ainsi que les variations d'heure des pleines mers et de l'amplitude de place en place. Les résultats obtenus sont intéressants non seulement pour ce chenal maritime très important, mais jettent aussi une certaine lumière sur le problème général des marées dans un chenal réunissant deux bassins marégraphiques indépendants.

Differences in the form of tides over the world. Examples. Explanations.

**Ogura Sinkiti** - The Tides in the Seas Adjacent to Japan [*De æstibus marium ad Japoniam pertinentium*] (In Jap.). 65 pls., Bull. Hydrogr. Dpt., 7, 1-189. Tokyo (1933).

(—) S. Abstract in Jap. in Suiro Yôhô, 7 pls., 12, 183-190, 227-240. Kobe (1933). **a - 1324**

This paper is written principally for the purpose of supplying those interested in the problems of daily motions of sea water with data on tides and tidal currents in the adjacent seas of Japan. In addition, a brief summary of the results of investigations on the tides hitherto made by various authorities are given. The harmonic constants of $M_2$, $S_2$, $K_1$ and $O_1$ tides are given for 704 stations in the seas near Japan and 69 along Japanese coast. The annual and secular fluctuations of sea-level are studied in the last section of the volume. The appended plates show the observed tidal curves at 28 stations, co-tidal charts of $M_2$ and $K_1$ tides, co-range charts of $M_2+S_2$ and $K_1+O_1$ tides, current charts, etc. (See abstr. by the author, Jap. Journ. Astr. Geoph., XI, 3, abstr. 143, 44. Tokyo, 1934).

**Ogura Sinkiti** - On the Tide and Tidal Currents in the Northern Part of the Hwang Hai (Yellow Sea) [*De æstibus, æstuumque currentiis in parte septentrionali* Hwang Hai] (In Jap.). 18 pls., Suiro Yôhô (Hydrogr. Bull.), 12, 47-61, 89-99, 137-149. Tokyo (1933). **a - 1325**

Results and analysis of observations made at 12 stations remote from land in the Hwang Hai, carried out in recent years by the Hydrographic Department and fisheries institutions of Japan. The observations at each station have been made at various depths below the surface and extended for about 24 hours. The directions, velocity, and time of the maximum and minimum currents have been obtained both for semi-diurnal and diurnal currents. By assuming probable relations existing among the amplitudes and phase-retardations for semi-diurnal component tides and those for diurnal components, the author derived the harmonic constants of $M_2$ and $K_1$ currents for the directions of the maximum and minimum velocities. At the end of the paper the author studies the tides in the northern part of the Hwang Hai on hand of current and tidal observations. He also calculates the gradient of sea-level and directions of co-tidal and co-range lines. (See also Jap. Journ. Astr. & Geoph., XI, 3, abstr. 137, 41-42, by the author, Tokyo, 1934).

**Okada T. (Director)** - Tidal Currents in the Muroran Harbour (Hokkaidô). (Aug. 1932) [*Aestuosæ currentiæ in portu* Muroran (Hokkaido)]. Journ. Oceanogr., VI, 2, 241-246. Kobe (1934). **a - 1328**

**Orrego Lira** - Chili. Raz de marée observés dans divers ports [*Cilena regio. De æstuosis phænomenis in portibus diversis*]. 8 fig. d. t., 2 pl. h. t. Union Géod. & Géoph. Int., Ann. Comm. Et. Raz de Marée, 3, 42-49. Paris (1933). **a - 1329**

Renseignements sur quelques phénomènes marins observés dans le Port de Coquimbo, le Port de Constitucio, le Port d'Antofagasta et le Port d'Iquique au Chili, dont l'origine ne peut être attribuée qu'à des mouvements séismiques très lointains et que, par conséquent, l'on peut considérer comme des raz de marée.

**Pettersson O.** - Interne Gezeiten-Wellen [*Aestuum undæ internæ*] (In dtsch, engl. Rés.). 12 Abb., Cons. Perm. Int. Expl. Mer, Rapp. & Pr.-Verb. des Réunions, LXXXII, 1-26, i-viii. Copenhague (1933). **a - 1330**

Vf. schildert die internen Gezeiten-Wellen, welche von ihm entdeckt worden sind, (s. O. Pettersson : « Strömstudier vid Oestersjöns portar », Sv. Hydrogr. Biol. Komm. Skr. III, 1908, und : O. Pettersson : « Gezeitenähnliche Bewegungen des Tiefenwassers », Publ. de Circonst., n° 47, Ref. in Krümmels Handb. d. Ozeanogr. II) Diese internen Gezeiten-Wellen sind als direkte Wirkungen der vertikalen Komponente der Gravitation des Mondes und der Sonne zu betrachten. Dass man bisher die Bedeutung der vertikalen Komponente der Flutkraft verkannt hat, beruht darauf, dass man den Einfluss der Schichtung des Meeres übersah. Die hier besprochenen internen Bewegungen des Meeres sind keine freien Wellen sondern gezwungene Gezeiten-Wellen in den Zwischenschichten des Meeres. Es wird ausserdem die innige Verbindung zwischen der ozeanischen Zirkulation und den Gezeitenphänomenen besprochen. (S. Uebers. in franz : James Johnstone Mem. Vol., 294-309. Liverpool, 1934).

**Proudman J.** - On the Distribution of Tides Over an Element of the Sea [*De æstuum distributione per elementum quiddam marinum*]. James Johnstone Mem. Vol., 316-323. Liverpool (1934). **a - 1331**

The object of the present paper is to find formulae relating to an elementar region which is bounded by two radii and by two transverse circular arcs. Over such a region the curvature of the earth is supposed to be negligible and the depth of the sea to be sensibly uniform. The radius of the outer arc is supposed to be small compared with a tidal wave-length and the normal components of current to be sensibly uniform over each side. In the paper six independent solutions of the tidal equations over the region are reported.

**Rauschelbach H.** - Die Hochseepegelbeobachtungen im südlichen Kattegat im August 1931 [*De hydrometricis observationibus in altum peractis in* Kattegat *meridionali, mense Augusto 1931*]. 7 Tab., 2 Taf. a. T., Ann. d. Hydrogr., LXII, 5, 6, 177-185 ; 233-250. Berlin (1934). **a - 1332**

Bericht über die vom 12. bis 17. August 1931 mit einem nach den Angaben des Vf. erbauten Hochseepegel ausgeführten Beobachtungen an der Ankerstation des R. F. D. « Poseidon » an 56° 21.0' N-Br. und 11° 59, l'0-Lg. I. Teil. Auswertung der Beobachtungen : A. Ausführung der Beobachtungen. B. Ablesung der Aufzeichnungen. Zusammenstellung der Beobachtungen. Innere Genauigkeit der Beobachtungen. II. Teil. Bearbeitung der Beobachtungen. A. Non-harmonisches Verfahren. B. Harmonisches Verfahren. Ermittlung der harmonischen Konstanten. Darstellung der Beobachtungen. Berechnung der harmonischen Konstanten. Auswertung der Beobachtungen von Hesselö.

**Romanovskij** - Influence du prélèvement de l'eau pour l'irrigation des fleuves du bassin de la Mer Caspienne sur le niveau de cette dernière [*De influentia detractionis aquæ ad irrigandum ex fluminibus bacini maris Caspii in libellum maris*]. 2 graph., 2 tabl., Ghidrotekhn. Stroit., 8, 14-22. Moskva (1933). **a - 1333**

Après quelques considérations de caractère général sur les fluctuations et les variations du niveau de la Mer Caspienne, l'A. étudie le bilan d'eau de cette mer en fonction de l'apport des fleuves qui viennent s'y jeter et de l'évaporation de l'eau de sa surface. Il fait ensuite le calcul de la quantité d'eau qui sera prélevée des affluents de cette mer lors de l'accomplissement des travaux projetés pour l'irrigation de la région Volgo-Caspienne ; détermine la dépendance de la superficie de la Mer Caspienne de l'abaissement de son niveau, ainsi que l'abaissement même du niveau par suite des travaux d'irrigation et illustre enfin l'effet de l'abaissement de la Mer Caspienne sur la navigation. Vu que l'abaissement de la Mer Caspienne pourra avoir des conséquences très défavorables pour la navigation et la pêche dans cette mer, ainsi que sur le climat et les conditions sanitaires de la région environnante, l'A. illustre dans la dernière partie de son article les mesures qui, selon lui, pourraient empêcher l'abaissement du niveau de la Mer Caspienne, tout en permettant de prélever la quantité d'eau nécessaire pour l'irrigation des terrains de la région Volgo-Caspienne.

**Romer** - Raz de marée et marée de tempête à la Martinique du XVII-ème siècle à nos jours [*De undis æstuosis, æstibusque procellosis in* Martinique *a sec. XVII in hodiernum*]. Union Géod. & Géoph. Int., Ann. Raz de Marée, 136-141. Paris (1932). **a - 1334**

Liste, avec notes illustratives, des plus forts raz de marée et marées de tempête connus depuis 1666 jusqu'à nos jours, qui ont provoqué des pertes sérieuses à la Martinique.

**Schokaljsky J. M.** - Niveau de l'Océan Mondial [*Livellus oceanorum*] (En russe, rés. franç.). Mém. Inst. Hydrol., X, 345-347. Léningrad (1933). **a - 1335**

Le nivellement de précision exécuté aux Etats Unis a démontré que le niveau de l'Océan Pacifique est plus haut de celui de l'Atlantique, ainsi que le livellement de précision entre Kronstadt et Vladivostok a démontré que le niveau à Kronstadt est de 1,87 m. plus haut de celui observé à Vladivostok, de 0,24 m. plus haut que celui d'Arkhangeljsk, de 0,49 plus haut que le niveau de la mer à Odessa. Il résulte de ces observations que le niveau de l'Océan Mondial est situé plus haut à l'ouest qu'à l'est, dans l'Eurasie qu'en Amérique. (Auteur).

**Springstubbe Helmut** - Die Gezeiten-Erscheinungen im St. Lorenzgolf. Beitrag zu den Untersuchungen über Gezeiten-Erscheinungen in Mittel- und Randmeeren, in Buchten und Kanälen [*De æstibus eorumque phænomenis in Sinu Sancti Laurentii. Contributio in inquisitiones de æstibus in maribus mediterraneis et externis, in canalibus et sinibus*]. 17 Tab., 4 Taf. m. 2 Kart. & 17 Abb., Arch. Deutsch. Seew., LIII, 2, 3-33. Hamburg (1934). **a - 1336**

Der Zweck der vorliegenden Untersuchung sollte nur sein zu beweisen, dass die Anwendung der hydrodynamischen Theorie sogar in Fällen möglich ist, wo die verwickelte Gestalt des Meeresbeckens auf den ersten Blick eine theoretische Bestimmung der Gezeiten aussichtslos erscheinen lässt, wenn nur die Aufteilung des Nebenmeeres in einzelne Schwingungsgebiete günstig genug erfolgt. Sein Inhalt ist folgender : I. Der bisherige Stand der Erforschung. II. Die Anwendung der hydrodynamischen Theorie auf die Gezeiten des St. Lorenzgolfes. III. Zusammenfassung der Ergebnisse.

Information provenant du Chili, Cuba, Etats-Unis d'Amérique, France, Grande-Bretagne, Grèce, Hawaii, Italie, Japon, Madagascar, Nouvelle Calédonie, Réunion.

**Deutsche Seewarte** - Gezeitentafeln für das Jahr 1934 [*Tabulæ æstuum a. 1934*]. Deutsche Seewarte. Hamburg (1933). **a - 1353**

Die vorliegende Auflage besteht aus zwei verschiedenen Teilen: im ersten sind die europäischen, im zweiten-die aussereuropäischen Häfen beschrieben. Im ersten Teilen sind Voraussagungen für 25 europäische Hafen an gegeben, unter welchen zwei zum ersten mal in Betracht gekommen sind, und zwar: Aberdeen und Southampton. Voraussagungen für 32 aussereuropäischen Häfen sind im zweiten Teile veröffentlicht worden, welcher neue Voraussagungen für die Häfen von Dar-es-Salam und Yokohama enthält.

**Hydrographic Department** - Chinese Admiralty Tide Tables for the Year 1933 [*Aestuum tabulæ a. 1933 ad Prefecturam Classis Sinensis pertinentes*]. tabl., Chinese Navy, Shanghai (1933). **a - 1354**

En dehors des prédictions pour Side Saddle, Woosung et Shihpu Road, contenues aussi dans l'édition de 1932, dans la présente édition des prédictions ont été publiées aussi pour Tsingtao.

**Hydrographic Department** - Tide Tables for the Arctic and White Sea for the Year 1934 [*Aestuum tabulæ Maris Arctici et Maris Albi a. 1934*] (In Russ.). 11 tabl., Hydrogr. Dpt., Hydro-Meteor. Sect., 7-107. Leningrad (1933). **a - 1355**

Preface. Arctic: I. Times and heigths of high and low waters in Ekaterininskaya Harbour; II. Hourly heigths of sea-level in Ekaterininskaya Harbour; III. Corrections of times of the high and low waters in Ekaterininskaya Harbour for finding the times of the same waters according to the standard time in other points of the Arctic; IV. Heigths of the sea-level in several points of the Arctic corresponding to the given level-heigths in Ekaterininskaya Harbour; V. Corrections of sea-level at a given height of the barometer; VI. Direction and speed of tidal streams for some points on Mourman coast. Examples. White Sea: the above data for the region southward Sviatoi Nos, Kanin Nos, Kem (Popov Islands).

**Hydrographic Department** - Tide Tables for the Pacific 1934 [*Aestuum tabulæ Oceani Pacifici a. 1934*] (In Russ., Engl., Ind. & titles). 11 tabl., Hydr. Dpt. Hydro-Meteor. Sect., 5-63. Leningrad (1934). **a - 1356**

Préface. De-Castries Bay: Table I. Times and heights of high and low waters in the De-Castries Bay; Table II. Hourly heights of sea-level in the De-Castries Bay. Langr Island: Table I. Times and heights of high and low waters at the Langr Island; Table II. Hourly heights of sea-level at the Langr Island. Nagaeva Bay: Table I. Times and heights of high and low waters in the Nagaeva Bay. Table II. Hourly heights of sea-level in the Nagaeva Bay.

Table A. Corrections of times of high and low waters and coefficients of the tide in standard ports for finding the times of the same waters and heights of sea level in other points of the Pacific. Table B. The times of the moon's transit over the meridian of Greenwich 1934. Table C. Lunar intervals and amplitudes for the Matuga point. Table D. Lunar intervals and amplitudes for the Cape Astronomitscheskij. Examples.

**Hydrographic Office of Leningrad** - Tide Tables [*Aestuum tabulæ*] (In Russ. with titles & rés. in Engl.). Hydrogr. Off. Leningrad (1932). **a - 1357**

Tide Tables for the Arctic and White Seas for the year 1933. The volume gives times and heights of high and low water at Ekaterininskaja Harbour and Kem, and also hourly heights of sea level in the same localities.

**Hydrographic Service** - Annual Tide Tables of Bangkok Bar for 1933 [*Aestuum tabulæ annuae scopulorum* Bangkok]. tables, Bangkok (1932). **a - 1358**

En plus des prédictions d'heure en heure la présente publication contient des renseignements sur les signaux et sur le pilotage de l'entrée de la rivière.

**Hydrographic Service** - Bangkok Bar Tide Tables [*Tabulæ æstuum*]. Bangkok (1933-34). **a - 1359**

**Hydrographic Service** - Tide Tables [*Tabulæ æstuum*]. Tokyo (1933-34). **a - 1360**

**Japanese Hydrographic Department** - On the Tides in the Oita Harbour [*De æstibus in portu* Oita] (In Jap.). Suiro Yôhô (Hydrogr. Bull.), 12, 475-477. Tokyo (1933). **a - 1361**

The tides in the Oita Harbour in the western part of the Naikai were studied on hand of observations extending for 12 months. The values of monthly mean sea-level and harmonic constants of tides are calculated. The heights of high and low waters on the days of new and full moon, monthly maximum and minimum heights are tabulated. (See: S. Ogura. Abstr. 140, Jap. Journ. Astr. & Geoph. XI, 3, 43. Tokyo, 1934).

**Japanese Hydrographic Department** - Tidal Currents in the Yokohama Harbour [*De æstus currentiis in portu* Yokohama] (In Jap.). 15 pls., Jap. Hydr. Dpt., 1-21. Tokyo (1933). **a - 1362**

Results of tidal-current observations carried out in the Yokohama Harbour by the « Sea-Casualty Prevention Committee » for one month in the summer of 1932. From these data of observations the mean state of currents was obtained and 8 current charts prepared. The currents in the harbour are very weak, not greater than 0,8 knots even at the point of the maxi-

mum velocity, the entrance to the harbour, and the velocity and direction of current considerably differ from day to day. Such variations of currents cannot be related with the local wind, weather and so on. (See : S. Ogura. Abstr. 146, Jap. Journ. Astr. & Geoph., XI, 3. Tokyo, 1934).

**Marine Minister** - New Zealand Nautical Almanac and Tide Tables [*Almanachus nauticus æstuumque tabulæ Novæ Zelandiæ*]. Wellington, New Zeland (1933). **a - 1363**
31st edition of this important work, containing information concerning ports of New Zealand and supplementary information concerning the « New Zealand Pilot », 10th Ed. 1930.

**Ministerstwo Robot Publicznych. Panstwowa Sluzba Hydrograficzna w Polsce.** - Stacja Mareograficzna na Ploskiem Wybrzezu Baltyku w Gdyni [*Statio mareographica* Gdynia *in litoribus Polonis Maris Baltici*] (En pol., rés. franç.). 9 fig., 6 tabl., Min. Rob. Publ. 5-22. Warszawa (1932). **a - 1364**
Avant-propos. Description sommaire de la station maréographique. Repères du maréographe et leur nivellement.

**Servicio Hydrografico de la Republica Argentina** - Tablas de Marea para 1933 [*Aestuum tabulæ a. 1933*]. Buenos Aires (1933). **a - 1365**
Ce manuel présente sous une forme commode les renseignements concernant les prédictions de chacun des ports principaux de l'Argentine.

**U. S. Department of Commerce. Coast & Geodetic Survey** - Current Tables. Pacific Coast. North America and Philippine Islands for the Year 1934 [*Currentiarum tabulæ. Litora oceani Pacifici. America Nordica. Insulæ Philippinæ a. 1934*]. 2 tabl., 2 diagr., U. S. Govmt. Print. Off. Coast. & Geod. Surv. Ser., n. 555, 7-119. Washington, D. C. (1933). **a - 1366**
Calendar. Preface. Table 1. Predicted currents. Table 2. Current differences and constant. Velocity of currents at any time. Duration of slack. Coastal tidal currents. Wind currents. The combination of currents. Current diagrams. Astronomical data. Publications by the Coast and Geodetic Survey relating to tides and currents.

**U. S. Department of Commerce. Coast & Geodetic Survey** - Tide Tables. Pacific Ocean and Indian Ocean for the Year 1934 [*Aestuum tabulæ. Oceanus Pacificus et Oceanus Indianus a. 1934*]. 7 tabl., U. S. Govmt. Print. Off., Coast & Geod. Surv. Ser. n. 557, 263 pp. Washington D. C. (1933). **a - 1367**
The present volume contains full daily predictions for 96 reference ports and differences and constants for about 1,700 stations on the Pacific and Indian Oceans and tributary waters. It also contains a table for obtaining the height of the tide at any time, a table of local civil time of sunrise and sunset for every fifth day of the year for different latitudes, a table for the reduction of local civil time to standard time, a table of moonrise and moonset for 13 places, and a table of Greenwich civil time of the moon's phases, apogee, perigee, greatest north, south and zero declination, and the time of the solar equinoxes and solstices.

**U. S. Department of Commerce. Coast & Geodetic Survey** - Tide Tables. Atlantic Ocean for the Year 1934 [*Aestuum tabulæ. Oceanus Atlanticus. a. 1934*]. 7 tabl., U. S. Govmt. Print. Off. Coast & Geod. Surv. Ser., n. 559, 283 pp. Washington, D. C. (1933). **a - 1368**
The present volume contains full daily predictions for 49 reference stations and differences and constants for about 2,200 stations on the Atlantic Ocean and tributary waters. 1. Predicted tides. 2. Tidal differences and constants. 3. Height of tide at any time. 4. Local civil time of sunrise and sunset. 5. Reduction of local civil time to standard time. 6. Moonrise and moonset. 7. Astronomical data.

## Undarum motus.

**Cornish Vaughan** - Ocean Waves and Kindred Geophysical Phenomena [*Undæ oceanicæ phænomenaque geophysica consentanea*]. 26 pls. xv + 164 pp. Univ. Press. Cambridge (1934). **a - 1376**

Study of all kinds of waves; those of the ocean; those of sand, of snow, of rivers, etc. This work is an attempt to find a scientific explanation of their formation and to give mathematic formulae expressing their power.

**De Haan P.** - Breakers in Smooth Water. Brisants en eau calme [*De undis in aquis placidis*] (En angl. & franç.). Bull. Hydrogr., Int., 1, 17. Monaco (1933). **a - 1377**

Extrait d'un travail publiè dans « De Zee », et « Den Helderc, novembre 1932, p. 636. Il résulte que le sillage provoqué par la proue du navire au nouveau cap se propage et, rencontrant l'ondulation de l'ancien sillage, brise sur cette dernière. Ce phénomène qui n'est pas généralement connu donnerait peut-être l'explication d'un grand nombre d'Avis aux Navigateurs qui constatent l'existence de brisants à des endroits, où l'on ne constate d'habitude rien d'extraordinaire.

**Fjeldstad Ekman Jonas** - Interne Wellen [*Undæ internæ*]. 11 Abb., 2 Tab., Geofys. Publ., X, 6, 1-35. Oslo (1933). **a - 1378**

Einleitende Bemerkungen über vorhergehende Untersuchungen. Wellen ohne Erdrotation. Interne Wellen in einem rotierenden Meere. Berechnung der internen Wellen. Numerische Integrationsmethode. Numerische Beispiele. Methoden zur Entdeckung interner Wellen. Literaturverzeichnis.

**Lettau Heinz** - Ausgewählte Probleme bei stehenden Wellen in Seen [*Problemata selecta pro undis stationariis in maribus*]. 4 Tab., Ann. d. Hydrogr., LXII, 13-20. Berlin (1934). **a - 1379**

In der vorliegenden Arbeit sind folgende Probleme berührt worden: I. Anregung von stehenden Wellen in Seen durch nichtperiodische Kräfte. II. Einwirkungsmöglichkeit von Seichesströmungen auf Ufer und Tiefenverhältnisse. III. Abänderung der Dauer der freien Eigenschwingungen bei stattfindender Tiefenbeeinflussung. IV. Turbulenzreibung in Seen.

**Majo Ester** - L'altezza delle onde del mare e la velocità del vento nel golfo di Napoli [*De undarum altitudine et venti celeritate in Sinu Neapolitano*]. Boll. della Soc. dei Nat., XLV, 295-307. Napoli (1933). **a - 1380**

Dalle osservazioni dello stato del mare, della direzione e della velocità del vento dal 1922 al 1927 si ricavano le frequenze mensili dello stato del mare in corrispondenza della velocità e della direzione del vento. Si determina l'andamento annuo del vento e la frequenza degli stati del mare. Da misure dirette di altezza delle onde, in corrispondenza dei vari stati, si determina una relazione pratica in funzione della velocità del vento.

**Montagne Robert** - Peut-on prédire la houle en Afrique sur les côtes de l'Atlantique ? [*Num tempestates propter litora Atlantica Africana prædici possunt ?*]. Union Géod. & Géoph. Int., Ann. Comm. Raz de Marée, 2, 15-23. Paris (1932). **a - 1381**

L'extrème violence des mouvements de houle inattendus et fréquents apparaissant sur les côtes du Maroc et de la Mauritanie. Nécessité de la construction de ports créés au moyen de longues et puissantes jetées pour assurer le déchargement et le chargement ininterrompus des navires. Origine de la houle liée au déplacement des grands systèmes dépressionnaires de l'Atlantique nord qui viennent aborder sur les côtes de l'Europe occidentale entre l'Ecosse et le Portugal. Organisation des observations pour les cartes isobariques de l'Atlantique et observations spéciales du phénomène de la houle. Possibilité de l'organisation à l'aide de la radio-télégraphie d'un service de renseignement et de prévision sur la houle sur les côtes de l'Atlantique.

**Nomura S.** - Secondary Undulations in the Bay of Muroran and the Gulf of Hunkawan, Hokkaido, Japan [*Undulationes secundariæ in baja* Muroran *ac Sinu* Hunkawan Hokkaido *in Japonia*] (In Jap.). Umi to Sora, 13, 120-123 (?) (1933). **a - 1382**

By examination of the record of a Kelvin tide gauge installed at the Harbour Work Office, Muroran, the author noticed the frequent occurrences of the secondary undulations in the Bay of Muroran and the Gulf of Hunkawan. In the present paper he gives the description and the calculation of the ondulation. (See : Abstract by T. Okada, Jap. Journ. Astr. & Geoph., XI, 3, abstr. 149, 46. Tokyo, 1934).

**Williams C. H.** - Notes on Sea and Swell Observation [*Mare undosum. Observationes*]. 3 figs., Mar. Obs., XI, 115, 105-108. London (1934). **a - 1383**

Paper of practical character on waves' dimensions, speed, period. General observation. Methods of measuring seas and swells. Results of experiments.

---

**Landesanstalt fuer Gewaesserkunde und Hauptnivellements** (im Auftrage des Preussischen Landwirtschaftsministerium bearbeitet in der...) - Die nordfriesischen Inseln vor und nach der Sturmflut vom 11. Oktober 1634 [*Insulæ Frisicæ consideratæ ante et post tempestatem die 11 Octobris 1634*]. 4 Karten, 95 S., E. S. Mittler & Sohn. Berlin (1934). **a - 1384**

In dem vorliegenden Buche werden aus dem grossen Werke von F. Müller « Das Wasserwesen an der schleswig-holsteinischen Nordseeküste » jene Teile zugänglich gemacht, welche mit der grossen Sturmflut vom 11. Oktober 1634 im Zusammenhang stehen. Nach allgemeinen Betrachtungen über die Methode des damals üblichen Deichbaus wird die Gestalt der Inseln Alt-Nordstrand, Amrum, Föhr und Sylt unter eingehender Benutzung zeitgenossischer Quellen eingehend dargelegt, sowie der Verlauf der grossen Sturmflut und der Zustand der Inseln nach der Flut.

---

**An.** - Sea Waves in the Laboratory [*Undæ marinæ ad experientias ducendas in laboratorio excitatæ*]. Science, LXXVIII, 2014. 9. New York (1933). **a - 1385**

Short note. Prof. Kenneth Reynolds hopes to be able to tell how to design sea-walls that will hold real storm waves in a bay, with storms created in a miniature ocean contained in a concrete tank.

## Hydrodynamica theorica.

**Asfazadour Armen** - Sur les lignes de courant autour d'une plaque en rotation, placée dans un courant fluide [*De lineis circum laminam rotantem positam in currentia quadam fluida*]. 3 fig., C. R. Acad. Sc., CIIC, 3, 245-247. Paris (1934). **a - 1386**

Les recherches de M. Riabouchinsky sur l'autorotation des girouettes ont amené l'auteur à construire effectivement les lignes de courant autour d'un plan mince, avec et sans circulation, dans un courant fluide. Etude analytique des phénomènes moyennant l'expression du potentiel complexe.

**Bjerknes V., Bjerknes J., Solberg H. & Bergeron T.** - Hydrodynamique physique : avec applications à la météorologie dynamique. (Recueil des Conférences-Rapports de documentation sur la physique. Vol. 23) [*De hydrodynamica physica, cum applicationibus ad meteorologiam dynamicam*]. Vol.

I, II & III, Les Presses Universitaires de France. Paris (1934).

(—) Voir : Bibl. Océanogr. 1933, p. 155 : a - 1983. **a - 1387**

**Blumberg O.** - Zur rationellen Organisation der methodologischen hydrometrischen Untersuchungen [*De inquisitionibus hydrometricis methodologicis earumque ratione*] (In russ., dtsch. Rés.). 1 Tab., Mém. Inst. Hydrol., XI, 10-19. Léningrad (1933). **a - 1388**

Nach der Behauptung, dass die wissenschaftliche Behandlung der hydrometrischen Fragen ein Uebereinkommen des theoretischen und praktischen Gesichtspunktes fordert, beschreibt der Vf. die Methodologischen Stationen, d. h. Laboratorien in natürlichen Verhältnissen, welche ein natürliches Objekt untersuchen. Er gibt ausserdem eine kurze Uebersicht der experimentellen Untersuchung zur Prüfung der Frage der Präzision der Wassermengebestimmungen.

**Drisko John B.** - Wave-motion in a Channel [*De motu undoso in canali*]. 4 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933. Washington, D. C. (1933). **a - 1389**

An account of the investigation on power- or increment-waves and tidal-waves made at the Massachusetts Institute of Technology and experimental work carried on in a small channel 41.5 feet long 15 inches deep, and having a mean width of 5 inches.

**Ertel H.** (A Review by K. Hidaka) - Eine neue Methode zur Berechnung der Eigenschwingungen von Wassermassen in Seen unregelmässiger Gestalt [*De nova ratione ad calculum persolvendum fluctuationum aquæ in maribus forma inæquali*]. Journ. Oceanogr., VI, 2, 289-292. Kobe (1934). **a - 1390**

**Gandgadharan G.** - Neuer Geschwindigkeitsmesser für turbulente Strömungen [*Apparatus novus ad velocitatem currentiarum turbulentarum mensurandam*]. 4 Abb., Mém. Hydrol. Inst. Tech. Hochsch., 4, München. (In russ.) Mém. Inst. Hydrol., XI, 227-229. Léningrad (1933). **a - 1391**

Beschreibung eines neuen Geschwindigkeitsmessers, welchem vom Erfinder der Nahme « Hitzdrahthydrometer » gegeben wurde.

**Hachey H. B.** - Hydrodynamics of Waters of Scotian Shelf [*De hydrodynamica aquarum plateæ Novæ Scotiæ*]. Ann. Rep. Biol. Board Canada, 1933, 20. Ottawa (1934). **a - 1392**

Results of modern hydrodynamical treatment of data obtained in the water area on the south coast of Nova Scotia in 1932.

**Judis Heinz** - Was lehren uns schnellschwimmende Hochseetiere für die Fortbewegung von Booten und Schiffen ? [*Quæ nos docent animalia marina celeriter natantia quoad motum navicularum et navium*]. 3 Abb., Naturwiss. 3, XXII, 19, 303-304. Berlin (1934). **a - 1393**

Bericht über die vom Vf. mit einem von ihm erfundenen Mechanismus sowie mit Paddelboot und einem längs verschiebbaren Seitenbordmotor ausgeführten Versuche. Es wird gezeigt, dass Paddelbetrieb eine starke Bugwelle hervorruft, während bei Flossenbetrieb fast keine Wellenbildung vorhanden ist.

**Kaufmann Walther** - Angewandte Hydromechanik [*De hydrodynamica applicata*]. vii + 293 pp., Band 2 : Ausgewählte Kapitel aus der technischen Strömungslehre. Julius Springer. Berlin (1934). **a - 1394**

**Kitagawa Kingoro** - Sur la propagation des ondes de dilatation dans la mer [*De propagatione undarum dilatationis*]. Mem. Coll. Sc., A, 15, 327-340. Kyoto (1932). **a - 1395**

L'A. établit l'équation du mouvement de l'onde sonore, cherche la solution générale de cette équation par la méthode des séries et arrive à l'étude du trajet de la propagation d'une onde sonore. Formule relative au sondage sonore.

**Leighly John** - Turbulence and the Transportation of Rock Débris by Streams [*Agitur de turbulentia ac subvectione detritorum saxeorum per flumina*]. 6 figs., 1 table, Geogr. Rev., XXIV, 3, 453-464. New York (1934). **a - 1396**

In the present statement and a recent paper published elsewhere (J. B. Leighly ; « Toward a Theory of the Morphologic Significance of Turbulence in the Flow of Water in Streams » Univ. of Calif. Publ. in Geogr., VI, 1, 1-2, 1932, Berkeley) the author makes an attempt toward the formulation of a theory of the morphologic activity of streams, with special regard to the simple action of gravity on the regolith that forms the surfaces of slopes. He considers the distribution of turbulence in stream cross sections, the relation between turbulence and turbidity and the diffusion of suspended matter as phase of transportation.

**Matuzawa T.** - Comparison of Movement of Water in a V-shaped Bay with that in a U-shaped Bay [*Comparatio motus aquarum in baja instar V cum motu aquarum in baja instar U*]. 3 figs., Jap. Journ. Astr. & Geoph., XI, 2, 67-70. Tokyo (1934). **a - 1397**

Experience has taught that in case of tunamis movement of water is more violently developed in a V-shaped bay opening direct on the Ocean than in bays of other type. The author explains the fact analytically.

**Mezheraup N. M.** - Die Variationen der Geschwindigkeit in der Nähe von Messpunkten [*De velocitatis variationibus apud puncta in quibus mensurae fiunt*] (In russ., dtsch. Rés.). 8 Abb., 5 Tab., Mém. Inst. Hydrol., XI, 19-34. Leningrad (1933). **a - 1398**

Resultate von Untersuchungen zur Ermittlung der Fehler, die infolge ungenauer Koordination des Messpunktes entstehen. Experimentelle Bestimmung der Geschwindigkeitsvariationen nach zwei Parametern (Breite und Länge des Gerinnes). Unstete Veränderlichkeit der Geschwindigkeiten in der Breite des Wasserlaufes. Ihre Rolle bei der Bestimmung von Wassermengen.

**Nomitsu Takaharu** - A Theory of the Rising Stage of Drift Current in Ocean. I. The Case of No Bottom-Current [*Theoria distributionis in altitudinem currentiæ oceanicæ raptoriæ. I. Nihil currentiæ fundi marini*]. 2 figs., Mem. Coll. Sc., A, 8, 161-175. Kyoto (1933). **a - 1399**

Fjeldstad's solution of the rising stage of drift current in a sea of finite depth is too laborious and inconvenient for practical use. The present author has been able to solve the same problem in a way that is exceedingly easy and very rich in physical meaning and also very convenient for numerical calculation, as he exemplifies with several ocean depths D/10, D/4, D/2, D, and 2D, where D means the so-called « Reibungstiefe ». According to the results, when a constant wind begins to blow over a boundless sea, the current produced may be taken to reach a steady state in time, as shown below.

| Depth of the sea . . . | D/10 | D/4 | D/2 | D | 2D |
|---|---|---|---|---|---|
| Time in pendulum hours | 1 | 6 | 18 | 48 | 120 |

In the course of his discussion, the writer obtains also the formula for the decay of the steady current when the wind suddenly stops, and shows that the subtraction of this decaying current from Ekma's steady value furnishes the developing stage of current required. (Author).

**Nomitsu Takaharu** - On the Development of the Slope Current and the Barometric Current in the Ocean. I. The Case of No Bottom-Current [*De progressibus currentiæ in clivum et currentiæ barometricæ in Oceano. I. Nihil currentiæ fundi marini*]. 2 figs., Mem. Coll. Sc., A, 8, 203-214. Kyoto (1933). **a - 1400**

The writer deals first with the development of a slope current theoretically and shows that the current will oscillate asymptotically around a steady value with a period of 12 pendulum hours and that the time required for it to become steady is substantially equal to that for the drift current.

The « barometric current » produced by a local difference in atmospheric pressure is next discussed, and it is emphasized that this may have in reality much more importance than is usually considered. (Author).

**O'Brien Morrough P.** - Review of the Theory of Turbulent Flow and Its Relation to Sediment-Transportation [*De reinspecta theoria currentiæ turbulentæ eiusque correlatione cum subvectione sedimentorum*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 487-491. Washington, D. C. (1933). **a - 1401**

The present paper is a review of the theory of turbulent flow developed by Osborn Reynolds, Prandtl, von Karman, and Taylor, and of its application to the distribution of suspended material by Schmidt and others.

**Okada M. & Miyosi K.** - Experimental Studies of the Water Movement in Coastal Regions of the Sea. I. Tidal Oscillations in Sagami Bay [*Studia ad experimentum ducta motus aquarum in regionibus litoreis marinis. I. Oscillationes æstuum in baja* Sagami]. 8 figs., 1 table, 15 pl., Journ. Imp. Fish. Inst., XXIX, 1, 15-28. Tokyo (1933). **a - 1402**

In the present paper a method of experimental studies of the periodic oscillation of water modelled after the semidiurnal tidal motion in Sagami Bay and its vicinity is described. Some qualitative results are also given.

**Quarleri Angelo** - Sulla teoria della « scia » nei liquidi perfetti. Risoluzione del problema nel caso del cilindro rotondo [*De « rima ». Quæstio de eius theoria in liquidis perfectis. Casus cylindri rotundi et solutio*]. 5 fig., Rend. Circ. Mat. di Palermo, LVII, 2, 196-209. Palermo (1933). **a - 1403**

Premessi brevi richiami della teoria, l'A. esamina l'impostazione generale del problema dovuta al Levi-Civita, per passare poi a studiare il caso particolare del cilindro, giungendo all'equazione.

$$T(\sigma) + \frac{a^2}{\pi} \int_0^{\frac{\pi}{2}} e^{T(\sigma_1)} \sin \sigma_1 (1 + \sin \sigma_1) \log \left[\frac{\sin \sigma_1 + \sin \sigma}{\sin \sigma_1 - \sin \sigma}\right]^2 d\sigma_1 = 0 \tag{1}$$

che ha la forma tipica delle equazioni integrali non lineari studiate da A. Hammerstein .Esposto poi brevemente la ricerca di questi, l'A. risolve l'equazione (1).

**Reynolds Kenneth C.** - Investigation of Wave-Action on Sea-Walls by the Use of Models [*Investigationes in undarum actionem in oras maritimas modulorum auxilio*]. 3 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Nat. Meet., Apr. 27-29, 1933, 512-516. Washington D. C. (1933). **a - 1404**

After having emphasized the damages, which battering seas, high tides, storm-driven, on-shore winds always cause along the sea-coasts and particularly at many beach communities, the author indicates the characteristics of an ideal sea-wall and illustrates the purpose of model-studies, which is to put in evidence the advantages and the disadvantages of different types of walls. He gives then the description of apparatuses used in his investigation, and an account of preliminary studies carried out in order to ascertain if the waves as generated were of correctly simulating nature. He indicates the scope of the tests and communicates their results on a vertical sea-wall.

**Rossby C. G.** - Studies of the Stress Exerted by the Wind as a Propulsive Force on the Surface of the Sea, and of the Evaporation from the Latter [*Sollicitatio, venti causa, ac vis propulsionis in superficiem marinam et evaporationem*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 34. Woods Hole, Mass. (1933). **a - 1405**

Brief summary of the calculation of the tangential stress of the wind along the ocean surface and of regular evaporation measurements carried out on board the » Albatross II » and the « Atlantis ».

**Rossby C. G.** - Investigations in Meteorology and Physical Oceanography [*Inquisitiones meteorologicae et physico-oceanographicae*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 45-46. Woods Hole, Mass. (1933). **a - 1406**

Summary of the results of a theoretical study of atmospheric and oceanic turbulence and of ten months' evaporation records from the Nantucket Lightship and from the « Atlantis ».

**Rossby C. G.** - Investigations in Meteorology and Physical Oceanography [*Inquisitiones meteorologicæ et physico-oceanographicæ*]. Woods Hole Oceanogr. Instit., Rep. 1933, 30-31. Woods Hole. Mass. (1934). **a - 1407**

Continuation of the theoretical investigation of the homogeneous surface layer of the ocean ; effect of converging and diverging flow on its thickness ; development of the baro-thermograph for accurate recording of the vertical temperature distribution whithin the surface layer (0-200 m.) ; completion of the routine evaluation and tabulation of all evaporation measurements made on board the « Atlantis ».

**Rubey W. W.** - Equilibrium-Conditions in Débris-Laden Streams [*Aequilibrium in currentiis detrita trahentibus*]. 1 fig., 1 table. Nat. Res. Counc., Trans., Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 497-505. Washington, D. C. (1933). **a - 1408**

In this paper the author gives a theory which may eventually lead to a general expression of stream-equilibrium, i. e. to express the quantitative effect of the various factors that influence the slope of graded streams, with especial reference to Gilbert's ideas that, either by cutting their beds or by building them up with sediment, streams always tend to make for themselves channels and slopes that, over a period of years, will transport exactly the load of sediment delivered into them from above. This work of streams is highly important in several fields of ecology ; they remove rock-débris from the sites of weathering and transport it to flood-plains, lakes, and oceans, where it is deposited to form new rocks. The author gives a derivation of a general equation for the equilibrium of graded streams and studies its general validity.

**Satkevitsch A. A.** - Analyse générale des mouvements tourbillonnaires [*Motus vorticosi eorumque analysis generalis*] (En russe, rés. franç.). Mém. Inst. Hydrol., IX, 1-16. Léningrad (1933). **a - 1409**

Rapport lu dans la séance du 11 janvier 1933 de la Section hydraulique et mathématique de l'Institut Hydrologique de l'U. R. S. S. Importance de l'application des coordonnées naturelles, ayant la direction de la vitesse, du tourbillon et de leur normale commune pour chaque point du courant, à l'étude des courants tourbillonnaires. Position relative des vecteurs de la vitesse et du tourbillon, comme critérium pour la classification typique des courants. Construction de la méthode d'analyse dynamique du courant : « méthode des deux vecteurs-forces A et B ».

**Satkevitsch A. A.** - Remarques méthodiques sur la théorie des mouvements discontinus de Kirchhoff [*Observationes per methodum theoriae motuum discontinuorum secundum* Kirchhoff]. 4 fig., 1 tabl., Mém. Inst. Hydrol., IX, 17-26. Léningrad (1933). **a - 1410**

Observations qui permettent d'appliquer la théorie de Kirchhoff non seulement aux lignes de contour du courant, mais aussi à ses points intérieurs. Ces observations sont illustrées moyennant leur application au problème classique du mouvement d'un liquide dans un espace de deux dimensions contre un obstacle plan, normal au courant, autour duquel ce dernier se divise en deux parties symétriques.

**Schlichting H.** - Neuere Untersuchungen über die Turbulenzentstehung. (Aus den Forschungen der Kaiser Wilhelm-Gesellschaft zur Förderung der Wissenschaften) [*Inquisitiones novæ de origine turbulentiæ*]. 5 Abb., Naturwiss., XXII, 22-24, 376-381. Berlin (1934). **a - 1411**

Unter Hinweisung auf Untersuchungen von v. Rayleigh, Prandtl, Tollmien, Tietjens u. a. behandelt der Vf. die Frage: Unter welchen Bedingungen entsteht Turbulenz? und schliesst folgendes: Es zeigt sich also auch hier wieder, dass die Methode der kleinen Schwingungen durchaus brauchbare Ergebnisse liefert, wenn man nur die physikalisch wichtigen Grössen Profilkrümmung und Zähigkeit in richtiger Weise berücksichtigt. Obwohl auf diesem Gebiete noch manche Einzelheit zu erledigen ist, so kann man heute doch schon sagen, dass in Prinzip die Instabilität der Laminarströmung gegen kleine Störungen und damit die Entstehung der Turbulenz aufgeklärt ist.

**Sverdrup H. U.** - Dynamic of Tides on North Siberian Shelf (Results from the « Maud » Expedition) [*Aestuum dynamica in platea Siberiæ nordicæ. (Resultatus ex navigatione navis* « Maud »)] (In Jap.). Journ. Oceanogr., VI, 1, 143-170. Kobe (Japan) (1934). **a - 1412**

A review by T. Kubo of the paper published in Geofys. Publ., IV, 1924.

**Vogel Herbert D.** - Movable Bed-models [*Moduli mobiles alveorum fluminum et portuum*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 509-512. Washington, D. C. (1933). **a - 1413**

Hydraulic models for the solution of problems relating to the improvement of rivers and harbours may be grouped into two general classes distinguished from each other by the character of the bed employed. The purpose of this article is to present a brief but comprehensive outline of the methods of design and utilization of movable bed-models, and to describe their particular fields of usefulness.

**Woskressenskij S. W.** - Das Wesen und die weiteren Entwicklungslinien der Hydrometrie [*De Hydrometria eiusque progressibus*]. (In russ., dtsch. Rés.). Mém. Inst. Hydrol., XI, 5-9. Léningrad (1933). **a - 1414**

In der neuen Anschauung ist die Hydrometrie als quantitativer Teil der Hydrologie betrachtet, der sich mit der momentanen und dauernden, zeitlichen und räumlichen Koordination der Wasserelemente, der Bestimmung ihrer Kasualität, den Aggregat-Uebergängen, den Messungsmethoden und dem Aufstellen entsprechender Charakteristika des Wassers bei verschiedenen dynamischen Vorgängen, deren analyse und Synthese befasst. Die hydrometrischen Arbeiten in der U. d. S. S. R. verfolgen in erster Linie volkswirtschaftliche Zwecke. Die weitere Entwicklung der Hydrometrie beruht auf einem komplexen Erforschen aller Wasserobjekte, auf Massenbeobachtungen und experimentellen Arbeiten spezieller methodologischer Prüfungsanstalten und Laboratorien und auf theoretischen Untersuchungen.

**Woskressensky S. V.** - Ueber die Tätigkeit des Hydrometrischen Büros [*De Officio Hydrometrico eiusque activitate*] (In russ. dtsch. Rés.). 1 Tab., Mém. Inst. Hydrol., XI, 188, 196. Léningrad (1933). **a - 1415**

Fortschritte der Arbeiten des Büros im Gebiete der theoretischen und experimentellen Hydrologie. Richtlinien der nächsten Entwicklung seiner Arbeit.

---

**Z. V. D. I.** - Nouveaux résultats des recherches sur la turbulence [*Resultatus ex novis inquisitionibus de turbulentia*]. Ann. Trav., Publ. de Belgique, XXXV, 2ª sér., 1, 135-140. Paris (1934). **a - 1416**

Extrait d'un travail de L. Prandtl dans Neuere Ergebnisse der Turbulenzforschung. Résultats obtenus pour les conduites et appliqués au calcul des résistances exercées sur des plaques. Propriétés des écoulements dans des canaux convergents, divergents et courbes, des phénomènes de mélange de jets liquides avec leur entourage et des mouvements qui se produisent derrière les corps mobiles. L'auteur communique des relations nouvellement découvertes entre les échanges de vitesse turbulents et les échanges de chaleur.

# GEOPHYSICA.

## Meteorologia.

**Abercromby Ralph** - Weather: the Nature of Weather Changes from Day to Day. New Edition revised and largely rewritten by A. H. R. Goldie [*Natura variationum atmosphæricarum in dies*]. num. ills., 8 pls., xii + 284 pp., Kegan Paul & Co. Ltd. London (1934). **a - 1417**

Enlarged edition fully illustrated. Many examples of weather described with help of charts and diagrams. Last theories on cyclones given and discussed.

**Abetti Giorgio** - Le ricerche sulle relazioni fra fenomeni solari e terrestri [*Inquisitiones de correlationibus inter phænomena solaria et terrestria*]. Ricerca Scient., I, 1, 3-12. Roma (1933). **a - 1418**

Si espone lo stato presente delle ricerche sulle relazioni fra fenomeni solari e terrestri per le quali è stata nominata nel 1924 una Commissione Internazionale dal Consiglio Internazionale delle Unioni Scientifiche. Premessi quali siano i fenomeni terrestri che dipendono dal Sole, si dimostra che il modo di propagazione dell'influenza solare deve accadere per mezzo di fasci di corpuscoli emanati da fuochi ben determinati nelle regioni solari perturbate. Le osservazioni fatte in diverse stazioni sparse in tutto il globo sono raccolte in un bollettino internazionale pubblicato a Zurigo sotto gli auspici dell'Unione Astronomica internazionale. Tre rapporti sono stati editi dalla Commissione dal 1924 a tutt'oggi i quali trattano delle più importanti ricerche e risultati ottenuti nella fisica solare, nel magnetismo terrestre, nelle comunicazioni radio-telegrafiche e nella meteorologia terrestre, sempre in relazione alla dipendenza dei fenomeni terrestri da quelli solari.

**Alfani Guido** - Venticinque anni di valori pentadici. Parte I: Barometro e Termometro [*De valoribus pentadicis vigintiquinque annos calculatis. Pars Ia : Barometrum et Thermometrum*] (Pubblicazioni dell'Osservatorio Ximeniano dei Padri Scolopi, Firenze, N. 144), 5 grafici, 73 pp. (testo litografato). Firenze (1932). **a - 1419**

Ciascuna pagina contiene tutte le medie d'una sola pentade ottenute durante 25 anni d'osservazione. Nel basso di ciascuna pagina sono riportate le medie parziali e generali. L'ultima linea rappresenta il valore medio di 5 anni d'osservazione.

**Aliverti G.** - Sul metodo dell'effluvio per misure di radioattività atmosferica [*De utenda methodu effluvii ad radioactivitatem atmosphœricam mensurandam*]. 5 ills., Atti R. Acc. delle Sc. di Torino, LXVII, disp. 14a, 15a, 376-385. Torino (1931-1932). **a - 1420**

Viene assoggettato ad uno studio più approfondito il metodo dell'effluvio, ideato lo scorso anno dall'A. per misure della radioattività atmosferica. Si dimostra quali siano le condizioni di maggiore efficienza dell'apparecchio e vengono esposti i risultati di diverse esperienze che confermano i vantaggi pratici del metodo e la completa attendibilità delle determinazioni che si possono effettuare con tale dispositivo.

**Amerio Alessandro** - Un registratore della radiazione solare [*Index radiationum solarium*]. 1 ills., 1 tav. f. t., Rend. R. Istit. Lombardo Sc. e Lett., LXV, 11/15, 596-600. Milano (1932). **a - 1421**

Descrizione dell'apparecchio, e breve cenno sugli accorgimenti adottati affinchè le misure fornite da detto apparecchio siano le più precise.

**Ångström A.** - Bericth über Ausstrahlungsmessungen [*Relatio de mensuris radiationis atmosphœricœ*]. Secr. Organ. Meteorol. Int., 15, 1-12. Utrecht (1933). **a - 1422**

Empfehlung des Kompensationspyrgeometers bei Ausstrahlungsmessungen unter der Voraussetzung, dass gewisse Vorsichtsmassregeln beobachtet werden. Einwendung dagegen und Verteidigung.

**Ångström A.** - Ueber die Trübung der Atmosphäre [*Obscuratio atmosphœrœ*]. Secr. Organ. Meteorol. Int., 15, Anl. 9, 1-2. Utrecht (1933). **a - 1423**

Unter Hinweisung auf zwei vorhergehende Arbeiten (On atmospheric transmission of sun radiation. Geogr. Ann. I, II, 2, 2-3, 1929, 1930) weist der Vf. hier auf den Potsdamer Standardfilter hin, um die aktinometrischen Messungen möglichst gut ausnützen zu können. Er betont aber, dass die aktinometrischen Messungen nur eine synoptische Vorstellung von der Trübung und dem Wassergehalt geben und dass man für exaktere Werte in Bezug auf die Strahlenschwächung sich anderer sehr verfeinerten Methoden bedienen müsse.

**Antonov V. P.** - Klimat i kurorty injnogo berega Kryma [*De climate et variationibus climaticis litoris meridionalis in Crimea*] (Rés. angl. et tatare). 31 fig., 88 pp., Mus. Geogr. locale. Ialta (1932). **a - 1424**

**Armellini G. & Andrissi G.** - La radiazione del Sole nel 1931 e nel 1932 [*De Solis radiatione a. 1931 et a. 1932*] Atti R. Acc. Naz. Lincei - Rend. Cl. Sc. Fis., Mat. e Nat., XVII, 8, 605-610. Roma (1933). **a - 1425**

In continuazione di un precedente lavoro, gli AA. espongono le misure sopra la radiazione del Sole, da loro eseguite al Campidoglio nel biennio 1931-32. Le misure vengono poi ridotte alla distanza media del Sole dalla Terra, ed in una tabella sono esposti i valori medi mensili dedotti dalle osservazioni degli ultimi quattro anni, sia per la radiazione solare integrale, sia per la radiazione filtrata, con filtri di luce di vario colore. Dalla tabella, con alcuni calcoli, viene poi dedotto il valore, *medio annuo*, sull'assorbimento che l'atmosfera esercita sopra la radiazione solare ed il risultato è assai vicino a quello da loro trovato, altra volta, con osservazioni fotometriche di stelle.

**Ballard J. C.** - Report on Sounding-balloon Work Carried Out in the United States During the Polar Year [*Relatio de observationibus peractis äerosphœricorum auxilio in Americœ Provincis Foederatis perdurante anno polari*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 104-105. Washington D. C. (1934). **a - 1426**

Short preliminary study of the United States Polar Year aerological data computed and tabulated as prescribed by the International Commission for the Exploration of the Upper Air, with especial reference to a number of features which heretofore have been untouched. Account of a number of interesting results found.

La station météorologique de Mygg-Bukta; sa position et fonction. Données météorologiques basées sur les observations de la station pendant 1922-1932.

**Bjerknes J.** - Exploration de quelques perturbations atmosphériques à l'aide de sondages rapprochés dans le temps [*De perturbationibus atmosphœricis exploratis*]. nombr. fig., cartes & tabl., Geofys. Publ., IX, 9, 3-52. Oslo (1932). **a - 1434**

Le 26, 27 et 28 Décembre 1928 l'Institut Royal Météorologique à Uccle a lancé 31 ballons-sondes munis de météorographes Jaumotte. 25 ont été retrouvés, et dans le présent ouvrage l'A. donne l'étude de la structure des perturbations à l'aide de coupes verticales de leurs surfaces isothermes et de leurs surfaces isentropes. Dans le Chap. I on trouve l'analyse du front froid du 26 Décembre et dans le Chap. II celle du cyclone du 28 Décembre. Le Chap. III donne une analyse des perturbations au niveau de la tropopause. Enfin le Chap. IV discute les variations de pression dues aux perturbations inférieures et supérieures. Pour que d'autres puissent faire une étude sur la série des sondages considérés, l'A a publié, en appendice, les données brutes du dépouillement.

**Blake Dean** - Remarkable Low Humidity Aloft over San Diego, California [*De anormali bassa humiditate in stratibus aëris super* San Diego *in California*]. 3 tabl., Monthly Weath. Rev., 61, 6, 170. Washington (1933). **a - 1435**

Results of several remarkable aerographical observations of abnormally low relative humidities made during the month of June, 1932 at the Naval Air Station, North Island, Calif. The accompanying table shows the temperature, relative humidity, wind direction and wind velocity for each 1,000-foot level for the four days, June 13, 15, 21 and 22.

**Boljahn Günther** - Weiterentwicklung des Wigandschen Sichtmessverfahrens im besonderen auf See [*De methodu ad mensurandam visibilitatem* τοῦ Wigand *præcipue in mari. Quæstio de progressione methodus*]. 4 Tabellentaf., 4 Figurentaf., Ann. d. Hydrogr., LXII, II, 429-444. Berlin (1934). **a - 1436**

In der vorliegenden Arbeit wird eingangs das Problem der Sicht und der Sichtbestimmung allgemein behandelt. Ferner wird die Theorie der Sicht- und Sichtweitenbestimmung mit den Sichtmessern von Wigand wiedergegeben; gleichfalls werden die in den einzelnen Zweigen der Praxis, wie Luftfahrt, Seefahrt und Meteorologie, gebräuchlichen Definitionen der Sichtweite besprochen. Der zweite Abschnitt bringt die Prüfung des $\sigma$- Wertes durch Messungen, die in Seeluft gemacht wurden. Im letzen Abschnitt wurde die Messung der Sicht mit dem Sichtmesser so vorgenommen, dass als Ziel der Kontrast zwischen Horizonthimmel und Wasseroberfläche an der Kimm benutzt wurde; dabei änderte sich an dem Aufbau der Sichtformel nichts, und die aus der Augenhöhe bekannte Kimmentfernung und der gemessene a-Wert gingen wie üblich in die Formel ein. Zur Vereinfachung der Sichtmessungen mit den Sichtmessern von Wigand und zur Vermeidung von Rechnungen in der Praxis wird noch eine Fluchtlinientafel beigefügt.

**Bowman Isajah, Compton Karl T., Reed Charles D. & Millikan Robert A.** - The Work of the Weather Bureau [*De operibus peractis ab Officio pro condicionibus meteorologicis*]. Science, LXXVIII, 2035, 604-607. New York (1933). **a - 1437**

**Brooks Charles F.** - A Meteorological Cross Section: The Köppen Birthday Volumes [*Agitur de Sectione quadam meteorologica transversali. Volumina edita die natali* τοῦ Köppen *recurrenti*]. Geogr. Rev., XXIII, 3, 472-478. New York (1933). **a - 1438**

Summary of some of the papers published in the three Köppen volumes and a supplementary number of «Gerlands Beiträge zur Geophysik» dealing with world weather, cyclones and frontal phenomena, great dust storms, equivalent temperatures and other phases of climate, climatic changes, the Wegener-Köppen theory of climatic change, the classification of climates, the meteorological equator, the snow cover and precipitation in the Alps, regional climatology, ocean currents, soils.

**Brooks Charles F.** - The Value of Cloud-Observations [*De nubium observationibus earumque significatione*] (Abstract). Nat. Res. Counc. Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 84-85. Washington, D. C. (1933). **a - 1439**

The author emphasizes the value of cloud-observations in the interpretation of atmospheric processes and for weather-forecasting. He illustrates the program of the International Cloud Year, which is supplementary to that of the Second International Polar Year.

**Brooks C. E. P. & Durst C. S.** - The Winds of Berbera. Discussion of Observations made Under the Supervision of R. S. Taylor, M. B., Ch. B., Principal Medical Officer [*De ventis in* Berberia. *Discussio observationum peractarum,* Taylor *inspectore*]. 8 figs., 5 tabl., Meteorol. Off., Prof. Notes, 65, 2-13. H. M. Stat. Off. London (1934). **a - 1440**

Note of the results of observations made by means of anemograph pilot-balloons: Seasonal variation of upper winds at Berbera. The variation of wind with height at Berbera. The diurnal variation of wind at Berbera. Seasonal variation of temperature (°F) over and on the shores of the Gulf of Aden.

**Brückmann W.** - Zum Problem der atmosphärischen Bewegungen [*De motibus atmosphæricis*]. Meteorol. Ztschr., L, 12, 448-450. Braunschweig (1933). **a - 1441**

Vortrag gehalten auf der 18. Versammlung der Deutschen Meteorologischen Gesellschaft im Oktober 1933. Statt der bisherigen Auffassung der atmosphärischen Bewegungen als Ausgleichsbewegungen der infolge verschiedener Temperaturen entstandenen Druckunterschiede sucht der Redner hier die Möglichkeit eine mechanische Erklärung zu geben. Er betont den Einfluss der verschieden gestalteten Oberflächen der Ozeane und Kontinente auf die gleitenden und haftenden Luftmassen und vergleicht diese Strömungen mit den Gleitvorgängen im Meere. Eine ausführlichere Behandlung dieses Problemes wird folgen.

**Bullig Hans-Jürgen** - Eine typische Grosswetterlage und ihre prognostische Verwertbarkeit. Föhnreichtum in den Alpen als Index einer typischen Grosswetterlage [*De tempestate quadam typica eiusque œstimatione per prognosim. Copia* τοῦ foehn *in Alpibus ac index tempestatis typicœ*]. 17 Tab., 5 Taf., Aus d. Arch. d. Dtsch. Seewarte, 52, 6, 5-36. Hamburg (1934). **a - 1442**

In der vorliegenden Arbeit ist es untersucht worden, ob ein Zusammenhang zwischen der wechselnden Föhnhäufigkeit und der Grosswetterlage besteht, und in welcher Weise sich diese gegebenfalls in der Folgezeit entwickelt. Die Arbeit enthält die folgenden Abschnitte: 1: Methodisches und Statistisches. II: Föhnreichtum in den Alpen als Index eines eindeutigen Grosswetterlagentyps: *a*) Luftdruck- und Windanomalien über Europa und dem Nordatlantischen Ozean in den einzelnen Monaten; *b*) Temperaturanomalien in den einzelnen Monaten; III. Die prognostische Verwertung der für Föhnreichtum typischen Grosswetterlage.

**Bureau R.** - Sur la variation rapide des atmosphériques au lever du soleil [*De rapida variatione atmosphœricorum sole oriente*]. C. R. Acad. Sc., CXCVI, 19, 1426-1428. Paris (1933). **a - 1443**

**Chang-Wang Tu** - China Rainfall and World Weather [*De pluvia in regione Sinensi deque condicionibus atmosphœricis mundialibus*]. Mem. R. Meteorol. Soc., IV, 38, 99-117. London (1934). **a - 1444**

**Chmyznikov P. K.** - Einige Angaben über das Winterregime der Meerengen des Archipels der Neusibirischen Inseln und des Jana-Meerbusens [*De hieme eiusque regimine in maribus ad archipelagus Novae Scotiœ pertinentibus et in baja* Jana] (Russ. Text, dtsch. Rés.) 1 Karte, 1 Fig., Expl. des mers d'U. S. S. R., 15, 33-62. Léningrad (1932). **a - 1445**

Homothermie und Homohalinität im Winterregime der Laptev-Meerenge und der Eterikan. In der Sannikov-Meerenge nur in den oberen Schichten, tiefer als 15-20 m. bei gleicher Temperatur, ein Salzgehalt von 31,3 ‰, statt 21 ‰. Eisdicke bis 227 cm. Einfluss des Janaflusses.

**Clarke Catharine B.** - Reduction of Meteorological Data from the Cruise VII of the « Carnegie » [*Reductio datorum meteorologicorum VII$^{ae}$ expeditionis navis* « Carnegie »]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 79-80. Washington, D. C. (1933). **a - 1446**

Account of the correction for the usual instrumental and observational errors of the data on the hourly values of sea-surface temperature, air-temperature, relative humidity, vapor-pressure, and atmospheric pressure obtained from the recording instruments on board the « Carnegie ». Scheme of reduction of the obtained data. Results of the harmonic analysis of the diurnal variations of the meteorological elements.

**Compton A. H.** - Progress of World-Survey of Cosmic Rays [*De progressibus in radiis cosmicis studendis*]. 5 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 154-158. Washington, D. C. (1933). **a - 1447**

A brief account of the coordinate study of the cosmic rays as organized in the United States, and on the sending of several expeditions into different parts of the world. On the various figures are reported: the intensity of cosmic rays at various altitudes as observed in different parts of the world, the diagram of the apparatus used in this survey, a group of curves representing the variation of the intensity of the cosmic rays with altitude at sea-level and the same data plotted against geomagnetic latitude.

**Counts R. C. Jr.** - Storms over the Northeast Pacific Ocean and Adjacent Land Areas in December 1933 [*De tempestatibus in Oceano Pacifico nordoccidentali regionibusque terrestribus adiacentibus mense Decembri 1933*]. Monthly Weath. Rev., LXII, 2, 58-59. Washington, D. C. (1934). **a - 1448**

Brief outline of the storm movements and anomalous distributions of the various air masses over the northeast Pacific and the adjacent portion of the continent causing an excess of precipitation and abnormally high mean temperatures in the far Western States, except California, during December 1933.

**Dauvillier A.** - Observation des Aurores Polaires au Scoresby Sund pendant l'Année Polaire [*De observatis auroris polaribus in* Scoresby Sound *perdurante anno polari*]. C. R. Acad. Sc., CIIIC, 18, 997-1000. Paris (1933). **a - 1449**

L'observation des Aurores a été assurée d'une façon permanente, à Scoresby Sund, depuis la mi-septembre jusqu'à la mi-avril. La statistique montre que l'aurore a été quasi permanente durant l'année aurorale. Photographie. Spectrographie.

**De Gasperi Luis** - La radiazione solare in rapporto alla previsione del tempo [*Radiatio solaris pro tempore providendo*]. 1 fig., Meteor. Prat., 2, 79-84. Perugia (1933). **a - 1450**

I rilevamenti pireliometrici eseguiti a Perugia dal 24 gennaio 1932 al 25 gennaio 1933 hanno portato a constatazioni molto interessanti per la previsione locale del tempo. La radiazione solare è generalmente in relazione inversa con la umidità relativa presso il suolo, ma questa proporzione può variare quando l'umidità atmosferica non è regolarmente distribuita lungo la verticale. Come conseguenza si possono avere i seguenti casi: radiazione intensa e umidità relativa elevata (indice di tempo stabile e buono), radiazione debole e umidità relativa bassa (tempo tendente alla pioggia). Un sintomo di tempo cattivo si ha pure quando la radiazione a mezzogiorno permane eguale o inferiore a quella delle nove, e ciò indipendentemente dalla situazione igroscopica o barometrica del momento.

**Doucette Bernard F.** - Typhoon and Depressions in the Far East July 1934 [*Agitur de quodam typhone depressionibusque in regionibus orientis extremi mense Julio 1934*]. Monthly Weath. Rev., LXII, 7, 259. Washington, D. C. (1934). **a - 1451**

Description of 1 typhoon and 4 depressions which had influenced the weather conditions in the Far East during the month of July 1934. Information of the same kind is given in all the numbers of this review.

**Dunn G. E.** - Tropical Storms of 1933 [*De tempestatibus tropicalibus a. 1933*]. 1 pl., 2 tabl., Monthly Weath. Rev. LXI, 12, 362-363. Washington, D. C. (1933). **a - 1452**

Report on the 21 tropical disturbances of the year 1933 in the Caribbean Sea, the Gulf of Mexico, and the southern portion of the Atlantic. Plate showing the paths of hurricanes and other tropical storms, 1933. Tables containing statements on monthly frequency of West Indian hurricanes and other tropical storms of the North Atlantic Ocean in 1933, and a synopsis of tropical storms of 1933.

**Eredia F.** - Le piogge sulla Regione italiana nel 1921-1930 [*Pluviœ in regione italica ab a. 1921 ad a. 1930*]. Atti Soc. It. Progr. Scienze. Ventesima Riun. Milano, 12-18 sett. 1931. Vol. II: Resoc. Adun. Sez., 136-137. Roma (1932). **a - 1458**

Riassunto della comunicazione riguardante la sistemazione della rete pluviometrica in Italia.

**Eredia F.** - La rosa dei venti [*Rosa ventorum*]. L'Aerotecnica, XIV, Roma (1934). **a - 1454**

L'A. ricorda gli studi fatti per la rappresentazione dei regimi dei venti durante l'anno. Proposta di Sir N. Shaw di una nuova disposizione per rappresentare direzione e frequenza dei venti.

**Eredia Filippo** - La climatologia dell'alta atmosfera [*De climatologia altæ atmosphæræ*]. Boll. Comit. Naz. It. per la Geod. e Geof., 4, 61-66. Pisa (1932). **a - 1455**

Si riassumono alcuni lavori recenti sulle registrazioni ottenute nei sondaggi eseguiti in una serie di annate. Si illustrano le registrazioni nei sondaggi eseguiti a mezzo di aeroplano a Montecelio e che nell'insieme formano una serie quasi unica di dati perchè le esplorazioni furono eseguite con continuità in tre diversi periodi del giorno.

**Evjen Sigurd** - Zur langfristigen Wettervorhersage [*De atmosphæra providenda maximis temporis spatiis*]. 7 Abb., Geofys. Publ., X, 3, 3-14. Oslo (1933). **a - 1456**

Diese in Tromsø ausgeführten Untersuchungen, die sich zum grossen Teil auf die von Krogness berechneten Temperaturkurven gründen, beziehen sich auf Wettervorhersagen für 8 bis 14 Tage. Es werden hier drei Hauptregeln mit Erläuterungen und schematischen Darstellungen mitgeteilt, deren Treffsicherheit bei der Anwendung grösseren Materials noch zuverlässiger werden könnten. Zum Schluss wird der Zusammenhang der barometrischen Unruhe mit der Wetterlage besprochen.

**Evjen Sigurd** - Zur Kenntnis der barometrischen Unruhe mit Bemerkungen über den täglichen Barometergang [*Agitur de cognoscenda instabilitate barometrica cum notis de barometrico diurno decursu*]. 1 Abb., Meteorol. Ztschr., L, 10, 374-378. Braunschweig (1933). **a - 1457**

A. Täglicher Gang der barometrischen Unruhe: Die Angaben beziehen sich auf die Messung während eines Tages in Oslo. B. Die Jahreswerte der barometrischen Unruhe: *a*) die der gesamten Unruhe, *b*) die der Unruhe für Differenzen; *c*) durchschmittliche Unruhe pro Tagesabschnitt (je 6 Stunden) *e*) Anzahl der Tagesabschnitte für Differenzen. C. Bemerkungen über den täglichen Barometergang: Erörterung über Untersuchungen von Lamont, Ekholm, Leyst, Hann, Hellmann Travnicek u. a.

**Fassig Oliver L.** - The Trade-Winds of the Eastern Caribbean [*Etesiæ in regione orientali Maris Caraibici*]. 11 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 69-78. Washington, D. C. (1933).

(—) S.: Trans. Amer. Geogr. Union, June, 68-78. Washington (1933). **a - 1458**

Summary of the results of pilot-balloons observations made at a station at San Juan, Puerto Rico, established in July 1920 by the United States Weather Bureau. The records of the observations furnish a material of the greatest importance for a detailed study of the trade-winds, and for the selection of the most efficient air routes.

**Fergusson S. P.** - Aerological Studies on Mount Washington [*De aërologia in monte* Washington]. 2 figs., 1 tabl., Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 114-117. Washington, D. C. (1934). **a - 1459**

Brief report on the extension of a study of the influence of mountains upon meteorological phenomena conducted during the summer seasons of 1905, 1906 and 1907, of which the opportunity has been afforded by the establishment of the Mount Washington Observatory in 1932 by Joseph B. Dodge of the Apalachiam Mountain Club as a contribution to the International Polar Year Program of 1932-1933. The data are simultaneous records of the principal meteorological elements on the summit and in the free atmosphere at the same height.

**Field J. H., Warden M. A. & R.** - A Survey of the Air Currents in the Bay of Gibraltar 1929-30 [*De relevamento currentiarum aëriarum Sinus Gaditani 1929-30*]. 30 pls. on tabl., Meteorol. Off., Geophys. Mem. 59, VII, 2, 3-30. H. M. Stationery Off. London (1933). **a - 1460**

1. Introdution: Sect. 1. Object. Sect. 2. The investigation. II. Model Work: 3. Apparatus used. 4. First method- flags. 5. Second method streamers. 6. Relative advantages of flags and streamers. 7. Results of work with the model. III. The work at Gibraltar: 8. Observations by pilot-balloons. 9. Comparison of « actuals » with the model results. 10. Areas of strong up and down wind components. 11. Strengths of vertical components of winds. 12. A further method of examination of eddies. IV. Summary. Appendix: Description of a kite instrument for recording wind features in eddies.

**Findeisen Walter** - Ueber Beobachtungen von Luftspiegelungen auf dem Neuwerker Watt [*De mirabilibus imaginibus observatis in* Neuwerker Watt.]. Ann. d. Hydrogr., LXII, 10, 423-426. Berlin (1934). **a - 1461**

Bericht über Beobachtungen von Luftspiegelungen auf dem in der Umgebung von Neuwerk (eine Insel an der Elbemündung) gelegenen Watt, auf dem günstige Vorbedingungen für die Ausbildung von derselben gegeben sind.

**Foitzik Leonhard** - Messungen der spektralen Lichtdurchlässigkeit von Naturnebeln mit einem neuen Sichtmesser [*Mensuræ transparentiæ spectralis nebularum naturalium novi apparatus metatorii auxilio*]. 4 Abb., Naturwiss., XXII, 22/24, 384-386. Berlin (1934). **a - 1462**

Beschreibung eines vom Vf. gemeinsam mit der Firma Zeiss nach einer Idee von Prof. Koschmieder entwickelten Apparates zur Messung des Schwächungskoeffizienten von Naturnebeln. Grösse des Schwächungskoeffizienten bei verschiedenen Messungen innerhalb eines Bereiches von 0.3-4 km. Sichtweite. Abweichungen. Möglichkeit sicherer Aussage und quantitativer Angaben.

**Freiesleben H. C.** - Luftspiegelung nach oben [*Mirabiles imagines aëriæ in altum*]. Ann. d. Hydrogr., LXII, 10, 426. Berlin (1934). **a - 1463**

Bericht über eine deutlich auf Helgoland am 1. VI. 1934 beobachtete Spiegelung der Kimm.

**Fuller Veryl R.** - Auroral Station at the Alaska Agricultural College and School of Mines [*Statio pro observationibus auroræ borealis in Collegio agrario et schola mineralogica alaskiana*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 177. Washington, D. C. (1934). **a - 1464**

Brief account of the investigation of the aurora continued during 1933-34 and the continuous measurements of the height of the ionosphere by the reflection-method maintained at Fairbanks after the close of the International Polar Year program at the end of August 1933.

**Gamba Pericle** - La previsione generale del tempo [*De provisione generali condicionum atmosphæricarum*]. (III Concorso Magistrale marittimo peschereccio). 3 fig., Soc. Tip. A. Manuzio. Ist. Poligr. dello stato - Libreria. Roma (1933). **a - 1465**

**Gamba Pericle** - Sulla unificazione dei segni meteorologici internazionali [*De unificandis signis meteorologicis internationalibus*]. Ric. Scient. (Boll.

Com. Naz. It. per la Geol. e Geof.), II, 7/8, 56-60. Roma (1933). **a - 1466**

Dopo aver esposto quanto è stato fatto fin qui per rappresentare con simboli i vari fenomeni meteorologici, si fa presente la necessità di uniformare da parte dei dirigenti i Servizi meteorologici di tutto il mondo attenendosi ad un codice internazionale unico ed uguale per tutti.

**Gherzi F.** - Zi-Ka-Wei Observatory. Typhoons in 1931. (Some Data about Typhoon Centres) [*Observatorium in* Zi-Ka-Wei. *Typhones a. 1931*]. 1 pl., 4 maps, 38 pp., Tou-Se-Wé Orphan. China (1933). **a - 1467**

**Gorczynski L.** - Actinomètres à lecture directe et enregistreurs [*De apparatibus actinometricis lectione directa prœditis. Agitur etiam de apparatibus registratoribus*]. ill., 32 pp., Ass. Typogr., Nice (1933). **a - 1470**

**Gray Richard W.** - Florida Hurricanes [*De tempestatibus in* Florida]. 1 graph., 3 tabl., Monthly Weath. Rev., 61, 1, 11-13. Washington, D. C. (1933). **a - 1471**

Summary of observations carried on during the 45-year period ending with 1930 of the damaging winds in the coastal regions of Florida. Tables indicating the frequency of tropical cyclones by year, id. by months and the chances of winds of hurricane force in any given year.

**Gregg Willis Ray** - Progress in Development of the United States Weather Service in Line with the Recommendations of the Science Advisory Board [*De progressibus munerum meteorologicorum Provinciarum Foederatarum Americæ ex præceptis officii pro consultationibus scientificis*]. Nat. Res. Counc., Trans. Amer. Geoph., Union, 15th Ann. Meet., Part I, 6-7. Washington (1934). **a - 1472**

Brief information as to the foundation of the Science Advisory Board which acts under the jurisdiction of the National Research Council and which has been created by President Roosevelt on July 31, 1933. Summary of the report submitted by the « Special Committee on the Weather Bureau » appointed by the Board containing a number of recommendations, the two most important being (1) an extension of the air-mass analysis method of forecasting, and (2) consolidation of weather- and communication-service under the Weather Bureau.

**Grimm Hans** - Nebelhäufigkeit an den deutschen strahlungsklimatischen Stationen [*Caliginis frequentia in stationibus elioterapicis Germanicis*]. 1 Tab., Ann. d. Hydrogr., LXI, 1/2, 36-38. Berlin (1933). **a - 1473**

Zusammenfassende Wiedergabe der von Lossnitzer, Galbas, Linke, Hellmann u. a. über die Häufigkeit der Nebeltage im Laufe des Jahres im Bezirke der strahlungsklimatischen Stationen im deutschen Nordseegebiet unternommenen Untersuchungen. In einer Tabelle (aus einer Arbeit von Hellmann entnommen) sind die mittleren Zahlen der Nebeltage im Jah (Periode 1891/1920) für 19 Stationen mitgeteilt.

**Grimm Hans** - Das aschgraue Mondlicht im Jahre 1932 [*De luce lunari coloris cinerei a. 1932*]. 1 Tab., Ann. d. Hydrogr., LXI, 7, 217-218. Berlin (1933). **a - 1474**

Fortsetzung des Berichts in « Ann. d. Hydrogr. », Juli 1932, S. 297-299. In einer Tabelle sind in Plassmannschen Helligkeitsgraden die Ergebnisse von 56 Schätzungen der Helligkeit des aschgrauen Mondlichtes (a. M.) wiedergegeben, welche im Text mit den von S. Skreb erhaltenen Resultaten verglichen worden sind.

**Grover N. C.** - Relation of Meteorology to Hydrology [*Correlatio inter meteorologiam et hydrologiam*]. Nat. Res. Counc., 14th Ann. Meet. Trans. Amer. Geoph. Union, Apr. 27-29, 1933, 25-27. Washington, D. C. (1933). **a - 1475**

The author emphasizes the interrelation of interest of the sections of Hydrology and Meteorology, whose fields added to that of oceanography cover the never-ending cycle of motion of water.

**Hand Irving F.** - Solar Radiation Measurements during January, 1933 [*De mensuris irradiationum solis mense Januario 1933*]. num. tabl., Monthly Weath. Rev., 61, 1, 18-20; 2, 47-49; 3, 86-87; 4, 116-177; 5, 143-145; 6, 174-176. Washington, D. C. (1933). **a - 1476**

Tables showing solar radiation intensities in January, 1933, average daily totals of solar radiation (direct-diffuse) received on a horizontal surface, solar radiation measurements, and determinations of atmospheric factor, β, at Washington, D. C., positions and areas of sun spots and provisional sun spot relative numbers.

**Harang L.** - Eine Untersuchung der Polarisation des Nordlichtes [*Agitur de quadam inquisitione in polarisationem auroræ borealis*]. Ztschr. Geophys., IX, 3, 265-266. Braunschweig (1933). **a - 1477**

**Harang Leiv** - Filteraufnahmen von Polarlicht [*De aurora boreali eiusque photographiis per philtrum*]. 14 Abb., 4 Taf., Geofys. Publ. Norske Vidensk., Akad. X, 8, 5-27. Oslo (1933). **a - 1478**

Einleitung. 1. Filteraufnahmen in grün und blauviolett; 2. Filteraufnahmen in rot und grün; 3. Filteraufnahmen in ultrarot und ultraviolett; 4. Untersuchung der Polarisation des Nordlichtes.

**Harrison Louis P.** - Tables (in Millibars) of the Pressure of Saturates Aqueous Vapor Over Water at Temperatures From 0° to - 50° C [*Pressio vaporis aquarum saturi super aquam. Tabulæ temperaturæ a 0° ad - 50° C.*]. 2 tabl., Monthly Weath. Rev., LXII, 7, 247-248. Washington, D. C. (1934). **a - 1479**

Tables often required in aerological work, particularly in connection with the interpretation of hair-hygrograph readings.

**Harrison Louis P.** - The Purpose of the Compilation of Aerological Data Being Made Under the Civil Works Administration Program of the Weather Bureau [*De propositis in elaborandis datis aërologicis ex ratione operum publicorum peractis per officium meteorologicum*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 101-102. Washington, D. C. (1934). **a - 1480**

Brief account of the work involving the compilation of aerological data set into operation at 24 stations scattered over the United States. The work, extending over a period of time ranging from two to four and one-half months, falls naturally into the three following general categories which are discussed

in the present note: I. Compilation of Polar-Year data; II. Graphical representation and tabulation of data showing diurnal variation of various meteorological elements in the free air; and III. Statistical compilation of various meteorological data for the aid of aerial navigation and for studies of the general circulation of the atmosphere.

**Haurwitz B.** - The recent Theory of Gião Concerning the Formation of Precipitation in Relation to the Polar-Front Theory [*De ultima theoria secundum* Gião *circa formationem præcipitationum pro theoria frontis polaris*]. Nat. Res. Counc. Trans., Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 89-91. Washington, D. C. (1933). **a - 1481**

The author gives a short account of Giao's theory which is contrary to the theory of the Norwegian school of meteorologists concerned with the causes of precipitation and indicates the reason why it fails. On hand of the discussion of the hydrometeors he claims that the Norwegian theory is very much to be preferred to the theory presented by Giao.

**Herrmann M.** - Föhnlücke in einer geschlossenen Hochnebeldecke am Südkap der Bäreninsel am 3. August 1933 [*De observato phænomeno in vento nomine* Föhn *in insula Ursorum*]. 4 Abb., Meteorol. Ztschr., L, 12, 472-473. Braunschweig (1933). **a - 1482**

Vortrag gehalten auf der 18. Versammlung der Deutschen Meteorologischen Gesellschaft in Oktober 1933. Die hier kurz beschriebene Erscheinung, beobachtet vom Redner und Dr Rieth auf ihrer Rückreise von der Polarfahrt der Deutschen Seewarte, ist besonders deshalb anschaulich, weil die Wolkendecke, aus der kein Niederschlag gefallen war, zwischen dem Küstenrand und dem Meeresniveau genauen Raum hatte sich auflösen zu können.

**Hesselberg Th.** - Våre arktiske vaerstasjoner [*Nostræ stationes meteorologicæ in regionibus arcticis*]. 1 carte, 1 tabl., Norsk. Geogr. Tidsskr., IV, 7, 3, 455-464. Oslo (1933). **a - 1483**

Bref aperçu du développement des stations météorologiques à partir de l'année 1854 où l'initiative en fut prise. L'organisation des trois stations centrales norvégiennes: Oslo, Bergen et Tromsø et les lieux d'observations en communication avec elles (indiqués sur une carte). L'importance et le développement des stations arctiques dont les résultats sont données dans un tableau.

**Hoerlin H.** - Latitude Effect of Cosmic Radiation [*Latitudinis effectus in radiationes cosmicus*]. 1 fig., Nature, CXXXII, 3323, 61. London (1933). **a - 1484**

On observations of cosmic rays made at several heights up to 6.100 m. and during the sea-voyage by the expedition organized by the « Deutscher and Oesterreichischer Alpenverein » in 1932. A diagram is given. There exists a latitude effect of 12 per cent.

**Hubert Henry** - Sur la distribution des filets d'air dans les cyclones tropicaux [*De filis aëriis eorumque distributione per cyclones tropicales*]. 1 fig., C. R. Acad. Sc., CIIC, 15, 1358-1361. Paris (1934). **a - 1485**

Sur un procédé de l'auteur appliqué à plusieurs cyclones de la Martinique, de Madagascar et de l'Indochine. Résultats des mesures.

**Humphreys W. J.** - On the Occasions, or Incidental Causes, of Extratropical Cyclones [*De causis cyclonum extratropicalium per occasionem seu per incidentem*]. 12 charts, Monthly Weath. Rev., 61, 4, 112. Washington, D. C. (1933). **a - 1486**

On hand of twelve examples illustrated on 12 charts the author gives some hints which may be helpful to students of the puzzle, the extratropical cyclone.

**Humphreys W. J.** - United States Weather Bureau [*Officium Meteorologicum ad Americæ Provincias Foederatas pertinens*]. Rep. Comm. Submar. Config. & Ocean. Circul., Nat. Res. Counc., 1932, 22-26. Washington, D. C. (1933). **a - 1487**

Account of sea-surface temperature investigations performed in the United States as a basis for special research into possible causative influences upon continental weather conditions. Report of the routine work of the Bureau. Charting of data for the Gulf of Mexico, the Caribbean Sea, and the western North Atlantic Ocean.

**Hunter Herbert C.** - North Atlantic Ocean [*Oceanus Atlanticus Nordicus*]. 1 tabl., Monthly Weath. Rev., LXII, 1, 28. Washington, D. C. (1934). **a - 1488**

Atmospheric pressure, cyclones, gales, and fog in January, 1934. Table of averages pressure departures, and extremes of atmospheric pressure at selected stations for the North Atlantic Ocean and its shores, January 1934.

**Hunter H. C.** - Weather of the Atlantic and Pacific Oceans. North Atlantic Ocean [*De atmosphæræ condicionibus Oceani Atlantici et Oceani Pacifici. Atlanticus Nordicus*]. 1 tabl., Monthly Weath. Rev., LXII, 7, 257. Washington, D. C. (1934). **a - 1489**

Atmospheric pressure, cyclones and gales, fog, and averages, departures, and extremes of atmospheric pressure (sea level) at selected stations for the North Atlantic Ocean and its shores, July 1934. Information of the same kind is given in all the numbers of this review.

**Hurd Willis E.** - The Weather of the Atlantic and Pacific Oceans: North Pacific Ocean [*De atmosphaericis condicionibus Oceani Atlantici et Oceani Pacifici. Oceanus Pacificus Nordicus*]. tabl. Monthly Weath. Rev., LXI, 1, 25-26; 2, 53; 3, 91; 4, 120-121; 5, 148-149; 6, 179-180. Washington, D. C. (1933). **a - 1490**

Data on atmospheric pressure, cyclones and gales, monsoons and northers, and fog occurred on the North Pacific Ocean.

**Hurd Willis E.** - North Pacific Ocean, July 1934 [*Oceanus Pacificus Nordicus. Mense Julio 1934*]. 2 tabl., Monthly Weath. Rev., LXII, 7, 258-259. Washington, D. C. (1934). **a - 1491**

Atmospheric pressure, cyclones and gales, fog, averages, departures, and extremes of atmospheric pressure at sea level at selected stations, July, 1934. Information of the same kind is given in all the numbers of this review.

**Jameson H.** - Report on the Colombo Observatory with Maps and Statistics for 1933 [*Relatio redacta ab observatorio in* Colombo *cum chartis et tabulis statisticis a. 1933*]. 18 tabl., 6 maps, 2 pls., Ceylon Govmt. Press., 1-31, y 1 - y 18. Colombo (1934). **a - 1492**

Administration. Time. Meteorological. Publications. Seismograph. Weather summary. Rainfall tables. Tables of Statistics as published in the Ceylon Blue Book. Maps and diagrams.

**Jatho Alfredo** - La correlación de la presión atmosférica y de las precipitaciones con las manchas solares [*Correlatio inter pressionem atmosphæricam, præcipitationes et maculas solis*] (Rés. franç.). An. Soc. Cient. Argentina, XCI, IV, V, 210-233; 295-304. Buenos Aires (1931). **a - 1493**

Etude préliminaire d'un travail qui sera bientôt publié, présentée à la première réunion nationale géographique. Après

avoir brèvement traité des oeuvres précédentes sur ce sujet et analysé à l'aide des formules des ondes solaires et la corrélation solaire-barométrique ainsi que la corrélation solaire-pluviométrique, l'A. examine comme exemples typiques des pluies ascensionnelles les précipitations de la côte nord du continent sud-américain ainsi que celles des Indes, puis les pluies migratoires, dues aux grands courants atmosphériques, et en exposant à la fin différence entre la pression atmosphérique de S.te Hélène et celle de Rio de Janeiro il conclut que dans les cas les plus simples la pression atmosphérique et surtout les precipitations sont en rapport avec le numéro des taches solaires.

**Jensen Chr.** - Strahlungsmessungen auf Amrum im August und September 1929 [*De mensura irradiationum in* Amrum *mensibus Augusto et Septembri 1929*]. 6 Tab., 2 Taf. a T., Ann. d. Hydrogr., LXI, 7, 202-210. Berlin (1933). **a - 1494**

Zusammenfassende Wiedergabe der Ergebnisse der von dem Vf. im Nordseegebiet (Geklino) in Nebel auf Amrum zwischen dem Sanatorium und dem Wattenmeer durchgeführten Strahlungsmessungen, und zwar Bestimmungen der Strahlungsintensität der Sonne, der Polarisationsgrösse im Zenit, solche der sogenannten Neutrallinien, der Höhe der neutralen Punkte von Babinet und von Arago und der Höhe des unter dem A-Punkt liegenden sekundären neutralen Punktes. Ausser den Ergebnissen werden auch die Vermessungsmethoden mitgeteilt.

**Kaminsky A. A. & Wanejewa** - Die Verfrachtung des Wasserdampfes im Sommer auf den europäischen Teil der U. S. S. R. [*De vapore aquarum, æstivo tempore, in territorio ad regionem europæam U. R. S. S. pertinente*]. 50 Kart., 3 Tab., Mém. Inst. Hydrol., 5-116. Léningrad (1933). **a - 1495**

Vorwort. Einleitung. Ueber die Verwendung der absoluten Feuchtigkeit beim Studium der Verfrachtung des Wasserdampfes. Die Verfrachtung des Wasserdampfes vom Barents. Weissen und Karischen Meere ins Innere des europäischen Teiles der U.S.S.R. Die Verfrachtung des Wasserdampfes über die Ostsee nach dem Inneren des europäischen Teiles der U.S.S.R. Die Verfrachtung des Wasserdampfes vom Mittelländischen, Schwarzen und Asowschen Meere in das Innere des europäischen Teiles der U.S.S.R. Der Anteil des Kaspischen Meeres an der Versorgung des europäischen Teiles der U.S.S.R. mit Wasserdampf. Die Zunahme der absoluten Feuchtigkeit in der unteren Schicht der von Meeren verfrachteten Luftmassen als Folge der Verdunstung. Gewitter. Trockene Steppenwinde. Wasserdampftransport und Klimaschwankungen. Schlussbemerkung.

**Kanter H.** - Klimatologische Witterungsschilderung. Nr. 8: Argentinien [*Temporis descriptio climatologica. N. 8: Argentina*]. Ann. d. Hydrogr., LXI, 7, 214-217. Berlin (1933). **a - 1496**

*a*) Winterwetter an der südlichen Chacogrenze. Gebiet des unteren Rio Dulce (30° S, 63° W). Luftdruckverteilung nach der Wetterkarte der Dirección de Meteorologia in Buenos Aires vom 25. Juni bis 16. Juli 1930; *b*) Sommerwetter im Gebiet Campo Gallo. General Pinedo, Chaco (27° S, 62° W). Luftdruckverhältnisse nach der Wetterkarte usw. vom 20. März bis 2. April 1931.

**Keil K.** - Der Zustand der freien Atmosphäre über Hamburg während des Polarjahres 1932-33 [*De atmosphæræ liberæ Hamburgi condicionibus, perdurante anno polari 1932-33*]. 3 Abb., 10 Tab., 1 Tafeltab., Ann. d. Hydrogr., LXII, 10, 406-411. Berlin (1934). **a - 1497**

Bericht über den Zustand der freien Atmosphäre über Hamburg an Hand der Temperatur- und Höhenwindmessungen aus der Zeit des 2. Internationalen Polarjahres: (Monatsmittel der Temperatur in den verschiedenen Höhen über Hamburg; absolute Extreme der Temperatur in den einzelnen Monaten und Höhenstufen; Monat mit der höchsten Temperatur; Differenz der absoluten Temperatur für die einzelnen Monate und verschiedenen Höhenstufen; Differenz der höchsten und niedrigsten beobachteten Temperaturen. Die Höhenwindverhältnisse: Mittlere Windgeschwindigkeit; Grösste und kleinste mittlere Windgeschwindigkeit und die verschiedenen Höhenstufen; Mittlere Luftversetzung; die verschiedenen Windrichtungen für bestimmte Windgeschwindigkeitsstufen).

**Kincer J. B.** - Climatological Work Accomplished Through Cooperation with the United States Civil Works Administration [*Opus climatologicum, consociata opera peractum, per Administrationem operum publicorum in Americæ Provinciis Foederatis*]. Nat. Res. Counc. Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 99-101. Washington, D. C. (1934). **a - 1498**

Brief account of the cooperation between U. S. Weather Bureau and the U. S. Civil Work Administration which has been of great value to the climatological service of the Bureau, enabling it to make a great number of much-needed compilations of data that otherwise would have been impossible.

**Kirstein Günther** - Klimatographische Witterungsschilderung. N. 10: Angola [*Temporis descriptio climatographica. N. 10.* Angola]. Ann. d. Hydrogr., LXI, 8/9, 265. Berlin (1933). **a - 1499**

Witterungsverlauf an normalen Tagen in verschiedenen Jahreszeiten in Gandu, etwa 13° 30' S, 12° 30' 0, Seehöhe ungefähr 1650 m, in Benguela Hochland. (s. auch: « Ann. d. Hydrogr. », 1932, S. 169: « Witterungsverlauf an einem Tage der Regenzeit »).

**Koeppen W.** - Die Temperatur der oberen Luftschichten über Lappland [*De temperatura in summis stratibus atmosphæricis in Lapponia*]. 1 Diagr.. 1 Tab., Ann. d. Hydrogr., LXI, 11/12, 392-393. Berlin (1933). **a - 1500**

Ergebnisse der Erforschung der höheren Luftschichten durch Registrierballone von der aerologischen Station am naturwissenschaftlichen Observatorium für wissenschaftliche Forschung in Abisko, an Hand der Arbeit von Bruno Rolf (Mitt. Met.-Hydr. Anst. Stockholm, V, 1932. B. Rolf: « Lancers de ballons-sondes d'Abisko de 1921 à 1929 »).

**Koeppen W.** - Klima der Halbinsel Santa Elena (Ekuador) und neues Auftreten des Niño-Stromes [*De climate pæninsulæ Sanctæ Helenæ (in Equatore) deque currentia* Niño *nomine*]. 3 Tab., Ann. d. Hydrogr., LXII, 7, 277-278. Berlin (1934). **a - 1501**

An Hand der von G. Sheppard ausgeführten Beobachtungen wird die wechselnde Ausbildung der wiederkehrenden Regenzeit in dem Gebiete von der Halbinsel Santa Elena an der südamerikanischen Westküste besprochen, und die abnorme Ergiebigkeit der Regenzeit von 1932 durch das neue Auftreten des Niño-Stromes erklärt.

**Köhler Hilding** - Meteorologische Turbulenzuntersuchungen [*Inquisitiones in turbulentiam meteorologicam*]. 3 Abb., Kungl. Sv. Vetensk. Akad. Handl. 3e ser., XIII, 1, 1-53. Stockholm (1933). **a - 1502**

Der Vf. leitet direkt aus den Arbeiten Reynolds' und H. A. Lorentz' eine Differentialgleichung ab, wie sie zu meteorologischen Zwecken anzuwenden ist. Ableitung der Differentialgleichung. Auflösung der Gleichung. Grössenanordnung der Konstanten. Trennung der reellen und imaginären Teile. Untersuchung des virtuellen Reibungskoeffizienten. Verhältnisse in in der Bodennähe. Winkel zwischen dem Gradienten und der Windrichtung. Die Richtung der Reibungskraft. Der Wert $\mu$ als Turbulenzcharakteristik. Erklärungsversuch. Vorbereitende Untersuchung in etwas grösserer Höhe. Ueber die Austauschgleichung. Auflösung der Austauschgleichung. Verschiedene Annahmen über $\varphi(t)$ und $f(\zeta)$. Literatur.

**Koschmieder H.** - Dynamische Meteorologie [*De meteorologia dynamica*]. 137 Abb., 1 Taf., XII + 376 S., Physik der Atmosphäre, II. Leipzig (1933). **a - 1503**

I. Buch, Statik: Zustandsgrössen und Gasgleichungen, trockene und feuchte Luft, quasistatische Bewegungen; II. Buch, Kinematik: allgemeine Eigenschaften des Stromfeldes,

kinematischer Aufbau hydrodynamischer Stromfelder ; III. Buch, Dynamik : Massenpunkt auf rotierender Erde, Gradientwind ; Margulessche Grenzflächenneigung, elementare Bewegungen mit Reibung : Ekman-Spirale ; Austausch. Lineare Schwingungen. Energiegleichungen. Zirkulationssätze.

**Koschmieder H., Weickmann L., Bartels J., Benndorf H., Schmidt W. u. a.** - Physik der Atmosphäre, Sammlung lehrbuchartiger Monographien aus dem Gebiete der Meteorologie hrsg. von H. Koschmieder [*Physica atmosphæræ*]. Akad. Verlagsg. m. b. H., Leipzig (1933-34). **a - 1504**

Bis jetzt sind die folgenden Bände erschienen ; I. Wetterkunde ; II. Dynamische Meteorologie ; III. Meteorologische und geophysikalische Rechenverfahren ; IV. Luftelektrizität ; V. Landwirtschaftliche Meteorologie.

**Kreilsheimer A. C.** - Hunting the Aurora Borealis [*De aurora boreali*]. Discovery Repts., XIV, 166, 306-307. London (1933). **a - 1505**

**Kuhlbrodt E.** - Die tägliche Periode von Stärke und Richtung des Passats auf hoher See [*Agitur de periodo diurno roboris et directionis venti monsonis in mare altum*]. Meteorol. Ztschr., L, 12, 447-448. Braunschweig (1933). **a - 1506**

Vortrag gehalten auf der 18. Versammlung der Deutschen Meteorologischen Gesellschaft im Oktober 1933. Ausgehend von seinem im Heft X. der Ann. d. Hydr. 1933, veröffentlichten Aufsatz bespricht der Vf. auf Grund der von mehreren Expeditionen gemachten Beobachtungen die Stärke des Nordostpassats und die des Südostpassats, die tägliche Periode der Richtung beider Passate und die tägliche Periode des Windes in Beziehung zu derjenigen des Luftdruckes.

**Leighly John B.** - Marquesan Meteorology [*De meteorologia in insulis* Marquesan]. 5 figs., Univ. Calif. Publ. Geogr., VI, 4, 147-172. Berkeley, Calif. (1933). **a - 1507**

Notes on the meteorological observations made in the Marquesas Islands by the Pacific Entomological Survey during the years 1929-1932 : Introduction. Local contrasts within the island group. The daily cycle. The annual cycle. Variations of duration longer than the year. The dynamics of the variations of longer period. The problem of seasonal forecasting of rain.

**Leighly John B.** - Graphic Studies in Climatology. III. A Graphic Interpolation Device for Dating the Extremes of the Annual Temperature Cycle [*Studia graphica climatologica. III. Apparatus graphicus ad cyclum annuum temperaturæ significandum*]. 4 figs., Univ. Calif. Publ. Geogr., VI, 5, 173-190. Berkeley, Calif. (1934). **a - 1508**

The graphic and numerical devices reported in this paper have grown out of an attempt to express more accurately than has in the past been possible the delay of the summer maximum of temperature along the Pacific coast of North America. The results of the regional investigation are reserved for a later communication. It is the extreme parts of the annual curves that are subjected to scrutiny here.

**Lettau Heinz** - Atmosphärische Zirkulation auf der nördlichen Halbkugel im Lichte der Turbulenzvorstellungen [*De circulatione atmosphærica in hemisphærio septentrionali ex hypothesi turbulentiarum*]. 1 Tab., Ann. d. Hydrogr., LXII, 6, 252-256. Berlin (1934). **a - 1509**

Diese Arbeit ist als ein Ausbau der Veröffentlichung Exners « Karten der atmosphärischen Zirkulation auf der nördlichen Halbkugel » (Wien 1929) anzusehen, wobei der Vf. auf die Anwendung der Turbulenzvorstellungen sowie auf die Notwendigkeit einer Umstellung der dem atmosphärischen Vertikalaustausch zugrunde liegenden Zeiteinteilung hinweist. Es wird eine erläuternde Uebersicht der erwähnten Karten gegeben mit Ergänzung einer Karte, welche die mittlere Veränderlichkeit der Strömung, ihre Grossturbulenz, angibt.

**Lettau Heinz & Schwerdtfeger Werner** - Vertikalaustausch in unmittelbarer Berechnung [*Methodus celerrima ad permutationem verticalem atmosphæricam calculandam*]. 1 Taf., zahlr. Formeln, Meteorol. Ztschr., L, 2, 47-51. Braunschweig (1933). **a - 1510**

Erörterung verschiedener Berechnungsmethoden mit besonderer Hinsicht auf die von Defant, welche obgleich für den horizontalen Austausch gebraucht, auch auf den vertikalen bezogen werden kann. Die nötige Verarbeitung derartiger Beobachtungen laut der Theorie von Hesselberg sowie die Messungen von P. Ludwig über die Vertikalbewegung werden hier wiedergegeben.

**Lori F.** - La radiometeorologia [*De radiometeorologia*]. Scientia, X, 229-239. Bologna (1933). **a - 1511**

È un articolo di divulgazione sui fondamenti scientifici, sperimentali e di osservazione, di questo capitolo della meteorologia, che va acquistando autonomia scientifica. L'A. riassume la storia delle trasmissioni con onde elettromagnetiche : il contributo dei fisici, dei matematici e dei tecnici. Egli si sofferma sulla propagazione delle perturbazioni elettromagnetiche in mezzi che, come l'atmosfera terrestre, contengono elettroni e ioni. Accenna alle questioni, che riguardano la costituzione dell'atmosfera nei vari strati fino ai più esterni : ai metodi sperimentali e teorici, che possono essere utilizzati per progredire in questa conoscenza e per risolvere i problemi di propagazione delle onde : all'aiuto che fisica e industria possono scambiarsi per il progresso delle conoscenze in questo campo, all'importanza degli studi relativi tanto al lato pratico che a quello teorico di questo progresso.

**Maino E.** - Il vento del Sud Africa [*De vento sudafricano*]. Ceschina. Milano (1934). **a - 1512**

**Majo Ester** - Un ventennio di osservazioni eliofanometriche in relazione con la nebulosità di Napoli [*De observationibus eliophanometricis viginti annos Neapoli peractis pro nebulis*]. Boll. della Soc. dei Nat., XLV, 225-250. Napoli (1933). **a - 1513**

Si prendono in esame i totali diurni delle ore di sole dal 1912 al 1931 dedotti dalle registrazioni dell'eliofanometro dell'Istituto di Fisica terrestre della R. Università e si calcolano i totali decadici, mensili, stagionali ed annuali rispettivamente per il 1° e 2° decennio e per l'intero ventennio, rilevandone in figura i risultati. Si passa quindi al calcolo dell'eliofania giornaliera e relativa, si rilevano i massimi e minimi mensili e annuali dell'eliofania assoluta. Si calcolano i valori successivi decennali, per mesi e anni dell'eliofania assoluta e dell'eliofania relativa. Le medie successive, così determinate, mostrano rispettivamente differenze di poche ore e pochi centesimi. In corrispondenza l'A. dà i valori successivi decennali della nebulosità (media delle osservazioni delle ore 9 e 15) e i massimi e i minimi rilevati. Coi valori della eliofania e della nebulosità si trova il coefficiente di correlazione, ottenendo il valore

$$r = -0{,}29,$$

corrispondente ad una debole correlazione negativa. L'A. si serve della formula di Courdevache e trova che i valori calcolati in base a tale formula risultano tutti in difetto rispetto a quelli effettivamente rilevati. Si avvale per ciò dei valori medi della nebulosità dedotti dalle osservazioni delle ore 9, 15 e 21 e introduce tali valori nella formula di Angot, pervenendo a valori dell'eliofania in soddisfacente accordo con quelli effettivamente rilevati.

**Mariolopulos Elia** - Μετεωρολογικαὶ παρκτηρήσεις θεσσαλονίκης [*Meteorologicæ observationes in Tessalonica*]. 27 tab., carta, 4 tav., 46 pp., Università. Salonico (1933). **a - 1514**

Beobachtungen *a*) vom Feuerschiff « Elbe 1 » am 9-IX-1930 ; *b*) der Marinesignalstelle Marienleuchte an der Nordostecke der

Insel Fehmarn am 16-IX-1931; *c*) auf der Strecke Helgoland-St. Peter-Amrumbank am 4-VIII-1932 und *d*) über der Strecke Wesermünde-Cuxhaven. Die behandelten Fälle von Wasserhosenbeobachtungen sind ganz verschiedener Wetterlage zugeordnet.

**Markus Eduard** - Der Nordatlantik als Vertiefungsgebiet barometrischer Minima [*Agitur de Atlantico Nordico ac zona valorum infimorum barometricorum*]. 5 Abb., 2 Tab., Ann. d. Hydrogr., LXII, 6, 225-233. Berlin (1934). **a - 1516**

Nach einigen einleitenden Bemerkungen über die bei der Untersuchung der Vertiefung der Zyklonen benutzten Methoden werden hier an Hand Kartogramme und Tabellen mehrere Beispiele der im Jahre 1932 beobachteten zusammenfliessenden Minima mit Angabe der Orte und der Monate, in denen die Minima ihre grösste Tiefe, d. h. unter 740 m. - 720 m., erreicht haben, angeführt. Das Westeuropäische Meer, und zwar das nordwestliche Grenzgebiet mit dem Polarfront, als ein wichtiges Vertiefungsgebiet der barometrischen Minima. Die Ursachen der Vertiefung. Literatur.

**Marteret M. J.** - Mesure des températures [*Mensuræ temperaturæ*]. 23 figs., Sc. Industrie, XVI, 218/221/223, 97-98, 230-236, 329-331. Paris (1933). **a - 1517**

Point de vue pratique. Résumé des nombreux travaux qui se sont succédés et des publications essentielles qui ont paru sur le sujet dans ces derniers temps.

**Marvin Ch. F.** - Recent Advances in Anemometry [*De anemometria eiusque recentioribus progressibus*]. 5 figs., 1 pl., 1 tabl., Monthly Weath. Rev., LXII, 4, 115-120. Washington, D. C. (1934). **a - 1518**

The objects in this paper are: (1) to advocate certain simple and exact methods of testing rotation anemometers; (2) to plead for the publication of original observations by others who test anemometers; and (3) to present in general terms the systematic characteristics of the performance of cup anemometers, illustrated by results from recent test.

**McDonald W. F.** - The Weather of the Atlantic and Pacific Oceans: North Atlantic Ocean [*De atmosphæræ condicionibus Oceani Atlantici et Oceani Pacifici. De Atlantico Nordico*]. num. tabl., Monthly Weath. Rev., 61, 1, 23-25; 2, 51-52; 3, 89-90; 4, 119-120; 5, 147-148; 6, 178-179. Washington, D. C. (1933). **a - 1519**

Data on atmospheric pressure, cyclone, gales, and fog which occurred on the Atlantic. In tables are given the averages departures and extremes of atmospheric pressure (sea level) at selected stations for the North Atlantic and its shores, as well as data on ocean gales and storms.

**McDonald W. F.** - Reorganization of Ocean Weather-Records for New Applications [*Ephemerides observationum meteorologicarum. Quæstio de reorganisatione pro novis applicationibus*]. Nat. Res. Counc. Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 97-99. Washington, D. C. (1934). **a - 1520**

Brief account of the work performed by the U. S. Weather Bureau in order to make generally available the tremendous files of accumulated observations of many decades in the Weather Bureau archives. The Marine Division of the Bureau has been enabled to go far towards the reorganization of a total of about five millions of ocean weather-observations so that now the material for any specific area can be reached for study and use.

**Melicchia Andrea** - La meteorologia e la previsione del tempo nelle principali organizzioni europee [*De meteorologia deque præcipuis stationibus europæis pro atmosphæræ condicionibus providendis*]. 2 vol. dattilogr., molte fig., 471 pp. Venezia (1934). **a - 1521**

Relazione su due viaggi di istruzione in Germania, Austria, Polonia, Inghilterra, Belgio, Francia, Svizzera.

**Mennella Cristoforo** - Note e vedute sul divenire cosmico [*Quæstio de cosmologia*]. 3 fig., Universo, 4, 267-278. Firenze (1933). **a - 1522**

Premesse alcune vedute personali, l'A. accenna a Herschell, il fondatore dell'astronomia siderale moderna a Miss Leawitt, a Hertzsprung e si sofferma sui più importanti problemi, tra cui quello fondamentale dell'origine dell'irradiazione stellare.

**Michel W.** - Sur quelques indices aérosynoptiques de la variation des zones bariques [*De variationibus in zonis baricis deque indicibus aëriosynopticis*] (En russe, rés. angl.). tabl. et diagr., Recueil Géophys., V, 3. Léningrad (1932). **a - 1523**

Elaboration des données de montées de ballons-pilotes en Russie et Europe Occidentale dans le but d'étudier les mouvements des couches moyennes de la troposphère et des zones de pression élevées qui pourraient jeter quelque lumière sur les origines et la disparition des cyclones et des anti-cyclones encore très peu connues, vu que les études de ces phénomènes ont porté jusqu'à présent presque exclusivement sur leur parcours effectif.

**Michler H.** - Eigenartige Nebelbildung bei der Insel Hogland [*De anormali quadam formatione nebulosa in insula* Hogland]. Ann. d. Hydrogr., LXII, 9, 392. Berlin (1934). **a - 1524**

Notiz über die am 21. Mai 1934 bei der finnischen Insel Hogland beobachtete Nebelbildung, deren Konturen scharf vom blauen Himmel abgesetzt waren und genau der Form der tatsächlichen Landbildung entsprachen.

**Mitchell C. L.** - Tropical Disturbance of July 21-25, 1934 [*Agitur de tropicali perturbatione a die 21 ad diem 25 mensis Julii 1934*]. Monthly Weath. Rev., LXII, 7, 251. Washington, D. C. (1934). **a - 1525**

Description of a disturbance which was unprecedented, so far as is known, by the fact that it was of extra-tropical origin, but moved south-westward into the Gulf of Mexico and assumed all the characteristics of a disturbance of tropical origin.

**Mitchell C. L.** - Complete Weather-maps of the Northern Hemisphere in Relation to Studies of Movements of Major Air-Masses [*Chartæ meteorologicæ completæ hemisphærium nordicum repræsentantes relate ad motus massarum aëris præcipuarum studendos*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 10-11. Washington, D. C. (1934). **a - 1526**

On hand of data contained in daily weather-maps published by the Deutsche Seewarte and since January 1, 1933, by the Soviet Government, an account is given of the work performed by the U. S. Weather Bureau in order to predict the outbreak of polar air masses, or the more or less stagnant condition of such air-masses, and to make forecasts for a week ahead for Washington D. C. These forecasts verified sufficiently well to indicate the great importance of quite complete Northern Hemisphere weather-maps in identifying and tracing the movements of major air-masses.

**Moeller Fritz** - Ueber Differenzmethoden bei Höhenwinden [*De methodibus differentialibus in ventis altis studendis*]. 1 Taf., 1 Abb., 2 Tab., Ann. d. Hydrogr., LXII, 7, 279-285. Berlin (1934). **a - 1527**

Genauere Betrachtung des Schlusses, zu welchem F. Wagner (s.: « Ann. d. Hydrogr. », LX, 272, 1932) in seiner Untersuchung über die Mittelwertbildung bei Höhenwindbeobachtungen mit der Anwendung der Differenzenmethode auf Vektoren kommt, und zwar, dass für den Wind als Vektor diese Methode unbrauchbar ist. Kritische Betrachtungen zu dem Einwand von H. U. Sverdrup, welcher derselben Meinung wie F. Wagner in Bezug auf die Anwendbarkeit der oben erwähnten Methode ist. Anwendung der skalaren und Differenzenmethode in der Beschreibung der Winde.

**Moeller Fritz** - Die vier Grundrechnungsarten und die Differenzenmethode und eine Anwendung auf die Beständigkeit von Höhenwinden [*De calculis circa stabilitatem ventorum in stratibus superioribus*]. 3 Tab., Ann. d. Hydrogr., LXII, 8, 341-345. Berlin (1934). **a - 1528**

Kritische Beleuchtung der Differenzenmethoden in ihrer Anwendung bei verschiedenen statistischen Untersuchungen mit aerologischem Beobachtungsmaterial.

**Moltschanov P.** - The Study of the Polar Atmosphere as a Result of the Polar Year [*De studenda atmosphæra polari ex operibus peractis perdurante anno polari*] (In Russ., Engl. Summ.). Bull. Arct. Inst., 12, 428-429, 457-458. Léningrad (1933). **a - 1529**

Account of the so-called « Soviet method of atmosphere study », worked out and used for the first time during the Second International Polar Year and based upon radio-sounding of the air. The observations have been performed on five points, i. e.: Franz-Joseph Land, Matotschkin Schar, Dickson Island, Polanoje and Uellen. Brief account of the soundings.

**Monahan R. S. & Pagliuca S.** - The Mount Washington Observatory [*Observatorium in monte* Washington]. Nat. Res. Counc. Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 85-88. Washington, D. C. (1933). **a - 1530**

Foundation of the Observatory for the study of meteorological conditions and associated phenomena on Mount Washington. Personnel, quarters preparations, communication. Regular observations, special observations; auroral observations and atmospheric electricity; radio experiments.

**Mueller Hans** - Ein Schieber zur Berechnung der äquipotentiellen Temperatur [*Agitur de quadam capsula ad æquipotentialem temperaturam calculandam*]. 5 Tab., 1 Taf. a T., Ann. d. Hydrogr., LXII, 7, 292-296. Berlin (1934). **a - 1531**

Nach einigen Betrachtungen über die Nützlichkeit der äquipotentiellen Temperatur bei der Diagnose der Luftmassen zur Wettervorhersage usw. bemerkt Vf., dass eine weite Verbreitung dieses Verfahrens bisher unterblieben ist, da die Berechnung der Daten zu viele Zeit in Anspruch nimmt. Er beschreibt in der vorliegenden Notiz einen praktischen Schieber, dessen Benutzung die Errechnung der erwähnten Daten weitgehend vereinfacht und welcher deswegen sicher zur weiteren Verbreitung der Methode der Luftmassenidentifizierung mit Hilfe der äquipotentiellen Temperatur dienen wird.

**Mügge R.** - Gewitter-Wolken [*Nubes ac tempestates*]. 10 Abb., Nat. u. Mus., LXIII, 9, 304-313. Frankfurt a. M. (1933). **a - 1532**

Entstehung der Haufenwolken und die Voraussetzung dafür. Bildung von Altocumulus-Castellatus-Wolken, ihre Auslösung. Die verschiedenen Wolkenformationen werden an Hand mehrerer Aufnahmen veranschaulicht.

**Murphy Cushman Robert** - Stray Sea Birds and Atlantic Storm Tracks [*Cursus procellarum ac aves migrantes*]. Geogr. Rev., XXIV, 1, 151-152. New York (1934). **a - 1533**

Author considers the relationship between the cases of picking up strictly pelagic birds in inland localities and the birthplace and course of tropical storms. Possibility on hand of data concerned with the occurrence of seabird waifs in eastern North America with contemporary information relating to the antecedents of Atlantic coastal storms, to add measurably to our knowledge of the origin and tracks of such disturbances.

**Musella F.** - Cenni di meteorologia generale e nautica [*De meteorologia generali et nautica*]. 29 fig., Boll. di Pesca, Piscic. e Idrobiol., 3, 285-345. Roma (1933). **a - 1534**

Composizione e proprietà fisiche dell'aria. Radiazione solare. Trasparenza dell'acqua marina. Temperatura dell'aria. Temperatura del mare. Pressione atmosferica. Correnti aeree. Ciclone e anticiclone. Nebulosità. Precipitazioni. Capannina meteorica. Elettricità atmosferica. Fenomeni vari (meteore). Moto ondoso. Cenno sulla teoria della marea. Correnti marine. Ghiacci marini.

**Musella F.** - Le previsioni del tempo e le tempeste [*De procellis ac atmosphæra providenda*]. 11 fig. Boll. di Pesca, Piscic. e Idrobiol., 3, 344-370. Roma (1933). **a - 1535**

Premessi alcuni concetti sulla previsione generale del tempo. l'A. parla del servizio meteorologico a bordo delle navi, dei caratteri del tempo in relazione alle principali configurazioni isobariche, della previsione locale di tempesta e dei segnali di tempesta.

**Musella F.** - Cenni di meteorologia generale e nautica [*De meteorologia generali et nautica*]. (III. Concorso Magistrale marittimo peschereccio). 28 fig., 60 pp., Soc. Tip. A. Manuzio. Ist. Poligr. dello Stato - Libreria. Roma (1933). **a - 1536**

**Musella Francesco** - Anemografo speciale Musella per navi [*De anemographo e systhemate* Musella]. Filotecnica, a. IV, 1, 299-302. Milano (1934). **1 - 1537**

In un precedente articolo, apparso sulla « Rivista Aeronautica », l'A., parlando della determinazione del vento a bordo delle navi, aveva accennato all'Anemografo a sospensione cardanica. In questo articolo l'A. riparla dello stesso apparato in modo più particolare, anche per il fatto che al modello primitivo esperimentato sul piroscafo « Capri ». è stata apportata una piccola modifica per renderlo adatto per la misura delle più alte velocità, sia del vento che delle navi, finora conosciute.

**Namias Jerome** - Some Aspects of the Surface of Subsidence [*De superficie subsedenti*]. 7 figs., Nat. Res. Counc., Trans. Amer. Geoph. Counc., 15th Ann. Meet., Part I, 105-114. Washington, D. C. (1934). **a - 1538**

This paper is a brief report showing a few points of interest in connection with a well-defined surface of subsidence. Several similar cross-sections are being studied minutely with the hope of finally being able to arrive at general conclusions. The situation chosen for illustration is that of October 4 to 9, 1932. An exceptionally slow moving and well-defined front marked the boundary between a transitional Polar Continental airmass and a Tropical Maritime current to the East. The case dealt with represents a front that becomes sharper and sharper because of the continued southward flow of cold air on the western side and northward flow of warm air on the eastern side of the discontinuity.

**Nodon Albert** - Recherches sur l'origine des grands troubles atmosphériques [*Inquisitiones in originem magnarum perturbationum atmosphæricarum*]. Bull. Soc. Océanogr. France, 75, 1326-1327. Paris (1934). **a - 1539**

Dans la présente note l'A. tire quelques conclusions sur la base de son ouvrage publié en 1920 (« Essai d'Astrométéorologie et ses applications à la prévision du temps ») sur les relations entre les actions solaires et les principaux troubles atmosphériques, dont il résulterait qu'une étude méthodique et suivie des foyers électriques solaires serait susceptible d'apporter d'utiles renseignements en géophysique et en météorologie.

**Oellrich H. & Roemer E.** - Nochmals Luv und Lee [*Agitur de navigatione vento secundo et adverso*]. Ann. d. Hydrogr., LX, 11/12, 395. Berlin (1933). **a - 1540**

Vgl. hierzu G. Castens: « Luv. und Lee », Ann. d. Hydrogr. 1933, S. 133 sowie unter dem gleichen Kennwort die Ausführungen von M. Rodewald, ebenda s. 265 ff. Der Vf. der vorliegenden Notiz ist geneigt den Vorschlag von Castens anzunehmen.

**Pagliuca Salvatore** - Mount Washington's Contribution to the Second International Polar Year [*Contributio Observatorii in Monte* Washington *in studia peracta secundo anno polari perdurante*]. 12 figs., 1 tabl., Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 18-22. Washington, D. C. (1934). **a - 1541**

Account of the work performed at the observatory of Mount Washington in order to cooperate with the International Polar Year Commission. Continuous records of atmospheric pressure, air-temperature, and relative humidity, and of solar and sky radiation obtained by means of standard direct-reading and self-recording instruments. Release of a total of 164 pilot-balloons; measurements of wind and precipitations. Some remarks concerned with the correct interpretation of Mount Washington observations.

**Palagi Arturo** - Ionizzazione atmosferica nei dintorni di Roma [*De jonizatione atmosphœrica apud Romam*]. 2 tabl., 1 graf., Meteor. Prat., 6, 259-263. Perugia (1932). **a - 1542**

Nel settembre 1926 si misurò la ionizzazione atmosferica media nei dintorni di Roma (Villa Spalletti-Rasponi) e poi anche nel centro della città (R. Ufficio Centrale di Meteorologia) e si determinò la variazione media della ionizzazione giornaliera, nelle due località per una settimana circa, onde farne il confronto: i risultati sono dati in due tabelle e in un grafico.

**Patterson J.** - Preliminary Report on the Upper-Air Work Undertaken in Canada During the Second International Polar Year [*Relatio prior de investigationibus in excelsos stratus aërios in regione Canadensi peractis secundo anno polari internationali*] (Abstract). Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 13-14. Washington, D. C. (1934). **a - 1543**

Short account of an intensive observational program carried on by the Meteorological Service of Canada on the temperature and movement of the atmosphere at three stations in Arctic Canada, namely Chesterfield Inlet, Cape Hope's Advance, and Coppermine.

**Peau Etienne** - Observations océanographiques faites de Barry (Angleterre) à l'Archipel de Kerguelen (12 Octobre - 2 Décembre 1923) [*Observationes oceanographicae peractae a* Barry (*Anglia*) *usque ad insulas* Kerguelen]. (Suite; v. les trois « Bull. », précédents). Bull. Amis Inst. Océanogr., XV, 45, 3-4. Le Havre (1933). **a - 1544**

Observations exécutées le 11, 12, 13 et 14 novembre.

**Perlewitz Paul** - Meteorologische Horizontal-Navigation durch Vertikal-Navigation im Luftfahrzeug, insbesondere im Freiballon [*Navigatio horizontalis meteorologica obtenta per navigationem verticalem in apparatu sphœrico, particulatim in sphœrico libero*]. 1 Taf. a T., Ann. d. Hydrogr., LXI, 11/12, 355-365. Berlin (1933). **a - 1545**

Dreidimensionale Navigation, das Luftfahrzeug im Luftstrom (Abtrift), Windänderung mit der Höhe, Beispiele für Vertikalnavigation bei Ziel, Dauer-, Weitfahrten, bei Fahrten im Hochdruckgebiet, bei zeitlichen Aenderungen, im Tief, (im Passat), bei Rekordfahrten, Fuchsjagden, Meeres- und Küstenfahrten. Meteorologische Vertikalnavigation des Segelfliegers.

**Perois** - Pluies et inondations en Afrique Occidentale [*Pluviœ et inundationes in Africa Occidentali*]. 4 fig., Géogr., Air, Terre, Mer, LXI, 3/4, 281-284. Paris (1934). **a - 1546**

Bref compte rendu de la saison des pluies qui a été extrèmement violente en 1934 dans toute l'Afrique Occidentale et au Cameroun. Mesures prises par le Gouverneur de la Côte de Ivoire pour permettre à la lagune Ebrié de se déverser dans la mer. Répercussion sur la navigation des inondations et du jet à la mer de masses d'eau considérables.

**Petterssen Sverre** - Kinematical and Dynamical Properties of the Field of Pressure with Application to Weather Forecasting [*De proprietatibus cynematicis et dynamicis relate ad campum pressionis pro applicationibus atmosphœrœ providendœ*]. 36 figs., 17 tabl., Geofys. Publ., X, 2, 1-92. Oslo (1933). **a - 1547**

The object of this work is to study the inter- relations between the field of pressure on one hand, and the various changes in the future pressure distribution on the other, and show how these relations may be applied to the problems of weather chart analysis and weather forecasting. Definitions and general equations. The displacement of isobars and isallobars. The movement of troughs and wedges. The movement of pressure systems. The movement of fronts. Deepening and filling. Practical examples.

**Pettersson Otto** - Ebb och flod i atmosfären. En studie i geofysik. [*De maris accessibus et recessibus eorumque correlatione cum atmosphœra. Studium quiddam geophysicum*]. (Rés. franç.). 1 pl. h. t., 1 fig., Gtbgs Kungl. Vetensk.- o. Vitterh.-Samh. Handl. Femte Följd., Ser. B., III, 1-12. Göteborg (1934). **a - 1548**

En se référant à son travail précédent (« Interne Gezeitenwellen », Rapp. Proc. Verb. Cons. Int. Expl. Mer LXXXII) l'A. étudie la relation entre la formation des mouvements verticaux dans l'atmosphère et celle des ondes internes de marée dans la mer et si, par conséquent, on peut les calculer selon la même formule. La marée. Discussion sur les courbes de la gravitation de la lune et celles de la pression atmosphérique. L'origine des anticyclones. Résumé et réponse à la critique de M. Brillouin.

**Piatti Vincenzo** - Previsione empirico-scientifica del tempo quotidiano locale [*Provisio empirico-scientifica temporis quotidiani localis*]. 15 fig. f. t., Riv. Cult. Mar., VIII, 3/4, 237-261. Roma (1933). **a - 1549**

Indizi offerti dal barometro e dal termometro. Influenza delle precipitazioni, del vento. Nozioni sulle nebbie e sulle nubi. Consigli.

**Piatti Vincenzo** - Previsione empirico-popolare del tempo quotidiano e medio locali [*Provisio empyrico-popularis temporis quotidiani et medii locali*]. Riv. Cult. Mar., VIII, 11/12, 745-759. Roma (1933). **a - 1550**

Folklore meteorologico. Previsioni sull'aspetto della Luna. Previsioni basate su determinati fenomeni osservati in certi vegetali ed in certi animali.

**Pick W. H.** - A Short Course in Elementary Meteorology. Fourth Edition, completely revised [*De meteorologia elementari. Editio IV$^a$*]. 143 pp., H. M. Stationery Office. London (1933). **a - 1551**

**Platania Giovanni** - Osservazioni di aloni in Napoli nel decennio 1922-1931 [*De alonibus Neapoli observatis a. 1922-1931*]. Ann. R. Ist. Super. Nav., I, 43-46. Napoli (1932). **a - 1552**

L'A. riporta le osservazioni, sui fenomeni alonari, eseguite da lui, in Napoli, nel decennio 1922-1931.

**Platania Giovanni** - Gli isogrammi. Proposte di revisione della terminologia [*De isogrammatis. De terminologia recognoscenda*]. Ann. Ist. Sup. Nav., II, 2. Napoli (1933). **a - 1553**

L'A. prende in esame un gran numero dei termini adoperati in geofisica composti col prefisso « iso », li discute e per alcuni propone modificazioni.

**Poisson Ch.** - Sur l'évolution des tempêtes tropicales [*De procellis tropicalibus earumque progressibus*]. C. R. Acad. Sc., CIIC, 26, 2273-2275. Paris (1934). **a - 1554**

Chargé depuis dix ans, des avertissements de tempêtes dans une des régions à cyclones, l'auteur constate que dans les secteurs maritimes exposés aux tempêtes, les conditions atmosphériques sont réellement variables, pendant que l'on répète souvent que les pays tropicaux jouissent de climats d'une régularité quasi parfaite.

**Prins J. A.** - Latitude Effect of Cosmic Radiation [*Latitudinis effectus in radiationem cosmicam*] 1 fig., Nature, CXXXII, 3342, 781. London (1933). **a - 1555**

More accurate results due to investigations of Clay and Berlage and to measurements of the A. Some particulars given.

**Raethjen P.** - Theorie der Fronten und Zyklonen. Ausblick und Uebersicht [*De cyclonibus eorumque theoria*]. Meteorol. Ztschr., L, 12, 450-454. Braunschweig (1933). **a - 1556**

Vortrag gehalten auf der 18. Versammlung der Deutschen Meteorologischen Gesellschaft im Oktober 1933. Kritische Betrachtung von A. Refsdals revolutionierender Theorie der atmosphärischen Zirkulation. Der Redner stellt den folgenden für die mechanische Behandlung der Wettervorhersage sehr wichtigen Satz auf: Bei sämtlichen Vorgängen der atmosphärischen Zirkulation tritt eine erhebliche Störung des dynamischen Gleichgewichtes nur dann ein, wenn Kondensationen auftreten und feuchtlabile Energie frei wird. Folgende Untersuchungen werden im einzelnen die Gültigkeit dieses Satzes aufzeigen.

**Ranzi Ivo** - Ricerche sulla distribuzione della densità ionica nella ionosfera e sulle sue variazioni [*Inquisitiones in distributionem densitatis jonicæ in jonosphæra eiusque variationes*]. 2 fig., Nuovo Cim., 1, 21-36. Bologna (1933). **a - 1557**

L'A., in base ai risultati di una numerosa serie di misure dell'altezza apparente di riflessione di onde elettromagnetiche di lunghezza compresa fra 40 e 100 metri, riesce a stabilire una relazione approssimata fra altezza reale e altezza apparente di riflessione e quindi la legge approssimata di distribuzione della densità elettronica con l'altezza. Egli mette altresì in rilievo il fatto, di frequente osservato, dell'aumento che può subire la densità ionica massima durante la notte. In base alle correlazioni meteorologiche, lunari e magnetiche osservate in relazione con tali variazioni della densità ionica, l'A. ammette l'arrivo, anche nella parte del globo in ombra, di radiazioni elettroniche solari deviate dal campo magnetico terrestre.

**Ray C. L.** - Long-Range Forecasts in Puerto Rico [*De prædictionibus condicionum atmosphæricarum maximo spatio temporis in* Porto-Rico]. 6 figs., 3 tabl., Monthly Weath. Rev., LXII, 7, 235-240. Washington, D. C. (1934). **a - 1558**

A study with reference to the table of monthly surface-water temperatures of the Caribbean Sea and Florida Straits, 1920-1932 which emphasizes their close correlation with the surface air temperatures of windward coast stations in the area. Comparison of the annual temperatures of the period. The maintenance of positive or negative trends with respect to the normal, for long periods. An attempt to trace the cause of the changes occurring at periodic intervals in the temperature trend with respect to the normal.

**Refsdal Anfinn** - Zur Thermodynamik der Atmosphäre [*De thermodynamica atmosphæræ*]. 2 Abb., Meteorol. Ztschr., L, 6, 212-218. Braunschweig (1933). **a - 1559**

Die verschiedenen arbeitleistenden Zirkulationen in der Atmosphäre können folgendermassen zusammengefasst werden: 1. Die Zirkulation zwischen Boden und Höhe, welche die energetisch wichtigste ist. 2. Die gezwungene Horizontalzirkulation zwischen Rossbreiten und Pol. 3. Die Zirkulation in der Vertikalebene zwischen höheren und niedrigeren Breiten, welche bisher als die einzige energieleistende Zirkulation betrachtet worden ist. 4. Die periodischen Zirkulationen (Monsune, Land- und Seewind, Berg- und Talwind).

**Reichel E.** - Ueber den Einfluss des Meeres auf Wind, Temperatur und Feuchtigkeit an der Pommerschen Küste [*De maris influentia in ventum, temperaturam, humiditatem in litoribus ad Pomeraniam pertinentibus*]. 3 Tab., 1 Taf. a. T., Ann. d. Hydrogr., LXII, 5, 195-199. Berlin (1934). **a - 1560**

In den vorliegenden Darstellungen sind die regionalen Untersuchungen über die Veränderung des Ganges der meteorologischen Elemente unter dem Einfluss des Meeres bzw. des Windwechsels an der hinterpommerischen Küste geschildert. Es werden die Windverhältnisse der Sommermonate 1930 bis 1932 in Betracht gezogen.

**Riel (van) P. M.** - Surface Temperature in the Northwestern Part of the Atlantic Ocean. (Dutch and Engl. Text) [*De temperatura superficiali in regione nordoccidentali Oceani Atlantici*]. many tabl., and charts, 7 figs., Meded. en Verh., Kon. Ned. Meteorol. Inst., 102, 1-92. 's-Gravenhage (1934). **a - 1561**

This work completes the publication N. 110 of the Meteorological Office at de Bilt finished in 1931 on oceanographical and meteorological observations in the Atlantic with some further details concerning the area of the Newfoundlandbank and the adjacent sea. The observations. Monthly isotherms. The annual range of the surface temperature. Yearly isotherms. General surface circulation. Deviations from the mean temperature. Frequency of the deviations from the monthly mean surface temperature.

**Rodewald Martin** - Luv und Lee [*Supra et sub ventum*]. 1 Abb., Ann. d. Hydrogr., LXI, 8/9, 265-267. Berlin (1933). **a - 1562**

Ergänzung zu den Bemerkungen von G. Castens (« Ann. d. Hydrogr. », S. 133, 1933) über dieses Begriffspaar. Versuche zur Erklärung dieser Begriffe an Hand verschiedener Beispiele. Mangels eines treffenden Ersatzes empfiehlt der Vf. die Begriffe zu behalten.

**Roediger G.** - Höhenströmung und Druckänderung bei Nordweststurmanlagen im Nordseegebiet [*De currentia atmosphærica deque mutatione pressionis pro originibus ventorum a parte nordoccidentali halitantium in Mare Nordicum*]. Meteorol. Ztschr., L, 12, 466-467. Braunschweig (1933). **a-1563**

Vortrag gehalten auf der 18. Versammlung der Deutschen Meteorologischen Gesellschaft im Oktober 1933. Der Redner demonstriert einen Fall vom 30. März 1933, wobei er den starken Druckanstieg im Zusammenhang mit der verstärkten Nordweströmung und dem Stau an der vorgelegten Südweströmung setzt. Diese Untersuchungen sind aber noch nicht abgeschlossen.

**Rossi Bruno** - I risultati della missione scientifica in Eritrea per lo studio dei raggi cosmici [*Resultatus ex navigatione scientifica in Erythræam ad radios cosmicos studendos*]. Ric. Scient., II, 10, 365-368. Roma (1933). **a - 1564**

Si dànno notizie sui risultati conseguiti dalla missione per lo studio dei raggi cosmici, anticipando su una più completa relazione che darà anche una più esauriente interpretazione dei fatti. Essa tratta della dipendenza dell'intensità della radiazione cosmica dalla latitudine geomagnetica; delle esperienze sull'influenza del campo magnetico terrestre sopra la ripartizione di intensità dei raggi cosmici nelle diverse direzioni; fornisce i dati delle misure di assorbimento, di misure sulla produzione di gruppi di corpuscoli secondari nel piombo, di misure dell'intensità complessiva della radiazione cosmica all'Asmara e a Massaua. Contemporaneamente sono state eseguite dal prof. Ranzi osservazioni sullo stato di ionizzazione dell'alta atmosfera, col metodo degli echi.

**Rusinova I. L.** - Observations météorologiques faites à bord du grise-glace « Sibirjakov » pendant l'expédition de 1932 [*Observationes meteorologicæ peractæ in navi glaciei ruptrici* « Sibirjakov » *nomine perdurante expeditione a. 1932*]. (En russe). 1 tabl., Trans. Arct. Inst., X, 131-163. Léningrad (1933). **a - 1565**

Petite note introductive au tableau, qui représente la partie principale de l'ouvrage et qui contient des données sur les observations météorologiques exécutées à bord du briseglace « Sibirjakov » entre le 30 Juillet et le 16 Octobre 1932 dans les mers arctiques.

**Scherhag R.** - Die Entstehung des Ostsee-Orkans vom 8. und 9. Juli 1931. Die Bedeutung von Konvergenz und Divergenz für die Bildung der Hoch- und Tiefdruckgebiete [*De tempestate maris Baltici diebus 8 et 9 Julii 1931. Momentum convergentiae et divergentiae pro formatione regionum, alta et demissa pressione*]. 5 Tab., 1 Taf. a. T., Ann. d. Hydrogr., LXII, 4, 152-162. Berlin (1934). **a - 1566**

Der schwere Sturm vom 9. Juli 1931 verdankte seine Energie den Temperaturgegensätzen zwischen einer warmen Luftmasse und von Westen vorbrechender Kaltluft. Diese breitete sich als Kaltlufttropfen zungenförmig nach Osten aus. An ihrer linken Seite entstand eine Zone mit divergenten Höhenisobaren, wo zugleich der Luftdruck am schnellsten fiel. Die Entstehung dieses Sturmes als Folge divergenter Höhenströmung wird in der vorliegenden Mitteilung roh angedeutet. Sie besteht aus folgenden Absätzen: Die Bodenbeobachtungen. Die Höhenbeobachtungen. Die Divergenz der Isobaren und der Druckfall. Die zyklonale Konvergenz. Die wolkenfreien Räume bei zyklonaler Konvergenz. Die Entstehung des Ostsee-Orkans. Die prognostische Bedeutung des baroklinen Isobarenfeldes.

**Scherhag R.** - Die Bedeutung der Divergenz für die Entstehung der Vb-Depressionen. Aerologische Analyse der Wetterentwicklung vom 17. bis 26. Juli 1930 [*De divergentia eiusque significatione pro formatione depressionum Vb. Analysis meteorologica progressionis meteorologicæ a 17 ad 26 mensis Julii 1930*]. 8 Tab., 2 Taf., Ann. d. Hydrogr., LXII, 10, 397-406. Berlin (1934). **a - 1567**

Eine Untersuchung des Ostsee-Orkans vom 8/9. Juli 1931 (S: « Ann. Hydr. », LXII, S. 152) führte zu dem Ergebnis, dass die ausserordentlich rasche Vertiefung dieser auf der Zugstrasse Vb ziehenden Depression auf eine in der Höhe eingetretenen Divergenz zurückzuführen war, die ihrerseits als Folge eines auf der linken Seite dieses Tiefs vorhandenen Kaltluftsektors eintrat. Diese und andere Beobachtungen eröffnen neue Aussichten für eine aerologischen Wetterprognose, die besonders für den sommerlichen Sturmwarnungsdienst an der deutschen Ostseeküste von Bedeutung sein könnten. In der vorliegenden Arbeit ist die Wetterentwicklung vom 17. bis 26 Juli 1930 synoptisch-aerologisch untersucht worden, um die gemeinsamen Merkmale der beiden Vb-Depressionen herauszuschälen, die sich während dieses Zeitraumes in nur 5tägigem Abstand entwickelten.

**Scherhag R.** - Die Luftdruck- und Temperaturverteilung in der Höhe bei der Bildung des Ostsee-Orkans vom 8/9. Juli 1931. (Folgerungen für die Zyklonenentstehung) [*De distributione pressionis atmosphæricæ et temperaturæ in atmosphæram pro formatione procellae maris Baltici diebus 8/9 Julii 1931. Adiunguntur conclusiones ad origines cyclonum interpretandas*]. Meteorol. Ztschr., L, 12, 467-470. Braunschweig (1933). **a - 1568**

Vortrag gehalten auf der 18. Versammlung der Deutschen Meteorologischen Gesellschaft im Oktober 1933. Der Redner weist auf die Uebereinsstimmung zwischen der Divergenz der Höhenisobaren und dem starken Fall des Luftdruckes hin und formuliert die folgende Regel: Wo die Isothermen divergieren, wird der Druck fallen, wo sie konvergieren, steigt der Druck.

**Schlichting H.** - Kleintrombe [*De parva columna marina*]. Ann. d. Hydrogr., LXII, 8, 347-348. Berlin (1934). **a - 1569**

Beschreibung einer vom Vf. am 19. Mai 1934 in Lübeck am Travegestade um 13 Uhr. 5 M. beobachteten Windhose von ungewöhnlicher Grösse und Dauer.

**Schmidt Wilhelm** - Prüfung von Anemometern auf die Wiedergabe rascher Schwankungen der Windgeschwindigkeit [*De inspectione anemometrorum relate ad registrationem oscillationum celerium velocitatis venti*]. 6 Tab., 1 Taf., Ann. d. Hydrogr., LXII, 8, 326-339. Berlin (1934). **a - 1570**

Ergebnisse der Versuche mit verschiedenen Typen von Anemometern in veränderlichem Luftstrom, bzw. mit Vorrichtungen, die diesem entsprachen. Vergleich zwischen den Wiedergaben von verschiedenen Anemometern.

**Schroeder Gustav** - Klimatologische Witterungsschilderung. N. 28. Seeverkehrsweg: Karibisches Meer [*Atmosphæræ descriptio climatologica. N. 28 Cursus maritimus ad Mare Caraibicum*]. Ann. d. Hydrogr., LXII, 10, 426-427. Berlin (1934). **a - 1571**

Aus der Sammlung des überseeischen meteorologischen Dienstes der Deutschen Seewarte. Verlauf eines Tages der sommerlichen Regenzeit an der atlantischen Küste von Costarica.

**Schubart L.** - Praktische Orkankunde mit Anweisungen zum Manövrieren in Stürmen [*Notiones simplices de tempestatibus cum præceptis de arte navigandi per procellas*]. 111 Abb. i. T., 173 S., Mittler & Sohn, Berlin (1934). **a - 1572**

Der Vf. gibt hier praktische Regeln für Matrosen im Kampfe gegen die Orkane. Der Stoff ist folgendermassen eingeteilt: Allgemeines. Die tropischen Wirbelstürme. Die Schiffsführung bei Wirbelstürmen. Gemässigte Zone. [Literaturverzeichnis.

**Schwabl W.** - Experimentelle Untersuchungen zur allgemeinen Zirkulation der Atmosphäre [*Inquisitiones ad experimentum peractæ in circulationem generalem atmosphæræ*]. 1 Abb., Meteorol. Ztschr., L, 6, 208-212. Braunschweig (1933). **a - 1573**

Die hier mitgeteilten experimentellen Untersuchungen gründen sich auf ähnliche Arbeiten von Vettin und Exner. Zwei verschiedene von der Rotationsgeschwindigkeit und dem Temperaturgefälle abhängige Zirkulationsformen werden gezeigt, von welchen die eine der Zirkulationsform der Passate und Antipassate und die andere der allgemeinen Zirkulation höherer Breiten entspricht.

**Sellerio A.** - Un anemometro derivato dal psicrometro [*De anemometro quodam e psicrometro derivato*]. 4 fig., Politecnico, 549-552. Milano (1933). **a - 1574**

Accennato alla semplicità di costruzione e di maneggio che presenta lo psicometro Danieli modificato da August, l'A. riferisce sulle sue ricerche per poter usare lo stesso apparecchio, con qualche modificazione, come misuratore della velocità dell'aria.

**Semmelhack W.** - Die Staubfälle im nordwest-afrikanischen Gebiet des Atlantischen Ozeans. Zugleich Beitrag zur « Harmattan »-Kunde [*Pluviæ pulverulentæ in regione Africana nordoccidentali Oceani Atlantici*]. 2 Tab., 3 Abb., 1 Taf., Ann. d. Hydrogr., LXII, 7, 273-277. Berlin (1934). **a - 1575**

In der vorliegenden Darstellung sind die in den Jahren 1902 bis 1933 von deutschen Schiffen gemeldeten Staubfälle

in dem in Frage stehenden Gebiet herangezogen worden. Untersuchung der Staubfälle hinsichtlich ihrer Häufigkeit und Verbreitung (Tabellen und Kurven). Schlüssel zum Verständnis des jährlichen Ganges der Häufigkeit an Hand der Luftbewegung über dem nordwest-afrikanischen Festlands- und Meeresgebiet. Die Rolle des Harmattans als Träger der aus dem Saharagebiet stammenden Sand- und Staubmassen. Verschiedene Bedeutungen des Wortes « Harmattan » im Sprachgebrauch des in Guinea lebenden Europäers. « Harmattan » und « Guinea-Harmattan ».

**Shaw Napier** - The Drama of Weather [*De condicionibus meteorologicis*]. ills. & maps., Univ. Press., xiv + 270 pp. Cambridge (1933). **a - 1576**

A book dealing with meteorology for the non-technical readers. In Chapter I the author describes the development of the ideas concerning the weather. Chapters II and III deal with meteorological instruments and with the results derived by their use. In Chapter IV the rhythms of the weather, as presented by monthly means, are discussed, and Chapter V introduces the weather map and illustrates the problem of its use for forecasting.

**Sinjagin A.** - Die Lage der Polarisationsebene am Himmelsgewölbe [*De positione superficiei polarizationis in cælo*]. 20 Abb., Gerl. Beitr. Geoph., XXXVIII, 1, 66-96. Leipzig (1933). **a - 1577**

In der vorliegenden Notiz, welche eine unmittelbare Fortsetzung der vorhergehenden Arbeit des Vf. (s. A. Sinjagin: « Verteilung der atmosphärischen Polarisation », Gerl. Beitr. Geoph., 24, 1929 u. A. Sinjagin: « Ueber die Verteilung der atmosphärischen Polarisation », Gerl. Beitr. Geoph., 27, 1930) bildet, werden die beiden Karten der Isoklinen und « Stromlinien » für die Fälle ⊙ = 0 und ⊙ = π/4 genauer bestimmt und vervollständigt. Sie besteht aus den folgenden Absätzen: 1. Allgemeine Eigenschaften der Isoklinen und « Stromlinien »; 2. Die Isoklinen für den Fall ⊙ = π/4. 3. Die Neutrallinie (Buchsche Kurve).

**Škreb S.** - Die Reduktion des Stationsbarometers auf 0° C. [*De reductione lectionis barometricæ ad 0° C*]. Meteorol. Ztschr., L, 6, 234-237. Braunschweig (1933). **a - 1578**

Unter Hinweisung auf die Angaben von Fuess, Schreiber, und K. Irgens erörtert der Vf. noch einnal diese Frage, um, wenn möglich, Vereinfachungen zu machen und formuliert die folgende Regel: Zur Reduktion des Stationsbarometers mit reduzierter Skala auf 0° C ist der abgelesene Barometerstand um die Höhe des Quecksilbers im Gefäss (auf 10 mm abgerundet). zu erhöhen, und mit diesem Barometerstand ist die Reduktionsgrösse aus der normalen Tafel zu entnehmen (Siehe Antwort von K. Irgens Meteorol. Ztschr. L, 12, 1933).

**Smosarski W.** - Ueber die Polarisation des Himmelslichtes [*De polarizatione lucis cælestis*]. Gerl. Beitr. Geoph., XXXVIII, 1, 97-111. Leipzig (1933). **a - 1579**

Es wird vorausgesetzt, dass die Verteilung der Polarisation auf dem Himmelsgewölbe durch drei zueinander senkrechte Vektoren im Beobachtungspunkte bestimmt ist, und es werden daraus die Formeln für den Polarisationsgrad und für die Lage der Hauptschwingungsebenen der Strahlen des diffusen Lichtes entwickelt. Es wird u. a. der einfache Satz aufgestellt, dass die Hauptschwingungsebenen mit den Symmetralen der zwei Ebenen zusammenfallen sollen, die durch den Strahl und die neutralen Punkte bestimmt sind. Die Formeln werden nach eigenen und fremden Beobachtungsergebnissen geprüft und die Gültigkeitsgrenzen besprochen.

**Stenz Edward** - Ueber Messungen der Wasserdampf-Absorption im ultraroten Sonnenspektrum, ausgeführt an der Mittelmeerküste mit einem Gorczynskischen Spektrographen [*De mensuris absorptionis vaporis aquarum in spectro solari ultrarubro, peractis præter litus Mediterraneum, spectrographi* Gorczynski *auxilio*]. 2 Abb., Meteorol. Ztschr., L, 6, 219-223. Braunschweig (1933). **a - 1580**

Bericht über die während 1926/27 von Gorczynski in Tunesien und die während 1931/32 vom Vf. in Südfrankreich ausgeführten Messungen. Beschreibung des Spektrographen. Bestimmung der atmosphärischen Transmission in den Absorptionsbändern laut der Fowleschen Methode. Tabellarische, vergleichende Angaben über das Verhältnis zwischen dem Wassergehalt und dem Dampfdruck, welche zu gewissen Zeiten an der Mittelmeerküste eine Senkung unter dem normalen Wert aufweisen. (S. auch Bull. de l'Acad. Pol. d. Sc. et des Lettres, April 1932).

**Stetson Harlan T.** - Solar Activity and Radio Reception [*De solis activitate ac radioreceptionibus*]. 5 figs., Monthly Weath Rev., LXI, 1, 1-3. Washington, D. C. (1933). **a - 1581**

Some considerations on new means which has become available of studying the correlation of solar activity with atmospheric phenomena through recent researches on the correlation of sun spots with radio reception. Summary of the available data collected. A hint is also given of the investigation carried on in order to determine what effect, if any, the altitude of the moon may have upon radio reception.

**Stevens A.** - Upper-Air Winds Over Northern Alaska During the Polar Year, August 1932 to August 1933 [*De ventis in stratibus superioribus aëris super Alaskam Septentr. perdurante anno polari 1932/33*]. 3 figs., 2 tabl., Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 14-18. Washington, D. C. (1934).

(—) See also Monthly Weath. Rev. LXII, 7, 244-247. Washington, D. C. (1934). **a - 1582**

In summary the following facts stand out from this study: (1) The mass-movement of air in the region of northern Alaska is relatively small, as compared with that for the northern part of the United States. (2) Below 3 km., on the average, easterly winds are recorded most frequently, while at higher levels westerly winds prevail. (3) Average wind-velocities for this region, both surface and aloft are 30 to 40 per cent lower than for points in the northern part of the United States. (4) Individual recorded velocities do not deviate greatly from the average. (Author).

**Stevens Albert W.** - Apparatus to Be Carried on the National Geographic Society-Army Air Corps Stratosphere-Flights [*Agitur de apparatu ad volatus stratosphæricos peragendos idoneo per Societatem Geographicam Nationalem ædificato*]. (Abstract). Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 23-24. Washington, D. C. (1934). **a - 1583**

Program and equipment of the proposed stratosphere-flights sponsored by the National Geographic Society and the United States Army Air Corps.

**Stone Robert G.** - The History of Mountain Meteorology in the United States and the Mount Washington Observatory [*De historia meteorologiæ montanæ in Americæ Provinciis Foederatis deque Observatorio in monte* Washington]. Nat. Res. Counc. Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 124-133. Washington, D. C. (1934). **a - 1584**

The author points out the importance of mountain meteorology for the use of its data in synoptic work and in general meteorology and climatology. He then gives a brief historical outline of the development of meteorological observations taken on American mountains and a rather complete bibliographical survey of the work existing on the subject. Particular reference is also made as to the reoccupation of Mount Washington for meteorological purpose in connection of the work of the International Polar Year 1932-33.

**Stüve G. & Mügge R.** - Wolkenbeobachtung und Wettervorhersage [*De nubium observationibus et atmosphæræ provisione*]. 4 Abb., Nat. u. Mus., LXII, 7, 217-223. Frankfurt. a. M. (1933). **a - 1585**

Nach einer kurzen Orientierung über die bis jetzt vorherrschenden Theorien der Wettervorhersage besprechen die Vf. Vf. in einer gemeinverständlichen Form die Entstehung der Wolken, ihre weitere Entwicklung und Verteilung, auch an Hand mehrerer Abbildungen, woraus es möglich ist, gewisse Schlussfolgerungen in Bezug auf das Wetter zu ziehen.

**Sverdrup H. U.** - Meteorology. Part I. Discussion [*De meteorologia. Pars Iª*]. 110 figs., 6 pls., The Norw. North Pol. Expl. « Maud » 1918-1925. Sc. Results., II, 1-331. Bergen (1933). **a - 1586**

The meteorological data discussed here comprise the ordinary meteorological observations as well as the results of the ascents with kites, and captive pilot balloons which have been published in Vol. III of this series.

Brief account of the expedition and observations. I. Upper air observations: Temperature, Wind. II. Temperature: Instruments and methods. III. Pressure: Instruments and methods. Wind: Instruments and methods. V. Humidity of the air: Instruments and methods. VI. Precipitation. VII: Hoar-frost. VIII. Fog. IX. Clouds and cloudiness. X. The circulation of the air. Every part is followed by a discussion. Literature and explanations of tables.

**Swann W. F. G. & C. G. Montgomery** - Cosmic-Ray Nuclear Disintegrations [*Desintegrationes nucleares radiorum cosmicorum*]. Phys. Rev., XLIV, 1, 52-53. Lancaster, Pa. (1933). **a - 1587**

**Tenani M.** - Tabelle per la misura barometrica delle altezze [*Parvæ tabulæ pro mensura barometrica altitudinum*]. (Istituto Idrografico della Regia Marina, N. 3084), 20 pp., Tipogr. dell'Istituto Idrografico della Regia Marina. Genova (1932). **a - 1588**

**Thomas H.** - Wetterkartenkatalog [*Elenchus tabularum meteorologicarum*]. 2 Taf., Meteorol. Ztschr., L, 6, 229-231. Braunschweig (1933). **a - 1589**

Prinzip: Vergleich vorhergehender Wetterlagen um daraus eine Base zur Wettervorhersage zu gewinnen. Material zur Prüfung (in Tabellen wiedergegeben). Bedeutung für die meteorologische Systematik.

**Thornthwaite** - The Climates of the Earth [*De diversis climatis terrestribus*]. 1 sep. map., 2 figs., 1 tabl., Geogr. Rev., XXIII, 3, 433-440. New York (1933). **a - 1590**

Description of a new classification of the climates of the earth which is like that of Köppen being quantitative and attempting to determine the critical climatic limits significant to the distribution of vegetation and also by the fact that it employs a symbolic nomenclature in designating the climatic types. It differs from Köppen's classification by making use of two new climatic concepts, precipitation effectiveness and temperature efficiency. The distribution over the earth of the 32 different climates is shown on the world map reproduced on a separated plate.

**Travniček Ferd.** - Die merkwürdigen säkulären Aenderungen der barometrischen Unruhe und Windgeschwindigkeit von Bremen [*De notandis variationibus secularibus perturbationum barometricarum velocitatisque ventorum, Bremæ*]. 1 Abb., 2 Tab., Ann. d. Hydrogr., LXII, 4, 162-165. Berlin (1934). **a - 1591**

Anschliessend an mehrere seiner früheren Aufsätze, welche gemeinsam die Erforschung atmosphärischer Unruhe zum Ziele hatten und in der allgemeinen Erkenntnis gipfelten, dass der mittlere Turbulenzzustand bodennahre Luftschichten säkular auffallend variert, teilt der Vf. in der vorliegenden Notiz neue Tatsachen mit, die besonders für die deutsche Nordseeküste gelten und hier zum Teil auch bei Seefahrern praktisches Interesse beanspruchen dürften. Bedeutung der ausgeführten Beobachtungen für die Abgabe von Jahresprognosen.

**Tschierske Hilmar** - Die geographische Verbreitung troposphärischer Luftmassen in Europa [*De geographica propagatione aëris massarum tropospæricarum in Europam*]. 12 Kärtchen, 4 Tab., Mitt. Ges. f. Erdkunde, 1931-1932, 171-188. Leipzig (1934). **a - 1592**

1. Die troposphärische Luftmasse als geographisches Objekt. 2. Beziehungen zwischen Luftmassenverbreitung und Temperaturverteilung. 3. Beziehungen zwischen Luftmassenverbreitung und Niederschlagsverhältnissen.

**Vallarta M. S.** - The Interpretation of the Azimuthal Effect of Cosmic Radiation [*De interpretando effectu azimutali radiationis cosmicæ*]. Phys. Rev., XLIV, 1, 1-3. Lancaster, Pa. (1933). **a - 1593**

**Vegard L. & Haraug L.** - The Wavelength of the Green Auroral Line Determined by an Interferometer Method [*De undæ longitudine in linea viridi auroræ per methodum interferometricam determinata*]. 4 figs., 10 tabl., 3 pls., Geofys. Publ., XI, 1, 3-17. Oslo (1934). **a - 1594**

Introduction. Report of the measurements of two quartz etalons. General remarks regarding the procedure followed by the wavelength measurements. Instrumental arrangements. The wavelength of the Green line redetermined from spectrograms taken with a large class prism-spectrograph. Results from interferometer measurements obtained in 1931 and 1932 by means of the 2.5 mm. etalon. Does the auroral line show any Doppler effect? Measurements with the 5 mm. etalon. The sharpness of the interference fringes, its relation to the width of the spectral lines, and the temperature of the auroral region.

**Venturelli L.** - Contatti di masse d'aria calda e d'aria fredda nella atmosfera in relazione alla situazione barica [*Agitur de contactibus inter massas aëris calidi ac frigidi in atmosphæra pro condicione barica*]. Atti R. Ist. Veneto Lett., Sc. ed Arti, XCIII, disp. VI, 731-867. Venezia (1933-34). **a - 1595**

L'autore esamina la distribuzione verticale della temperatura in una zona sufficientemente estesa e in un numero abbastanza grande di casi, per vedere se si possa realmente parlare di discontinuità nella distribuzione verticale della temperatura nella libera atmosfera e quale significato sia da attribuire a questa eventuale discontinuità.

**Vercelli Francesco** - L'aria nella natura e nella vita [*De atmosphæra pro natura et vita*]. 605 fig., 17 tav., xv + 711 pp., Tip. Sociale Torinese, Unione Tipogr. Editr. Torinese. Torino (1933). **a - 1596**

L'atmosfera, costituzione, genesi e confini. La pressione dell'aria. Temperatura e termometri; energia raggiante. I regolatori della temperatura dell'aria; le radiazioni solari, terrestri e atmosferiche. Fattori dinamici della temperatura ed equilibrio dell'aria. Troposfera e Stratosfera. Il moto dell'aria; principi generali; classificazione dei venti. Aria e acqua; umidità, evaporazione, condensazione. Meteore acquee. Circolazione atmosferica e sue perturbazioni. Aria ed elettricità. Aria e vita: principi di bioclimatologia e di meteorologia. Aria e suolo: ambiente di vita dei vegetali. Utilizzazioni dell'aria. Teorie del più leggero e del più pesante dell'aria. Aviazione e aeronautica. Bibliografia. Indice alfabetico delle materie.

**Vercelli Francesco** - Le nuove vedute sulla composizione dell'atmosfera [*De atmosphærica compositione. Cogitationes novæ*]. Ric. Scient., I, 3, 133-139. Roma (1933). **a - 1597**

Il problema della composizione dell'aria, negli strati presso il suolo e nelle alte zone inaccessibili a dirette determinazioni, viene esaminato alla luce dei più recenti dati di osservazione e delle vedute teoriche che si vanno affermando. Risulta che molte fra le valutazioni accettate in passato perdono ormai ogni consistenza; si è indotti invece ad accettare altre stime che meglio si accordano con lo stato attuale delle nostre conoscenze.

**Voigts Heinrich** - Zum Luftkörperklima der Lübecker Bucht [*De influentia aëris componentium in clima Sinus Lubecæ*]. 4 Abb., 2 Tab., Meteorol. Ztschr., L, 12, 498-503. Braunschweig (1933). **a - 1598**

Vortrag gehalten auf der 18. Versammlung der Deutschen Meteorologischen Gesellschaft im Oktober 1933. Nach einigen einleitenden Worten über den Luftkörperkatalog behandelt der Redner das Gesamtbild des Einflusses der Luftkörper im Vergleich mit dem der einzelnen Hauptperioden des Jahres, die Eigenschaften der einzelnen Luftkörper, den Zusammenhang zwischen Luftkörper und Strahlung und die neutralen Punkte bei Sonnenhöhe (in Tabellen ausgedrückt), die Aufeinanderfolge und schliesslich die klimatopsykologischen und phänologischen Wirkungen der Luftkörper.

**Wagner Fritz** - Die meteorologischen Beobachtungen während der Einweisungsfahrt für die Höhenwindmessstelle F nach dem La Plata im Frühjahr 1931 [*De observationibus meteorologicis peractis inter navigationem præfectos nauticos docendi causa susceptam, relate ad novam stationem ad ventorum in altis stratibus mensuras persolvendas idoneam secundum flumen* La Plata]. 6 Textabb., 5 Taf., 3 Tab., Aus d. Arch. d. Dtsch. Seewarte, LII, 3, 1-52. Hamburg (1933). **a - 1599**

Die durch die Deutsche Seewarte in den Atlantischen Ozean eingeführte Beobachtungssystem über Höhenwindmessungen ist im Frühjahr 1931 um noch eine Höhenwindmessstelle F erweitert worden. 1. Die Höhenmessstelle F auf D. « Sierra Ventana ». II. Der Reiseverlauf der Einweisungsfahrt F. III. Die Höhenwindbeobachtungen. IV. Die Einwirkung der atlantischen Inseln auf das Stromfeld und das Luftdruckfeld.

**Wanssowitsch A. L.** - Das Nebelregime des Weissen Meeres und seiner nächsten Umgebung [*De nebularum regimine in Mari Albo regionibusque adiacentibus*] (In russ., dtsch., Rés.). 1 Taf., 9 Tab., Mém. Inst. Hydrol., IX, 67-87. Léningrad (1933). **a - 1600**

Versuch die etwas eigenartigen hydrometeorologischen Verhältnisse der Nebelbildung auf dem Weissen Meere zu erklären. Es werden die Zahl der Nebeltage für 15 Stationen von 1906 bis 1915 angegeben, sowie die jährlichen, jahreszeitlichen, monatlichen und täglichen Perioden dieser Tage. Es werden auch die Richtung und Geschwindigkeit der Winde, welche am häufigsten das Entstehen des Nebels fördern und begleiten, angedeutet. Es ist ein Vergleich zwischen der Dauer des Nebels auf den verschiedenen Stationen gemacht worden, und zwar in der Nähe und in einer grösseren Entfernung von der Küste. Die Angaben über die Dunsterscheinungen im Gebiete des Weissen Meeres sind in einer Bearbeitung wiedergegeben. Ausserdem, in dem Abschnitte « Luft- und Wassertemperaturen », wird der durch die Differenz der beiden Temperaturen hervorgerufene Nebel behandelt und einige Vermutungen über die im Frühling, Sommer und Herbst enstehenden Land- und Küstennebel am Weissen Meer ausgesprochen.

**Wasserfall K. F.** - Praktische Versuche mit langsichtigen Wettervoraussagen [*Experientiæ practicæ ex quibus prognosis maximo spatio temporis deducere fas est*]. 5 Abb., 1 Tab., Meteorol. Ztschr., L, 9, 331-337. Braunschweig (1933). **a - 1601**

Unter Hinweisung auf seine Arbeiten (siehe « Geofys. Publ. V, 3, und 10, IX, 2) betont der Vf. in der Einleitung den engeren Zusammenhang zwischen solaren und terrestren Phänomenen und teilt dann seine mittels der Koch-Blanfordschen Methode behandelten Daten mit: Die achtmonatliche Welle. Die zweijährige Welle und ihren Zusammenhang mit der achtmonatlichen. Praktischer Nutzen dieser Untersuchung. Die zusammengesetzte acht- und elfjährige Periodenvariation.

**Wegener Kurt** - Der Schwere-Wind [*Ventus gravis*]. Ann. d. Hydrogr., LXII, 7, 285-288. Berlin (1934). **a - 1602**

A. Beobachtungen: Folgende Erscheinung, welche die Beobachter übereinstimmend auf allen vereisten Landflächen der Polargebiete gefunden haben: Der Wind bläst im Sommer und Winter vom Eis herab, um etwa 45° abgelenkt, offenbar durch die scheinbare Ablenkungsbeschleunigung der Erddrehung. B. Deutung des Problems: Untersuchung über die Eigenschaften eines Schwere-Windes im Gegensatz zum Gradientwind und über das Vorkommen dieser Eigenschaften bei dem eindrucksvollen, regelmässigen Bodenwind der Polargebiete. Die Meinung verschiedener Beobachter, welche das Problem untersucht haben.

**Weightman R. Hanson** - Comments on the General Circulation [*Cogitationes de circulatione generali*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr., 27-29, 1933, 106-108. Washington, D. C. (1933). **a - 1603**

These comments are given as a discussion for the item proposed by the American Geophysical Union for the agenda of the Lisbon Assembly and concern especially the increase and decrease in the central pressure of high-pressure areas or anticyclones, the larger-scale operations, probably involving both the northern and southern hemispheres and the seasonal correlation of conditions in widely separate regions.

**Weightman R. Hanson** - Preliminary Report on Relationship Between Temperatures in the United States and Precedent Pressures Outside the United States [*Relatio prior de correlatione inter temperaturas Provinciarum Foederatarum Americæ et pressiones præcedentes extra Status foederatos*]. Nat. Res. Counc. Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 12-13. Washington, D. C. (1934). **a - 1604**

Brief account of the work performed by the U. S. Weather Bureau in order to solve the problem of long-range forecasting by associating weather in one locality with antecedent condition in some other distant region, as was done by Sir Gilbert Walker in the monsoon-forecast for India. For the purpose of the present investigation the United States were divided into twelve districts and comparisons were made by means of correlation-coefficients and thus far more than 5000 coefficients have been worked out. The results of this investigation will be published in some details in the Monthly Weather Review.

**Wentstrom William H.** - Radiometeorography as Applied to Unmanned Balloons [*De radiometeorographia eiusque applicationibus in sphæricis sine pilotis*]. 3 figs., 2 tabl., Monthly Weath. Rev., LXII, 7, 221-231. Washington, D. C. (1934). **a - 1605**

After a brief summary of the three methods of air-sounding which are in wide present use, the author deals with (*a*) the historical development of radio pilot balloons and radio sounding balloons, (*b*) with the possibilities of improving the present state of balloon radiometeorography and (*c*) with the evaluation of radio balloons in terms of their probable future usefulness.

**Wexler H.** - A Comparison of the Linke and Ångström Measures of Atmospheric Turbidity and Their Application to North America Air Masses [*Comparatio mensurarum turbiditatis atmosphæricæ a* Linke *et* Ångström *peractarum earumque applicatio ad aëris massas in America Nordica*]. 2 figs., 2 tabl., Nat. Res. Counc., Trans. Amer.

Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 91-99. Washington, D. C. (1933). **a - 1606**

After having put into evidence that the problem of defining an adequate expression for the measure of atmospheric turbidity is a difficult one and that as yet no suitable expression has been found, the author gives a summary of the work performed by various scholars in their attempt to define a turbidity-measure which would obey the requirements he formulates. In his conclusions he gives his opinion concerning the relative values of the Linke and Ångström measures.

**Wiese W.** - Meteorologische Beobachtungen ausgeführt an Bord des Eisbrechers « Sedow » im Jahre 1930 [*Observationes meteorologicæ peractæ in navi glaciei-ruptrici* « Sedow » *nomine a. 1930*]. (In russ.). 1 Taf. a. T., Sc. Res. Arct. Exped. on the « Sedow » in 1930; Hydrolog. & Metoorol., Trans. Arct. Inst., I, 139-150. Leningrad (1933). **a - 1607**

Zusammenfassende, in einer Tafel vereinigte Wiedergabe der im Sommer 1930 während der arktischen Expedition von dem Eisbrecher « Sedow » ausgeführten meteorologischen Beobachtungen.

**Wiese W. J.** - Meteorologische Beobachtungen [*Observationes meteorologicæ*] (In russ.). 1 Tab., Trans. Arct. Inst., VI, 33-40. Leningrad (1933). **a - 1608**

Tabelle der Ergebnisse von meteorologischen Beobachtungen (Luftdruck, Wind, Temperatur, Feuchtigkeit, Bewölkung, Art der Wolken), welche an Bord des Eisbrechers « Malygin » während seiner Fahrt nach Franz-Joseph Land im Sommer 1931 ausgeführt worden sind.

**Willett H. C.** - American Air Mass Properties [*De præcipuitatibus massæ aëriæ americanæ*]. Mass. Inst. Technol. & Woods Hole Oceanogr. Inst., Pap. Phys. Oceanogr. II, 2. Woods Hole, Mass. (1933). (—) (See also: Phil. E Church: « A New Viewpoint in Climatology », « Geogr. Rev. », XXIV, 1, 154-156. Washington (1934). **a - 1609**

The author illustrates a new method of the study of meteorology and climatology of America. He treats the types of air masses which made their appearance during the opposite seasons of December 1929-March 1930 and July-August 1930. A careful analysis of the properties of each type of air mass is made. The paper gives a clear conception of the types of weather and the underlying factors of the various types of climate from the viewpoint of air-mass analysis.

**Willett H. C.** - Some Interesting Features of Our Warm and Cold Waves [*De notandis rebus relate ad undas calidas ac frigidas*]. Nat. Res. Counc. Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 80-84. Washington, D. C. (1933). **a - 1610**

The author discusses the properties of the most important American air-masses, which are the polar continental (typical cold wave) and the tropical maritime (warm Gulf air). He hopes, if he eventually can get satisfactory aerological material, to carry out the more difficult investigation of frontal structure and of the generation and movement of American cyclonic disturbances. Results of the aerological observations at Ellendale and Boston. Explanation of the radical difference between those data. Importance of the conditional instability for the weather-forecasting.

**Willett H. C.** - The Use of Aerological Observations in Weather-Forecasting [*De utilitate percipienda ex aërologicis observationibus coelo providendo*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 7-10. Washington, D. C. (1934). **a - 1611**

After some general remarks concerned with the use of the so-called polar-front or air-mass analysis methods of weather-map analysis and weather-forecastings, the author points out that the technique of application of these methods to the daily synoptic routine, in the preparation of weather-forecast, still falls far short of the maximum possible effectiveness. He illustrates then briefly the two essentially simple concepts, on which those methods are based and indicates the two main problems involved in the application of those methods, i. e. (1) to develop a quick practical method for the daily routine analysis of the data for use in preparing the regular forecast, and (2) to develop methods for the thorough investigation, in the light of all obtainable data of meteorological conditions of particular interest.

**Woerner H.** - Beziehungen zwischen Wassertemperatur und Luftdruckverteilung auf dem Nordatlantischen Ozean in den Jahren 1932 und 1933 [*Correlationes inter aquæ temperaturam et pressionem barometricam in Atlantico Nordico a. 1932 et 1933*]. 2 Taf., Ann. d. Hydrogr., LXII, 11, 445-450. Berlin (1934). **a - 1612**

Ergebnisse von Untersuchungen, an Hand eines ziemlich reichen Beobachtungsmateriales, wie weit Beziehungen zwischen dem Luftdruck und der Wassertemperatur in den Jahren 1932 und 1933 auf dem Nordatlantischen Ozean bestanden haben. Es hat sich kein Einfluss der Wassertemperaturverteilung auf die entsprechende Luftdruckverteilung nachweisen lassen. Dagegen ist ein Einfluss der Luftdruckverteilung mittels der durch sie bedingten Luftströmung auf die Wassertemperatur in verschiedenen Fällen nachweisbar.

**Zanon Francesco Saverio** - Osservatorio Geofisico del Seminario Patriarcale di Venezia. Bollettino mensile [*Observatorium Geophysicum Seminarii Patriarcalis Veneti. Bulletinus menstruus*]. Atti R. Ist. Ven. Sc., Lett. ed Arti, XCII, 7, 791. Venezia (1932-33). **a - 1613**

Sono riportate le osservazioni meteorologiche e quelle geodinamiche eseguite nei mesi di gennaio, febbraio e marzo 1932 in detto Osservatorio.

Résumé du bulletin danois sur l'état des glaces dans la Mer Kara, la Mer Blanche, la Mer Barents, sur les côtes du Spitzberg, du Groenland, de l'Islande, de Terreneuve, du Labrador, dans le détroit de Davis, de Houdson et autour de l'archipel polaire canadien.

**Smith Edward H.** - Ice in the Sea [*Glacies marina*]. 1 tabl., 2 maps, Bull. Nat. Res. Counc. 85, 384-408. Washington, D. C. (1932). **a - 1652**

The different relations of the Arctic, its central mass of ocean ice and the Greenland ice cap, as well as the Antarctic, with its central dome of glacial ice surrounded by a fringe of sea ice and the variations of floating ice are discussed. After a short historical résumé of our knowledge on ice in general, and the ice of the Arctic and the Antarctic especially, the author gives a classification of natural ice and a list of standard terms, indicating the geographical distribution of floating ice, aswell as the variations in ice limits.

**Speerschneider C. I.** - The State of the Ice in the Arctic Sea. 1933 [*Glacies in oceano arctico*]. Naut. Meteorol. Aarb., Copenhagen (1934). **a - 1653**

Développement et perfectionnement de l'Ice Patrol Service organisé peu de temps après la catastrophe du « Titanic » en 1912. Le travail accompli par ce Service en 1932 ; élaboration des cartes dynamiques pour la facilitation des prognoses.

**Wiese W. J.** - Ueber die Eistrift im nördlichen Polarbecken [*Glacies declinans per bacinum arcticum*] (In russ., dtsch. Rés.). 2 Kart., 4 Tab., Mém. Inst. Hydrol., X, 327-336. Léningrad (1933). **a - 1659**

Angaben über die Triften verschiedener Bojen im nördlichen Eismeer. Versuch die Geschwindigkeit der westlichen Trift der Bojen festzustellen. Der mittlere für die Bojen erhaltene Wert der Geschwindigkeit der Trift im Polarbecken (1.04-1.11 Seemeilen) stimmt sehr gut mit der mittleren Geschwindigkeit der Eistrift der Schiffe. Die unternommene Untersuchung der Triften der Bojen erlaubt Schlussfolgerungen über einige Tatsachen zu ziehen, welche schon aus den Eistriften der Schiffe bekannt waren.

**Wiese W. J.** - Die Eisverhältnisse [*Glacies eiusque condiciones*] (In russ., dtsch. Auzsug). 2 Karten, Trans. Arct. Inst., VI, 13 & 23-29. Leningrad (1933). **a - 1660**

Zusammenfassende Wiedergabe der Ergebnisse der Beobachtungen der Eisverhältnisse im Barents Meere, im Karischen Meere, in den Sunden von Franz-Joseph Land, im nördlichen Teile des Britischen Kanals und in der Königin Victoria See, welche während der Fahrt des Eisbrechers « Malygin » nach dem Franz-Joseph Land im Sommer 1931 ausgeführt wurden.

**Wiese W. J.** - Die Eisverhältnisse im Nördlichen Eismeer zwischen Nowaja Zemlja und der Bering-Strasse nach Beobachtungen des Eisbrechers « Sibirjakow » im Jahre 1932 [*Glacies in mari nordico inter* Novaja Zemlja *et Fretum* Bering *ex observationibus navis glacieiruptricis* « Sibirjakov » *a. 1932*] (In Russ., dtsch. Rés.). 7 Abb. u. Kart., Trans. Arct. Inst., X, 89-101. Leningrad (1933). **a - 1661**

Zusammenfassender Bericht über die Eisverhältnisse nach den Beobachtungen an Bord des Eisbrechers « Sibirjakow » im Karischen Meere zwischen dem östlichen Eingang in die Strasse Matoschkin Schar und der Dickson-Insel, an der Ostküste von der Severnaja Zemlja und während der Ueberfahrt von der Lena-Mündung zur Grossen Ljachow-Insel. In 1932 hatte das Staatliche Hydrologische Institut zu Leningrad den ersten Versuch gemacht eine Eisprognose für die ganze Strecke zwischen Spitzbergen und der Bering-Strasse aufzustellen. Die Prognosen sind mit Ausnahme derjenigen für das Tschuktscher Meer sehr gut ausgefallen.

**Zubov N. N.** - The Circumnavigation of Franz Joseph Land [*De Terra Francisci Josephi circumnavigata*]. 2 figs., 3 tabl., Geogr. Rev., XXIII, 3, 394-401. New York (1933). **a - 1662**

In connection with the Second International Polar Year various scientific institutions of the U. S. S. R. planned an extensive program of meteorological and oceanographical investigations. Among outstanding achievements is the first circumnavigation of Franz Joseph Land by the « Knipovitch », whose success is a proof of the good work which can be accomplished in high latitudes by small boats if personnel and crew are experienced and if physical conditions can be predicted. Professor Zubov had forecast favorable ice conditions for this expedition and these were realized. In the present article he describes the course of the expedition and the hypothesis upon which it was founded that the temperatures of the North Cape Current can be used to foretell the state of the ice in Barents Sea.

Results of an investigation carried out by the National Broadcasting Company in order to determine the major solar and terrestrial phenomena which affect short-wave propagation adversely, their correlation with transmission and the practicability of forecasting these disturbances. Systematic observations several hours daily of the Transatlantic circuits, and less frequent observations of the Pacific and South American circuits. The results are reported graphically on a reception-log making the transmission characteristics evident at a glance. Effect of magnetic disturbances. Sufficient accuracy attained in the prediction of day-to-day transmission-conditions.

Uno degli AA. (R. Fabiani) informa d'aver promosso una nuova esplorazione gravimetrica e geomagnetica regionale di secondo grado della Sicilia, che venne eseguita nel periodo 1929-1931. Accenna ai principali risultati delle ricerche gravimetriche ed ai rapporti fra l'andamento delle isoanomale di gravità e le condizioni generali della costituzione geologica dell'isola, mettendo in evidenza l'importanza di detti risultati anche come guida a ricerche future con finalità applicative. L'altro A. (G. Petrucci), premesso un cenno sui criteri che servirono di norma alle indagini geomagnetiche, mette in evidenza i principali risultati della campagna, rilevando le anomalie magnetiche regionali e locali più significative finora scoperte e l'importanza applicativa che potrà ottenersi dalla interpretazione di esse.

The investigations, whose results are illustrated in the present paper, have been undertaken with a view to discover more exactly the relation between the secular variation of the horizontal magnetic force and magnetic activity. It deals with the two ways in which the secular change of the secular magnetic force may be affected by magnetic activity: the post-perturbation phenomenon and the consideration whether the force, after recovering from the depression, attains a value lower or higher than it had before the depression. A comparison whose results are reported on a table, is made of the annual values of magnetic horizontal intensity for all days with magnetic activity (u) as determined from the interdiurnal variability in horizontal intensity at many observatories.

**Muramoto Asakazu** - On the Result of Observations of Earth Magnetism on the Day of the Solar Eclipse [*De resultatibus ex observationibus magnetismi terrestris die eclypsis solis*]. 1 pl., Suiro Yôhô (Hydrogr. Bull.), 12, 277-280. Tokyo (1933). **a - 1716**

Results of observations on declination of earth magnetism carried out simultaneously at three stations in Japan during the eclipse of the sun on September 1st, 1932, by parties dispatched from the Hydrographic Department of the Imperial Japanese Navy for the magnetic survey of the whole Empire. The observations have been made by means of « Nippon Suirobu Magnetometer » continuously for 6 hours from the beginning to the end of the eclipse, at intervals of from 1 to 10 minutes. No sudden change at the beginning and the end of the eclipse nor any abnormality during the eclipse was observed, the day being calm. (S. Ogura, Jap. Journ. Astr. & Geoph., XI, 3, abstr. 136, 41. Tokyo, 1934).

**Lambert W. D.** - Tables for the Isostatic Reduction of Gravity. A Report of Progress [*Tabulæ pro reductione isostatica gravitatis. Relatio de progressibus obtentis*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 63-65. Washington, D. C. (1933). **a - 1753**

Description of the tables used by the U. S. Coast and Geodetic Survey for the calculation of the various isostatic reductions, which are purposely adapted to rapid computation according to some very definite and special form of the hypothesis of isostasy. They represent a new set of tables of the Cassinis type but differ in some particulars from the Cassinis tables of 1911. These particulars are dealt with in this paper.

**Lejay P.** - Les caractères généraux de la gravité le long de la côte sud de Chine [*Gravitatis præcipuitates generales præter litus meridionale Sinense*]. 1 fig., 1 tabl., C. R. Acad. Sc., CIC, 26, 1589-1591. Paris (1934). **a - 1754**

Mesures de gravité faites sur la côte sud de la Chine avec le gravimètre Holweck-Lejay N. 42. Les valeurs des résultats sont données dans une table.

**Soler E.** - Lista di stazioni di riferimento nazionale per misure gravimetriche [*Index stationum nationalium pro mensuris gravimetricis*]. (Rapporto alla commissione internazionale per la gravimetria. (Lisbona, 1933), 7 pp., Tip. del Seminario. Padova (1933). **a - 1755**

La presente lista ha lo scopo di stabilire i criteri per una nuova rete internazionale, da sostituire a quella nota, calcolata da Borrass nel 1909. Sono elencate le stazioni di riferimento europee e transoceaniche fino adesso note.

**Somigliana C.** - Les expressions finies de la pesanteur normale [*Expressiones finitæ gravitatis normalis*]. Bull. Géod., 38, 178-187. Paris-Toulouse (1933). **a - 1756**

**Sverdrup H. U.** - Pendulum Observations near Cape Chelyuskin [*Observationes pendulares apud promunturium* Chelyuskin]. Tabl., The Norw. North Pol. Exped. « Maud » 1918-1925, Scient. Res., I, 8, 1-9. Bergen (1933). **a - 1757**

Some remarks on the use of the v. Sterneck pendulum apparatus. (See descr. in Scient. Res. Exped. Vol. II, 8, Christiania 1901). Dates and values of observations expressed in tables and formulas. It is concluded that the acceleration of gravity is nearly normal in the vicinity of Cape Chelyuskin.

**Swick C. H.** - Recent Progress in Gravity-Work [*Progressus recentiores in gravitatem studendam*]. 1 map, Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 53-56. Washington, D. C. (1934). **a - 1758**

Account of the second year of use of the Brown gravity-apparatus, which has been as successful as the first year. During the year under consideration about 110 stations have been determined by the parties of the U. S. Coast and Geodetic Survey, in a working time of eight months or less. The other four months of the year were devoted to astronomical observations and other geodetic work. All determinations of gravity made during the past year have been based on the new Washington base-value and in connection with Potsdam. Some information on new progress in developing gravity-apparatus that will give the required accuracy with much less effort and time that was required with the older types.

**Survey of India** - Gravity Anomalies and the Structure of the Earth's Crust [*De anomaliis gravimetricis et structura corticis terrestris*]. tabl. & maps, Prof. Paper, 27, Survey of India, Dehra Dun. (1932). **a - 1763**

This paper shows the results of gravity observations with modern apparatus obtained during the last few years. Several sketches are given showing the geological map of India; gravity anomalies and the location of pendulum stations given annually are reproduced. In the conclusions some information is given concerning a theory advanced on the causes of the gravity anomalies and the results of the numerical tests of the aforesaid theory, which seem to be satisfactory.

Brief account of the work of a special Committee appointed in view of the revision of the earthquake-code.

**Davis W. M.** - The Long Beach Earthquake [*Terræ motus in* Long Beach]. 6 figs., Geogr. Rev., XXIV, 1, 1-11. New York (1934). **a - 1774**

Description of the Long Beach earthquake which occurred on March 10th, 1933, and which, as it is believed, has been caused by a small slip on the southeastward submarine extension of the Inglewood fault. Geological relations. Report of the Committee on Earthquake protection. Special considerations are concerned with the effect of the earthquake on the tourist industry.

**Davison C.** - The Hawke's Bay Earthquake of February 3, 1931 [*Terræmotus in baja* Hawke *die 3 mensis Februarii 1931*]. 2 figs., Nature, CXXXIII, 3370, 841-842. London (1934). **a - 1775**

New Zealand has been visited by several earthquakes with great crustal changes, such as those of 1823, 1848, 1855 and 1929. For the first time in its history New Zealand on Febr. 3, 1931 experienced an earthquake in the neigbourhood of important towns. This earthquake is here described and isoseismal lines and epicentres illustrated.

**Davison Charles** - The Earthquake-Series of Itô (Japan) [*De terræ motibus in* Itô (*in Japonia*)]. 2 figs., Geogr. Journ., LXXXIII, 3, 228-231. London (1934). **a - 1776**

After a brief comparative description of the several earthquakes which visited the district of Itô (Japan) in 1930, the author gives an account of the erection of five stations surrounding the epicentral area of the earthquakes, of the observations carried out with special reference to a comparison made between the frequency of the shocks and the tidal phases at Misaki. He also communicates the results of the accurate survey of the neighbourhood of Itô made after every earthquake.

**Escher B. G.** - On the Relation between the Volcanic Activity in the Netherlands East Indies and the Belt of Negative Gravity Anomalies Discovered by Vening Meinesz [*De correlatione inter activitatem vulcanicam in Indiis Orientalibus et cincturam anomaliarum gravitatis negativæ*]. Kon. Akad. v. Wet. Proc., XXXVI, 677-684. Amsterdam (1933). **a - 1777**

L'A. est d'avis que le parallélisme des arcs volcaniques de l'archipel des Indes Orientales et de l'axe des anomalies citées dans le titre suppose une corrélation entre ces phénomènes.

**Heck N. H.** - Seismology and the Island-Arcs [*De sysmologia et arcubus insularum*]. Nat. Res. Counc. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, Append. B, Rep. Comm. Ocean. Basins, 20-21. Washington, D. C. (1933). **a - 1778**

Relation of seismology to island-arcs as illustrated in the West Indies region; special problems of the region; purposes of earthquake studies; defects in present instrumental recording; desirability of correlation of gravity-observations and determination of submarine contours with the seismic activity.

**Heck N. H.** - Review of Seismology of the United States [*De sysmologia in Statibus Foederatis Americæ*]. 1 tabl., Nat. Res. Counc. Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 318-321. Washington, D. C. (1933). **a - 1779**

Review of the accomplishment of the Coast and Geodetic Survey, followed by a synopsis of the work of other organizations.

**Heck N. H.** - Seismological Progress Report [*Relatio de progressibus scientiae sysmologicae*]. 1 tabl., Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part. I, 58-61. Washington, D. C. (1934). **a - 1780**

In the present report an account is given listing the activities and referring under each to the appropriate organization, under the following headings: Teleseismic stations and instruments, Nearby earthquake stations, Strongmotion stations, Analyses of records and travel-time tables, Determination of epicenter, Non-instrumental earthquake information, Geological studies of earthquake regions, Seismic sea-waves or tidal waves, Miscellaneous. In a table is given a statistical summary of station-operation, April 1, 1933 to April 30, 1934.

**Imamura Akitune** - The S. Atlantic Earthquake of June 27, 1929, as Registered at Tokyo. An Observation of Rigid Waves Transmitted across the Earth's Inner Core [*De terræmotu in Atlantico meridionali die 27 mensis Junii 1929 in* Tokio *inscripto. Agitur de observatione undarum rigidarum quæ transmissæ fuerunt per nucleum internum terræ*]. Proc. Imp. Acad., VIII, 354-357. Tokyo (1932). **a - 1781**

The distance of the present earthquake — occurred at 30° W., 50° S., a place in the South Atlantic Ocean near the Sandwich Islands — was of 160°,4 of arc. Appearance of the S' phase, which traversed the inner core of the earth as rigid waves. Appearance of the P' phase. Constants of the instruments.

**Imamura Akitune** - On Crustal Deformations Preceding Earthquakes [*De corticis terrestris deformationibus terræmotus præcedentibus*]. Jap. Journ. Astron. Geophys., X, 2, 81-92. Tokyo (1933). **a - 1782**

Relation existing between earthquakes and the vertical component of pre-seismic crustal deformation. Importance of horizontal component. Historical remarks from the year 684 to nowadays.

**Imamura Akitune** - Past Tunamis of the Sanriku Coast [*De* Tunamis *apud litus* Sanriku]. Jap. Journ. Astr. & Geoph., XI, 2, 79-93. Tokyo (1934). **a - 1783**

History and description of the most important tunamis that took place off the Sanriku coast in the North East part of Japan.

**Imamura Akitune & Kawase Zirô** - The Sanriku Tunami of 1933 [*De* Tunami *in* Sanriku *a. 1933*]. 10 figs., Jap. Journ. Astron. & Geoph., XI, 1, 17-35. Tokyo (1933). **a - 1784**

On March 3 (Jap. Stand. Time), March 2 (G. M. T.) a large earthquake occurred off the Sanriku coast. A description is given of the tunami which took place about half an hour after the occurrence of the earthquake. All the possible data are gathered in this interesting paper.

**Imamura Akitune & Kawase Zirô** - A New Volcano off the East Coast of Alaid Island [*Agitur de invento vulcano longe a litoribus orientalibus Insulæ* Alaid]. 7 figs., Jap. Journ. Astron. & Geoph., XI, 3, 113-116. Tokyo (1934). **a - 1785**

Account of the explosion of a new volcano and the formation of a new islet about 900 m. off the east shore of Alaid Island, the northernmost island of the Kuriles on January 26th 1934.

**Ishimoto M.** - Preliminary Notes on the Tunami of March 2, 1933 (G. M. T.) and an Outline of the Investigations now being made concerning it at the Earthquake Research Institute [*Nota de* Tunami *die 2 Mensis Martii 1933*]. 2 figs., Jap. Journ. Astron. & Geoph., XI, 1, 1-9. Tokyo (1933). **a - 1786**

General description. Seismometrical observations. Mareograms. The maximum height of waters. Geological studies. Damages. Other accompanying phenomena of tunami. Conclusion.

**Itoo Tokunosuke** - Sur les séismes des grands fonds au Japon [*De terræ motibus in maxima profunditate in Japonia*]. 3 fig., Jap. Journ. Astr. & Geoph., XI, 2, 71-78. Tokyo (1934). **a - 1787**

L'auteur, admettant la théorie de Wegener, explique pourquoi les épicentres se distribuent azimutalement et circonférenciellement et comment la sismicité et le volcanisme se lient l'un avec l'autre.

**Katô Yosio** - Volcanic Action and the Magnetic Disturbance [*De actione vulcanica ac magneticis perturbationibus*]. (In Jap.). 10 figs., 1 tabl., Disin (Earthquake), 5, 156-170. Tokyo (1933). **a - 1788**

The autor studies the effect of some earthquakes on the anomalies of the secular change in the magnetic field in Japan.

**Katô Yosio** - Seismic and Volcanic Activities and Changes in the Earth's Magnetic Field [*De activitate sysmica et vulcanica deque mutationibus in campo magnetico terrestri*]. (In Jap.). 9 figs., 4 tabl., Disin (Earthquake), 5, 309-319. Tokyo (1933). **a - 1789**

According to the author the anomalies of the secular variation of the horizontal component of the magnetic field in seismic or volcanic regions are approximately represented by the field due to a simple doublet placed at corresponding centres. On similar argument see the same journal p. 573-584.

**Ludy A. K.** - Adventures of Two Seismograph-Tenders During a Severe Earthquake [*Agitur de fortunis duorum observatorum apparatuum sysmographicorum permagno terræmotu perdurante*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 256-257. Washington, D. C. (1933). **a - 1790**

Not a technical report, but rather an account of the adventures of Ralph S. McLean and the writer while attending the strong-motion seismograph of the Coast and Geodetic Survey which operated at Long Beach and Los Angeles at the time of the earthquake of March 10, 1933.

**Lych Joseph S. J.** - A Review of the Earthquakes of the Past Year [*De terræ motibus anno elapso*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 253-254. Washington, D. C. (1933). **a - 1791**

Epicenters, geographic distribution, pecularities of the earthquakes recorded, of which two have been of most interest, those of March 3 in Japan, and of March 10, 1932 in California.

**Macelwane J. B.** - Report of the Jesuit Seismological Association for 1933 [*Relatio sysmologica Societatis Jesu a. 1933*]. 2 maps, Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 62-64. Washington, D. C. (1934). **a - 1792**

Brief account of the work of the Jesuit Seismological Association, which is a voluntary organization of seismological stations which are owned and operated by the Jesuit universities and colleges in the United States, with especial mention of the determination of epicenters.

**Matuzawa T., Kanbara K. & Minakami T.** - Horizontal Movement of Water in the Tunami of March 3, 1933 [*De aquæ motu horizontali,* Tunami *perdurante, die 3 mensis Martii 1933*]. 4 figs., 1 diagr., Jap. Journ. Astron. & Geoph., XI, 1, 11-16. Tokyo (1933). **a - 1793**

Article of theory applied to practical examples. Discussion of results.

**McComb H. E.** - Strong-Motion Seismograph Equipment and Installations [*De instrumentis et constructionibus, observationibus maximorum terræmotuum peragendis*]. 10 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 268-272. Washington, D. C. (1933). **a - 1794**

Account of the development of accelerometers and tiltmeters used in the investigation of strong seismic motion carried out by the Coast and Geodetic Survey. Records obtained from accelerographs at three stations.

**Merritt G. E.** - Installation of Tiltmeters [*De constitutione cuiusdam inclinometri*]. 4 figs., Nat. Res. Counc. Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 65-69. Washington, D. C. (1934). **a - 1795**

Description of the design, installation and work of a tiltmeter designed at the Bureau of Standard ; the tiltmeter is an instrument for measuring changes of level, particularly such small changes in level that great magnification of some sort must be used to make them evident. The importance of the use of tiltmeters for the study of preseismic tilts is emphasized.

**Neumann Frank** - United States Earthquakes 1932 [*Terræmotus in Statibus Foederatis Americæ a. 1932*]. 4 figs., U. S. Govmt. Print. Off., Coast & Geod. Surv., Ser. nº 563, 23 pp. Washington, D. C. (1934). **a - 1796**

This publication is a summary of earthquake activity in the United States and the regions under its jurisdiction for the calender year 1932. Earthquake activity in the various states. Instrumental reports. Summary of instrumental results. Miscellaneous seismological activity : geodetic work, hydrographic work, tidal observations.

**Oddone Emilio** - Rapporto sull'attività esplicata dall'Italia nel triennio 1930-32 nel campo della sismologia [*Relatio de triennali activitate italica sysmologica (1930-32)*]. Rapp. sull'attività del Comitato naz. italiano per la Geodesia e la Geofisica nel triennio 1930-32, presentati alla V. Ass. gen. dell'Un. geod. e geof. intern. (Lisbona, 1933), 73-75. Padova (1933). **a - 1797**

Elenco delle principali pubblicazioni di sismologi italiani a partire dal 1930. Osservatori sismici italiani : loro attività e attrezzatura.

**Poulter Thomas C.** - The Seismological Program of the Byrd Antarctic Expedition II [*Ratio operum sysmologicorum inter secundam Expeditionem Antarcticam a* Byrd *susceptam peractorum*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, 316-317. Washington, D. C. (1933). **a - 1798**

Summary of the seismological program to be carried on, conditions permitting, during the stay of the Byrd Antarctic Expedition II at Little America on the Bay of Whales.

**Rappleye Howard S.** - First-Order Levelling as an Aid in Seismological Investigation in the United States [*Livellationes primi gradus ac auxilium inquisitionibus sysmologicis in Americæ Statibus Foederatis*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 69-72. Washington, D. C. (1934). **a - 1799**

The author points out the usefulness of any levelling in connection with investigations of earthquakes. On hand of practical examples of levelling made in California he shows that most of activity occurred in this region allows to lay foundations on which to base future work as earthquakes occur or as re-levelling is run in an effort to detect slow motions which may presage earthquake.

**Sanchez Pedro C.** (transl. by **J. L. Thomas**) - The Bay of Acapulco and Its Relation to the Earthquakes in the Southern Part of the Mexican Republic [*De baja* Acapulco *eiusque correlatione cum terræ motibus in regione meridionali Reipublicæ Mexicanæ*]. 3 maps., Nat. Res. Counc. Trans., Amer. Geoph. Union, 15th Ann. Meet., Part I, 83-91. Washington, D. C. (1934). **a - 1800**

After a discussion of the general ideas concerning the orogeny of the Mexican Republic, the author takes in consideration the range that formed the Bay of Acapulco and claims on hand of the results of his own observations and of those of Mr. de Lapparent, that the Bay of Acapulco is of tectonic origin and is intimately connected with seismic phenomena at least as far as the southern part of the Republic of Mexico is concerned.

**Scarpellini Antonio** - L'impianto di un sismografo « Agamennone » a pendoli orizzontali nell'Osservatorio di Fano [*De constitutione cuiusdam sysmographi* « Agamennone » *nomine, oscillis horizontalibus præditi, in Observatorio urbis* Fano]. Meteor. pratica, 5-6, 254-256. Perugia (1933). **a - 1801**

**Severit W.** - Die Anthropogeographische Bedeutung der Erdbeben [*De terræ motibus eorumque significationibus antropographicis*]. 1 carte, Matériaux pour l'Etude des Calamités, 30/31. Genève (1934). **a - 1802**

Le Dr. A. Severit donne, dans un long article, un utile résumé de la distribution des tremblements de terre dans ces derniers temps avec regard spécial à ceux qui ont produit plus des ravages. Une carte montre le nombre de ces calamités pendant le dernier siècle. Etude des mesures de prédiction.

**Steikhardt L.** - Erdbebentätigkeit am Westrand des Mittelmeers und ihre geologische Bedeutung [*De frequentia et momento terræ motuum in bacino occidentali maris Mediterranei*]. Geologie, 23 pp., Diss. Jena (1933). **a - 1803**

**Taber Stephen** - The Location of Earthquake Epicenters [*De epicentris terræ motuum recognoscendis*]. Science, LXXVIII, 2022, 283. New York (1933). **a - 1804**

**Tsuboi Chûji** - Investigation on the Deformation of the Earth's Crust Found by Precise Geodetic Means [*Investigationes in deformitatem corticis terrestris Geodesiæ auxilio*]. 143 figs., 60 tabl., Jap. Journ. Astron. Geophys., X, 2, 93-248. Tokyo (1933). **a - 1805**

Long, patient, detailed paper. All the possible measures have been taken and every examination and calculation have been made of vertical and horizontal deformations of the Earth's Crust.

**Visser S. W.** - Aardbevingen in Nederlandsch Indie [*Terræ motus in Indiis Hollandicis*]. Tijdschr. Kon. Ned. Aardr. Gen, Amsterdam, LI, 4, 629-630. Leiden (1934). **a - 1806**

Vorlesung mit Lichtbildern gehalten am 8. Mai in Utrecht. Regelmässige Registrierungen über Erdbeben liegen seit 1844 vor, von denen die schwersten in den letzten zwanzig Jahren erschienenen hier erwähnt sind. Besonders schwer heimgesucht sind die Randgebiete, die Küsten des Indischen Ozeans: Sumatra, Java und die kleinen Sunda-inseln, die Molukken und Celebes. Die meisten Bewegungen rühren aus dem Seeboden her.

**Williams Earl L.** - Earthquakes observed with a Telescope [*Terræ motus per telescopium observati*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 14th Nat. Meet., Apr. 27-29, 1933, 260-261. Washington, D. C. (1933). **a - 1807**

Brief account of the observations by means of the sensitive levels attached to the zenith-telescope of the International Latitude Observatory, Gaithersburg, Maryland, of earthquake-waves originated at a considerable distance.

**Wood Harry O.** - Note on the Long Beach Earthquake [*De terræ motibus in* Long Beach]. Science, LXXVIII, 2022, 281-283. New York (1933). **a - 1808**

Reports on the work carried on by the following countries: Denmark: Biology (Blegvad), plaice investigations, flounder and dab, cod and other cod Fishes, herring, mackerel and eel, larvae of spring spawning Fishes, bottom Invertebrates, plankton, water pollution, cod transplantations to the Limfjord, investigations concerning the disease of *Zostera marina*, causes of fluctuations in the yield of fisheries. Hydrography (Knudsen). Germany (Strodtman): plaice, flounder, dab, sprat, herring. Norway: Biology (Bjerkan & Dannevig). Sweden: Biology (Andersson & Molander), hydrography (Pettersson Hans).

**Borcea I.** - La Station Zoologique Marine « Regele Ferdinand I » d'Agigéa [*Statio zoologica marina nomine* Regele Ferdinand I *in* Agigéa]. 6 fig., Ann. Scient. Univ. Jassy, XIX, 1/4, I-XVI. Jassy (1934). **b - 13**

Intérêt biologique qui offre la Mer Noire en particulier au point de vue du problème de l'adaptation des espèces. La fondation du Laboratoire de Recherches Marines, pour lequel a été choisi un endroit très convenable. L'approbation et la visite de Sa Majesté le Roi Carol II. Programme des recherches concernant la biologie et la pêche.

**Borodin N.** - Report on Fishes [*Relatio de piscibus*]. Ann. Rep. Mus. Comp. Zoöl. Harvard College 1933-1934, 45-46. Cambridge, U. S. A. (1934). **b - 14**

Catalogue work. Research work on the anabiosis of Fishes (see Zool. Jahrb. Bd. 53, Abt. allg. Zool. u. Physiol., 313-342, 1934). New accessions. Loans. Visitors.

**Bowman Alexander** - Northern North Sea, 1932 [*Area septentrionalis Maris Nordici, a. 1932*] Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXV, 2ème partie, 23-31. Copenhague (1933). **b - 15**

Résumés of the work carried out in the northern North Sea area by the following countries: Denmark (Å. Vedel Tåning), England (F. M. Davis), France (Jean Le Gall), Germany (E. Ehrenbaum), Norway (Oscar Sund), Sweden (A. R. Molander), Scotland. Herring-Haddock-Plaice. Hydrography and Plankton.

**Brinkmann Aug.** - Bergens Museums biologiske stasjon [*De statione biologica ad* Bergens Museum *pertinente*]. Bergens Mus. Årsber. 1933-1934, 60-62. Bergen (1934). **b - 16**

Acquisition of a new motor for the research boat. Researchers and their works at the station; Visitors; Publications.

**Brunelli Gustavo** - La talassografia e la pesca [*Thalassographia et piscatus*] (III Corso magistrale marittimo peschereccio). 20 pp., Tip. A. Manuzio. Ist. Poligr. dello Stato. Roma (1933). **b - 17**

Obbiettivi della talassografia. Studio fisico e biologico del mare. Diffusione della vita nel mare ed equilibri biologici in rapporto all'industria della pesca. (Vedi anche: Boll. Pesca, Piscicolt. e Idrobiol., IX, 4, 587-604, Roma 1933).

**Buchanan-Wollaston H. J.** - Letter to the Editor [*Epistula ad editorem*]. Journ. Cons. Expl. Mer, IX, 3, 394-396. Copenhague (1934). **b - 18**

Reply to Dr. Ottestad's criticism of the A.'s paper (published in this Journal, Vol. IX, N. 2) on modern statistical methods.

**Buddenbrock (von) W.** - Bericht über die Arbeiten, die in den Jahren 1930-1933 im Auftrage der Deutschen wissenschaftlichen Kommission für Meeresforschung in Kiel und Schilksee ausgeführt wurden [*Relatio de operibus peractis a. 1930-1933 iussu Commissionis Scientificæ Germanicæ pro Oceanographia, in* Kiel *et* Schilksee]. 4 diagr., Ber. Dtsch. Wiss. Komm. Meeresf., N. F., VII, 3, 237-242. Leipzig (1934). **b - 19**

Eierzuchts- und Fütterungsversuche mit Schollen und Flundern. Weiterzucht der Junglarven. Schlussversuch mit Flundereiern. Studium der Physiologie des Blutes und der Atmung der Plattfische. Schollenüberpflanzung.

**Cerruti A.** - L'Istituto demaniale di Biologia marina di Taranto [*Institutum demaniale Tarentinum pro Biologia Marina*]. 6 fig., Riv. Biol., XV, 3/4, 386-390. Perugia (1933).

(—) 40 pp., 36 fig., 4 tav., Cressati. Taranto (1932).

(—) Recensione in: Int. Rev. Ges. Hydrobiol. u. Hydrogr., XXIX, 3/4, 293-294 (1933). **b - 20**

Distribuzione dei vari laboratori per ricerche di chimica-fisica riguardanti la biologia marina, per la chimica, per le indagini micrografiche, per la oceanografia. Altri locali per uso vario: acquari, laboratorio batteriologico, stanza per le bilancie di precisione, salone per le conferenze con proiezione, laboratorio parassitologico, ecc. Attrezzatura varia. Ricerche compiute e in corso.

**Clark Robert S.** - Northern North Sea, 1933 [*De area meridionali Maris Nordici, a. 1933*]. Rapp. Proc.-Verb. Cons. Expl. Mer, LXXXIX, 2ème partie, 28-36. Copenhague (1934). **b - 21**

Reports of the work carried out by the following countries: Denmark, England, France, Germany, Holland, Norway, Sweden, Scotland: Work at sea. Haddock. Herring. Plaice. Mesh of net experiments. Lemon Soles. Crabs and Lobsters. Plankton. Hydrography.

Conspectus circa recentiores inquisitiones in mare profundum*]. 16 Taf., vi + 144 S., Das Meer in Volkstüml. Darst., III, Hrsg. von Inst. für Meereskunde zu Berlin, unter Schriftleitung von Wüst Georg. Mittler und Sohn. Berlin (1934). **b - 22**

**Cowie J. J.** - Rapport sur les travaux de l'Office de Biologie Marine du Canada, Année 1931 [*Relatio de operibus ab* Office de Biologie Marine du Canada *peractis, a. 1931*]. II-ème Rapp. Ann. Minist. Pêch. Canada, 1931/32, Append. 2, 88-117. Ottawa (1933). **b - 23**

Exposé des travaux accomplis aux stations dépendant de l'Office de Biologie Marine, à voir: la Station Atlantique de Biologie à Saint-André, N. B., la Station Atlantique d'Expérimentations et d'Essais appliqués à la pêche, à Halifax, N. E., la Station Biologique du Pacifique à Nanaimo, C. B., et la Station Expérimentale de Pêche (Pacifique) à Prince-Rupert, C. B. Recherches de pêche, d'océanologie en général, de limnologie, pisciculture, maladies des Poissons, physiologie et anatomie des Poissons, manutention du poisson comestible, sur les Saumons, etc.

**Crossland Cyril** - The Red Sea Biological Station of the University of Egypt [*De Statione biologica Maris Rubri ad Universitatem aegyptianam pertinente*]. 1 fig., Nature, CXXXIV, 3393, 743-744. London (1934). **b - 24**

Advantages of the site selected to build this Station. Description of the buildings. Concrete tanks for breeding of several organisms. Equipment.

**Davis F. M.** - British Hake Research [*Inquisitiones britannicæ ad merlucium studendum*]. Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXVII, 54. Copenhague (1934). **b - 25**

Brief report on the two voyages of the « Georges Bligh » on hake research in July and August 1932. Continuation of marking experiments. Trial of a new technique of marking.

**De Buen Fernando** - Etudes biologiques dans la région du Guipúzcoa [*Studia biologica in regione nomine* Guipúzcoa *peracta*]. 3 fig., 1 table, Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXVII, 55-59. Copenhague (1934). **b - 26**

Dans la présente note l'A. donne l'aperçu d'une étude accomplie sur les Poissons habituels du plateau continental (dont il donne une liste) que l'on capture par les arts traînants, ainsi que des résultats de quelques observations réalisées sur terre pendant la croisière du « Xauen » ayant un caractère surtout statistique et se référant surtout au thon et à la biométrie de la sardine.

**Dieuzeide R.** - Le Professeur Louis Boutan (1859-1934) [*Prof.* Louis Boutan (*1859-1934*)]. 3 fig., Bull. Trav. Stat. Aquicult. et Pêche Castiglione, 1933, 1, 9-34. Alger (1934). **b - 27**

Sa vie, sa carrière, son activité scientifique. Liste de ses travaux concernant en particulier la biologie et la physiologie des Mollusques.

**Ege V.** - Johannes Schmidt, 1877-1933. C. R. Labor. Carlsberg, XX, 1. (1934). **b - 28**

**Ehrenbaum E.** - Southern North Sea, 1933 [*De area meridionali Maris Nordici, a. 1933*]. Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXIX, 2ème partie, 37-50. Copenhague (1934). **b - 29**

A) Work at Sea. Denmark, England, France, Germany, Holland and Scotland ; B) Fish. : I. General ; II. Cod and Haddock : Denmark, England, Germany, Scotland ; III. Herring (England, France, Germany, Holland, Scotland) ; IV. Plaice. General, statistics and ichthyometrics, age determination, quantity of the year-classes, rate of growth, marking experiments, transplantation ; V. Other fish ; VI. Shellfish ; C) Benthos and Deposits ; D) Plankton ; E) Hydrography.

**Gaarder Torbjørn** - Biokjemisk laboratorium [*De laboratorio biochimico*]. Bergens Mus. Årsber. 1933-1934, 71-72. Bergen (1934). **b - 30**

Lectures held. Examinations. Assistants. Investigations and expeditions. Publications.

**Galtsoff Paul S.** - The Mystery of the Ocean [*De oceano eiusque mysteriis*]. Scient. Monthly, August, 172-175. New York (1934). **b - 31**

The beginning of the science of oceanography back to the year 1522. Captain J. Cook, who made the first deep-sea soundings. The ingenious instruments invented for catching various organisms of the sea. The principal aims of the oceanography at present : determination of laws that control life in the ocean, ecology, description of new forms. Modern analyses of the sea water for studying its chemical constituents. Comparison between the elements found in sea water and those accumulated in the bodies of marine organisms. Present knowledge that supports the idea that fresh-water and land animals developed from marine forms.

**Gilson G.** - Combined North Sea and Eastern Channel Committee, 1932 [*Comitatus pro Mari Nordico et Freto Britannico occidentali, a. 1932*]. Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXV, 2ème partie, 20-22. Copenhague (1933). **b - 32**

I. Current work in the neighbouring areas: France, England, Germany, Holland, Belgium. Herring, sprat, Shrimps, young Fishes in coastal stage, destruction of young-fish, food of Fishes, hydrographical work ; II. Simultaneous work in the area : Meeting of workers specially engaged in herring problems in the transitional zone between Channel and North Sea ; simultaneous cruises for hydrographical and biological investigations.

**Gilson G.** - Combined North Sea and Eastern Channel Committee, 1933 [*Comitatus pro Mari Nordico et Freto Britannico, a. 1933*]. 1 table, Rapp. Proc.-Verb. Cons. Expl. Mer, LXXXIX, 2ème partie, 26-27. Copenhague (1934). **b - 33**

Proposals for the international co-operation. Outline of Current Work carried out in 1933, in the boundary region by the following countries : Belgium, England, France, Germany, Holland.

**Gran H. H.** - Plankton Committee, 1933 [*Comitatus pro plancton, a. 1933*]. Rapp. Proc.-Verb. Cons. Expl. Mer, LXXXIX, 2ème partie, 68-71. Copenhague (1934). **b - 34**

Belgium (by G. Gilson). Denmark (by Ove Paulsen) : Food of the herring. Faunistic work. Quantitative plankton researches. England. Résumé of plankton investigations carried out from the Plymouth Laboratory during 1933 (by Dr. Harvey). France (par Louis Fage). Germany. Hydrobiologische Abteilung des Zoologischen Staatsinstitutes in Hamburg (von E. Hentschel). Biologische Anstalt auf Helgoland (von A. Wulff). Irish Free State (by G. P. Farran). Norway. Report (by P. Bjerkan). Report on Phytoplankton work in 1933 (by Gran). Scotland (by R. S. Clark).

Sa carrière, ses études concernant divers groupes d'organismes marins.

**Gunther R. T.** - The Ray Society [*De Societate nomine* Ray]. Nature, CXXXIII, 3352, 127-128. London (1934). **b - 36**

History of the foundation ; members ; work and publications (concerning the various groups of organisms), editors and agents for sale.

**Hagmeier A.** - Die Arbeiten der Biologischen Anstalt auf Helgoland in den Haushaltsjahren 1930-1933 [*De operibus a* Biologische Anstalt *in* Helgoland *peractis a. 1930-1933*]. 2 Abb., Ber. Dtsch. Wiss. Komm. Meeresf., N. F., VII, 3, 145-212. Leipzig (1934). **b - 37**

A) Einleitung ; B) Die Beziehungen zwischen Fischbestand, Fischerei und Fischereiertrag : I. Die Untersuchungen über die Scholle und die Schollenfischerei. ; II. Untersuchungen über die Seezunge ; III. Kabeljau und Schellfisch des Barentsmeeres. C) Oekologische Untersuchungen auf verschiedenen Gebieten der praktischen Meeresforschung : I. Plankton und Fischbrut ; II. Sonstige Untersuchungen und Beobachtungen an Fischen ; III. Züchtungen und Experimente ; IV. Untersuchungen über den belebten und unbelebten Lebensraum : D) Forschungsfahrten. Methoden, Geräte : I. Die Unternehmungen auf See ; II. Die Methode der biologischen Marktuntersuchungen : III. Technik und Arbeitsweise an Bord. E) Anhang : I. Beteiligung an den Ostsee-Untersuchungen : II. Mitarbeiter. Uebersicht über die Untersuchungsfahrten und das Material 1930 bis 1933 ; IV. Verzeichnis der Veröffentlichungen.

**Heinrici C., Wulff A., Künne Cl. & Hagmeier A.** - Dem Andenken an Wilhelm Mielck 1878-1933 [*Necrologia* Wilhelm Mielck *1878-1933*]. Ber. Dtsch. Wiss. Komm. Meeresf., N. F., VII, 3, 117-144. Leipzig (1934). **b - 38**

Nachruf. Seine Tätigkeit als Meeresforscher und Forschungsreisender ist besonders mit dem Studium der Radiolarien, Plankton, Heringslarven sowie mit Fanggeräten und Verpflanzungen eng verknüpft. Folgt ein Verzeichnis seiner sämtlichen Veröffentlichungen.

**Hentschel E.** - Bericht über die Arbeiten der Hydrobiologischen Abteilung des Zoologischen Staatsinstitutes in Hamburg [*Relatio de operibus a sectione hydrobiologica Instituti biologici Hamburgensis peractis*]. 1 Karte, Ber. Dtsch. Wiss. Komm. Meeresf., N. F., VII, 3, 233-236. Leipzig (1934). **b - 39**

Vorbereitende Untersuchungen und Veröffentlichungen. Planktonforschungen während der Sommer 1932 und 1933 in den südisländischen Gewässern hauptsächlich in Bezug auf ernährungsbiologische Bedeutung.

**Hoffmeister J. Edward** - University of Rochester Fiji Expedition [*Expeditio ad insulas* Fiji *ab Universitate Rochesteriana peracta*]. Science, LXXX, 2065, 98. New York (1934). **b - 40**

Expedition organized for geological research in the Lau Islands of eastern Fiji. As a result excellent collections of fossil *Foraminifera*, Corals, Echinoids, Mollusks and other organisms have been obtained.

**Hollister Gloria & Beebe William** - Sample of Unedited Telephone Notes from Dive thirty-two [*Communicationes thelephonicæ inter immersionem N. 32*]. 1 fig., Bull. New York Zool. Soc., XXXVII, 6, 188-189. New York (1934). **b - 41**

Mr. Beebe gives a telephonic communication nearly every minute about all that he sees during his dive from 2450 to 2600 feet from 11.00 to 11.34.28 A. M.

**Huntsman A. G.** - Biological Board of Canada, East Coast of Canada, 1933. Trans. Amer. Geoph. Union, 15th Ann. Meet., Nat. Res. Counc., Part I, 227. Washington, D. C. (1934). **b - 42**

Brief account of the work performed by the Biological Board of Canada during the summer of 1933, which consisted in repeating the oceanographic observations made in the Halifax area in 1932; work carried out in Passamaquoddy Bay and adjacent estuaries in order to follow the effect of a freshet discharge through an estuary. Observations made during the winter season.

**Iselin C. O.** - Institutions on the Atlantic Side of Canada and the United States. Introduction [*Instituta ad regionem atlanticam canadensem et Americæ Status Foederatos pertinentia. Introductio*]. Trans. Amer. Geoph. Union, 15th Ann. Meet., Nat. Res. Counc., Part I, 225-226. Washington, D. C. (1934). **b - 43**

Very brief account of the physical investigations in progress during 1933. List of major Institutions information has been received from, located on or near the Atlantic seaboard. List of a number of smaller Laboratories primarily engaged in biological and physiological researches.

**Issel Raffaele** - Progressi e mete della biologia marina [*De biologia marina eiusque progressibus et propositis*]. Scientia, LIII, III, 6, 394-404. Bologna (1933). **b - 44**

Metodi e indirizzi di ricerca considerati in rapporto al delinearsi delle vedute sintetiche e in collegamento ai risultati delle scienze affini. I tre modi di esistenza degli organismi nel mare in rapporto al fondo e alla maggiore o minore autonomia di movimento: bentos, plancton, necton. Migrazioni, addensamenti, cicli biologici in rapporto a cicli analoghi dimostrabili nell'andamento di taluni fenomeni idrografici e meteorologici, a loro volta legati a ricorrenze d'indole cosmica.

**Jespersen P. & Tåning Vedel Å.** - Foreword (Introduction to the Reports from the Carlsberg Foundation's Oceanographical Expedition round the World 1928-30) [*Præfatio.* (*Introductio in relationes expeditionum oceanographicarum per orbem a. 1928-30 a Fundatione* Carlsberg *peractarum*)]. 1 photo, 6 tabl., Carlsberg Foundation's Oceanogr. Exped. round the World 1928-30 and previous « Dana » - Exped., Dana-Rep., 1, 7-16. Copenhagen & London (1934). **b - 45**

List of Expeditions under the leadership of Prof. Schmidt with a special reference to the Eel investigations. The tables contain: List of ports called at, anchoring places etc. during the Expedition; summarized list of Stations 1928-30, number of horizontal hauls with stramin-nets and ringtrawl in different depths and various areas, number of hauls with Nansen closing-net, number of stations with hydrographical observations and number of echo-soundings.

A brief reference of Schmidt's work.

**Le Danois Ed.** - Plateau Continental Atlantique, 1932 (Atlantic Slope) [*Planities continentalis atlantica, a. 1932*]. 1 table, Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXV, 2ème partie, 19-20. Copenhague (1933). **b - 48**

Bref compte rendu des croisières effectuées par les soins des Gouvernements de France, d'Espagne, de Grande-Bretagne, d'Irlande et du Portugal.

**Le Danois Ed.** - Plateau Continental Atlantique (Atlantic Slope) [*Planities continentalis atlantica*]. Rapp. Proc.-Verb. Cons. Expl. Mer, LXXXIX, 2ème partie, 24-25. Copenhague (1934). **b - 49**

Rapport sur les croisières effectuées par les soins des Gouvernements d'Espagne, de France, de Grande-Bretagne, d'Irlande et du Portugal.

**Le Danois Ed.** - Rapport sur le fonctionnement de l'Office des Pêches maritimes pendant l'année 1933 [*Relatio de activitate peracta ab* Office des Pêches maritimes *a. 1933*]. Rev. Trav. Off. Pêch. Marit., VII, 1, 9-25. Paris (1934). **b - 50**

I. Fonctionnement général de l'office: Navire océanographique. Laboratoire de Biarritz. Recherches sur les pêches marocaines; II. Océanographie et biologie: Recherches hydrologiques. Recherches sur la hareng et le maquereau. Recherches sur la sardine. Recherches sur les Poissons de chalut; III. Recherches techniques: Etudes frigorifiques. Recherches techniques sur les conserves; IV. Recherches de biologie ostréicole et conchylicole: Commission consultative des Etablissements de pêche. Commission supérieure de salubrité. Contrôle sanitaire ostréicole; V. Conseils internationaux: Conseil international pour l'Exploration de la mer. Commission internationale pour l'Exploration scientifique de la mer Méditerranée.

**Lillie Frank R.** - Gilman A. Drew. 1868-1934. Science, LXXX, 2082, 470-471. New York (1934). **b - 51**

His work at the Marine Biological Laboratory over a period of twenty-five years from 1901 to 1926. His very important study of the breeding mechanisms and behavior of the squid *Loligo*.

**Lillie Frank R.** - Decennial Review of the Work of the Marine Biological Laboratory [*Relatio decennalis de operibus peractis a Laboratorio*

*pro Biologia marina*]. 2 figs., Scient. Monthly, October, 377-380. New York (1934). **b - 52**
Report presented at the meeting of the Committee of Review on July 21, 1934 concerning the work accomplished by the Laboratory during ten years. Members of the Committee; endowment funds.

**Manfredi P.** - Gli stabilimenti ittiogenici italiani [*De oficinis ichthyogenicis italicis*]. 6 fig., Pesca e Piscicolt., I, 6, 6-8. Milano (1933). **b - 53**
L'A. illustra brevemente le due stazioni ittiogeniche di Brescia e di Roma, trasformate dal 1921 in Stabilimenti Ittiogenici.

**McLean Fraser C.** - Report on Oceanography in British Columbia for the Year 1932 [*Relatio de oceanographia in Columbia Britannica a. 1932*]. Trans. Amer. Geoph. Union, 14th Ann. Meet., Nat. Res. Council, 222-224. Washington, D. C. (1933). **b - 54**
Work centered at the Biological Station at Nanaimo, which has been particularly concerned with oceanographic investigation of the Strait of Georgia. Progress in the work on the food value of marine species and other physico-chemical investigations. Biological problems: life-history studies, faunistic studies, other biological problems. Fisheries Experimental Station at Prince Rupert: vitamin assays, fish oils, freezing and cold storage, fish spoilage, nutritive value of canned salmon. Hydrographic survey. Meteorological Office.

**McMurrich J. Playfair** - Annual Report of the Biological Board of Canada [*Relatio annua de operibus a* Biological Board of Canada *peractis*] (In Engl. & French). Ann. Rep. Biol. Board Canada, 1933, 3-4 & 121-123. Ottawa (1934). **b - 55**
Membership of the Board; summary of the research carried on at the four Stations maintained by the Board.

**Meyer K.** - Report on Works of the Expedition for the Exploration of the Iodine-Bearing *Algæ* along the White Sea and Murman Coast, Organized by the State Oceanographical Institute in 1931 [*Relatio de operibus peractis, perdurante expeditione ab Instituto Oceanographico ad Statum pertinenti constituta, ad explorandum et inquirendum in algas quæ jodium continent præter litora maris Albi et regionis* Murmansk] (In Russ. & Engl.). Trans. Oceanogr. Inst., III, 3, 5-6. Moscow (1933). **b - 56**
Causes which induced the Union of the Chemical and Pharmaceutical Industry to organize the expedition. Résumé of the program of the work made.

**Mielck W.** - Southern North Sea, 1932 [*De area meridionali Maris Nordici, a. 1932*]. 3 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXV, 2ème partie, 31-49. Copenhague (1933). **b - 57**
Preliminary. Work at sea: Belgium, Denmark, England, Germany, Holland, Norway, Scotland. Fish: Statistics and ichthyometrics. Littoral fishing. Eggs and larvae. Food of Fishes. Marking experiments. Experiments on the catching power and sparing quality of fishing gear. Methods. Cod and haddock. Herring. Other fish: mackerel, sole, sprat, tunny, gurnards; VI. Shellfish: periwinkle, *Pecten maximus*, oyster, lobster. Benthos and deposits. Plankton. Hydrography.

**Parr A. E.** - Investigations in Coöperation with the Bingham Oceanographic Foundation of Yale University [*Inquisitiones, consociata opera peractæ, a Fundatione oceanographica* Bingham *nomine ad Universitatem urbis* Yale *pertinente*]. Woods Hole Oceanogr. Instit., Rep. 1933, App., 27-28. Woods Hole, Mass. (1934). **b - 58**
Brief account of the three coöperative series of investigations started during 1933: (1) an oceanographic survey of the Central American Seas; (2) a quantitative and biological study of the Sargasso weeds and their associated animal life, and (3) taxonomic and distributional studies of deep sea Fishes.

**Playfair J.** - Sommaire du Rapport sur les travaux de l'Office de Biologie du Canada en 1932 [*Summarium relationis de operibus ab* Office de Biologie du Canada *peractis, a. 1932*]. 3-ème Rapp. Annu. Pêch. Canada, 1932-33, App. 2, 86-88. Ottawa (1934). **b - 59**
Constitution du personnel de l'Office. Résumé des travaux exécutés aux quatre Stations exploitées par l'Office, à voir: la Station de biologie de St. André, de Nanaimo, de Halifax, N. E. et de Prince-Rupert, C. B.

**Ranzi Silvio** - L'opera scientifica di Paolo Enriques [*Paulus* Enriques *eiusque opera scientifica*]. Atti Pont. Accad. Sc. N. L., LXXXVI, sess. VII, 383-397. Roma (1933). **b - 60**
Paolo Enriques era nato a Livorno il 17 agosto 1878, è morto a Roma il 26 dicembre 1932. Si laureò in scienze naturali a Bologna nel 1901, fu professore di Zoologia e Anatomia comparata a Sassari dal 1917, prima incaricato, poi di ruolo, poi fu professore di Zoologia a Padova nel 1921. Aveva avuto il premio Pio XI dell'Accademia delle Scienze Nuovi Lincei nel 1931. Viene illustrata la sua opera scientifica e dato l'elenco delle sue pubblicazioni.

**Ranzi Silvio** - L'attività della Stazione Zoologica di Napoli nel 1932 [*Relatio de activitate Stationis Zoologicæ Neapolitanæ*]. Riv. Fis., Matem. e Sc. Natur., VIII, 1, 11-22. Napoli (1933). **b - 61**
La vasta opera scientifica realizzata dalla Stazione Zoologica di Napoli, in conformità alle sue tradizioni. Scienziati e giovani ricercatori che l'hanno frequentata nell'ultimo triennio (1930-32). Importanza biologica degli argomenti trattati, che comprendono ricerche di sistematica e biologia animale, zoologia generale, embriologia descrittiva e morfologica, embriologia sperimentale, fisiologia dell'embrione, rigenerazione, accrescimento e problemi connessi, fisiologia, psicologia sperimentale, zoologia applicata, botanica. Segue un elenco degli estratti della Monografia « Uova, larve e stadi giovanili di Teleostei », dei lavori apparsi nelle Pubblicazioni della Stazione Zoologica di Napoli e dei lavori, non pubblicati dalla Stazione, ma facenti parte delle ricerche da essa sussidiate ovvero pubblicate dal suo Personale.

**Ranzi Silvio** - La Stazione Zoologica di Napoli [*De Statione Zoologica Neapolitana*]. 2 foto., Scuola Superiore, I, 11, 620-623. Roma (1934). **b - 62**
L'A. illustra uno dei centri di studi biologici più importanti del mondo.

**Richard J.** - Liste générale des stations des Campagnes Scientifiques du Prince Albert de Monaco avec notes et observations [*Index generalis stationum, perdurantibus expeditionibus scientificis ab Alberto* Prince de Monaco *peractis. Notæ et observationes*]. 8 pl., Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXIX, 1-348. Monaco (1934). **b - 63**
Liste générale des Stations (1885-1915): numéro de Station, date, localité, profondeur en mètres, nature du fond, procédé de récolte, observations. La liste est suivie par des notes et des observations sur chaque station. Hors texte ont été publiées 3 cartes: VII) Itinéraires du yacht « Princesse Alice » dans la Méditerranée et dans l'Océan Atlantique Nord de 1900 à 1905 inclus; VIII) Itinéraires des yachts « Princesse Alice » et « Hirondelle » dans la Méditerranée, l'Océan Atlantique Nord et l'Océan Glacial Arctique de 1906 à 1912 et 1914; IX) Itinéraire du yacht « Hirondelle » dans la Méditerranée et l'Océan Atlantique Nord en 1913 et 1915.

**Richard J.** - Sur la dernière campagne scientifique du yacht « Princesse Alice » [*De ultima navigatione scientifica pamphilii* « Princesse Alice » *nomine*]. Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXIX, 376-380. Monaco (1934). **b - 64**

L'A. donne une idée générale des récoltes zoologiques faites pendant cette campagne (1895), au moyen des notes prises sur place et de l'examen qui a pu être fait de quelques sujets remarquables.

**Richard J.** - Campagne scientifique de la « Princesse Alice » en 1901 [*De navigatione scientifica phamphilii* « Princesse Alice » *nomine a. 1901*]. Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXIX, 381-401. Monaco (1934). **b - 65**

L'A. n'insiste dans ce travail que sur la partie zoologique des travaux en passant en revue les opérations les plus intéressantes faites au cours de la dernière campagne. Observations sur les espèces recueillies aux différentes stations au moyen de chalut, nasse, barre à fauberts, palancres, trémails, filet Giesbrecht modifié. Faune de la surface. Physiologie et bactériologie. Etudes diverses.

**Richard J.** - Campagne scientifique du yacht « Princesse Alice » en 1902 [*De navigatione scientifica pamphilii* « Princesse Alice » *nomine a. 1902*]. Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXIX, 401-415. Monaco (1934). **b - 66**

Description de trois nouveaux instruments employés pour la première fois pendant cette campagne : une nasse à trémails inventée par le Prince ; un sondeur à long tube et des nouvelles bouteilles à eau, disposées en série verticale. L'A. n'insiste que sur la partie zoologique des travaux poursuivis et s'occupe plus particulièrement des Poissons, des Stellérides, des Alcyonaires, ainsi que d'un certain nombre d'espèces d'autres groupes, y compris les Cétacés.

**Richard J.** - Campagne scientifique du yacht « Princesse Alice » en 1903. Observations sur la sardine, sur le plancton, sur le Cétacés, sur des filets nouveaux, etc., etc. [*De navigatione scientifica pamphilii* « Princesse Alice » *nomine a. 1903. Observationes de sardinia, plancton, Cetaceis, retibus novis, etc.*]. Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXIX, 416-432. Monaco (1934). **b - 67**

Observations sur les espèces recueillies aux différentes stations au moyen de : chalut à étriers, chalut à plateaux, nasse, palancre, trémails de fond, trémails de surface, filets à Sardines, filet fin vertical, filet bathypélagique de Giesbrecht, filet à large ouverture, filet fin étroit, petit filet Hansen, haveneau. Une partie spéciale est dédiée aux Cétacés.

**Richard J.** - Campagne scientifique du yacht « Princesse Alice » en 1904. Observations sur le faune bathypélagique, etc. [*De navigatione scientifica pamphilii* « Princesse Alice » *nomine a. 1904. Observationes de fauna bathypelagica, etc.*]. Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXIX, 432-449. Monaco (1934). **b - 68**

Observations sur les espèces recueillies aux différentes stations au moyen de : chalut à étriers, chalut à plateaux, nasses, palancre et lignes de fond, trémail de surface, ligne de traîne, filet à large ouverture, filet fin étroit, haveneau. Une partie spéciale est dédiée aux Cétacés.

**Richter Rud** - Unserm Freunde Dr. F. A. Bather († 20.3.34) [*Necrologia Dr. F. A.* Bather († *20/3/34*)]. 1 Photo., Natur u. Volk, LXIV, 6, 241-242. Frankfurt a. M. (1934). **b - 69**

Dr. F. A. Bather, korr. Ehrenmitglied der Senckenbergischen Gesellschaft, als der angesehenste Kenner der vorweltlichen Echinodermen anerkannt.

**Roule Louis** - Le Biologiste Océanographe Docteur Johs. Schmidt (1877-1933). Sa carrière et son oeuvre [*Doctor* Johs. Schmidt (*1877-1933*), *biologus oceanographus. Agitur de eius curriculo et operibus*]. 4 fig., Bull. Trav. Stat. Aquicult. et Pêche Castiglione 1932, 2, 103-121. Alger (1934). **b - 70**

Sa biographie. Sa carrière d'explorateur scientifique, ses croisières, son étude très remarquable sur la biologie de l'Anguille.

**Russell E. S.** - Johnstone and the Philosophy of Biology [*De philosophia scientiæ biologicæ apud* Johnstone]. James Johnstone Mem. Vol., 12-21. Liverpool (1934). **b - 71**

In the present article the author considers in some detail Johnstone's last book « The Essentials of Biology », which summarizes in compact form his matured reflections upon the nature and evolution of life.

**Seurat L. G.** - VII$^{e}$ Assemblée plénière de la Commission Internationale pour l'exploration scientifique de la Mer Méditerranée (Naples, 22-25 Octobre 1933) [*VII.$^{us}$ Consessus plenarius Commissionis internationalis Mari Mediterraneo ex scientia explorando.* (*Neapoli a 22 ad 25 octobris 1933*)]. 1 fig., Bull. Trav. Stat. Aquicult. et Pêche Castiglione 1932, 2, 211-231. Alger (1934). **b - 72**

Liste de membres qui ont participé à cette assemblée. Conférences scientifiques relatives à la biologie de l'esturgeon et la valeur alimentaire du poisson de mer. Questions à l'étude. Excursions.

**Siedlecki M.** - Salmon and Trout Committee 1933 [*Comitatus salmonis tructaeque studendae, a. 1933*]. Rapp. Proc.-Verb. Cons. Expl. Mer, LXXXIX, 2-ème partie, 72-76. Copenhague (1934). **b - 73**

The investigations carried out concern mainly the character of the different populations of the Salmon and Sea Trout and their migrations, their biology during the riverlife and the life in the sea, the value of the scale reading for the determination of biological qualities of different populations, and the natural and artificial propagation of these species. The countries concerned are : Denmark, England, Finland, Germany, Irish Free State, Latvia, Poland, Scotland, and Sweden.

**Steuer Ad.** - Das neue Marine Laboratory in Alexandrien (Aegypten) [*De novo quodam Laboratorio Marino in Alexandria*]. Int. Rev. ges. Hydrobiol. u. Hydrogr., XXX, 3/4, 383. Leipzig (1934). **b - 74**

Kurze Notiz über das im Frühjahr 1931 beim Fort Kayed Bey eröffnete staatliche Institut für Meeresforschung.

**Stott F. C.** - The Oxford University Expedition to Spitsbergen, 1933. Appendice IV : Marine Biology [*De expeditione ad* Spitsbergen *ab Universitate Oxoniana peracta a. 1933. Appendix IV$^{a}$: Biologia Marina*]. Geogr. Journ., LXXXIV, 2, 126-127. London (1934). **b - 75**

Summary of the results of hydrographic observations, consisting in 240 sea temperature and 117 salinity determinations, 94 phosphate determinations, and observations on the vertical circulation made in the region at the head of Klaas

Billen Bay which has a typical fjord formation. The results of about 50 tow-nettings are reported for the study of the plankton, as well as those of observations on benthos, seal, and fish: *Leptoclinus maculatus*, *Liparis liparis*, *Myxocephalus scorpius*, *Boreogadus saida*.

**Strodtmann S. & Kändler R.** - Die Arbeiten der Ostseeabteilung Hamburg in den Jahren 1930-1933 [*De operibus a sectione hamburgensi Maris Baltici peractis a. 1930-1933*]. Ber. Dtsch. Wiss. Komm. Meeresf., N. F., VII, 3, 269-318. Leipzig (1934). **b - 76**

I. Allgemeine Uebersicht sowie Zielsetzung der Arbeiten; II. Forschungsfahrten während der Berichtsjahre; III. Einzelergebnisse der Untersuchungen in den Berichtsjahren: *a*) Untersuchungen über den Jungfischbestand im Oderbankgebiet; *b*) Untersuchungen auf den Laichgebieten; *c*) Rassenkundliche Untersuchungen; *d*) Bastardbildung zwischen Scholle und Flunder; *e*) Wachstumsstudien. Veröffentlichungen in den Jahren 1930-1933.

**Sund Oscar** - North-Eastern Area, 1932 [*De area nord-occid., a. 1932*]. Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXV, 2-ème partie, 12-14. Copenhague (1933). **b - 77**

Account of the biological and hydrographical work carried out by the following countries represented in the Committee: England, France, Denmark, Scotland, Norway. Marking of fish. Russian cod marking. Other investigations: cod, herring, sprat, haddock.

**Sund Oscar** - Reports of Area Committees. North-Eastern Area, 1933 [*Relationes Comitatuum Sectionum variarum et diversarum. Area nord-orient., a. 1933*]. Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXIX, 2-ème partie, 15-17. Copenhague (1934). **b - 78**

Information on the work carried out by the following countries: Denmark (by Dr. Å. Vedel Tåning), England (by Dr. E. S. Russell), France (by Dr. Ed. Le Danois), Germany (by Dr. H. Lübbert), Norway (by Mr. O. Sund). Investigations at Bear Island, Spitzbergen and Barents Sea. Investigations on cod, herring, haddock, sprat, lobster, oysters, prawn (*Pandalus*). Scotland (by Dr. R. S. Clark). Publications in 1933: German, Norwegian.

**Tåning V. Å.** - North-Western Area, 1932 [*Area nord-occid., a. 1932*]. Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXV, 2-ème partie, 15-18. Copenhague (1933). **b - 79**

Account of the various works carried out by various countries belonging to the Committee (France, Germany, Norway, Denmark) with especial reference to hydrographical and plankton investigations.

**Tåning V. Å.** - Reports of Area Committees. North-Western Area 1933 [*Relationes Comitatuum sectionum variarum et diversarum. Area nord-occid., a. 1933*]. 1 table, Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXIX, 2-ème partie, 18-24. Copenhague (1934). **b - 80**

Information on the work carried out by the following countries: Denmark: Investigations by the research vessel « Dana » at the Faroes, Iceland, Denmark Strait, Greenland. Whales. Racial investigations. Reformation of the method used in age-determination of cod from the otoliths. Plankton investigations. Hydrography. England. France, Germany: Biology, hydrography. Norway. Scotland: Cod and Haddock. Plankton. Hydrography.

**Vaughan T. Wayland** - Oceanographic Research at the Scripps Institution of Oceanography [*Inquisitiones oceanographicæ in* Scripps Institution of Oceanography *peractæ*]. 1 table, Trans. Amer. Geoph. Union, 15th Ann. Meet., Nat. Res. Counc., Part I, 222-225. Washington, D. C. (1934). **b - 81**

Improvements. Expeditions and oceanographic data. Physical oceanography and marine meteorology. Chemistry. Microbiology. Phytoplankton. *Foraminifera*. Physiology of marine Invertebrates. Fish biology. Marine bottom-deposits.

**Ward Henry B.** - The Berkeley Meeting of the American Association for the Advancement of Science [*Conventus in* Berkeley *Societatis Americanæ pro Scientiarum progressibus*]. Science, LXXX, 2064, 43-62. New York (1934). **b - 82**

Some hints of previous meetings of 1915 (San Francisco), 1925 (Portland, Oregon) and of the third meeting on the Pacific Coast, the eighty-eighth meeting of the association, 1931 (Pasadena, Calif.). The Berkeley meeting (1934) was the ninety-fourth meeting of the association. There were 15 sections and 37 societies presenting programs on this occasion. All the meetings on the west coast have been held in conjunction with the Pacific. The Pacific Division had been most active and agreed to join with the association in 1937 in Denver.

**Wetmore Alexander** - Part 2. Report on the Progress and Condition of the United States National Museum for the Fiscal Year ended June 30, 1933 [*IIa Pars. Relatio pro anno fiscali hexitum habente die 30 mensis Junii 1933 de progressibus et condicionibus præsentibus Musei Nationalis ad Americæ Provincias Foederatas pertinentis*]. Rep. U. S. Nat. Mus., 1933, 69-86. Washington, D. C. (1933). **b - 83**

Operations for the year; Appropriations; Collections; Explorations and field work; Educational work; Visitors; Publications; Library; Photographic laboratory; Buildings and equipment; Meetings and receptions; Changes in organization and staff.

**Wheeler J. F. G.** - Bermuda Biological Station [*De Statione Biologica in insulis Bermudis*]. Trans. Amer. Geoph. Union, 15th Ann. Meet., Nat. Res. Counc., Part I, 231-232. Washington, D. C. (1934). **b - 84**

Drift-bottle work. Temperature measurements. Tide-gauge. Biological work.

**Wiese W.** - La Seconde expédition antarctique de « Discovery II » (1931-1933) [*De altera expeditione antarctica navis* « Discovery II » (*1931-1933*)] (En russe). 1 carte, Bull. Arct. Inst., 11, 362-364. Leningrad (1933). **b - 85**

Quelques informations plus précises (v. « Bull. Arct. Inst., 3/4, 58-60, 1931, 7, 8 et 9/10, 1931) sur l'expédition de « Discovery II » que l'on peut considérer comme l'entreprise la plus grandiose parmi les expéditions pour l'exploration des mers polaires en ce qui concerne la superficie de la région explorée et l'importance des travaux scientifiques exécutés. Recherches biologiques et hydrologiques.

**Wulff A., Bückmann A. & Künne Cl.** - Bericht über die Teilnahme an einer Fischereischutzfahrt der « Weser » zu Untersuchungen über die Verbreitung der Heringslarven in der südlichen Nordsee und dem Kanaleingang. 7. November bis 15. Dezember 1933 [*Relatio de operibus navi* Weser *peractis perdurante expeditione scientifica ad inquirendum in distributionem larvarum aringorum per Mare Nordicum merid. et accessum Freti Britannici, a die 7 Novembris ad diem 15 Decembris 1933*]. 3 Abb., Ber. Dtsch. Wiss. Komm. Meeresf., N. F., VII, 3, 328-342. Leipzig (1934). **b - 86**

1. Aufgaben; 2. Teilnehmer; 3. Verlauf der Fahrt; 4. Hydrographie und Oberflächenplankton; 5. Die Verbreitung des Grossplanktons; 6. Verbreitung und Häufigkeit der Heringslarven; 7. Sonstige Fischbrutfänge.

**Biologic Board of Canada** - Pacific Biological Station, Nanaimo, B. C., 1933. Ann. Rep. Biol. Board Canada, 1933, 59-70. Ottawa (1934). **b - 87**

List of the members of the staff and voluntary investigators at the Station during 1933. Brief account of investigations carried forward and concerned with fish culture, propagation of sockeye salmon, of pink salmon, of trout, with pathology and ocean fisheries, with shellfish, oceanography; report of the work in the field of analysis and food values of British Columbia fish, of physiological investigation; of the studies of the fauna of the Pacific coast. Educational activity of the Station. Fifth Pacific Science Congress. Publications based in whole or in part on work carried out at the Pacific Biological Station at Nanaimo, B. C.

**Carlsberg Foundation's Oceanographical Expedition round the World 1928-30 and previous « Dana » Expeditions** - List of Stations [*Index stationum*]. tabl., 7 pl., Introd. Rep. Carlsberg Foundation's Oceanogr. Exped. round the World 1928-30, Dana-Rep., 1, 17-78. Copenhagen & London (1934). **b - 88**

Station Nr., date, hour, position, depth, weather, wind, sea, temperature, gear, revolutions, duration and direction of hauls for the different seas crossed. Indications of depths from which the sea water samples have been taken. Additional collections of surface-plankton.

**Commission Internationale pour l' Exploration Scientifique de la Mer Méditerranée** - Rapport administratif [*Relatio ad administrationem pertinens*]. Rapp. Pr.-Verb. Comm. Expl. Scient. Méditerranée, VIII, 5-58. Paris (1934). **b - 89**

Rapport du Secrétaire Général. Composition du Bureau, des Commissions Nationales et du Personnel du Secrétariat. Procès-verbaux des Séances de l'Assemblée Pleinière et du Bureau Central, tenues à Naples en 1933. Compte administratif du budget. Annexes: I. Lettre de S. E. l'Ambassadeur de la République Espagnole.

**Commission Internationale pour l' Exploration Scientifique de la Mer Méditerranée** - Liste officielle des Services, Institutions et Etablissements scientifiques recevant les Publications de la Commission Internationale de la Méditerranée [*Index publicus Munerum, Institutionum, Laboratoriorum scientificorum quæ publicationes redactas a* Comm. Int. Expl. Scient. Médit. *recipiunt*]. Rapp. Pr.-Verb. Comm. Expl. Scient. Méditerranée, VIII, 329-334. Paris (1934). **b - 90**

**Conseil International pour l' Exploration de la Mer & Commission Internationale pour l' Exploration Scientifique de la Mer Méditerranée** - Conférence d'experts pour l'examen des méthodes scientifiques et techniques à appliquer à l'étude des Poissons de la famille des Thonidés [*Conferentia peritorum ad methodus scientificas et technicas pro studio Thunnidarum examinandas*]. Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXIV, Rapp. Atlant. 1932, 92-103. Copenhague (1933). **b - 91**

Composition du Comité convoqué à Madrid et à Cadiz sur invitation du Gouvernement Espagnol du 16 au 22 Mai 1932. Compte rendu des travaux. Programme provisoire des travaux de la Conférence. Nomenclature des Thonidés. Méthodes de marquage. Caractères ichthyométriques. Croissance du thon. Statistiques. Méthodes de pêche. Germon. Systématique des Thonidés. Séance de clôture.

**Conseil Permanent International pour l' Exploration de la Mer** - Rapports et procès-verbaux des Réunions. Procès-Verbaux (Mai 1933) [*Relationes et Acta scripta Consessuum. Pars I.ª Acta scripta* (*Mense Majo 1933*)] (Edition franco-anglaise). Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXV, I-ère partie, 4-60. Copenhague (1933). **b - 92**

Procès-verbaux des réunions du Conseil: Vingt-sixième réunion, Paris, Mai 1933: Bureau, tableau des membres, etc. Ordre du jour de la réunion. Procès-verbal de la séance du 8 Mai à 11 h. a. m., id. à midi. id. de la séance du 13 Mai à 2 h. 30 p. m., id. à 3 h. p. m. Statuts et Règlement particulier concernant le Bureau du Conseil International. Budget du Conseil pour 1933-34. Liste des Comités. Recommandations du Comité Consultatif. Programmes et Rapports des Comités des Secteurs: Comité du Secteur Nord-Est, id. Nord-Ouest, id. du Plateau Continental Atlantique, id. de la Mer du Nord, id. du Secteur de Transition, id. de la Baltique. Programmes et Rapports des autres Comités: Comité Hydrographique, id. du Plankton, id. Statistique, id. du Saumon et de la Truite, id. de la Baleine, id. Editorial.

**Conseil Permanent International pour l' Exploration de la Mer** - Rapport administratif (1932-1933) [*Relatio ad administrationem pertinens*]. Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXV, 2-ème partie, 3-11. Copenhague (1933). **b - 93**

I. General: Composition of the International Council for the Exploration of the Sea. Composition of the Bureau. Committees. Audit of Accounts. Meetings; II. Work of the Office at Copenhagen: A. Publications; B. Hydrographical Department; C. Statistical Department. Appendix I. Report on Meeting of Shellfish Experts at Middelburg, 20th-22nd September, 1932. Appendix II. Meeting of Herring Experts at Lowestoft. 11th October 1932. Appendix III. Conférence d'Experts pour l'examen des méthodes scientifiques et techniques à appliquer à l'étude des Poissons de la famille des Thonidés.

**Conseil Permanent International pour l' Exploration de la Mer** - Report of Administration 1933-1934 [*Relatio ad administrationem pertinens*]. Rapp. Proc.-Verb. Cons. Expl. Mer, LXXXIX, 2-ème partie, 3-14. Copenhague (1934). **b - 94**

Composition of the Intern. Council for the Explor. of the Sea. Balance. Meetings. Work at the Office at Copenhagen: Publications, Hydrographical Dpt., Statistical Dpt. 3 Appendices concerning Regulations for administration, meetings of salmon, trout, and cod experts.

**Conseil Permanent International pour l'Exploration de la Mer** - Report of the Meeting of Salmon and Trout Experts in Poland, October 1933 [*Relatio de congressu quodam speciali peritorum salmonis et tructæ in Polonia habito, oct. 1933*]. Rapp. Pr.-Verb. Cons. Expl. Mer, XCI, 3-10. Copenhague (1934). **b - 95**

Experts appointed by the Salmon and Trout Committee. Proceedings. Reports. Recommendations.

**Marine Biological Laboratory** - Thirty- Sixth Report for the Year 1933, Forty-Sixth Year [*Relatio XXXVIª pro a. 1933, a fundatione a. XLVIus*]. Biol. Bull., LXVII, 1, 1-44. Lancaster, Pa. (1934). **b - 96**

Trustees and executive Committee. Library Committee. Act of Incorporation. By-laws of the Corporation. Report of the Treasurer. Report of the Librarian. Report of the Director. Statement. Addenda. The staff; Investigators and Students; Tabular view of Attendance; Subscribing and cooperating Institutions; Evening lectures; Shorter scientific papers; Members of the Corporation.

**Museum of Comparative Zoölogy** - Publications for the year 1933-1934 (1 August, 1933 - 31 July, 1934) [*Publicationes a. 1933-1934* (*1* *mensis Augusti 1933 - 31 mensis Julii 1934*)]. Ann. Rep. Mus. Comp. Zool. Harvard College 1933-1934, 55-62. Cambridge, Mass. (1934). **b - 97**

**National Academy of Sciences (U. S. A.)** - Presentation of Medals and Honoraria [*Numismata et honoraria assignata*]. Science, LXXIX, 2060, 555-556. New York (1934). **b - 98**
The presentation address made by Dr. H. B. Bigelow at the presentation of the Agassiz Medal for 1933 to Bjørn Helland-Hansen, of the Oceanographic Institute, Bergen, Norway.

« **Ricerca Scientifica** » - Attività del Consiglio delle Ricerche. Conferenza plenaria della Commissione Internazionale per l'Esplorazione scientifica del Mediterraneo [*De activitate Consilii Inquisitionum Scientificarum. Conferentia plenaria Commissionis Intern. Mari Mediterraneo scientiæ causa explorando*]. Ric. Scient., a. IV, II, 10, 404-405. Roma (1933). **b - 99**
Relazione sulla conferenza plenaria della Commissione internazionale per l'esplorazione scientifica del Mediterraneo riunitasi in Napoli il 22 ottobre, alla presenza dei delegati dei seguenti paesi: Italia, Francia, Spagna, Romania, Tunisi, Monaco, Cipro, Palestina. Particolarmente importanti le relazioni del prof. Quagliariello di Napoli e di José Cerezo Gimenez (Spagna) sul « Valore alimentare del pesce », ed altri rapporti di Kel Saby, Gr. Antipa, H. Heldt, L. Roule e G. Brunelli, sulla biologia dello storione ed il valore alimentare di certi Pesci.

**Scottish Marine Biological Association** - Annual Report 1932-33 [*Relatio annua 1932-33*]. N. Adshead & Son, 3-23. Glasgow (1934). **b - 100**
Office Bearers, 1933-34 of the Association. Council. Executive Committee. Report of the Executive to the Council for the year to 31st March, 1933, for transmission by the Council, after approval, to the Nineteenth Annual General Meeting. Director's Report dealing with the research accomplished on plankton (*Calanus finmarchicus* and other members of the zooplankton), on molluscan ecology (certain bivalve Molluscs both in the littoral zone and in moderate depths) *Tellina tenuis*, *Syndosmya alba*, *Cardium edule*, *Mactra subtruncata*, shore ecology (summary of the collections of *Schistomysis spiritus* Norman). Publications and workers at the Station. Educational work. Museum and Aquarium.

**Woods Hole Oceanographic Institution** - Report for the Year 1933 [*Relatio a. 1933*]. 3-38 pp. Woods Hole, Mass. (1934). **b - 101**
I, Trustees, as of December 31, 1933 ; II. Members of the Corporation as of December 31, 1933 ; III. Report of the Treasurer ; IV. Report of the Director ; V. Staff, as of December 31, 1933. Appendix : Reports of progress by investigators working at the Institution during 1933.

**Eh.** - Prof. W. Mielck. 1 Photo., Fischmarkt, I, 11, 312-313. Cuxhaven (1933). **b - 102**
Nekrolog des Direktors der Preussischen Biologischen Anstalt auf Helgoland, welcher den 5. Oktober 1933 verstorben ist

**J. H. A.** - Prof. J. Cossar Ewart, Obituary [*Necrologia Prof. J. Cossar Ewart*]. Nature, CXXXIII, 3353, 165-166. London (1934). **b - 103**
Born in 1851, dead in 1933. His work embraces especially hybridisation and other problems of animal breeding, researches on Lampreys, *Raia*, *Laemargus* and Herrings.

**J. S. G.** - Prof. W. M. Davis. Obituary [*Prof. W. M. Davis. Necrologia*]. Nature, CXXXIII, 3374, 973-974. London (1934). **b - 104**
Dead on February 5th at the age of eighty-four years. His career embraces more than sixty years of active scientific work especially on shore-line topography, continental slopes, marine shelves and coral reefs.

« **N. N.** » - Aquarium neapolitanum (Führer durch das Aquarium der Zoologischen Station zu Neapel). 169 Abb., 130 S., R. Stabil. Tipogr. F. Giannini e Figli. Napoli (1933). **b - 105**

**R. W.** - Prof. Cesare Artom † 10/III/1934. Int. Rev. ges. Hydrobiol. u. Hydrogr., XXX, 5/6, 490. Leipzig (1934). **b - 106**
Professor der Zoologie an der Universität Pavia und Mitherausgeber der Internationellen Revue.

**V. E.** - Travaux biologiques de la Station Polaire du Cap Tchéljouskine en 1932/33 [*Opera biologica in regione promunturii* Tscheljuskin *peracta, a. 1932-1933*]. (En russe). Bull. Arct. Inst., 4, 180. Leningrad (1934). **b - 107**
Compte rendu des travaux et des recherches sur la faune de la région avec référence spéciale aux observations sur la famille des Gadidés, dont on a observé deux formes: *Boreogadus saida* et *Arctogadus*. Cette dernière semble être nouvelle.

**An.** - Atlantic Biological Station, St. Andrews, N. B., 1933. Ann. Rep. Biol. Board Canada, 1933, 5-12. Ottawa (1934). **b - 108**
The Staff of the Station during 1933. Investigators. Investigations : special fisheries, general sea fisheries and oceanology, fresh water fish cultural investigations, disease and mortality, fish physiology and anatomy, the handling of fish for food. Publications. Relations with other Organizations.

**An.** - « Poison Water » of the Black Sea [« *Aqua venefica* » *in Ponto Euxino*]. Science, LXXIX, 2042, 6. New York (1934). **b - 109**
According to Prof. R. A. Daly of Harvard University, this « poison water » is due to the decayed carcasses of pre-historical beasts that had died when the salt Mediterranean water entered the basin. Some examples of emersions and lowerings of the sea-level.

**An.** - The Woods Hole Marine Biological Laboratory [*De operibus peractis a Laboratorio pro Biologia marina in* Woods Hole]. Science, LXXX, 2075, 308-309. New York (1934). **b - 110**
First meeting of the Committee to be held once very ten years for the study of the work of the Marine Biological Laboratory in order to determine whether the Laboratory is performing valuable services in biological research.

# METHODICE.

## Subsidia technica - Microscopia - Microphotographia - Cultura - Collectio.

**Allen Glover M.** - Report on Mammals [*Relatio de Mammaliis*]. Ann. Rep. Mus. Comp. Zool. Harvard College 1933-34, 26-30. Cambridge, U. S. A. (1934). **b - 111**

Among the donations there is a practically complete skeleton of a false killer Whale (*Pseudorca crassidens*) stranded in 1927 at Dornoch Firth, Scotland.

**Allgén C. A.** - Zur Sammel-, Konservierungs- und Präparationstechnik freilebender mariner Nematoden [*Technica ad Nematodes marinos liberos colligendos, servandos et parandos*]. 1 Abb., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 25, 97-100. Trondheim (1934). **b - 112**

Unter Hinweisung auf die Methoden und Anweisungen von Micoletzky, Ditlevsen, Brakenhoff, Paramanov u. a teilt der Vf. eine einfache Methode mit, die immer gute Dienste geleistet hat.

**Barni Benedetto** - Nuovo apparecchio per la presa di campioni di acqua a diverse profondità [*De novo apparatu ad aquæ specimina ex diversis profunditatibus colligenda*]. 1 fig., Atti R. Accad. Fisiocr. Siena e St. Fac. Med. Sen., ser. XI, I, 3, 131-135. Siena (1933). **b - 113**

**Bassler R. S.** - Report on the Department of Geology [*Relatio de sectione geologica*]. 1 table, Rep. U. S. Nat. Mus., 1933, 108-117. Washington, D. C. (1933). **b - 114**

Accessions during the fiscal year ending June 30, 1933; accessions of the division of stratigraphic paleontology filling gaps in the brachiopod series, fine series of fossil Starfishes and Crustaceans, etc. Installation and preservation of collections. Investigation and research. Distribution and exchange of specimens. Number of specimens under Department.

**Belloni A.** - Apparecchi per la respirazione subacquea [*Apparatus pro respiratione subaquanea*] Atti Soc. Ital. Progr. Sc., XXII Riun. (Bari, 12-18 ott. 1933), III, 62-65. Roma (1934). **b - 115**

Dopo avere esposto i pericoli che presenta per l'uomo la respirazione subacquea, l'A. enumera gli apparecchi più moderni che consentono la respirazione sott'acqua, e suddivisi in: apparecchi per la respirazione a pressione normale, ed apparecchi per la respirazione ad alta pressione.

**Bonde (von) C.** - New Oceanographic Apparatus [*Apparatus oceanographici novi*]. 2 pl., Fish & Mar. Biol. Surv., Rep. N. 10, 144-148. Pretoria (1933). **b - 116**

Description of the two following apparatus designed by the author: 1. Closing apparatus for a quantitative plankton net. 2. Water bottle with deep-sea reversing thermometer.

**Brinkmann Aug.** - Den zoologiske avdeling [*Sectio zoologica*]. 2 fig., Bergens Mus. Årsber. 1933-1934, 24-32. Bergen (1934). **b - 117**

New acquisitions: *Galeorhinus galeus*, *Centrolophus pompilus*, *Morone labrax*, *Myctophum punctatum*, *Mugil chelo*, *Salmacis rarispina*, *Heterocentrotus mammillatus*, *Coelopleurus elegans* and *Lingula anatina*. Use of the collections for scientific researches. Gifts.

**Burch Arthur B. & Eakin Richard M.** - A Device for Water Circulation [*De systhemate pro aquæ circulatione*]. 1 fig., Science, LXXX, 2085, 563-564. New York (1934). **b - 118**

Detailed description of a simple air pump that can be easily constructed and will maintain a continuous circulation of clean aerated fresh or salt water through an aquarium.

**Campbell M. H.** - Experiments on the Culture of Diatoms, and Studies of the Young Stages of Copepods [*De Diatomearum cultura stadiisque juvenilibus Copepodorum*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 39-40. Woods Hole, Mass. (1933). **b - 119**

I. Culture of Diatoms: *Nitzschia closterium*. II. A comparison of the developmental stages of *Euchaeta norvegica* Boeck, with those of *Euchaeta japonica*. III. Vertical distribution of developmental stages of *Euchaeta norvegica*.

**Cărăuş Sergiu** - Note préliminaire sur le mode dont se comportent certains animaux marins à la lumière artificielle [*Nota prior de modu agendi aliquorum animalium marinorum lucis artificiosæ causa*]. Ann. Scient. Univ. Jassy, XIX, 1/4, 314-316. Jassy (1934). **b - 120**

Il résulte des observations de l'A. que l'action qu'exerce la lumière sur les animaux marins peut être utilisée avec succès non seulement pour des récoltes planktoniques, mais même pour des formes benthoniques.

**Clark Lyman Hubert** - Report on Marine Invertebrates [*Relatio de Invertebratis marinis*]. tabl., Ann. Rep. Mus. Comp. Zoöl. Harvard College 1933-1934, 12-14. Cambridge, U. S. A. (1934). **b - 121**

Revision of the collection (data on table); researches accomplished; accessions including a very valuable collection of Echinoderms with species not previously known from northwestern Australia.

**Deichmann E.** - Report on Coelenterates and Sponges [*Relatio de Coelenteratis et Spongiis*]. Ann. Rep. Mus. Comp. Zoöl. Harvard College, 1933-1934, 50-52. Cambridge, U. S. A. (1934). **b - 122**

The sponge collection now catalogued offers a special interest because it includes a large number of the types from Oskar Schmidt's monograph « Die Spongien des Meerbusens von Mexico » of 1879, one of the fundamental and earliest works on this group. Report on the Curator's travels for the purpose of studying Alcyonarians. Accessions.

**Erdmann W.** - Die angewandte Meeresforschung an der Biologischen Anstalt. *b*) Züchtung von Meerestieren [*Studia oceanographica in Statione Biologica peracta.* b) *De cultura animalium marinorum*]. Der Biologe, III, 180-182. München (1934). **b - 123**

**Harvey H. W.** - Measurement of Phytoplankton Population [*Apparatus ad phytoplancton mensurandum idoneus*]. 9 figs., Journ. Mar. Biol. Assoc., XIX, 2, 761-773. Plymouth (1934). **b - 124**

A meter is described which measures the volume of water having passed through a silk net which may be either towed or lowered and raised vertically. A double release gear and throttling arrangement allows the net to be opened, and later closed at any desired depths.

The catch of phytoplankton, from a volume of water which has been measured by the meter, may be assessed from its content of yellow-green pigments, which readily dissolve in acetone. A rapid method of measuring the pigment content of the catch in terms of arbitrary units of plant pigment is described. The arbitrary unit is related to numbers of two species of Diatoms.

The irregular distribution of phytoplankton in the sea is considered in connexion with representative sampling with this measuring net.

**Hecht Franz** - Bemerkungen zu Trask's Methode der Bestimmung des organischen Gehaltes meerischer Sedimente [*Observationes in methodum a « Trask » perlatam ad continentiam organicam sedimentorum marinorum determinandam*]. Senckenbergiana, XVI, 1, 21-24. Frankfurt a. M. (1934). **b - 125**

Die von Trask gewonnenen Ergebnisse bestätigen die früher in Bezug auf das deutsche Wattenmeer gemachte Feststellung, dass die N-haltigen Substanzen am frühesten und schnellsten zersetzt werden.

**Hentschel Ernst** - Eine Methode zur Untersuchung von Copepodenbevölkerungen [*Methodus quædam pro inquisitionibus in Copepoda*]. 4 Abb., Rapp. Pr.-Verb. Cons. Expl. Mer, 3-ème partie, Appendices 1933-1934, LXXXIX, 93-97. Copenhague (1934). **b - 126**

Diese Methode gestattet, in einfacher Weise jeden Copepodenfang mit jedem anderen inbezug auf seine Zusammensetzung zu vergleichen, und zwar auf Grund rein quantitativer an allen Tieren leicht ausführbarer Feststellungen, ohne Bestimmung der Arten.

**Homès Marcel V.** - La conservation de *Codium bursa* en herbier ou en liquide [*De conservatione speciei « Codium bursa » in herbario et in liquoribus*]. 4 fig., Bull. Soc. R. Bot. Belgique, LXVI, 1, 34-36. (1933). **b - 127**

L'A. suggère deux méthodes pour conserver cette algue et pour en faire des sections.

**Honig C.** - Nitrates in Aquarium Water [*De Nitratis in aqua cuiusdam aquarii*]. 1 table, Journ. Mar. Biol. Assoc., XIX, 2, 723-725. Plymouth (1934). **b - 128**

In the water of an aquarium as much as 1 gram per litre expressed as sodium nitrate was found. By adding lactate or tartrate to the water the development of denitrifying bacteria brought about almost complete removal of the nitrates and nitrites in the water.

**Hopkins A. E.** - A Mechanism for the Continuous Circulation and Aeration of Water in Small Aquaria [*De apparatu mechanico ad excitandam aëris continuam circulationem et aërationem in parvis aquariis*]. 1 fig., Science, LXXX, 2078, 383-384. New York (1934). **b - 129**

Description of a mechanism that eliminates the difficulties common in the usual method employed.

**Jackson T. Robert** - Report on the Fossil Echinoderms [*Relatio de Echinodermatis fossilibus*]. Ann. Rep. Mus. Comp. Zoöl. Harvard College 1933-34, 48-49. Cambridge, U. S. A. (1934). **b - 130**

Notes on accessions among which the most important one is an extensive collection of about 4000 fossil *Echini* from Jamaica. This collection is especially valuable to the Museum in view of the Memoir on Jamaican Fossil *Echini* by Benjamin Walworth Arnold and Hubert Lyman Clark published by the Museum as Vol. L, 1, 1927, and also a supplementary Memoir by the same authors which is now in press.

**Kokubo S.** - A Plankton Pump in which the Winding of the Tow Line of Suction Tubing is made automatically [*De siphone, organismis planctonicis studendis, in quo funis pro remulco tuborum captatorum automatice convolvitur*] (In Jap., Engl. Rés.). 1 fig., Bull. Jap. Soc. Scient. Fish., I, 6, 277-280. Tokyo (1933). **b - 131**

**Krogh August** - A Method for the Determination of Ammonia in Water and Air [*Methodus pro determinatione ammoniaci in aqua et aëre*]. 1 fig., Biol. Bull., LXVII, 1, 126-131. Lancaster, Pa. (1934). **b - 132**

A method and apparatus for the determination of ammonia in sea water are described. The ammonia is carried over by a simple vacuum distillation into hydrobromic acid in which it is determined by the naphthyl red titration of added hypobromite.

**Krogh August & Keys Ancel** - Methods for the Determination of Dissolved Organic Carbon and Nitrogen in Sea Water [*Methodus ad determinandam solutionem organicam carbonis et nitrogeni in aqua marina*]. 4 figs., Biol. Bull., LXVII, 1, 132-144. Lancaster, Pa. (1934). **b - 133**

For the determination of organic nitrogen, the principle of Will-Warrentrap, involving digestion at 500° C. with caustic soda in an atmosphere of hydrogen is used. This method gives an accuracy of about 5 per cent in 5- or 10- ml. samples.

A wet combustion method for the analytical determination of dissolved organic carbon in sea water is presented. Halides are removed with thallous sulphate, the evaporated sea water residue is oxidized by means of ceric-chromic sulphuric acid, and the evolved carbon dioxide eventually determined by acid titration of baryta solution through which the gases have passed. The accuracy approaches 0.1 mg. carbon per liter.

**Kuenne Cl.** - Weitere Untersuchungen zum Vergleich der Fangfähigkeit verschiedener Modelle von vertikal fangenden Plankton-Netzen [*Inquisitiones vetustiores ad variarum retium verticalium capacitates captandi comparandas, quarum auxilio organisma planctonica colliguntur*]. (Dtsch. Text, Engl. Rés.). 6 Abb., 15 Tab., Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXIII, 3-33. Copenhague (1933). **b - 134**

Ergebnisse der Prüfung in Bezug auf ihre praktische Verwendbarkeit und des Vergleiches bezüglich ihrer Fangfähigkeit mit dem Hensen' schen Eiernetz aus Gaze Nr. 3 der folgenden Netze: *a*) das grosse Vertikalnetz ohne Aufsatz, Stramin, $b_1$) das grosse Vertikalnetz mit Aufsatz, Griessgaze Nr. 22, $b_2$) dasselbe Netz mit Erbstüll, *c*) das Helgoländer Larvennetz, Seidengaze Nr. 0, *d*) das Eiernetz ohne Aufsatz, Seidengaze Nr. 3, *e*) das mittlere Apstein-Netz, Seidengaze Nr. 20.

**Leavitt Benjamin B.** - Investigations of Bathypelagic Zoöplankton and Experiments with Closing Nets [*Inquisitiones in zooplancton bathypelagicum et experimenta, retium occlusione præditarum auxilio*]. Woods Hole Oceanogr. Instit., Rep. 1933, App., 25. Woods Hole, Mass. (1934). **b - 135**

Results of the comparison of the relative efficiencies of various types of releasing devices and closing nets and elaboration of a new type of releasing device.

**Nesbit Robert A.** - A Convenient Method for Preparing Celluloid Impressions of Fish Scales [*Methodus simplex ad vestigia squamarum piscium in celuloide paranda*]. 2 figs., Journ. Cons. Expl. Mer, IX, 3, 373-376. Copenhague (1934). **b - 136**

Description of a method devised by the A. to prepare minor image impressions of the scales of Squeteague (*Cynoscion regalis*, Bloch and Schneider).

**Penn Amos B. K.** - Physiological Media for Fresh-Water and Marine *Protozoa* [*De physiologicis liquidis, ad culturas parandas Protozoorum maris ac aquae dulcis*]. Science, LXXX, 2075, 316-317. New York (1934). **b - 137**

Formulae of two media, one for fresh-water forms, the other for marine forms. These media are less toxic than natural fresh water or sea water and many other physiological media tested.

**Phifer Lyman D.** - Continuous Phytoplankton Collection [*De quodam apparatu ad phytoplancton colligendum sine ulla intermissione*]. 1 fig., Science, LXXIX, 2048, 298-299. New York (1934). **b - 138**

Description of an apparatus to make a representative qualitative and roughly quantitative collection of the surface phytoplankton.

**Portier P. & Richard J.** - Sur une méthode de prélèvement de l'eau de mer destinée aux études bactériologiques [*Methodus ad aquam marinam colligendam pro studiis bacteriologicis*]. 4 fig. on pl., Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXIX, 360-361. Monaco (1934). **b - 139**

Description de l'appareil employé au cours de plusieurs campagnes du yacht « Princesse Alice » avec des résultats satisfaisants.

**Richard J.** - Modification du filet bathypélagique de Giesbrecht [*Modificatio retis bathypelagicae ex* Giesbrecht]. 5 fig. on pl., Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXIX, 363-366. Monaco (1934). **b - 140**

Principe du filet Giesbrecht, description, mode opératoire, facilité et simplicité de son maniement.

**Richard J.** - Sur des instruments destinés à la récolte et à l'examen préliminaire du plankton microscopique et sur la présence du genre *Penilia* dans la Méditerranée [*Apparatus ad plancton microscopicum colligendum et summatim examinandum. De genere « Penilia » Maris Mediterranei*]. 3 fig. on pl., Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXIX, 366-372. Monaco (1934). **b - 141**

Construction et emploi d'un petit filet, facile à mettre à l'eau et à retirer, pour une personne seule, très peu dispendieux et donnant des résultats très satisfaisants. Il est le seul qui permet de recueillir facilement le plancton de surface quand la mer est agitée.

**Richard J.** - Sur deux filets destinés à la récolte du plancton [*Retia duo ad plancton colligendum*]. Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXIX, 372-374. Monaco (1934). **b - 142**

Description de ces deux filets, dont les essais faits jusqu'ici sont très encourageants.

**Stanbury F. A.** - Replacement of Potassium by Rubidium in *Nitzschia closterium* [*Rubidium ponitur in locum potassii in N. c.*]. 2 figs., 6 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 931-939. Plymouth (1934). **b - 143**

It may be concluded that when rubidium is supplied in small amounts this element equals in efficiency similar amounts of potassium. In larger amounts, e. g. 21 γ rubidium per c. c., rubidium would appear to be harmful. The Diatoms in rubidium-containing cultures seem to be limited to an increase of seven to eleven times their original number, so that even when the rubidium is not harmful the total replacement of potassium seems impossible.

**Steemann Nielsen E. & Brand (von) Th.** - Quantitative Zentrifugenmethoden zur Planktonbestimmung [*Methodus pro inquisitionibus quantitativis in plancton, centrifugationis auxilio*]. Rapp. Pr.-Verb. Cons. Expl. Mer, 3-ème partie, Appendices 1933-1934, LXXXIX, 99-100. Copenhague (1934). **b - 144**

Beschreibung von zwei Methoden, durch welche in Ausbeuten von 81-115 % der im umgekehrten Mikroskop gefundenen Werte erhalten worden ist.

**Stejneger Leonhard** - Report on the Department of Biology [*Relatio de sectione biologica*]. Rep. U. S. Nat. Mus. 1933, 94-107. Washington, D. C. (1933). **b - 145**

Accessions for the year of the Department with particular mention of the divisions which deal with marine fauna, especially of the deeper waters of the ocean. Installation and preservation of collections. Research by members of the staff. Distribution and exchange of specimens. Number of specimens under Department.

**Tee-Van John** - The Bathysphere of 1934 [*De bathysphæra a. 1934*]. 2 fig., Bull. New York Zool. Soc., XXXVII, 6, 171-173. New York (1934). **b - 146**

Description on hand of a diagram of the different accessories forming the bathysphere.

**Tilden Josephine E.** - Standardization of Method for Drawing *Algæ* for Publication [*De methodu standardisata ad Algas in libris delineandas*]. 19 figs., Bot. Gaz., XCV, 515-518. Chicago, Ill. (1934). **b - 147**

Table of magnifications and factors, sample drawings and indication of precautions to be taken for the making of drawings of *Algae* for publication, according to the scheme adopted in the phycological Laboratory of the University of Minnesota.

**Van Ooste Kohn, Deason H. J. & Jobes Frank W.** - A Microprojection Machine Designed for the Study of Fish Scales [*Machina microproiectione prædita ad squamas Piscium studendas*]. 2 figs., Journ. Cons. Expl. Mer, IX, 2, 241-248. Copenhague (1934). **b - 148**

Description of a new microprojection machine designed by the authors for the study of fish scales, tested and used since March, 1931, and found satisfactory by every member of the research staff of the Bureau of Fisheries (U. S. A.): optical equipment, object stage, supporting framework, projection screen, mirror, cabinet, wiring, focussing device, accessories, adaption for photography of the machine.

**Zobell C. E. & Allen E. C.** - Attachment of Marine *Bacteria* to Submerged Slides [*Quo modo bacteria marina ad laminas submersas adherescunt*]. Proc. Soc. Exp. Biol. & Med., XXX, 1409-1411. New York (1933). **b - 149**

Only some marine *Bacteria* attach themselves to submerged slides. All stages of bacterial development from individual cells, dividing cells, chains, and micro-colonies have been observed.

Imp. Acad., X, 7, 431-434. Tokyo (1934). **b - 160**

Preceding works as to the nature of peculiar granules in the photogenic tissue of this Cephalopod.

The results of experiments made on the granules contained in the brachial organs tend to prove that the granules in question are not bacteria, but crystalloids of protein nature.

**Rousseau Charles** - Sur la structure de l'épithélium hépatique des Eolidiens [*De structura epithelii hepatici in Aeolididis*]. C. R. Acad. Sc., CXCVIII, 7, 677-679. Paris (1934). **b - 161**

De cette étude, il résulte que chez *Spurilla glauca*, et *S. croisicensis*, le tissu hépatique est formé de trois types de cellules : 1) cellules vacuolaires excrétrices formées de vacuoles renfermant chacune une granulation lipoïdique ; 2) cellules excrétrices ou xanthinophores renfermant des concrétions de xanthine ; 3) cellules à ferments sécrétant des diastases et ayant aussi une fonction absorbante et phagocytaire.

**Stefanelli Alberto** - Le cellule e le fibre di Müller dei Petromizonti [*De cellulis fibrisques in Petromyzontibus*]. 11 fig., Arch. Ital. Anat. e Embriol., XXXI, 4, 519-548. Firenze (1933). **b - 162**

Suddivisione dei centri tegmentali dei Petromizonti. Cellule e fibre di Müller. Sulla presunta decussazione delle fibre di Müller e sulla decussazione dei tratti ottavomotori. Discussione e conclusioni.

**Stolz Picchio Teresa** - Ricerche sul timo di *Lophius budegassa* Spin. e sulle sue modificazioni nell'adulto [*Inquisitiones in thymum speciei « Lophius budegassa »* Spin. *et in eius modificationes quoad speciem adultam*]. 2 tav., Arch. Ital. Anat. e Embriol., XXXI, 4, 549-568. Firenze (1933). **b - 163**

Il timo del *Lophius budegassa* Spin. presenta una struttura molto varia in esemplari di diversa lunghezza (da cm. 15 a cm. 35) e quindi di diversa età. Nei più giovani si distingue una sostanza di tipo midollare disposta alla periferia e una sostanza di tipo corticale, che occupa la parte centrale dell'organo: col crescere dell'età questi due tessuti vanno progressivamente mescolandosi tra loro e dapprima formano isole che mantengono la individualità strutturale del tessuto da cui derivano, indi si fondono anche più intimamente in modo da non lasciar più riconoscere l'esistenza di due tessuti distinti. Negli individui più vecchi si verifica la comparsa di tipici ammassi cellulari compatti, caratterizzati anche dalla presenza di numerosi granuli di pigmento, e la rarefazione generale del restante parenchima, con la formazione di cavità che possono raggiungere dimensioni cospicue. L'organo è completamente isolato dalla parete della cavità branchiale ravvolto da una capsula connettivale che si ispessisce notevolmente col crescere dell'età.

**Vialli Maffo** - Formazioni linfoidi meningee e perimeningee nei Selaci [*Formationes lymphoides meningeae et perimeningeae in Selachioideis*]. Boll. Zool., IV, 4, 123-134. Napoli (1933). **b - 164**

Le ricerche dimostrano che anche in qualche specie di Selaci e particolarmente in *Pristiurus melanostomus* esistono in seno ai tessuti meningeo e perimeningeo formazioni che si possono comparare all'organo linfomieloide dei Ganoidi. La caratteristica di queste formazioni è di essere esclusivamente di tipo linfoide, con elementi a distribuzione molto varia.

**Vialli Maffo** - Rapporti fra connettivo reticolare e reticulum nei plessi coroidei [*Correlationes inter connectivum reticulare et reticulum in plexibus coroideis*]. Monit. Zool. Ital. (Atti Soc. Ital. Anat., IV Conv. Pavia 16-19 ott. 1932), a. XLIII, suppl. 1933, 160-161. Firenze (1933). **b - 165**

Osservazioni sulla continuità tra le fibrille del tessuto reticolare laminare e quelle del *reticulum* linfoide a livello dei plessi coroidei, fatte in *Emys orbicularis*, nei Ganoidi, e in una specie di Selacei, *Pristiurus melanostomus*.

**Vialli Maffo** - Zone e forme differenziate dell'epitelio coroideo dei Pesci [*Zonæ ac formæ differentiatae in hepitelio coroideo piscium*]. Monit. Zool. Ital. (Atti Soc. Ital. Anat. IV, Conv. Pavia, 16-19. ott. 1932). XLIII, suppl. 1933, 263-264. Firenze (1933). **b - 166**

Esempi particolarmente interessanti anche dal punto di vista funzionale, raccolti non solo per i Pesci, ma anche per le altre classi di Vertebrati.

# ANATOMIA ET PHYSIOLOGIA.

## *Varia.*

**Atkins W. R. G. & Poole H. H.** - The Photoelectric Measurement of the Penetration of Light of Various Wave-lengths into the Sea and the Physiological Bearing of the Results [*De mensuris photo-electricis penetrationis lucis, varia undæ longitudine præditæ, in mare. Consideratur etiam momentum physiologicum resultatuum*]. 5 fig., Phil. Trans. R. Soc., B. CCXXII, 487, 129-164. London (1933). **b - 167**

Account of the measurements. Values found in the English Channel for the different spectra and their following reductions of the sub-surface illumination for each spectral region. The absorption of light from yellow to violet and its influence on the water temperature. The absence of red light from the deeper water and its influence on the color vision of fish dwelling under such conditions. Reduction of the anti-rachitic portion of the spectrum and its bearing on the origin of vitamin D in fish liver oils.

**Bertolini Fausta** - Rigenerazione dell'apparato digerente nelle *Holothuria* [*De regeneratione apparatus digestionis in Holothuriis*]. 2 fig., 1 tav., Pubbl. Staz. Zool. Napoli, XII, 3, 432-442. Napoli (1933). **b - 168**

Rigenerazione dell'apparato digerente nelle specie del genere *Holothuria* eviscerate. Origine delle reti mirabili. Osservazioni durante il processo di rigenerazione. Differenza di comportamento tra *Stichopus* e *Holothuria*. L'aspecificità dei foglietti nella rigenrazione degli Echinodermi è in rapporto col fatto che le larve degli Echinodermi hanno capacità di rigenerare organi indifferentemente da diversi foglietti (rigenerazione di sacchi celomatici a spese di ectoderma o entoderma), mentre fenomeni simili non si osservano in tutti gli embrioni di altri Metazoi a questo scopo studiati.

**Binet Léon** - Biologia marina e medicina [*Biologia marina et Ars medica*]. 2 fig., Biol. Med., X, 1/2, 39-50. Milano (1934). **b - 169**

Contributi che lo studio sperimentale della fisiologia e fisio-patologia degli animali marini può portare alla medicina sperimentale, dimostrati attraverso l'esposizione di una serie di studi della fagocitosi, dell'inflammazione, dell'immunità, delle ittiotossine nel dominio della biologia marina, della scoperta dell'anafilassi in seguito alle ricerche sulle tossine degli animali marini, ecc. ecc.

**Borodin N. A.** - Investigation of the Phenomena of Resuscitation of Fishes, after Freezing [*Inquisitiones in phænomena reditus in vitam piscium post congelationem*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 31. Woods Hole, Mass. (1933). **b - 170**

Account of studies made of the problem of the « Anabiosis » of several species of fish.

**Borodin N. A.** - Investigation of the Phenomenon of the « Anabiosis » or Resuscitation of Fishes, after Freezing [*Inquisitiones in phænomenum quod anabiosis dicitur seu reditus in vitam piscium post congelationem*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 38-39. Woods Hole, Mass. (1933). **b - 171**

Brief account of the continuation of the investigation started in 1931, consisting in 151 experiments on freezing Fishes

and efforts to revive them. Besides observations were made on the temperature of the body of 7 species of fish during the process of freezing. Classification of Fishes frozen to different degrees, on hand of histological examination. Summary of the results of supplementary experiments made in the laboratory of the Museum of Comparative Zoology with Alaska blackfish (*Dallia pectoralis* Bean).

**Brown F. A. Jr.** - The Chemical Nature of the Pigments and the Transformations Responsible for Color Changes in *Palaemonetes* [*Natura chimica pigmentorum mutationesque quæ coloris variationes in specie « Palaemonetes » permittunt*]. 6 figs., 1 pl., Biol. Bull., LXVII, 3, 365-380. Lancaster, Pa. (1934). **b - 172**

The red pigment of *P. vulgaris* appears to be astacin while the yellow one seems to be identical with plant carotin.

A method is set forth to measure the rate of formation and destruction of pigment within the Shrimps. Quantitative study of the chemical transformations in the pigments. Pigment destruction upon a white background. Effect of darkness upon pigment quantity. Pigment formation upon a black background.

**Buchanan-Wollaston H. J.** - The Theory of Variation, Correlation and Regression. Its Relevance in Researches on Proportional Growth [*De theoria variationis, correlationis et regressionis. Quæstio de eius momento deque utilitate pro inquisitionibus in accretionem proportionalem*]. 3 figs., Rapp. Pr.-Verb. Cons. Expl. Mer, 3-ème partie, Appendices 1933-1934, LXXXIX, 33-44. Copenhague (1934). **b - 173**

Referring to a recent work of Einar Lea on the prevalent misuse of statistical theory in dealing with calculation of previous length of a fish the A. here tries to illustrate and elucidate the above mentioned new statistical theory by means of examples, formulas and graphs to calculate the previous length of a fish from the previous length of one or more of its scales or otoliths. 2 addenda with explanatory remarks.

**Chabanaud Paul** - Contribution à la morphologie des Poissons hétérosomes [*Heterosomata. Contributio in morphologiam cognoscendam*]. Bull. Soc. Zool. France, LIX, 123-129. Paris (1934). **b - 174**

Sur la présence d'un rayon pelvien, surnuméraire, chez un soléidé. *Atherestes stomias* Jord. et Gilb. *Psettodes belcheri* Bennett. La morphologie générale des *Heterosomata* considérée du point de vue phylogénique.

**Colla Silvia** - Ricerche sui gas nei vegetali [*Inquisitiones in gas vegetalium*]. Atti Soc. Ital. Progr. Sc. (XXI riun., Roma 9-15 ott. 1932), V, 98-108. Roma (1933). **b - 175**

Metodo usato per la ricerca dei gas contenuti negli organi cavi delle Alghe. Questi gas risultano costituiti da una miscela di $O_2$, $CO_2$ e $N_2$. Natura della secrezione gassosa nelle diverse specie esaminate.

**Coonfield B. R.** - Coördination and Movement of the Swimming Plates of *Mnemiopsis Leidyi*, Agassiz [*Palæ natatoriæ in specie « Mnemiopsis Leidyi » Agassiz. Quæstio de coordinatione et motu*]. 6 fig., Biol. Bull., LXVI, 1, 10-21. Lancaster, Pa. (1934). **b - 176**

On hand of experiments reported here the A. considers the following questions: Is the aboral sense organ the center of coördination? Does the coördination in each plate row depend entirely upon the stimuli arising in the aboral center? Will this sensory center exhibit its dominance during all rates of plate movements? Is this stimulating element in each plate row strong enough to resist any reversed impulses? Does each plate row exhibit an aboral dominance as reported by Child (1917)? Is the transmitting element nervous or is it less differentiated than nervous tissue?

**Coonfield B. R.** - The Movement and Regulation of Cilia on the Parapodia of *Nephthys bucera* Ehlers [*Motus et regula ciliarum in parapodiis speciei « Nephthys bucera » Ehlers*]. 9 figs., Biol. Bull., LXVII, 3, 399-408. Lancaster, Pa. (1934). **b - 177**

Though this problem has been studied intensively from both the morphological and physiological point of view a full explanation on the exact mechanism responsible for ciliary movement and of the principle involved in ciliary coördination has not yet been found. After having described the structure of these ciliated regions as shown by stains the A. discusses the possibility of a nervous control of the cilia which is however confuted. Presumption of a neuroid mechanism for the ciliary coördination of these cells when they are in their natural location.

**Damant G. C. C.** - Physiology of Deep Diving in the Whale [*De physiologia profundæ immersionis balænarum*]. Nature, CXXXIII, 3371, 874. London (1934). **b - 178**

Critical note to the part of the article of Prof. Krogh appeared in Nature 3365 p. 635 (1934) that concerns the liability of Whales to caisson disease. Complementary note of Prof. Krogh.

**Ditlevsen Hjalmar** - Some Remarks on the Spicular Apparatus of *Enoplolaimus diplechma* (Southern) [*Enoplolaimus diplechma* (Southern). *Observationes quædam circa apparatum spicularum*]. 2 figs., Vidensk. Medd. Dansk. naturhist. Foren. i København, XCVII, 207-210. København (1933-34). **b - 179**

In his examination of the spicular apparatus of *E. diplechma* the A. has come to the conclusion that the « second accessory piece », as quoted by Southern, is another spicule, the shape of which is that characteristic of the sub-genus *Mesacanthion* and that the presence of these two spicules of very different shape is unique in the said sub-genus. The function of these two spicules.

**Dykgraaf S.** - Untersuchungen über die Funktion der Seitenorgane an Fischen [*Inquisitiones in functionem organi lateralis Piscium*]. Ztschr. vgl. Physiol., XX, 162-214. Berlin (1933). **b - 180**

**Facciolà Luigi** - L' *Ophidion barbatum* Linn. e la sua vescica natatoria [*Ophidion barbatum eiusque vesica natatoria*]. 1 fig., Atti Soc. Ital. Sc. Natur. e Mus. Civ. Stor. Natur. Milano, LXXII, 2, 157-164. Milano (1933). **b - 181**

Caratteri comuni alle specie del genere *Ophidion*; specie che vivono nei mari italiani. Particolarità anatomiche e funzionali della vescica natatoria.

**Fontaine M.** - Sur une relation entre la teneur en gaz carbonique libre et combiné du milieu intérieur et le niveau moyen de l'habitat chez quelques Décapodes Brachyrhynques [*De correlatione inter tenorem $CO_2$ ambientis interni et libellum medium quoad abitat in quibusdam Decapodis Brachyrhynchis*]. Bull. Inst. Océanogr., 639, 1-4. Monaco (1933). **b - 182**

L'A. a fait une comparaison entre Crabes (1) du même groupe, (2) de taille voisine à l'état adulte et (3) d'une activité comparable et plus précisément entre *Portunus puber*, *Carcinus moenas* et *Grapsus marmoratus*. Il a pu constater que chez les Décapodes Brachyrhynques comparables par leur taille et leur activité, mais non par leur habitat, la réserve alcaline est d'autant plus élevée que l'animal présente une vie aérienne plus importante.

**Fontaine M.** - Remarques sur la fluorescence des Chlorophycées marines [*Considerationes circa fluorescentiam in Chlorophyceis marinis*]. Rev. Algol., Notes, VII, 1/2, 189-192. Paris (1934). **b - 183**

L'A. conclut que chez les Chlorophycées tant marines que d'eau douce la chlorophylle in situ et in vivo est normalement fluorescente.

**Giacomini Ercole** - Il sistema interrenale e i corpuscoli di Stannius dei Ganoidi e dei Teleostei [*De systhemate interrenali deque corpusculis τοῦ Stannius in Ganoideis et Teleosteis*]. Boll. Soc. Ital. Biol. Sper., VIII, 6, 1215-1220. Napoli (1933). **b - 184**

Dal confronto tra le disposizioni che si hanno nei Ganoidi e quelle che s'incontrano nei Teleostei, risulta che in questi ultimi il vero interrenale, omologo all'interrenale dei Selaci e alla corticale surrenale dei Mammiferi è l'« interrenale anteriore » e non lo sono affatto i cosidetti corpuscoli di Stannius, contrariamente a quanto erasi in addietro ritenuto.

**Giersberg H.** - Physiologie des Farbwechsels bei Tieren [*De physiologia coloris mutationis in Piscibus*]. 4 Abb., Zool. Anz., 7. Supplementband, 96-126. Leipzig (1934). **b - 185**

Der physiologische Farbwechsel mit drei angegebenen Arten der Beeinflussung der Farbzellen. Der morphologische Farbwechsel mit besonderer Berücksichtigung der innersekretorischen Drüsen. Als Beispiele sind u. a. *Crangon* und *Palaemonetes* angeführt worden.

**Hardenberg J. D. F.** - Ein Töne-erzeugender Fisch [*Piscis qui sonos emittit*]. Zool. Anz., CVIII, 224-227. Leipzig (1934). **b - 186**

In and near the mouths of the big rivers of the Sunda islands one may often hear sounds, which can be so loud that it is even impossible to sleep. Mostly these sounds are described to the friction between each other of several layers of water with a different density. It is shown now that the sound is caused by Fishes, species of the genus *Therapon*. The noises are made by the air-bladder which is divided into two parts. The distal part is about thrice as voluminous as the proximal part which is more or less spherical, and which is attached to the skull by two muscles. The biological meaning of the sound is unknown as far as now.

**Harvey E. Newton** - Biological Effects of Heavy Water [*De effectibus biologicis aquæ ponderosæ*]. Biol. Bull., LXVI, 2, 91-96. Lancaster, Pa. (1934). **b - 187**

Heavy water (85-95 per cent) has been found not to prevent the luminescence of dried *Cypridina* nor to affect the luminescence of a fresh water luminous *Bacterium* but to diminish the luminescence of a marine form; to retard growth of luminous *Bacteria* sometimes allowing slow growth without luminescence; to kill a number of *Protozoa* and Rotifers, but not to kill *Bacteria* and not to injure *Euglena* irreversibly.

**Hoadley Leigh** - Autotomy in the Anomuran *Porcellana platycheles* (Pennant) [*De autotomia in specie « Porcellana platycheles »* (Pennant)]. 3 tabl., Biol. Bull., LXVII, 3, 494-503. Lancaster, Pa. (1934). **b - 188**

From the experiments reported here it is evident that animals with all the appendages present autotomize much more readily than do animals which have already cast some of their legs. The act of autotomy in itself appears, therefore, to have a very definite influence on the reflex, for the fact of which two theories are presented that should require testing. There has further proved to be a fundamental difference in the reactions of the two sexes.

**Huxley J. S. & Callow F. S.** - A Note on the Asymmetry of Male Fiddler-Crabs (*Uca pugilator*) [*De asymmetria in masculis speciei « Uca pugilator »*]. 3 figs., Roux' Arch., CXXIX, 2, 379-392. Berlin (1933). **b - 189**

The A. determines the changes, if any, in the degree of asymmetry showed by the paired organs; in other words, whether the ratio of organ from the side of the large chela to that from the side of the small chela shows a progressive alteration with increase of absolute body-size. He gives also the ratios which do not concern asymmetry. The results of these measurements are expressed in graphs and tables, as well as the differences between the right-handed and left-handed specimens.

The A. finally makes an attempt to give an explanation of all the facts observed.

**Kahmann H.** - Ueber das Vorkommen einer « Fovea centralis » im Knochenfischauge [*Fovea centralis eiusque præsentia in oculo Teleosteorum*]. Zool. Anz., CVI, 49-55. Leipzig (1934). **b - 190**

**Kerr J. Graham** - Archaic Fishes - *Lepidosiren*, *Protopterus*, *Polyterus*, and their Bearing upon Problems of Vertebrate Morphology [*Pisces archaici, Lepidosiren, Protopterus, Polypterus eorumque momentum in problematis de morphologia Vertebratorum*]. Jenaische Ztschr. Naturwiss., LXVII, 419-433. Jena (1932). **b - 191**

This paper reviews the main conclusions which emerge from the work of the author and his school upon the embryology and comparative anatomy of the surviving examples of the *Crossopterygii* and *Dipnoi* in so far as they affect problems of general interest. A special interest is dedicated to the skeletal structures, the origin of pigment cells, the morphology of the central nervous system, the development of muscle fibers, the vascular system, the question of the external gills as modern larval adaptations and the evolutionary origin of the vertebrate limbs. Reference is also made to hypothetical pelagic ancestors and to the *Protostoma* theory as being the only working hypothesis concerning the development of Vertebrates.

**Kreps E.** - Organic Catalysts or Enzymes in Sea Water [*Catalisatores et enzymi organici in aqua marina*]. 5 tabl., James Johnstone Mem. Vol., 193-202. Liverpool (1934). **b - 192**

Some original experimental data are referred to, which bring new evidence in favour of the idea that sea water contains various catalysts, probably of organic origin (enzymes), which manifest their catalytic action upon chemical reactions in samples of sea water, poisoned with $HgCl_2$ or filtered through a Seitz ultrafilter.

**Krogh August** - Physiology of the Blue Whale [*De physiologia speciei « Balaenoptera musculus »*]. 1 fig., Nature, CXXXIII, 3365, 635-637. London (1934). **b - 193**

Rate of growth. Metabolism, circulation and respiration. Liability of Whales to caisson disease.

**MacDonald Roderick** - Studies on the Defaecation of Marine Invertebrates [*Studia defaecationis in Invertebratis marinis*]. Woods Hole Oceanogr. Instit., Rep. 1933, App., 25-26. Woods Hole, Mass. (1934). **b - 194**

Possibility of the identification of the excremental pellets to determine species; study of the rate of defaecation in some bottom forms and in some cases, e. g. in *Arbacia punctata*. Observations on the faecal pellets from various points of view.

**Magnan Antoine, Magnan Claude & de Villelongue Albert** - Contribution à l'étude de la vision des Poissons [*Contributiones in Piscium visum studendum*]. C. R. Acad. Sc., CXCIX, 16, 736-738. Paris (1934). **b - 195**

Les AA. ont étudié les indices des divers milieux transparents de l'oeil de quelques Poissons : la truite commune, le brochet, le maquereau, dont il résulte que les diverses espèces sont légèrement myopes.

**Ozaki Yoshimasa** - Lymph System of *Teleotrema caudatum* [*Systhema lymphaticum speciei « Teleotrema caudatum »*]. 3 figs., Proc. Imp. Acad., X, 6, 380-383. Tokyo (1934). **b - 196**

Study of lymph system of *T. caudatum* from serial sections.

**Parker G. H.** - Studies of Fish Coloration [*Studia colorationis in Piscibus*]. Woods Hole Oceanogr. Instit. Rep. 1933, App., 26-27. Woods Hole, Mass. (1934). **b - 197**

Results of the work on the colour changes of the smooth dogfish, *Mustelus canis*, the identification of color changes in the little skate, *Raja erinacea*, and the color changes of certain Flatfishes.

**Peebles Florence & Fox Denis L.** - The Structure, Functions, and General Reactions of the Marine Sipunculid Worm *Dendrostoma zostericola* [*De structura, functionibus et reactionibus generalibus speciei « Dendrostoma zostericola »*]. 11 figs., Bull. Scripps Instit. Oceanogr., Techn. Ser., III, 9, 201-224. Berkeley, Calif. (1933). **b - 198**

This paper contains a morphological part dealing with external features and internal anatomy and a study of various responses of the worm : to food, to contact, to stagnation of the medium, to sound and other vibrations, to light stimuli etc. The effect of the injury caused by the removal of parts is also dealt with.

**Pettersson Hans, Höglund Hans & Landberg Svante** - Submarine Daylight and the Photosynthesis of Phyto-plankton [*Correlatio inter lucem diurnam submarinam et photosynthesim phytoplanctonicam*]. 4 figs., 5 tabl., Medd. Göteborgs Högskolas Oceanogr. Instit. (Göteborgs Kungl. Vetenskaps- och Vitterhets-Samhälles Handl. Femte Följden. Ser. B., IV, 5), 1-17. Göteborg (1934). **b - 199**

Experiments undertaken to find « compensation intensity » of submarine daylight corresponding to an equilibrium between photosynthesis and respiration in their effects on the oxygen content of the water have been carried out at Bornö Station. The preliminary value of this compensation intensity found from experiments with plankton containing a certain amount of zooplankton was 400 lux.

**Pierantoni Umberto** - Studi sui pigmenti dei Tunicati. Osservazioni su *Botrylloides leachi* (Sav.) e *Clavelina lepadiformis* (Müll). [*De pigmentis Tunicatorum. Observationes circa species « Botrylloides leachi »* (Sav.) *et « Clavelina lepadiformis »* (Müller)]. 1 tav., Atti R. Accad. Sc. fis. e matem., ser. II, XIX, 3, 1-14. Napoli (1933). **b - 200**

Fenomeno del cambiamento stagionale dei colori dell'ascidia composta *Botrylloides leachi*, cause delle variazioni dello stato delle capsule a pigmento aderenti alle pareti dei seni periferici. Origine di queste capsule da cellule vaganti nell'emolinfa, origine del pigmento, sua natura chimica (gruppo delle melanine). Disposizione del pigmento bianco di *Clavelina lepadiformis*, sua origine da speciali ameboidi del sangue, e comparsa dei granuli in vacuoli del plasma di esse. La sua natura chimica corrisponde alla guanina. Questi Tunicati, anche per la natura dei pigmenti, si avvicinano grandemente ai Vertebrati.

**Pintner Theodor** - Zur Kenntnis des Exkretionssystems der Cestoden [*Studia ad systema excretorium cognoscendum in Cestodis*]. 7 Abb., Sitz. Ber. Akad. Wiss., Abt. 1, CXLII, 5/7, 205-211. Wien (1934). **b - 201**

Der Vf. bespricht besonders die verschiedenen aus der glatten Gefässwand herausgezerrten Zipfel und derartigen Bildungen, welche sich weiter verzweigen und somit neue Windungen bilden (*Acanthobothrium filicolle* aus *Raja asterias*, *Trilocularia* (*Monorygma*) *gracilis* Olss. aus *Acanthias* und *Acanthobothrium coronatum* aus *Scyllium canicula*). Es werden auch die sehr komplizierten Gefässformen der Tetrarhynchen behandelt.

**Raphaël Claudette** - Étude de la trompe des Glycères et de son organe excréteur d'hémoglobine [*Studium tubarum in Glycera eiusque organi quod hemoglobinam secernit*]. Trav. Stat. Biol. Roscoff, 11, 3-18. Paris (1933). **b - 202**

En étudiant la trompe de *Glycera* l'A. a apporté dans le détail des précisations nouvelles sur sa structure, ainsi que sur celle des papilles qui la recouvrent. Il a observé la couronne de languettes qui pend dans le coelome, et à laquelle on attribuait un rôle nerveux. Selon l'A. cette couronne de languettes pourrait être un organe d'épuration éliminant l'hémoglobine.

**Redfield Alfred C.** - Studies in Marine Biology and Biological Chemistry [*De biologia et chemia biologica*]. Woods Hole Oceanogr. Instit. Rep. 1930-32, 44-45. Woods Hole, Mass. (1933). **b - 203**

Brief account of the work continued in 1932 (1) on the equilibrium of oxygen with respiratory proteins of marine animals ; (2) of the oxygen dissociation curves of the hemocyanin of the squid ; (3) of the asphyxiation of the squid at various temperatures ; (4) of certain properties of the blood of porpoise important in respiration ; (5) of the oxygen dissociation curves of the blood of the toadfish, *Opsanus tau* L., tautog, *Tautoga onitis* L., and goosefish, *Lophius piscatorius* L. ; (6) of the carotinoid pigments of *Crustacea* ; (7) and of observations made during a short cruise of the « Atlantis » to the Gulf of Maine with a view to determine whether there existed diurnal alternations in the hydrogen ion concentration and oxygen content of the sea water occasioned by the interruption of photosynthetic activity during the night.

**Rizzo Carlo** - Sui movimenti dei Teleostei in rapporto con lesioni sperimentali degli apparati periferici di moto e di senso. III : Lesioni della linea laterale [*De motibus Teleosteorum pro vulneribus ad experimentum inlatis in apparatibus perifericis motus et sensus. III. Vulnera lineae lateralis*] Boll. Soc. Ital. Biol. Sper., VIII, 2, 153-156. Napoli (1933). **b - 204**

Esperimenti condotti su Teleostei marini (Labridi) e d'acqua dolce (Ciprinoidi), allo scopo di controllare la importanza o meno della linea laterale del moto dei Teleostei, e, più precisamente per vedere se la distruzione di una o di entrambe le linee laterali riproducesse in tutto o in parte quei disturbi della locomozione e dell'equilibrio già dall'A. analizzati nei pesci encefalolesi. Risulta che la distruzione di uno o di entrambe le linee laterali non ha una particolare importanza agli effetti del nuoto e dell'equilibrio dei Teleostei.

**Rollefsen Gunnar** - The Cod Otolith as a Guide to Race, Sexual Development and Mortality [*De otholitis in specie « Gadus morrhua » ac indicibus originis, progressionis sexualis et mortalitatis*]. 8 figs., Rapp. Pr.-Verb. Cons. Expl. Mer (Scient. Rep. North Eastern Area Comm. 1934), LXXXVIII, 1-5. Copenhague (1934). **b - 205**

Referring to a preliminary publication the A. here tries to sustain the theory that the otoliths may serve for determining different races, the extent of maturity, increase and decrease in the stock of « skrei ». Some calculations concerning age- and length-distribution and spawning classes are expressed graphically and discussed.

**Sandon H.** - Pseudopodial Movements of *Foraminifera* [*Foraminifera. Pseudopoda eorumque motus*]. Nature, CXXXIII, 3368, 761-762. London (1934). **b - 206**

Re-examination of the different types of pseudopodia to elucidate the protoplasmic changes accompanying amoeboid movement.

Preliminary observations which have some bearing on the following questions: exact location of the various moving streams; nature of the motive force producing them; the conditions of stability of the fluid pseudopodia.

**Schmidt-Nielsen S., Flood Arne & Stene Jørgine** - On the Size of the Liver of some Bone-fishes, their Content of Fat and Vitamin A. [*De magnitudine jecinoris aliquorum Teleosteorum. Agitur de continentia adipis et vitaminæ A in Teleosteis*]. Tab., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 38, 146-149. Trondheim (1934). **b - 207**

In a table are given the results of the last six years' researches on the colour reaction after Carr and Price of the liver oil from about 30 different bone-fishes, as well as the size of the liver in per cent of the total weight, and its content of fat. The highest tintometer number of the liver oil was found for the *Macrurus*, i. e. 5000-12000.

**Spärck R.** - Investigations on the Biology of the Oyster. X. Some Preliminary Investigations on the Power of Filtration in *Ostrea edulis* [*Inquisitiones in biologiam ostreae. X. Investigationes priores in possibilitatem filtrationis in Ostrea eduli*]. Rep. Danish Biol. Stat., XXXVIII, 31-32. Copenhagen (1933). **b - 208**

Description of the experiments undertaken at the Zoophysiological laboratory of the university on the vigour of the ciliary motion of the oyster in water not moved by currents.

**Sumner Francis** - Studies of the Mechanism of Color Changes in Fishes [*Studia colorationis Piscium quoad mechanismum mutationis*] James Johnstone Mem. Vol., 62-80, Liverpool (1934). **b - 209**

The present paper is restricted to pronounced color changes on the part of Fishes which are induced by optic stimuli. The discussion is limited to certain problems to which the writer has devoted particular attention, i. e. (1) responses to the intensity or quality of the incident light, and (2) responses to the shade or the color of the background. The mechanism of those responses are dealt with and various hypothesis concerned with the determining factors in these reactions are discussed.

**Takahasi Sadae** - On the Variability of Paragnathi in *Nereis mictodonta* Marenzeller (*Perinereis nuntia* var. *brevicirris* Grube) [*Quæstio de variabilitate paragnathorum in specie «Nereis mictodonta»* Marenzeller (*Perinereis nuntia var. brevicirris* Grube)]. 4 figs., Ann. Zool. Jap., XIV, 1, 35-40. Tokyo (1933). **b - 210**

The great variation in the number and arrangement of the paragnathi.

**Watzka Max** - Vergleichende Untersuchungen über den ultimobranchialen Körper [*Inquisitiones comparativæ in corpusculum ultimobranchiale*] 35 Abb., Ztschr. f. Mikroskop-Anat. Forsch., XXXIV, 4, 485-533. Leipzig (1933). **b - 211**

Der Vf. sucht hier durch ausgedehnte vergleichende Untersuchungen ein besseres Verständnis des Bauplanes und der Wirkungsweise des ultimobranchialen Körpers zu gewinnen. Bei den niedrigsten Wirbeltierklassen, den Cyclostomen, ist kein dergleiches Organ nachgewiesen worden, bei den Fischen ist dieser ultimobranchiale Körper schon bei den Elasmobranchiern, an Embryonen verschiedener Selachierarten und bei den Teleostiern unter verschiedenen Formen vorhanden. Drei Teleostier, *Scomber scomber*, *Centronotus gunellus* und *Zoarces viviparus* sind vom Vf. untersucht, beschrieben und mit anderen Organen verglichen worden.

## *Apparatus musculorum et scheletrum - Quæstio de motu.*

**Benazzi Mario** - L'influenza dell'acqua di mare diluita sui movimenti ritmici delle Meduse [*De influentia aquæ maris dilutæ in motus rythmicos Medusarum*]. Boll. Zool., IV, 6, 211-219. Napoli (1933). **b - 212**

L'A. dopo aver riassunti dati risultanti dalla letteratura, espone osservazioni compiute su due Scifomeduse: *Rhizostoma pulmo* e *Cotylorhiza tuberculata*, nelle quali si era proposto di indagare l'influenza di una varia e progressiva diluizione dell'acqua marina sul ritmo e sulla frequenza dei movimenti da esse compiuti, nonchè il loro meccanismo fisiologico. Risulta che l'attività contrattile delle Meduse in questione, offre verso un ambiente esterno ipotonico, una resistenza nettamente superiore a quella presentata dal cuore di questi Invertebrati.

**Bonde (von) Cecil** - Contributions to the Morphology of the *Elasmobranchii*. I. The Craniology and Neurology of a Hammerhead Shark *Sphyrna* (*Cestracion*) *zygaena* (Linnaeus) [*Contributiones in morphologiam Elasmobranchiorum I. De craniologia et neurologia speciei «Sphyrna (Cestracion) zygæna» (Linnaeus), quæ capite est prædita instar mallei*]. 9 figs., 4 pl., Journ. Comp. Neurol., LVIII, 2, 377-399. Philadelphia, Pa. (1933). **b - 213**

Notes on the different species of the family *Sphyrnidae*, in which the head is laterally expanded in the frontal region, so that it is T- or hammer-shaped. The sensory canal system. The skull. The eye muscles. The central and the peripheral nervous system.

**Bonde (von) Cecil** - Contributions to the Morphology of the *Elasmobranchii*. II. The Craniology and Neurology of a Saw Shark, *Pliotrema Warreni* Regan [*Contributiones in morphologiam Elasmobranchiorum. II. De craniologia et neurologia speciei «Pliotrema Warreni»* Regan]. 5 figs., 3 pl., Journ. Comp. Neurol., LVIII, 2, 405-414. Philadelphia, Pa. (1933). **b - 214**

Owing to the presence of an elongated rostrum the craniology and neurology of this species are peculiar: Sensory canal system. The skull. The eye muscles. The nervous system: central nervous system, peripheral nervous system.

**Campbell J.** - The Composition of Lobster Muscle [*De compositione musculorum in specie «Homarus americanus»*]. Ann. Rep. Biol. Board Canada, 1933, 16-17. Ottawa (1934). **b - 215**

Study of the non-protein nitrogenous constituents of lobster muscle (*Homarus americanus*) in relation to its digestion. A larger effect on the digestive secretions from the above constituents of lobster muscle than from the same constituents of haddock, cod or herring muscle.

**Campbell J.** - The Composition of Skate Muscle *Raja stabuliforis* [*De compositione musculorum in specie «Raja stabuliforis»*]. Ann. Rep. Biol. Board Canada, 1933, 17. Ottawa (1934). **b - 216**

Results of some determinations made of the non-protein nitrogenous constituents of the «wing» muscles of the «barn-door» skate. The values for volatile base nitrogen and urea nitrogen are of the same order as that for cod or herring.

**Chabanaud Paul** - Le complexe basisphénoïdien et le septum orbitaire nadiral des Poissons héteromes [*Complexus basisphenoidicus et septum orbitale nadirale Piscium heterosomatum*]. C. R. Acad. Sc., CXCVIII, 21, 1875-1877. Paris (1934). **b - 217**

Différences dans la constitution du basisphénoïde et du septum interorbitaire, entre les *Psettodidae* et les autres *Heterosomata*.

**Chauchard A., B. & P.** - Recherches sur le fonctionnnement neuro-moteur chez quelques animaux marins [*Inquisitiones in functionem neuromotoriam aliquorum animalium marinorum*]. Bull. Labor. Marit. Saint Servan, XII, 23-35. Rennes (1934). **b - 218**

On sait que la chronaxie est susceptible de varier dans les éléments nerveux reliés aux centres, et que cette variation est à la base du mécanisme régulateur du fonctionnement nerveux; quand les éléments nerveux ne sont plus reliés aux centres, la chronaxie se stabilise : chronaxie « de constitution », opposée à la chronaxie « de subordination ». Ces faits s'étendent-ils à des animaux marins (Crustacés et Sélaciens) ? 1) Etude sur *Portunus puber*. La section des connectifs périoesophagiens, section qui supprime l'action des ganglions céréboïdes sur les nerfs moteurs, est suivie d'une augmentation de la chronaxie de ces nerfs. Une seconde augmentation s'observe à la suite de l'élimination du centre sous-oesophagien : il y a donc une double subordination. L'action du chloroforme produit le même effet que l'isolement du ganglion cérébroïde, mais elle n'atteint pas le centre abdominal ; 2) Etude sur *Scylliorhinus canicula*. La subordination s'y manifeste, comme chez les autres Vertébrés, par une variabilité de la chronaxie, qui fait place à une stabilisation après la section ou après l'action du chloroforme.

**Fedele Marco** - Ricerche sulla natura dei ritmi muscolari negli Invertebrati [*Rythmi musculares Invertebratorum inquisitionesque in eorum naturam*]. 4 fig., Arch. Sc. Biol., XIX, 2, 107-143. Napoli (1933). **b - 219**

Il sistema nervoso dei *Thaliacea*, come di tutti i Tunicati, non presenta nulla che possa ritenersi come una rete fibrocellulare diffusa periferica, un neuro-epitelio in rapporto con il sensorio e con la muscolatura somatica. Il sistema nervoso in rapporto al sensorio e all'attività contrattile dei muscoli somatici dei *Thaliacea* ha il suo centro esclusivo nell'unico ganglio dorsale. Le contrazioni ritmiche della muscolatura somatica dei Salpidei dipendono dal centro nervoso; il ritmo dell'intera muscolatura somatica si coordina esclusivamente nel centro nervoso. La distruzione della sinapsi sensoriomotrice abolisce questi riflessi, ma non l'attività ritmica della muscolatura. Il sensorio non entra nella determinazione del ritmo muscolare somatico, ma influisce solo sulla regolazione di esso. Quello somatico delle Salpe può definirsi un ritmo muscolare autonomo neurocentrigeno.

**Fedele Marco** - Sul ritmo muscolare somatico delle Salpe [*De rythmo musculari somatico in Salpis*]. Boll. Soc. Ital. Biol. Sper., VIII, 4, 475-478. Napoli (1933). **b - 220**

I risultati testimoniano la centrigenità degli impulsi e la loro natura discontinua, per il fatto che nelle Salpe l'ipotesi di un impulso continuo partente dal centro non spiegherebbe la sincronia del ritmo fra i diversi gruppi di fasce muscolari, come difficilmente lo spiegherebbe l'ipotesi di impulsi ritmici centrali di successione diversa dalle manifestazioni ritmiche contrattive.

**Fedele Marco** - Muscoli e attività muscolare nei *Thaliacea* [*De musculis et activitate musculari in Thaliaceis*]. Boll. Soc. Natural. Napoli, XLIV, 1932, 237-250. Napoli (1933). **b - 221**

Studio istologico e fisiologico della muscolatura dei *Thaliacea*; caratteri istologici distribuiti in sette tipi, fra i quali cinque rappresentati da elementi striati dei *Salpidae* e due da elementi lisci dei *Doliolidae*. Studio fisiologico dell'attività ritmica della muscolatura dei *Salpidae*, che si dimostra attività autonoma neurocentrigena, la cui determinazione è connessa con la zona di cellule motrici del ganglio centrale ed è indipendente dal sensorio.

**Graham Alastair** - The Cruciform Muscle of Lamellibranchs [*De musculo cruciformi in Lamellibranchiatis*]. 6 figs., Proc. R. Soc. Edinburgh, 1933-34, LIV, 1, 17-30. Edinburgh (1934). **b - 222**

The cruciform muscle of Lamellibranchs has always been associated with its special sense organs. It has been studied in the following species: *Donax vittatus*, *Tellina crassa*, *Macoma balthica*, *Scrobicularia plana*, *Gari tellinella*, and *Solecurtus scopula*.

It is suggested that the cruciform muscle and its sense organs form a water-testing apparatus. On the basis of the occurrence of this structure in certain of its members the family *Solenidae* is broken into two families : 1) the *Solenidae*, without a cruciform muscle ; 2) the *Solecurtidae*, which possess one.

**Hart J. L.** - Investigations Dealing with Vertebra Number in Young Herring [*Inquisitiones in numerum vertebrarum aringi juvenis*]. Ann. Rep. Biol. Board Canada, 1933, 86. Ottawa (1934) **b - 223**

Some results of a study on the vertebral numbers in young herring showing significant differences between herring from various localities and the higher proportion of abnormal vertebrae in the young herring in comparison with the proportion found among adults.

**Howell A. Brazier** - The Architecture of the Pectoral Appendage of the Dogfish [*Architectura appendicis pectoralis in Squalis*]. 4 figs., Journ. Morphol., 399-413. Boston (1933). **b - 224**

**Howell A. Brazier** - Morphology of the Pectoral Architecture in Fish [*Morphologia structuræ pectoralis in Piscibus*]. Mount Desert Island Biol. Labor., Annual. Announc. 1933 and Rep. 1932, 23. (1933). **b - 225**

**Howell A. Brazier** - Morphogenesis of the Shoulder Architecture. Part II. Pisces [*De morphogenesi in architectura humeri. Pars II. Pisces*]. 12 figs., Quart. Rev. Biol., VIII, 433-464. Baltimore (1933). **b - 226**

Historical. Apinnate Chordates. Fossil prefishes. Chondrichthyes. Genesis of the appendages : fin-fold theory and gill-arch theory, position of the appendages, exoskeletal fin genesis, stimulation by diverse uses. Anatomical evidence in living fish: pharyngeal, skeletal, neurological and myological evidence.

**Jennison Marshall Wolker & Wymond Miller Bunker John** - Analysis of the Movement of Cilia from the Clam (*Mya*) by High-speed Photography with Stroboscopic Light. [*Analysis motus ciliarum in quadam Mya per photographiam maxima velocitate lucis stroboscopicae auxilio*]. Journ. Cell. & Comp. Physiol., V, 2. (1934). **b - 227**

A new tool in biological research — the stroboscopic-light, high-speed motion picture camera — was used to obtain photomicrographic records of ciliary movement, pictures being taken at the rate of 200 per second. Analysis showed the form of the cilia to be different during the effective and recovery strokes, in the former, the rigid cilium had a pendular movement ; in the latter, it was limp with a hook-like form. The total time for the complete ciliary cycle varied appreciably in consecutive beats of the same cilium, although the effective stroke was always three or four times as rapid as the recovery stroke. Both the effective stroke and the recovery stroke begin at the base of the cilium, the tip lagging slightly behind the proximal portion (Authors) (Bibliogr. Serv. Wistar Inst., 5285).

**Langstroth M. A.** - Development and Fat-storing Ability of Lateral Muscle of Salmon [*Progressio et capacitas adipis cumulandi in musculis lateralibus salmonis*]. Ann. Rep. Biol. Board Canada, 1933, 25. Ottawa (9134). **b - 228**

Description of the musculus superficialis lateralis of salmon in regard to its development and fat-storing ability. Its comparison with the deeper lateral muscles.

**Raucci Tosca** - Ricerche sulla struttura dei muscoli adduttori dei Bivalvi [*Inquisitiones de structura musculorum abducentium in Bivalvis*]. 3 fig., Atti Soc. Ital. Sc. Natur. e Mus. Civ. St. Natur. Milano, LXXII, 3/4, 219-231. Milano (1933). **b - 229**

Cenni morfologici e fisiologici sui muscoli adduttori dei Bivalvi fatto nei Monomiari e Dimiari.

Descrizione particolareggiata del corpo glomeruloso (o nucleo rotondo): grossa formazione pari del diencefalo di taluni gruppi di Teleostei, in base all'applicazione dei più fini ed elettivi metodi di citologia nervosa.

**Suyehiro Y.** - Doesn't the Vomiting Center Exist in the Fish ? [*Num loqui possumus de centro vomitionis in Piscibus ?*] (In Jap., Engl. Rés.). 2 figs., 3 tabl., Bull. Jap. Soc. Scient. Fish., II, 6, 307-311. Tokyo (1934). **b - 239**

The writer makes suggestion on the existence of the vomiting center in the fish.

**Svensson Erik** - Ueber die Augen und das Gehirn von *Haploops tubicola* Lilj. [*De oculis et cerebro speciei « Haploops tubicola »* Lilj.]. 7 Abb., Ark. f. Zool., XXV A, H. 4, 18, 1-16. Stockholm (1934). **b - 240**

Der Vf. sucht hier zu beweisen, dass das bei *Haploops tubicola* Lilj. von ihm gefundene dritte Augenpaar auch bei *Ampelisca* vorkommt. Das dorsale Augenpaar: der Bau des Linsenauges, die Cornealinse, die Hypodermisschicht, der Glaskörper und dessen Kernschicht, die Semperschen Kerne und die Kristallkegel, die Retinaschicht. Das ventrale Augenpaar. Das caudo-dorsale Augenpaar. Das Gehirn. Kommissuren.

**An.** - LI. Nervous System and Sense Organs. *Crustacea Branchiopoda* [*LI. De systhemate nervorum deque organis sensuum. Crustacea Branchiopoda*]. 5 figs., Journ. Entomol. & Zool., XXVI, 3, 35-45. Claremont, Calif. (1934). **b - 241**

General form of the nervous system of branchiopod *Crustacea* according to the description of several preceding authors. General form of the ganglia. Cells. Fiber tracts. Some general conclusions.

**An.** - Nervous System and Sense Organs. LII. *Crustacea* [*De systhemate nervorum deque organis sensuum. LII. Crustacea*]. 7 figs., Journ. Entomol. & Zool., XXVI, 4, 58-69. Claremont, Calif. (1934). **b - 242**

Anatomical description of the nervous system and sense organs in the following groups: *Ostracoda, Cirripedia, Copepoda, Nebaliacea, Cumacea.*

## *Circulatio et apparatus sanguinis.*

**Boucher-Firly S.** - Sur quelques constituants chimiques du sang de congre et de murène [*Constituentes chimici sanguinis in generibus « Conger » et « Muræna »*]. 3 tabl., Bull. Inst. Océanogr., 651, 1-7. Monaco (1934). **b - 243**

Historique. Techniques utilisées. Les résultats des dosages effectués, soit dans le sérum, soit dans le sang total, chez le congre et la murène, sont très comparables. Les différences concernent : la teneur en protéines et la réserve alcaline.

**Daniel Frank J.** - The Circulation of Blood in *Ammocoetes* [*De sanguinis circulatione in « Ammocoetes »*]. 11 figs., Univ. Calif. Publ. in Zool., XXXIX, 16, 311-340. Berkeley, Calif. (1934). **b - 244**

The present work is concerned with the structure and development of the organs of circulation, and the movement of blood in the head and pharynx of *Ammocoetes*, the larva of the Cyclostome, *Entosphenous tridentatus*, which occur in abundance in the mouths of streams along the western Pacific slopes.

**Fontaine M. & Boucher-Firly S.** - Recherches sur la réserve alcaline du sang des Poissons. Ses variations au cours des changements de salinité [*Inquisitiones in reservam alcalinam sanguinis Piscium. Quæstio de eius variationibus, salsedinis mutationibus perdurantibus*]. Bull. Inst. Océanogr., 646, 1-12. Monaco (1934). **b - 245**

Chez un poisson euryhalin, l'anguille, la réserve alcaline diminue très rapidement au début du séjour en eau salée. Chez les Poissons dulçaquicoles (sténohalins ou euryhalins) l'augmentation de salinité entraîne une diminution très importante de la réserve alcaline du sang. Chez les Poissons sténohalins marins une diminution de salinité entraîne une augmentation importante de la réserve alcaline du sang. Interprétation et discussion de ces résultats.

**Hopkins A. E.** - Accessory Hearts in the Oyster, *Ostrea gigas* [*De cordibus additiciis in specie « Ostrea gigas »*]. 2 figs., 1 table, Biol. Bull., LXVII, 3, 346-355. Lancaster, Pa. (1934). **b - 246**

In three species of *Ostrea* a pair of actively pulsating accessory hearts was observed in the lateral walls of the cloacal chamber. Counts of the rate of pulsation of heart and accessory hearts in *O. gigas* show that they act independently. Description of the course of circulation, as influenced by the accessory hearts.

**Hopkins A. E.** - Accessory Hearts in the Oyster [*De cordibus additiciis in ostrea*]. Science, LXXX, 2079, 411-412. New York (1934). **b - 247**

Description of two accessory hearts found in *Ostrea gigas*. Their activity, the rate of pulsation, their function. The circulatory system of the oyster.

**Laporta M.** - Sulla costituzione della emocianina di *Octopus* [*De hemocyanina in specie « Octopus ». Quæstio de eius constitutione*]. Arch. Sc. Biol. (XIV Congr. Int. Fisiol., Roma 29 ag.-3 sett. 1932), XVIII, 1/4, 219-220. Napoli (1933). **b - 248**

Preparazione e proprietà chimiche.

**Redfield Alfred C.** - Studies on the Physical Chemistry of Respiratory Proteins [*Studia chimico-physica proteinarum respirationis*]. Woods Hole Oceanogr. Instit. Rep. 1930-32, 34. Woods Hole, Mass. (1933). **b - 249**

Brief account of a study of the effect of temperature upon the equilibrium of the blood of marine Invertebrates with oxygen. A complete series of data has been obtained upon the blood of the horseshoe crab at temperatures varying between 5° C and 44° C.

**Reznikoff P. & Reznikoff Grout D.** - Hematological Studies in Dogfish (*Mustelus canis*) [*Studia de sanguine in specie « Mustelus canis »*]. 5 tabl., Biol. Bull., LXVI, 2, 115-123. Lancaster, Pa. (1934). **b - 250**

The normal blood picture and the effect of removal of blood and of turpentine injections : Blood picture in twenty-five dogfish ; effects of frequent removal of blood or removal of blood in large amounts ; of injection of sterile distillated water or of turpentine interperitoneally on the blood picture. These investigations indicate that the changes observed in the blood pictures at the above conditions may be of importance in comparative biological problems.

**Scatizzi Ida** - L'organo linfomieloide pericardico dello storione [*De organo lymphomieloidi pericardico acipenseris*]. 3 fig., Arch. Zool. Ital., XVIII 1/2, 1-26. Napoli (1933). **b - 251**

L'esame dello strato linfomieloide assai sviluppato che avvolge il cuore dello storione, fa ritenere che quest'organo a produzione mista, linfocitaria prevalentemente ed eritrocitaria secondariamente, non sia un tessuto semplicemente linfoide, ma un vero tessuto di tipo linfomieloide.

**Stolz-Picchio Teresa** - Le nostre conoscenze sulla ematogenesi embrionale e larvale nei Pesci [*Quæ cognovimus de hematogenesi embryonali et larvali in Piscibus*]. Rend. R. Ist. Lomb. Sc. e Lett., ser. II, LXVI, 6/10, 575-589. Milano (1933). **b - 252**

L'A. passa rapidamente in rassegna le cognizioni che si hanno attualmente sul modo col quale si verifica l'ematogenesi nell'embrione e nella larva dei pesci, tenendo distinti fra loro i diversi gruppi di questa classe, che offrono condizioni diverse.

**Suzuki Senji** - On the Distribution of Ganglion Cells in the Heart of the Oyster [*De distributione cellularum gangliarium in corde ostrearum*]. 6 figs., Sc. Rep. Tôhoku Imp. Univ., Fourth Ser., Biol., VIII, 4, 335-344. Sendai, Japan (1934). **b - 253**

The visceral ganglion consists of two parts : central fibrous and peripheral ganglion cell part. The ganglion cell is unipolar and has a large nucleus which contains a clear nucleolus.

The nerves which originate from the visceral ganglion and enter the tissue around the heart were observed.

The ganglion cells in the heart were discovered and the distribution of these cells were determined.

In the auricle were observed nerve fibers, which end in the muscle of the septum at the auriculo-ventricular junction forming any special end organs.

**Turner Abby H.** - Studies on the Colloid Osmotic Pressure of the Blood of Fishes [*De pressione osmotica colloidali sanguinis Piscium*]. 1 table, Woods Hole Oceanogr. Instit., Rep. 1933, 35. Woods Hole, Mass. (1934). **b - 254**

Results of a study of the colloid osmotic pressure of some species of elasmobranch and teleostean blood, 5 species and 3 species respectively, and of two Invertebrates, *Loligo* and *Limulus*. The species of Teleosts studied are the following ones : *Paralichthys dentatus, Prionotus carolinus, P. evolans strigatus, Sarda sarda*, and *Tautoga onitis*.

## *Alimentatio et apparatus digestionis.*

**Antoniu A.** - Notes sur l'anatomie du tube digestif chez quelques espèces du genre *Mugil* [*De anatomia apparatus digestionis aliquarum specierum ad genus « Mugil » pertinentium*]. 14 fig., Ann. Scient. Univ. Jassy, XIX, 1/4, 287-307. Jassy (1934). **b - 255**

Description détaillée des différentes régions du tube digestif. Variations spécifiques du tube digestif.

**Babkin B. P., Chaisson A. F. & Friedman M. H.** - Studies on Gastric Secretion in Skate [*De secretione gastrica in Raja*]. Ann. Rep. Biol. Board Canada, 1933, 13-14. Ottawa (1934). **b - 256**

Data obtained in an investigation carried on in order to study the mechanism of gastric secretion in the comparatively simple Vertebrates, the elasmobranch Fishes, and to elucidate on hand of the results obtained certain phases of the extremely complicated secretory processes of the higher Vertebrates.

**Battle Helen I.** - Laboratory Feeding of the Herring [*De alimentatione experimentali aringi*]. Ann. Rep. Biol. Board Canada, 1933, 14-15. Ottawa (1934). **b - 257**

Results of observations on the habits of the small herring (the sardine of commerce) acclimatized to laboratory tanks with running sea water, showing that his feeding is selective and carried on always by a definite act of capture and not by a mere straining process as thought by early investigators.

**Battle Helen I.** - Effect of Temperature on Rate of Digestion («Clearing») in Herring [*Effectus temperaturæ in digestionem aringi*]. Ann. Biol. Board Canada, 1933, 15. Ottawa (1934). **b - 258**

Results of investigation on sardine-size herring kept under laboratory condition, which allows to determine with some degree of accuracy the relationship between the time required for the «clearing» of the digestive tract and the environmental temperature.

**Berkeley C. J.** - Digestion in Clams and Oysters [*De digestione in «Pecten» et Ostreis*]. Ann. Rep. Biol. Board Canada, 1933, 70. Ottawa (1934). **b - 259**

Results of work on the crystalline style, the solid digestive agent occurring in Clams, Oysters and other Molluscs, and of a close study of the oxidising mechanism, which depends for its activity on some component, or components, of the Diatoms forming the food material of the Molluscs concerned.

**Bertolini Fausta** - Dentatura dei Selaci in rapporto con la nutrizione [*Correlatio inter dentes et alimentationem in Selachioideis*]. Atti R. Accad. Naz. Lincei - Rend. Cl. Sc. Fis., Matem. e Natur., XVIII, 5/6, 234-237. Roma (1933). **b - 260**

Esaminando la varietà di dentatura in rapporto alla diversità di vitto l'A. distingue quattro tipi di apparato boccale dei Selaci: Selaci predatori, Selaci masticatori, Selaci trituratori, Torpedini. Questi quattro tipi corrispondono a quattro diversi regimi di alimentazione caratterizzati prevalentemente da: Cefalopodi e Pesci, Crostacei, Molluschi con conchiglia e Paguri, Pesci paralizzati. Come varietà del I° tipo l'A. pone i Selaci mangiatori di plancton; rileva pure l'importanza dell'organo elettrico delle Torpedini nell'alimentazione di questi animali.

**Bond R. M.** - Digestive Enzymes of the Pelagic Copepod, *Calanus finmarchicus* [*Enzymi digestionis speciei «Calanus finmarchicus»*]. 1 fig., Biol. Bull., LXVII, 3, 461-465. Lancaster, Pa. (1934). **b - 261**

*Calanus finmarchicus* contains enzymes which digest protein, starch, and fat. Proteolytic digestion is performed by the extracted enzymes from pH 2.4 to above pH 11.0; there is a peak of activity at pH 3.6-4.0 and a still greater peak at pH 8.0-8.49. Digestion of starch is performed by the extract from slightly below pH 6.0 to above pH 8.0 with an optimum at about 7.2. There is no digestion of alginic acid at pH 8.0, and no evidence was obtained that it is digested at any other pH.

The copepod extract will digest Diatoms, Bacteria, and at least a part of the cell contents of a green flagellate.

**Cobb W. M.** - The Dentition of the Walrus, *Odobenus obesus* [*De dentitione in specie «Odobenus obesus»*]. 8 figs., 6 pl., Proc. Zool. Soc. London, 3, 645-668. London (1933). **b - 262**

On hand of material collected in Alaska.

**Cannon H. G.** - On the Feeding Mechanism of Certain Marine Ostracods [*De mechanismo alimentationis in Ostracodis quibusdam marinis*]. Trans. R. Soc. Edinburgh, LVII, 739-364. Edinburgh (1934). **b - 263**

**Chesley Leon C.** - The Concentration of Proteases, Amylase, and Lipase in Certain Marine Fishes [*Proteasica, amylasica et lipasica concentratio in Piscibus marinis*]. 6 tabl., Biol. Bull., LXVI, 2, 133-144. Lancaster, Pa. (1934). **b - 264**

In view of the fact that marine Fishes show great diversity as to food, feeding habits, special habitat, and rate and type of metabolism, it is to be expected that there will be adaptive variations in the amounts and sites of production of the different digestive enzymes secreted. It is the purpose of the present investigation to determine where the enzymes are secreted, and in what quantities, with a view to making correlations with the anatomy and physiology of the Fishes studied. The Fishes used were selected as representatives of diverse specialization, i. e.: (1) very active: *Scomber scomber* L., *Brevoörtia tyrannus* Latr., *Stenotomus chrysops* L.; (2) intermediately active: *Prionotus carolinus* L., *Spheroides maculatus* Bl. & Schn., and (3) inactive or sluggish: *Opsanus tau* L.

**Clemens W. A.** - Food of the Young Spring Salmon (*Oncorhynchus tschawytscha* in Shuswap Lake, British Columbia, (Canada) [*De alimentatione in specie «Oncorhynchus tschawytscha»*]. Canad. Field Natural., XLVIII, 142, Ottawa (1934). **b - 265**

**Dennell R.** - The Habits and Feeding Mechanism of the Amphipod *Haustorius arenarius* Slabber [*Consuetudines et mechanismum alimentare in specie «Haustorius arenarius» Slabber*]. Journ. Linn. Soc. (Zool.), XXXVIII, 363-388. London (1933). **b - 266**

**Fedele Marco** - Sul complesso delle funzioni che intervengono nel meccanismo ingestivo dei *Salpidæ* [*Complexus functionum in mechanismo ingestionis Salpidarum*]. Atti R. Accad. Naz. Lincei, Serie 6ª, Rend. Cl. Sc. Fis., Matem. e Natur., XVII, 3, 241-245. Roma (1933). **b - 267**

Sono state studiate cinque specie di *Salpidae: Cyclosalpa pinnata, Salpa democratica, S. maxima, S. fusiformis, S. confoederata* f. *bicaudata*. Oltre l'esame del contenuto intestinale l'A. ha fatto uno studio comparativo del plancton, pescato nelle località di cattura delle Salpe, e ha eseguito esperimenti di alimentazione in laboratorio. Questo studio ecologico è accompagnato dallo studio anatomico e fisiologico delle parti che intervengono nell'alimentazione. Nello studio del meccanismo ingestivo è stata presa in esame anche l'anatomia delle parti che in esso intervengono, in special modo della zona periesofagea, ancora non studiata in questi animali, e sono messi in evidenza i legami nervosi intercorrenti fra queste parti.

**Fedele Marco** - Sulla nutrizione degli animali pelagici. III: Ricerche sui *Salpidæ* [*De alimentatione in animalibus pelagicis. III. Inquisitiones in Salpidas*]. 13 ill., Boll. Soc. Natural. Napoli, XLV, 1933, 49-117. Napoli (1934). **b - 268**

Sulla base di uno studio planctologico, condotto nel Golfo di Napoli, e di indagini anatomiche e sperimentali sull'apparato digerente, sul sistema nervoso e sui vari organi e sulle attività dinamiche in rapporto con la ingestione, in cinque specie di *Salpidae* (*Salpa democratica, S. maxima, S. fusiformis, S. confoederata* f. *bicaudata, Cyclosalpa pinnata*), l'A. espone in questo studio i risultati riguardanti le qualità delle sostanze ingerite e la modalità della prensione degli alimenti tracciando, da un lato, un quadro delle varie specie di organismi e detriti ingeriti, in rapporto alla microflora e microfauna contemporanea nelle acque, e precisando, dall'altra, i vari fattori del meccanismo ingestivo, non solo nei riguardi delle disposizioni anatomiche dell'esofago, endostile, branchia, e delle varie formazioni ciliate connesse, ma illustrando e precisando il contributo e i rapporti funzionali di queste varie parti. Egli mette anche in luce i legami funzionali con il sistema nervoso, esaminando i dispositivi ricettori per gli stimoli chimici e tattili in rapporto con l'apparato digerente ed i centri autonomi viscerali, e dando di essi una rappresentazione anatomica.

**Huntsman A. G.** - Factors Making Plankton Available as Herring Food [*De plancton ac alimentum aringorum*]. Ann. Rep. Biol. Board Canada, 1933, 22-23. Ottawa (1934). **b - 269**

Description of the conditions in the Passamaquoddy region, which make available for the herring its food, consisting chiefly of Euphausiids (« shrimp ») and the copepod *Calanus* (the principal type of « red feed »). Tidal mixing of the water, which at times concentrates these deep-living organisms in the mixing places, where they are brought near to the surface and made available as food for the herring.

Caratteristiche somatiche e analisi stomacale del genere *Trigla*, diffusissimo abitante dei nostri mari.

**Yasukawa Y.** - Studies on the Colon *Bacteria* from Oysters [*Bacteria in colon ostrearum*] (In Jap., Engl. Rés.). Bull. Jap. Soc. Scient. Fish., III, 2, 77-79. Tokyo (1934). **b - 282**

### *Respiratio et apparatus respirationis.*

**Bertolini Fausta** - Sulle funzioni dei polmoni acquatici delle Oloturie [*Pulmones aquatici in Holothuriis eorumque functio*]. 4 fig., Pubbl. Staz. Zool. Napoli, XIII, 1, 1-11. Napoli (1933). **b - 283**

L'ossidazione del leucoderivato del blu di metilene dimostra che i polmoni acquatici delle Oloturie hanno funzione respiratoria. L'intestino non ha funzione respiratoria, l'hanno invece verosimilmente i tentacoli boccali, i pedicelli ambulacrali e la cute. L'ossigeno viene assorbito molto lentamente e molto lentamente giunge ai tessuti, secondo quanto doveva attendersi dalla grande lentezza della circolazione messa in evidenza da Enriques. L'ossigeno dal polmone acquatico di destra passa alle reti mirabili e al vaso ventrale destro. Raggiunge solo in un secondo tempo l'intestino e compare nella musculatura che riveste le pareti del corpo. I polmoni acquatici hanno anche funzione idrostatica ed escretrice. Si esclude una loro funzione ematopoietica.

**Campbell J. Argyll** - Whales and Caisson Disease [*Balænæ et morbus capsarum* (*ut dicitur*)]. Nature, CXXXIV, 3390, 629. London (1934). **b - 284**

New theory to explain how the Whales escape caisson disease, i. e. by filling their lungs with sea-water.

**Das B. K.** - The Habits and Structure of *Pseudapocryptes lanceolatus*, a Fish in the First Stages of Structural Adaptation to Aerial Respiration [« *Pseudapocryptes lanceolatus* ». *Agitur de eius consuetudinibus et structura praecipue quoad adaptationem ad respirationem aëriam*]. 2 pl., Proc. R. Soc., CXV, B 795, 422-430. London (1934). **b - 285**

The facts adduced in this paper justify the conclusion that aerial respiration at intervals depending on the temperature is a physiological necessity to *P. lanceolatus* in the conditions under which it lives. It is also clear that the air is absorbed mainly by the lining of the opercular chamber and that this chamber is adapted to this function by a rich vascular supply and by the thinness and elasticity of the opercular bones. Further, there is an adaptation which enables the operculum temporarily to be completely closed.

**Gray R. W.** - Breathing Movements of Whales [*De motibus respiratoriis in Balænis*]. Nature, CXXXIII, 3369, 797-798. London (1934). **b - 286**

The author explains in this letter the mechanism of the breathing movements in different species of Whales.

**Gray R. W.** - Whales and Caisson Disease [*Balænæ et morbus capsarum* (*ut dicitur*)]. Nature, CXXXIV, 3396, 853. London (1934). **b - 287**

Critical note to the theory of Dr. J. Argyll Campbell (See Nature, CXXXIV, 3390,629) . The A. sustains that the whale may avoid diver's paralysis or caisson disease by the « short circuiting » of its pulmonary circulation.

Chez les Silicodermés, le pénis est bien morphologiquement un pénis, mais, physiologiquement, n'est qu'un organe excitateur, lorsque la glande péniale existe et a pris la fonction d'organe éjaculateur.

**Le Gall Jean & Priol E. P.** - Observations sur la ponte de la sardine du Nord du Golfe de Gascogne et de La Manche [*Observationes de reproductione in sardina ad Sinum Vasconicum et Fretum Britannicum pertinente*]. 8 fig., Rev. Trav. Off. Pêches Marit., VI, 3, 229-248. Paris (1933). **b - 310**

Résumé des travaux de recherches sur la ponte de la sardine du Golfe de Gascogne. Considérations biométriques et biologiques sur les Sardines reproductrices de la côte Ouest de Bretagne : Echantillons examinés (taille, âge, croissance observée, sexe et maturité sexuelle, moyenne vertébrale). Considérations sur l'état hydrologique constaté sur les frayères des Sardines du Nord du Golfe de Gascogne et de la Manche. Annexe : Liste des stations océanographiques faites au large de la côte du Finistère.

**Legendre R.** - Les rythmes lunaires des animaux marins [*De rythmo lunari in animalibus marinis*]. 3 fig., Rev. Météorol. Méd., 2, 13-20. (1934). **b - 311**

L'A. a fait une série de pêches, de nuit, au moyen d'une lanterne flottante à acétylène. Dans ce travail il se borne aux manifestations de la ponte, aux essaimages, aux danses nuptiales et aux rythmes lunaires des Polychètes et des Crustacés recueillis.

De ses propres observations et de celles d'auteurs précédents il conclut qu'il existe chez de nombreux êtres marins une périodicité qui porte essentiellement sur les fonctions génitales et qui se trouve synchrone des mouvements de la lune.

**McGinitie G. E.** - The Egg-laying Activities of the Sea Hare, *Tethys californicus* (Cooper) [*De ovorum depositione in specie « Tethys californicus »* (Cooper)]. 1 table, Biol. Bull., LXVII, 2, 300-303. Lancaster, Pa. (1934). **b - 312**

The present account adds more information as to what actually may be accomplished in one season by a marine animal.

Calculation of total length of the egg string ; average number of capsules per centimeter, number of eggs contained in a capsule, total number of eggs laid. Mechanism of fertilisation and egg-laying.

**McKay Hayden Hazel** - The Life-history of *Pterygophora californica* Ruprecht [*De cyclo vitali in specie « Pterygophora californica »* Ruprecht]. 7 pl., Univ. Calif. Publ. Bot., XVII, 6, 111-148. Berkeley, Calif. (1933). **b - 313**

This paper presents an account of the life history of this species based upon both morphological and cytological data, giving special attention to the development and behavior of the male gametes and to the process of fertilization.

**Meyer P. F.** - Ein Beitrag zur Eiablage der Nordseekrabbe (Granat) *Crangon vulgaris* Fabr. [*Contributio in studium ovorum depositionis in specie « Crangon vulgaris »* Fabr.]. Zool. Anz., CVI, 7/8, 145-157. Leipzig (1934). **b - 314**

Beschreibung der im Aquarium beobachteten verschiedenen Stadien der Eiablage sowie der ausgeschlüpften Eier und deren Nahrungsaufnahme.

**Monné L.** - Untersuchungen über die Spermatogenese von Cephalopoden (*Octopus vulgaris* Lm. und *O. Defilippi* Ver.) und Erwägungen über die morphologische Bedeutung verschiedener Plasmabestandteile [*Inquisitiones in spermatogenesim Cephalopodorum* (*Octopus vulgaris* Lm. *et O. Defilippi* Ver.) *et considerationes de momento morphologico aliquorum elementorum plasma constituentium*] (Pol. Text). Kosmos, 58, 225-242. Lwow, Pol. (1933). **b - 315**

**Ohshima Hiroshi & Ikeda Hayato** - Male-female Superposition of the Sea-Star *Archaster typicus* Müll. & Trosch. [*Masculus foeminae superpositus in specie « Archaster typicus »*]. 1 fig., Proc. Imp. Acad., X, 2, 125-128. Tokyo (1934). **b - 316**

Notes on the peculiar habit of superposing of the male on top of the female, at the different periods of the tide. Some few exceptions to this typical case. The position assumed by the two individuals superposed. Explanation of this act that recalls the copulation and similar records among Echinoderms.

**Ohshima Hirohi & Ikeda Hayato** - Sexual Size-dimorphism in the Sea-star *Archaster typicus* Müll. & Trosch. [*De dimorphismo sexuali in dimensionibus speciei « Archaster typicus »* Müll. *et* Trosch.]. 4 tabl., 2 graphs, Proc. Imp. Acad., X, 3, 180-183. Tokyo (1934). **b - 317**

Careful measurements show that there exists a sexual dimorphism in size in this sea-star. This fact is worth noting as the first instance of the sexual size-dimorphism among the *Asteroidea*. Other examples of sexual dimorphism hitherto known from among Echinoderms.

**Philbert M.** - Note sur les gonothèques femelles de *Diphasia pinaster* (Ell. et Sol.) et de *Diphasia pinnata* (Pallas) [*De gonothecis foemineis in speciebus « Diphasia pinaster » et « D. pinnata »*]. 2 pl., Bull. Inst. Océanogr., 647, 1-8. Monaco (1934). **b - 318**

Description détaillée et comparaison des gonothèques de ces deux espèces.

**Ranzi Silvio** - Sui rapporti tra fegato e gestazione nei Selaci [*De correlationibus inter iecur et prægnationem in Selachioideis*] 4 fig., Acta Pont. Acad. Sc. Novi Lyncaei, LXXXVII, sess. I, 100-112. Roma (1933-34). **b - 319**

In *Torpedo ocellata*, *Acanthias blainvillei*, *Mustelus vulgaris* e *Trygon violacea* il fegato diminuisce nel corso della gestazione. La riduzione del fegato è proporzionale alla quantità di sostanze organiche che dalla madre sono fornite agli embrioni ; quindi è a un dipresso proporzionale alla quantità di sostanze organiche presenti nel liquido uterino e alla velocità di accrescimento degli embrioni. Il fegato materno funziona quale serbatoio di sostanze organiche destinate all'embrione.

**Rodolico Antonino** - Differenziamento dei sessi ed ovo-spermatogenesi nell'anguilla (Ricerche istologiche e sperimentali) [*De sexuum differentiatione deque ovospermatogenesi in anguilla. Inquisitiones histologicae et experimentales*]. 10 ill., Pubbl. Staz. Zool. Napoli, XIII, 2, 180-278. Napoli (1934). **b - 320**

I corpi genitali delle ceche. Differenziamento dei sessi nelle Anguille. Ovogenesi e spermatogenesi. Tentativi di maturazione artificiale dei corpi genitali dell'anguilla.

**Rosenberg T.** - Zur Anatomie und Entwicklungsgeschichte von *Dasya arbuscula* [*De anatomia et accretionis historia speciei « Dasya arbuscula »*]. 2 Abb., Bot. Notiser, 535-542. Lund (1933). **b - 321**

Anatomie und Erzeugungsorgane dieser Art.

**Roughley T. C.** - The Australian Oyster [*De Ostrea australiana*]. Nature, CXXXIV, 3376, 66. London (1934). **b - 322**

Correction of an error made in referring to the temperature of the water when Oysters spawned at Port Macquarie, New South Wales, in an abstract of the author's paper entitled « The Life History of the Australian Oyster, *Ostrea commercialis* » (Nature, CXXXIII, 332).

**Schmit W.** - Ueber die Laichplätze von Kabeljau im Beringmeere und Morphologie der Larven vom Still-ozeanischen Kabeljau [*De locis in quibus fit reproductio speciei « Gadus callarias macrocephalus »* Til. *in Mari* Bering *et de morphologia larvarum in Oceano Pacifico*]. (Russ. Text, dtsch. Rés.). 1 Karte, 5 Abb., Bull. Far East. Branch Acad. Sc., U. S. S. R., 1/2/3, 79-86. Vladivostok (1933). **b - 323**

Ergebnisse der Bearbeitung des Materials der wissenschaftlichen Trawlerexpeditionen des Still-Ozeanischen Wissenschaftlichen Forschungsinstituts für Fischereiwirtschaft nach dem Beringmeere in 1932. Morphologischer Vergleich zwischen den Larven und Eiern des stillozeanischen und des atlantischen Kabeljaus. Verbreitung der Laichgebiete von *G. callarias macrocephalus* im Beringmeere. Bestätigung einer Trennung der verschiedenen Laichstellen untereinander, was wahrscheinlich zur Bildung verschiedener Rassen von Kabeljau geführt hat. Hydrologische Charakteristika der betreffenden Laichgebiete.

**Stephenson Anne** - The Breeding of Reef Animals. Part 2 : Invertebrates other than Corals [*De procreatione in animalibus in scopulis viventibus. Pars 2ª : Invertebrata (Corallis exceptis)*]. Great Barrier Reef Exped., 1928-29, Scient. Rep., III, 9, 247-272. British Mus. (Natur. Hist.). London (1934). **b - 324**

**Stephenson T. A. & A.** - Growth and Asexual Reproduction in Corals [*De accretione et reproductione asexuali in Corallis*]. Great Barrier Reef Exped., 1928-1929, Scient Rep., III, 7, Brit. Mus. (Natur. Hist.). London (1933). **b - 325**

**Steven G. A.** - Observations on the Growth of the Claspers and Cloaca in *Raia clavata* Linnaeus [*Observationes ed accretione organi copulationis et cloacæ in R. c.*]. Journ. Mar. Biol. Assoc., XIX, 2, 887-889. Plymouth (1934). **b - 326**

The present investigation was undertaken in order to discover whether or not there exists an external feature from which could be deduced with reasonable accuracy in a live fish her state of sexual development. Practical applications of the rapid identification of mature fish.

**Takahasi Sadae** - On the Epitocous Phase of the Nereid, *Perinereis nuntia* var. *brevicirris* Grube [*De epitochia in varietate « Perinereis nuntia brevicirris »* Grube]. 1 pl., Ann. Zool. Jap., XIV, 2, 203-209. Tokyo (1933). **b - 327**

Morphology and habits.

**Templeman W.** - Lobster Hatching [*De reproductione in Homaro*]. Ann. Rep. Biol. Board Canada, 1933, 37-38. Ottawa (1934). **b - 328**

Results of observations on berried lobster females showing that the time of hatching with contemporary variations in temperature and food during the larval period may have a profound influence on the survival of resulting larvae.

**Vladykov V. D.** - Data on Occurrence and Spawning of Fishes on Outer Nova Scotia Coast [*De præsentia et reproductione Piscium in litoribus extremis Novæ Scotiæ*]. Ann. Rep. Biol. Board Canada, 1933, 40-41. Ottawa (1934). **b - 329**

Elaboration of data collected during 1932 and 1933 allowing to establish the time of spawning by examination of ovaries of specimens captured. Account of several southern forms captured along the outer coast of Nova Scotia during recent years.

**Waterman A. J.** - Observations on Reproduction, Prematuration, and Fertilization in *Sabellaria vulgaris* [*Observationes de reproductione, præmaturitate, fecundatione in specie « Sabellaria vulgaris »*]. 4 figs., 1 pl., Biol. Bull., LXVII, 1, 97-114. Lancaster, Pa. (1934). **b - 330**

The early development of *S. vulgaris*, a polychaete annelid inhabiting sand tubes on dead *Echinarachnius* and other shells in *Bryozoa* nodules, and on stones, is described from the time of the separation of the ova from the ovaries to the early cleavage stages, with special reference to longevity of the gametes, fertilization reaction and the relation of the first cleavage plane to the sperm entrance point and to the position of the polar bodies. A comparison is made with the development of *S. alveolata* as described by Fauré-Fremiet.

# PROGRESSUS EMBRYONALIS ET ACCRETIO CORPORIS.

## Embryologia - Accretio larvalis - Metamorphosis - Accretio corporis.

**Bazikalova A.** - Age and Rate of Growth of *Pecten jessoensis* Say [*De ætate et rapiditate accretionis in specie « Pecten jessoensis »* Say] (In Russ., Engl. Rés.). 2 figs., 4 tabl., Bull. Acad. Sc. U. R. S. S., Cl. Sc. Mathém. et Natur., 2/3, 389-394. Léningrad (1934). **b - 331**

Description of a new method for determining the age and rate of growth of *P. jessoensis* in order to be able to apply it in future to other bivalve Mollusks having many additional rings on their shells, which prevent from determining their age by the year-rings. Author points out that the rate of growth of *P. jessoensis* is influenced by the environment and varies in relation to the different months.

**Berkeley Needler Alfreda** - Larvae of Some British Columbia *Hippolytidæ* [*Hippolytidæ. De larvis in Columbia Britannica*]. 1 fig., Contr. Canad. Biol. & Fish., VIII, 18, 237-242. Toronto (1934).

(—) See Rés. in : Ann. Rep. Biol. Board Canada, 1933, 92. Ottawa (1934). **b - 332**

The paper deals with the first stage larvae of *Spirontocaris paludicola*, *S. tridens*, *S. herdmani*, *S. brevirostris* and *Hippolyte californiensis* hatched out in the laboratory. The larva of *Spirontocaris paludicola* is described and figured in some detail and the others are dealt with more briefly.

**Blair A. A.** - Effect of Food and Temperature on Growth of Salmon Fry [*Effectus alimentationis et temperaturæ in accretionem larvarum Salmonis*]. Ann. Rep. Biol. Board Canada, 1933, 15-16. Ottawa (1934). **b - 333**

Study on the causes of variations in the size on young salmon fry from different rivers and from different brooks of the same river, with especial reference to the effect of food and temperature of the rate of growth. The results obtained have a preliminary character.

**Burton M.** - Observations on Post-larval Sponges of the Genus *Suberites* [*Observationes de stadiis post-larvalibus generis « Suberites »*]. Ann. & Magaz. Natur. Hist., 10th ser., XIII, 312-317. London (1934). **b - 334**

**Campbell Mildred H.** - The Life History and Post Embryonic Development of the Copepods, *Calanus tonsus* Brady and *Euchæta japonica* Marukawa [*De cyclo vitali et progressu post-embryonali in speciebus « Calanus tonsus »* Brady *et « Euchaeta japonica »* Marukawa]. 18 figs., Journ. Biol. Board Canada, I, 1, 1-65. Toronto (1934). **b - 335**

The development of *Calanus tonsus* is characterized by a distinct metamorphosis and the six nauplius and six copepodid stages are described. The life cycle extends over one year and breeding occurs in the spring at the surface of the water. *Euchaeta japonica* undergoes a metamorphosis similar to that of *C. tonsus*. The twelve stages are described. There is no definite spawning period but reproduction occurs throughout the year in deep water where development proceeds. The nauplii differ from those of *C. tonsus*.

**Cox Philip** - Age Determination of Canadian Mackerel [*De ætatis determinatione in scombro canadensi*]. 2 tabl., Ann. Rep. Biol. Board Canada, 1933, 18-19. Ottawa (1934). **b - 336**

Results, given in two tables, of age-analysis, using the scales, of mackerel obtained at the Magdalen Islands, Gulf of St. Lawrence in 1925 and on the outer Nova Scotian coast in 1921-22.

**Day J. H.** - Development of *Scolecolepis fuliginosa* (Claparède) [*De progressione in specie « Scolecolepis fuliginosa »* (Claparède)]. 16 figs., Journ. Mar. Biol. Assoc., XIX, 2, 633-654. Plymouth (1934). **b - 337**

The development of *S. fuliginosa* is described from the egg to the young worm for the first time. A description is given of the histological structure of a ciliated pit which arises in early larval existence and disappears at metamorphosis. The structure of the glandular region of the pygidium is also described. The larva has three pairs of eyes, the third pair disappearing in the young worm long after metamorphosis is otherwise complete.

**Day J. H. & Wilson Douglas P.** - On the Relation of the Substratum to the Metamorphosis of *Scolecolepis fuliginosa* (Claparède) [*Correlatio inter substratum et metamorphosim in specie « Scolecolepis fuliginosa »*]. Journ. Mar. Biol. Assoc., XIX, 2, 655-662. Plymouth (1934). **b - 338**

Laboratory experiments indicate that larvae of *S. fuliginosa* when ready to metamorphose, are able, if necessary, to postpone metamorphosis until a substratum suitable for adult life is reached, meanwhile continuing to swim and grow for a period that may be as long as several weeks.

**De Gaetani D.** - Nuovo contributo alla conoscenza dello sviluppo post-embrionale di *Physiculus Dalwigki* Kp. [*Contributio nova in progressum post-embryonalem cognoscendum in specie « Physiculus Dalwigki »* Kp.]. 1 tav., Mem. R. Comit. Talassogr. Ital., No. CCIV, 3-8. Venezia (1933). **b - 339**

L'A. descrive un esemplare di *Physiculus* pescato nello Stretto di Messina, e che per i suoi caratteri più salienti permette di formare un collegamento tra una larva allevata dall'uovo e uno stadio più avanzato,e già conosciuto, di *Physiculus Dalwigki* Kp.

**De Gaetani D.** - Uova, sviluppo embrionale e stadi post-embrionali negli Sparidi. 2. *Pagellus centrodontus* De La Roche [*Sparidæ. 2. De ovis, progressu embryonali et stadiis post-embryonalibus in specie « Pagellus centrodontus »* De La Roche]. 1 tav., Mem. R. Comit. Talassogr. Ital., No. CCIX, 1-20. Venezia (1934). **b - 340**

Si fanno conoscere le uova e lo sviluppo embrionale del *Pagellus centrodontus* De La Roche, nonchè i caratteri di sviluppo di una serie di stadi post-embrionali da mm. 3,80 a mm. 30,08.

**Desbrosses Pierre** - Contribution à la connaissance de la biologie du Rouget-Barbet en Atlantique Nord, *Mullus barbatus* (Rond.) *surmuletus* Fage mode septentrional Fage [*Contributio in cognoscendam biologiam speciei « Mullus barbatus surmuletus » oceani Atlantici*]. 11 fig., 5 tabl., Rev. Trav. Off. Pêches Marit., VI, 3, 249-270. Paris (1933). **b - 341**

Valeur commerciale, l'espèce et les variétés du rouget-barbet, son habitat. Dans le présent ouvrage, dans le but de compléter les connaissances sur le rouget-barbet, sont illustrées les caractéristiques suivantes de ce poisson : la croissance et la longévité, l'âge et la taille à la première maturité sexuelle, la variation du nombre des vertèbres. En même temps on a dressé l'inventaire du stock en Atlantique Nord pendant l'hiver 1932-1933.

**Elsey C. R.** - The Growth of Japanese and Native Oysters [*De accretione in ostreis japoniis et nativis*]. Ann. Rep. Biol. Board Canada, 1933, 76-77. Ottawa (1934). **b - 342**

Results of further studies on the seasonal rates of growth of Japanese and native Oysters carried on at the Pacific Biological Station at Nanaimo, B. C.

**Foerster R. E.** - Variation in Size of Sockeye Salmon Eggs During Development [*De variatione dimensionum ovorum in specie « Oncorhynchus nerka »* Walb. *progressione perdurante*]. Ann. Rep. Biol. Board Canada, 1933, 82. Ottawa (1934). **b - 343**

Account of a study made of the size of sockeye eggs at various periods during development to determine, primarily, whether any appreciable increase occurred. Description of the two methods of measurement used and results obtained.

**Foerster R. E.** - An Investigation of the Life History and Propagation of the Sockeye Salmon (*Oncorhynchus nerka*) at Cultus Lake, British Columbia. No. 4 [*Inquisitiones in cyclum vitale et propagationem speciei « Oncorhynchus nerka » in* Cultus Lake, *Columbia Britannica. 4. De cyclo vitali*]. 2 figs., 2 tabl., Contr. Canad. Biol. & Fish., VIII, 27, 345-355. Toronto (1934). **b - 344**

Eggs spawned naturally by 3,883 females in 1925 were estimated as amounting to 17,470,000. Approximately 12,500 fry (0.07 % of eggs) migrated to sea in 1926 ; 183,272 yearlings (1.05 %) in 1927, and 1,722 two-year-olds (0.01 %) in 1928, making 1.13 % in all. Returning fish consisted of no three year ($3_2$ group), 4,463 four-year ($4_2$ group), and 1,112 five-year fish (no $5_2$ group, all being of the $5_3$ group). None of the fish was reported returning to other spawning areas.

**Foxon G. E. H.** - Notes on the Swimming Methods and Habits of Certain Crustacean Larvae [*Natatio consuetudinesque aliquarum larvarum Crustaceorum*]. 7 figs., Journ. Mar. Biol. Assoc., XIX, 2, 829-849. Plymouth (1934). **b - 345**

The swimming methods of the larvae: *Munida banffica, Caridea, Astacura, Anomura, Thalassinidea, Brachyura.* The relation of the larva to its environment: orientation to light and to gravity. Speed of swimming. The relation of the larva to other stages of the life-history.

**Fridriksson Arni** - On the Calculation of Age-Distribution within a Stock of Cod by Means of Relatively Few Age-determinations as a Key to Measurements on a Large Scale [*De calculanda distributione œtatis in turma specie «Gadus morrhua» composita, ad misurationes amplissime ducendas*]. 3 figs., 2 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer (Scient. Rep. North-Western Area Comm. 1930-1932), LXXXV, 1-14. Copenhague (1934). **b - 346**

Introductory remarks on different methods applied. A combination of two methods. Necessity of using the diagrams correctly. Age-determination on a comparatively small number of fish, serving as a key to measurements on a large scale. An example of the application of the above method of investigations. Discussion of the method.

**Fridriksson Arni, Hansen M. Paul, Bruun Fr. Anton & Tåning Vedel Å.** - Report concerning the Analysis of Cod Otoliths from Iceland [*Relatio de analysi otolithorum speciei «Gadus morrhua» in Islandia*]. 2 figs., 14 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer (Scient. Rep. North-Western Area Comm. 1930-1932), LXXXVI, 1-14. Copenhague (1934). **b - 347**

The use of otoliths in stock analyses of cod must be considered as of remarkable value, but the present investigation has shown, nevertheless, that a more penetrating study of ring formation in otoliths is necessary in the Iceland-Greenland waters, with their greatly contrasting natural conditions, in order to remove as many shortcomings as possible. The investigation has given rise to a number of proposals, which, if carried out, would bring these age-analyses on to a firmer and more certain basis. The work is followed by an appendix: List of otolith determinations.

**Giltay Louis** - Notes ichthyologiques. VIII. Les larves de Schindler sont-elles des *Hemirhamphidœ*? [*Notœ ichthyologicœ. VIII. Num larvœ Schindlerii ad familiam Hermirhamphidarum pertinent* ?]. 4 fig., Bull. Mus. R. Hist. Natur. Belgique, X, 13, 1-10. Bruxelles (1934). **b - 348**

Discussion au sujet de deux larves de Téléostéens décrites par Schindler, d'après laquelle l'A. arrive à la conclusion qu'elles appartiennent à un genre nouveau autonome: *Schindleria*, qu'il range provisoirement dans une famille nouvelle qu'il appelle: *Schindleridae.*

**Goodrich E. S.** - Nephridia of *Amphioxus* [*Nephridia in genere «Amphioxus»*]. Quart. Journ. Microscop. Sc., LXXVI, 499-510 & 655-764. London (1934). **b - 349**

Account of the development of the unpaired anterior nephridium and of the paired nephridia of *Amphioxus.* The author's conclusions support the idea that the nephridia of *Amphioxus* are true protonephridia, homologous with the protonephridia of the Invertebrates.

**Gopala Aiyar R.** - Development of *Salmacis bicolor* Agassiz [*De progressione speciei «Salmacis bicolor»* Agassiz]. 1 fig., Nature, CXXXIV, 3397, 899-900. London (1934). **b - 350**

First complete account on the development of *S. bicolor* from the insemination of the egg until the adult.

**Grave B. H.** - Rate of Growth, Age at Sexual Maturity, and Duration of Life of Certain Sessile Organisms, at Woods Hole, Massachusetts [*De rythmo accretionis, maturitate sexuali, spatio vitœ aliquorum organismorum sessilium in* Woods Hole, Mass.]. 4 tabl., Biol. Bull., LXV, 3, 375-386. Lancaster, Pa. (1933). **b - 351**

In this paper the discussion of each species (*Balanus eberneus, Hydroides hexagonis, Teredo navalis, Bugula flabellata, Botryllus gouldii, Cumingia tellinoides, Chaetopleura apiculata*) has been stated in the briefest possible form because the A. is here interested only in the outstanding facts of their life histories including the limits of the breeding seasons, rate of growth, duration of life, and number of generations per year.

**Gurney Robert** - The Development of *Rhincalanus* [*De progressione in genere «Rhincalanus»*]. Discovery Rep. (Govmt. Depend. Falkland Isls.), IX, 207-214. Univ. Press. Cambridge (1934). **b - 352**

**Hanaoka Kin-Ichro** - Notes on the Early Development of a Stalked *Medusa* [*Notœ de progressionis prioribus stadiis in quadam Medusa pedunculata*]. 8 figs., Proc. Imp. Acad., X, 2, 117-120. Tokyo (1934). **b - 353**

The A. has studied the development of the Medusa, *Thaumatoscyphus distinctus*, from the spawning to the planula.

**Hart J. L.** - The Early Life-history of Crabs [*De progressionis prioribus stadiis in cancro*]. Ann. Rep. Biol. Board Canada, 1933, 84. Ottawa (1934). **b - 354**

Summary of the results of a study of the larval stages of Crabs i. e. twelve species of Crabs and hermit Crabs.

**Hart J. L.** - A Report of the Investigation of the Life-history of the British Columbia Pilchard [*Inquisitiones in cyclum vitale speciei «Sardinops coerulea» ex Columbia Britannica*]. 8 figs., 2 tabl., Rep. Comm. Fish. 1933, App., 60-70. Victoria, B. C. (1934). **b - 355**

Importance of the study of the life-history to the fish in order to be able to discover just what factors are principally involved in controlling its abundance. Results of a study of the life-history of *S. coerulea* concerned with changes in lengths, vertebra number, body-form, proportions of sexes, and food.

**Henbest Lloyd G.** - A New Term for the Youthful Stage of Foraminiferal Shells [*Vocabulum quiddam novum ad stadium juvenile concharum Foraminiferorum nominandum*]. Science, LXXIX, 2051, 363-364. New York (1934). **b - 356**

The A. proposes the new name «juvenarium» for the early stage of shell-building which precedes the adult idiomorphology. The other terms used.

**Hildebrand F. Samuel & Cable Louella E.** - Reproduction and Development of Whitings or Kingfishes, Drums, Spot, Croaker, and Weakfishes or Sea Trouts, Family *Sciœnidœ*, of the Atlantic Coast of the United States [*De reproductione et progressione in speciebus «Menticirrhus americanus», «M. saxatilis» et «M. littoralis», «Stellifer lanceolatus», «Larimus fasciatus», «Cynoscion nebulosus», «C. regalis» et «C. nothus», in familia «Sciaenidae» litorum Oceani Atlantici ad Americœ Provincias Foederatas pertinentium*]. 44 figs., 5 tabl., Bull. Bureau Fish., XLVIII, 16, 1-117. Washington, D. C. (1934). **b - 357**

Artificial keys to the eggs and young so far as known forming a sort of summary of the present state of knowledge of the characters of the eggs and young of the *Sciaenidae* of the Atlantic coast of U. S. A. For every species are given spawning, descriptions of the young and growth.

**Huus Johan** - Zur morphologisch-systematischen und biologischen Kenntnis der nordischen *Munida*-Larven (*Crustacea Decapoda*) [*Studium morphologicum, systematicum et biologicum larvarum speciei septentrionalis* « *Munida* »]. 6 Abb., 4 Tab. a. T., Bergens Mus. Årb., Naturv. r., H. 1, 8, 1-29. Bergen (1934). **b - 358**

I. Morphologisch-systematischer Teil: Stadien der *Munida*-Larven und ihre Unterscheidung. Unterscheidung der *tenuimana*- und der *Sarsi*- Larven. Die Larven von *Munida bamffia* (Pennant.). II. Biologischer Teil. Dauer der Larvenstadien. Dauer des postlarvalen Stadiums. In welchen Tiefen leben die *Munida*-Larven? Photo- und Geotaxien der Larven und des postlarvalen Stadiums. Ausbreitungsmöglichkeiten der *Munida*-Larven.

**Inoh Shunpei** - Keimentwicklung von *Pelvetia Wrightii* Yendo [*De progressione in specie* « *Pelvetia Wrightii* » Yendo]. (Jap. Text). 2 Abb., Mitt. aus d. Inst. f. Algenforsch. wiss. Fak. Hokkaido kaiserl. Univ., I, 11-17. (1933). **b - 359**

**Johnson Martin W.** - The Life History of the Copepod *Tortanus discaudatus* (Thompson & Scott) [*De cyclo vitali in specie* « *Tortanus discaudatus* » (Thompson & Scott)]. 4 pl., 2 tabl., Biol. Bull., LXVII, 1, 182-200. Lancaster, Pa. (1934). **b - 360**

Identification of the pelagic eggs of *T. discaudatus* is established by hatching larvae from eggs occurring in the plankton and also from eggs definitely known to have been spawned by the species in experimental cultures.

A description is given of the development of the specialized flotation case containing the egg. The nauplius stages I-VI are described and figured. The copepodid stages I-V are described and figures given. The nauplius larva has a remote resemblance to the nauplius larvae of *Acartia longiremis* and *A. bifilosa*.

**Johnson Martin W.** - The Developmental Stages of the Copepod *Epilabidocera amphitrites* McMurrich [*De progressione eiusque stadiis in specie* « *Epilabidocera amphitrites* » McMurrich]. 2 tabl., 3 pl., Biol. Bull., LXVII, 3, 466-483. Lancaster, Pa. (1934). **b - 361**

Six nauplius stages and six copepodid stages are described in detail in this paper.

**Komai Taku** - Notes on Semper's Larvae Found in the Vicinity of Seto [*Notæ de larvis Semperii apud* Seto *repertis*]. 4 figs., 1 pl., Ann. Zool. Jap., XIV, 1, 67-77. Tokyo (Contr. Seto Mar. Biol. Labor. N. 36). (1933). **b - 362**

This report deals with: *Zoanthella*, *Zoanthina* and *Trachanthina bicincta*, n. g., n. sp.

**Konopacki M.** - Histophysiologie du développement de *Loligo vulgaris* [*De progressione eiusque physiologia in specie* « *Loligo vulgaris* »]. Bull. Int. Acad. Pol., B II, 1/5, 51-70. Cracovie (1933). **b - 363**

**Kraińska M. K.** - Recherches sur le développement d'*Eupagurus prideauxi* Leach. 1. Segmentation et gastrulation [*Inquisitiones in progressionem speciei* « *Eupagurus prideauxi* » Leach. *1. De segmentatione et gastrulatione*]. 3 fig., 1 pl., Bull. Int. Acad. Pol. Sc. et Lett., Cl. Sc. Mathém. et Natur. Sér. B: Sc. Natur. (II), 3/4, B. II, 149-165. Cracovie (1934). **b - 364**

La segmentation de l'oeuf d'*Eupagurus* est du type superficiel, mais à un certain stade elle se rapproche du type total.

**Kunieda Hiroshi** - On the Life-history of *Monostroma* [*De cyclo vitali in genere* « *Monostroma* »]. 12 figs., Proc. Imp. Acad., X, 2, 103-106. Tokyo (1934). **b - 365**

In the present paper the A. describes briefly the development of the zygote and the formation of the zoospores in the genus *Monostroma* and compares its development with those of *Ulva* and *Enteromorpha*.

**Lebour Marie V.** - Larval *Crustacea* (*Decapoda* and *Stomatopoda*). Expedition S. A. R. Prince Leopold of Belgium, Duke of Brabant, to the Extreme East (1932) [*De Crustaceis larvalibus* (*Decapodis et Stomatopodis*) *ex expeditione a* S. A. R. *Principe Leopoldo* de Belgique *in regiones orientis extremi* (*a. 1932*) *perfecta*]. 19 figs., Bull. Mus. R. Hist. Natur. Belgique, X, 8, 1-24. Bruxelles (1934). **b - 366**

The collection contained one *Squilla* larva, one crab zoea, some pagurid larvae, several crab megalopae, and one young *Galathea*. In the present report each larva is figured, described briefly and placed as near as possible in the group to which it belongs.

**Lebour Marie V.** - Rissoid Larvae as Food of the Young Herring. The Eggs and Larvae of the Plymouth *Rissoidæ* [*Rissoidæ. Larvæ ac alimentum aringorum juvenum. De ovis et larvis in* Plymouth]. 4 pl., Journ. Mar. Biol. Assoc., XIX, 2, 523-539. Plymouth (1934). **b - 367**

It is now proved that the larva which the Herrings eat is *Rissoa Sarsii* Lovén.

List of the known Plymouth *Rissoidae*. Discussion on their classification. Distinguishable characteristics of the larval *Rissoidae*. Description of the following species: *Rissoa membranacea*, *R. parva*, *R. Guerini*, *R. incospicua*, *R. Sarsii*, *Cingula semistriata*, *C. semicostata*, *Alvania punctura*, *Barleeia unifasciata*.

**Lebour Marie V.** - The Eggs and Larvae of some British *Turridæ* [*Turridæ anglicæ. De ovis et larvis*]. 4 pl., Journ. Mar. Biol. Assoc., XIX, 2, 541. Plymouth (1934). **b - 368**

Description of the eggs and larvae of the Plymouth planktonic forms: *Haedropleura septangularis*, *Lora rufa* v. *ulideana*, *Mangelia attenuata*, *M. coarctata*, *M. nebula*, *Philbertia gracilis*, *Ph. linearis*, *Ph. leufroyi*, *Ph. asperrima*, *Ph. purpurea*, *Ph. teres*.

**Ma Ting Ying H.** - On the Seasonal Change of Growth in a Reef Coral, *Favia speciosa* (Dana), and the Water-temperature of the Japanese Seas during the Latest Geological Times [*De accretione eiusque variationibus pro anni tempore in Favia speciosa* (Dana). *De aquæ temperatura marium japonensium novissimis ætatibus geologicis*]. 10 figs., Proc. Imp. Acad., X, 6, 353-356. Tokyo (1934). **b - 369**

The measurements taken from the Corals derived from the raised coral reef of Tateyama and from those of the Ryûkyû limestone of Amami-o-sima as well as from the recent ones on the same island reveal hardly difference in their length of annual growth. The phenomenon is of profound significance as it indicates that the water temperature of Tateyama during the building of the raised coral reef was closely similar to that of the present northermost limit of distribution of the living coral reef.

**Maxia C.** - Scambi di acqua in cellule viventi [*De cellulis viventibus ac aquæ permutatione*]. Atti Soc. Ital. Progr. Sc. (XXI Riun., Roma 9-15 ott. 1932), III, 244-247. Roma (1933). **b - 370**

Ricerche su uova vergini e fecondate di *Paracentrotus lividus*, su uova di *Artemia salina* e di *Cyprinodon calaritanus*. Formule di Lillie e di McCutcheon e Lucké per il valore d'imbibizione e di permeabilità.

**McFarlane C.** - Observations on the Annual Growth of *Ascophyllum nodosum* [*Observationes de accretione annua in specie « Ascophyllum nodosum »*]. Proc. Nova-Scotian Inst. Sc., 18, 27-33. (1933). **b - 371**

**McKay Donald C. G.** - The Life-history of the Edible Crab [*De cyclo vitali in cancro eduli*]. Ann. Rep. Biol. Board Canada, 1933, 87. Ottawa (1934). **b - 372**

Some information of the life-history of the edible crab of importance for an adequate understanding of the fishery of the same.

**Moore H. B.** - The Rate of Growth of *Balanus* [*De accretione eiusque rythmo in genere « Balanus ».*] Scott. Natural., 208, 101-109. Edinburgh (1934). **b - 373**

**Myers Earl H.** - The Life-history of *Patellina corrugata*, a *Foraminifera* [*De cyclo vitali speciei « Patellina corrugata »*]. Science, LXXIX, 2054, 436-437. New York (1934). **b - 374**

Account of the life cycle of *P. corrugata* Williamson based on permanent cytological preparations and photographs of living organisms. In this life cycle there is a regular alternation of generations: the asexual or microspheric generation and the sexual or megalospheric generation.

**Nicholls A. G.** - The Developmental Stages of *Euchæta norvegica*, Boeck [*De progressione eiusque stadiis in specie « Euchaeta norvegica » Boeck*]. 8 figs., 9 tabl., Proc. R. Soc. Edinburgh, 1933-1934, LIV, Part I, 4, 31-50. Edinburgh (1934). **b - 375**

The nauplii and their appendages are described in tabular form, and illustrated. The appendages of the copepodite stages are dealt with separately and described in a series of tables. The growth and development of *Euchaeta* and *Calanus* are compared. A table shows the definitive point by which any copepodite stage of *Euchaeta* may be identified without dissection.

**Okamura K. & Ôshima K.** - Life-history of *Coccophora langsdorffii* (Turn). Grev. [*De cyclo vitali in specie « Coccophora langsdorffii » (Turn.) Grev.*]. 10 figs., Bot. Magaz., XLVII, 555, 187-194. Tokyo (1933). **b - 376**

*Coccophora* may be considered as a descendant of *Sargassum microceratium* (Mert.) J. Ag. the « *Phyllamphora* » form showing the ancestral character of *Sargassum*.

**Pritchard A. L.** - Size of Eggs of Pink Salmon (*Oncorhynchus gorbuscha*) [*De dimensionibus ovorum in specie « Oncorhynchus gorbuscha »*]. 1 table, Ann. Rep. Biol. Board Canada, 1933, 95. Ottawa (1934). **b - 377**

Brief summary of the readings obtained from the weekly measurements of twenty sets of ten eggs and of the weekly counts of thirty-two ounces of the same eggs from the time when they were received at McClinton creek approximately eight hours after fertilization until they reached the eyed stage. It results from the investigation that pink salmon eggs do not change in size during development from fertilization to eyeing.

**Raja Maria** - Sull'accrescimento post-embrionale del *Loligo vulgaris* (Nota preventiva). [*De accretione post-embryonali in specie « Loligo vulgaris ». Nota prior*]. Boll. Zool., V, 1, 1-5. Napoli (1934). **b - 378**

Comportamento dei diversi organi del *Loligo vulgaris* Lam. nel corso dell'accrescimento post-embrionale, attraverso l'esame di 218 esemplari, raccolti nel periodo dal luglio 1932 al gennaio 1933. I dati raccolti riguardano il peso dei singoli organi in rapporto al peso totale del corpo.

**Ranzi Silvio** - Risultati di ricerche sull'accrescimento embrionale [*Resultatus ex inquisitionibus de accretione embryonali*]. Arch. Sc. Biol., (XIV Congr. Int. Fisiol., Roma, 29 ag.-3 sett. 1932), XVIII, 1-4, 296. Napoli (1933). **b - 379**

L'A. esamina la questione della provenienza delle sostanze minerali destinate a formare il corpo dell'embrione. Pone in evidenza come nell'uovo di *Sepia officinalis* preesista solo un quarto delle sostanze minerali, che si osservano nel piccolo al momento della schiusa, e come gli altri tre quarti di queste sostanze siano, in ultima analisi, prese dall'ambiente. Lo studio è svolto sui Selaci che offrono: specie che depongono le uova nell'ambiente, specie che le trattengono nell'utero senza che tra l'embrione e l'utero si stabiliscano rapporti anatomici, e specie infine munite di placenta.

**Ranzi Silvio** - Ipotesi sulle basi fisico-chimiche dell'accrescimento embrionale [*Hypothesis de fundamentis physico-chimicis quoad accretionem embryonalem*]. Atti Soc. Ital. Progr. Sc., (XXI Riun., Roma 9-15 ott. 1932), III, 146-147. Roma (1933). **b - 380**

Processi fisico-chimici che caratterizzano lo sviluppo di numerose specie di Selaci e di *Sepia officinalis*.

Accrescimento degli embrioni e variazioni delle sostanze organiche, determinate quale differenza tra il peso secco e il peso delle ceneri, studiati in varie specie di Selaci. Studio dell'istofisiologia delle pareti uterine.

**Reverberi G.** - Esperimenti di incrocio fra uova di *Ciona intestinalis* e spermi di *Phallusia mamillata* [*Mixturæ ad experimentum ductæ inter ova Cionæ intestinalis et sperma Phallusiæ mamillatæ*].Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis., Matem. e Natur., XVII, 9, 737-739. Roma (1933). **b - 385**

Vennero tentate esperienze di incrocio eterogeneo tra uova di *Ciona intestinalis* con spermi di *Phallusia mamillata*. Tali uova sono capaci di svilupparsi; fenomeni più appariscenti sono: espulsione di globuli polari, segmentazione normale, blastulazione e gastrulazione. Accanto a questi fenomeni normali si notano asincronie di sviluppo e divisioni nucleari non seguite da divisione citoplasmatica.

**Reverberi G.** - Studi sperimentali sull'uovo di Ascidie. II: La segmentazione dei blastomeri isolati dell'uovo di *Ciona* e di *Phallusia* [*De ovo Ascidiarum. Studium ad experimentum perfectum. II. Agitur de seiunctis blastomeris specierum* « *Ciona* » *et* « *Phallusia* » *deque eorum segmentatione*]. 7 fig., Pubbl. Staz. Zool. Napoli, XII, 3, 385-406. Napoli (1933). **b - 386**

Segmentazione normale dell'uovo e dei blastomeri isolati. Determinazione dei piani di segmentazione. Segmentazione dei due blastomeri isolati allo stadio di 2 blastomeri, dei quattro blastomeri isolati allo stadio di 4 blastomeri, degli otto 1/8 allo stadio di 8 blastomeri, dei 2/4 anteriori o posteriori destri o sinistri dell'uovo allo stadio di 4 blastomeri, dei 4/8 dell'uovo. Sviluppo ulteriore delle forme derivate dai blastomeri.

**Rollefsen Gunnar** - Torsken og Fiskehavet 1933. (The Cod and the Sea in 1933) 2. Skreiens alder [*De aetate maturitatis in specie* « *Gadus callarias* »]. (In Norw., Engl. and Larvae [*De prioribus stadiis progressionis in Sardina caerulea californiensi. Agitur particulatim de distributione ovorum et larvarum*]. 23 figs., tabl., Div. Fish and Game Calif., Fish Bull., 41, 1-48. Sacramento, Calif. (1934). **b - 397**

The present work is the result of an intensive investigation from April 1929 to September 1932. Location of the major spawning area. Location of the Sardine larvae. Food of the larvae and adult Sardines. Description of the sardine egg and larva. Methods of investigation.

**Spartà A.** - Uova e larve di *Gobidæ*. I. *Gobius paganellus* L. [*Gobidæ I. De ovis et larvis in specie « Gobius paganellus »* L.] 1 tav., Mem. R. Comit. Talassogr. Ital., No. CCXI, 1-10. Venezia (1934). **b - 398**

Si fanno conoscere le uova e le larve fino al 7° giorno della schiusa di *Gobius paganellus* L.

**Stevenson J. A.** - Growth of the Giant Scallop (*Placopecten grandis*) [*De accretione in specie « Placopecten grandis »*]. Ann. Rep. Biol. Board Canada, 1933, 36-37. Ottawa (1934). **b - 399**

Results of the continuation of the work begun in 1932 on the growth of the scallop, as shown by the « rings of growth » on the empty shells. Some conclusions concerned with the growth-rate of *P. grandis*. Observations concerned with the development of the larvae studied at intervals and with the effect of temperature upon them.

**Stolfi G.** - L'accrescimento embrionale del *Loligo vulgaris* [*De accretione embryonali in specie « Loligo vulgaris »*]. Atti R. Accad. Naz. Lincei, Rend. Cl. Sc. Fis., Matem. e Natur., XVIII, 11, 516-519. Roma (1933). **b - 400**

L'A. ha studiato le variazioni di acqua e sostanze minerali nel corso dello sviluppo delle uova di *Loligo vulgaris* Lam. Egli ha potuto stabilire che l'acqua e le sostanze minerali di cui l'embrione si arricchisce nel corso dello sviluppo vengono prese dall'ambiente (acqua di mare) e non dagli involucri dell'uovo.

**Sund Oscar** - Cod-measurements during 21 Years on the Western and Northern Coasts of Norway. Methods and Results [*De mensuris in specie « Gadus morrhua » per 21 annos perfectis præter litora occid. et sept. Norvegiæ. Rationes et resultatus*]. 13 figs., 6 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer (Scient. Rep. North - Eastern Area Comm., 1934), LXXXVIII, 1-20. Copenhague (1934). **b - 401**

I. Some remarks on the measurements of fish. II. The numerical treatment and the graphical presentation of the Norwegian cod measurements. III. The Norwegian cod fisheries in 1933. IV. The fluctuations of the Arcto-Norwegian cod stock from 1913 to 1933.

**Tattersall W. M. & Sheppard E. M.** - Observations on the *Bipinnaria* of the Asteroid Genus *Luidia* [*Observationes de Bipinnariis ad genus « Luidia » pertinentibus*]. 8 figs., James Johnstone Mem. Vol., 35-61. Liverpool (1934). **b - 402**

The present paper, based on living specimens of larvae of *Bipinnaria asterigera*, enables the authors to add to the knowledge of these larvae in several particulars, and to elucidate some obscure and disputed points. The chief new contributions in this paper are (1) the more accurate discrimination of the two species of *Bipinnaria* larvae, corresponding to the two known European species of *Luidia*, (2) the description of a very perfect ciliary feeding mechanism in the larvae, (3) an account of the process of metamorphosis, showing that this process is quite distinct in the two species, (4) some notes on hitherto overlooked points, and (5) an account of the peculiar and unique method of locomotion of the larvae.

**Tchakhotine S.** - Una funzione specifica della glicolisi nei processi morfogenetici delle uova del riccio di mare [*De præcipua quadam functione glycolitica in processibus morphogeneticis ovorum echini*] Boll. Soc. Ital. Biol. Sper., VIII, 4, 623-626. Napoli (1933). **b - 403**

Azione inibitrice specifica dell'acido monobromo-acetico sulle uova fecondate di riccio di mare in corso di sviluppo. A concentrazione m/100 e m/1000 la gastrulazione non avviene, ma si ha uno sviluppo eccezionale del mesenchima ; a concentrazioni forti (m/100) le blastule si disfanno in un ammasso di cellule sferiche che si disperdono e in seguito si citolizzano ; in concentrazioni più deboli si ha una così impetuosa proliferazione di cellule mesenchimatiche da far scoppiare la larva. Valore di queste osservazioni per la questione della genesi del cancro.

**Tester A. L.** - The Age and Growth of Herring in British Columbia [*De ætate et accretione aringi in Columbia Britannica*]. 1 fig., Rep. Comm. Fish., 1933, App., 71-73. Victoria, B. C. (1934). **b - 404**

Method of age estimation. Age composition of the runs. Seasonal variation in age composition. The age at which herring become mature and enter the commercial fishery. Rate of growth. A comparison of the Southern and Northern runs.

Descrizione di esemplari mostruosi di *Myliobatis aquila*, *Myliobatis sp.*, e *Raja alba.* Ipotesi che si tratti di formazioni anomale non dipendenti da alterazioni di sviluppo prodotte da cause esterne, bensì da vere mutazioni. (Vedi anche in : Mem. R. Comit. Talassogr. Ital. Nº CCII, 1933).

**Duff D. C. B.** - Furunculosis [*De furunculosi*]. Ann. Rep. Biol. Board Canada, 1932, 82. Ottawa (1933). **b - 415**

Account of the studies continued at the University of British Columbia on the bacterium isolated in August, 1931, from the victims of the Elk river epizootic, Rocky Mountain whitefish. The organism has been found to conform in all cultural and biochemical characteristics with *Bacillus salmonicida* Emmerich and Weibel : record on the tests on the pathogenicity of strains obtained from dead hybrid Pacific salmon kept in a retaining pond at Cultus lake and resembling *Bacillus salmonicida.* Result of studies on the possibility of furunculosis bacillus being transferred on trout eggs.

**Fish Frederic F.** - A Fungus Disease in Fishes of the Gulf of Maine [*Morbus piscium, mycetis cuiusdam causa, in* Gulf of Maine]. 2 figs., 1 pl., Parasitol., XXVI, 1, 1-16. London (1934). **b - 416**

A fungus disease of epidemic proportions was found in the common sea Herring (*Clupea harengus*). The fungus was also found to infect the common winter flounder (*Pseudopleuronectes americanus*) and the Alewife (*Pomobolus pseudoharengus*). The causative agent proved to be a species of fungus belonging to the genus *Ishthyosporidium* Caullery and Mesnil (1905). The specific name is tentatively accepted as *hoferi* Plehn and Muslow (1911). Life cycle, morphology, pathology, epidemiology, culture of the parasite.

**Früchtl Fritz** - Beitrag zur Kenntnis der Missbildungen adriatischer Planktoncopepoden [*Contributio in studendas anomalias Copepodorum planctonicorum Maris Hadriatici*]. Anz. Akad. Wiss., Math.-Naturw. Kl., LXXI, 13, 139-140. Wien (1934). **b - 417**

Kurzer Bericht über das Werk. 13 neue Fälle von Missbildungen beobachtet an 10 Copepodenarten. Eine Tabelle gibt die qualitative und quantitative Verbreitung der am Copepodenmaterial der dritten Virchow-Fahrt (Juli-August 1911) beobachteten Missbildungen wieder.

**Früchtl Fritz** - Beitrag zur Kenntnis der Missbildungen adriatischer Planktoncopepoden [*Contributio in Copepoda planctonica anomala cognoscenda in Hadriatico*]. 7 Abb., 1 Tab., Sitz. Ber. Akad. Wiss., Abt. 1, CXLIII, 5/7, 147-157. Wien (1934). **b - 418**

Eingehende Beschreibung der Missbildungen und Versuche zur Erklärung derselben, Tabelle ihrer qualitativen und quantitativen Verbreitung. *Calanus minor* (Claus), *Calocalanus styliremis* Giesbrecht, *Clausocalanus arcuicornis* (Dana), *Aetidius giesbrechti* Cleve, *Temora longicornis* (Müller), *Acartia*

*(Acartiura) clausi* Giesbrecht, *Sapphirina nigromaculata* Claus, *Corycaeus (Ditrichocorycaeus) brehmi* Steuer, *Corycaeus (Onychocorycaeus) catus* F. Dahl und *Corycaeus (Agetus) typicus* Kröyer.

**Gibbons N. E.** - Investigation of Fish Diseases [*Inquisitiones in morbos Piscium*]. Ann. Rep. Biol. Board Canada, 1932, 56. Ottawa (1933). **b - 419**

Results of investigation conducted on an epidemic disease among trout and salmon fry, which could not be reproduced in other fry, when inoculated with the various organisms. On culturing no bacteria was found which would reproduce the condition. From the symptom of the sick fish, furunculosis was suspected, but no organism resembling *B. salmonicida* was isolated.

**Gudger E. W.** - Ambicoloration in the Winter Flounder, *Pseudopleuronectes americanus*. I. Incomplete Ambicoloration without Other Deformity ; II. Complete Ambicoloration with a Hooked Dorsal Fin and with the Rotating Eye just over the Dorsal Ridge [*Quæstio de ambicoloratione in specie « Pseudopleuronectes americanus ». I. De ambicoloratione incompleta sine alia deformitate. II. De ambicoloratione completa cum pinna dorsali instar unci et cum oculo mobili in linea spinae dorsalis*]. 4 figs., Amer. Mus. Novit., 717, 1-8. New York (1934). **b - 420**

Two abnormal specimens in the collections of the Department of Ichthyology of the American Museum are figured, described and briefly discussed.

**Hess Ernest** - « Finrot » in Salmon Fry [*Morbus « finrot » (ut dicitur) in larvis salmonis*]. Ann. Rep. Biol. Board Canada, 1932, 58. Ottawa (1933). **b - 421**

Account of inoculation experiments with strains of pure cultures of bacteria isolated from infected salmon fry ; it seems that the causative agent of « finrot » could not be isolated, or, if isolated, must have lost its virulence during prolonged culture on artificial media.

**Hess Ernest** - Eelgrass Disease [*De morbo in Zostera marina* L.]. Ann. Rep. Biol. Board Canada, 1933, 56. Ottawa (1934). **b - 422**

Results of a study of pure culture of bacterial strains isolated from samples of eelgrass suspected of being diseased ; impossibility of finding bacteria by direct examination of stained and unstained tissue preparations from freshly collected samples.

**Kuitunen-Ekbaum E.** - The Occurrence of Dracontiasis in Pacific Coastal Fishes [*De dracontiasi in piscibus ad litora Oceani Pacifici pertinentibus*]. Ann. Rep. Biol. Board Canada, 1932, 90. Ottawa (1933). **b - 423**

Description of two cases of dracontiasis of which one has been observed in *Platichthys stellatus* from Departure Bay, infected by *Philometra sanguinea*, which has been also reported from *Lepidopsetta bilineata*, *Rhodymenichthys dolichogaster* and *Caularchus meandricus*. The second case was in sockeye salmon caught from English bay infected with a new species of a dracunculoid nematode, *Philomena oncorhynchi* n. gen., n. sp.

**Ladreyt F.** - Sarcome chondroblastique et glycogénèse sarcomateuse chez *Scyllium canicula* L. [*Sarcoma chondroblasticum et glycogenesis sarcomatosa in specie « Scyllium canicula »*]. Bull. Inst. Océanogr., 645, 1-16. Monaco (1934). **b - 424**

**Mounce Irene** - Eelgrass Disease [*De morbo in Zostera marina* L.]. Ann. Rep. Biol. Board Canada, 1933, 29-30. Ottawa (1934). **b - 425**

Account of the sudden and almost complete disappearance of eelgrass from the Atlantic coast due to an unknown disease ; description of the symptomes of the disease. Some preliminary work done in order to elaborate a method of obtaining sterile plants for inoculation tests, which remained without success.

**Mounce Irene & Diehl Wm. W.** - A New *Ophiobolus* on Eelgrass [*Ophiobolus halimus n. sp. in Zostera marina*]. 9 figs., Canad. Journ. Res., XI, 1, 31 ; XI, 2, 242-246. Ottawa (1934). **b - 426**

*Ophiobulus halimus* Diehl and Mounce n. sp. is reported on *Zostera marina* L. from St. Andrews, N. B. It was collected on rhizomes and fertile shoots, and developed in leaves kept in sea water in the laboratory. The fungus is described, illustrated and compared with related species.

**Ninni E.** - Mostruosità in un *Sargus vulgaris* (Geof.) e in un' *Anguilla vulgaris* (Flem.) [*Monstrum in specie « Sargus vulgaris » et in Anguilla vulgari*]. 2 fig., Boll. Pesca, Piscicolt. e Idrobiol., IX, 1, 108-112. Roma (1933). **b - 427**

L'A. descrive e illustra un'anomalia di sviluppo della regione codale in un esemplare di *Sargus vulgaris*, e una deformità in un esemplare di *Anguilla vulgaris* il quale presenta superiormente sette gibbosità compresa quella della coda. Nel primo caso si tratta probabilmente di deformità di origine traumatica, nel secondo di deficienza di sviluppo del sistema osseo.

**Okada Yaichiro** - Abnormalities in *Ceratium hirundinella* found in Hokkaidô, Japan [*De anomaliis in specie « Ceratium hirundinella » collecta in* Hokkaidô, *Japonia*]. 1 fig., Ann. Zool. Jap., XIV, 2, 191-192. Tokyo (1933). **b - 428**

Description of two specimens with abnormal horns.

**Petersen Henning E.** - Wasting Disease of Eelgrass (*Zostera marina*) [*Morbus destructor in Zostera marina*]. Nature, CXXXIV, 3378. 143-144. London (1934). **b - 429**

The A. gives further details concerning this disease and the fungus that is the cause of it.

**Raabe Henryk** - La dégénérescence du rein des Céphalopodes, provoquée par un ascomycète [*Renis degeneratio in Cephalopodis per Ascomycetem*]. 9 fig., Bull. Inst. Océanogr., 640, 1-8. Monaco (1934). **b - 430**

Pénétration du champignon dans les reins. Les différents stades de l'infection.

**Raphaël Claudette** - Sur un cas de bifurcation postérieure chez *Glycera convoluta* [*Bifurcum posterius in specie « Glycera convoluta »*]. 3 fig., Stat. Trav. Biol. Roscoff, 11, 19-25. Paris (1933). **b - 431**

Description d'un individu de *G. convoluta* qui présentait une bifurcation de la région caudale. Interprétation de cette anomalie.

**Renn Charles E.** - Wasting Disease of *Zostera* in American Waters [*Morbus destructor in Zostera aquarum americanarum*]. 1 fig., Nature, CXXXIV, 3385, 416. London (1934). **b - 432**

In searching the possible causes of the total disappearance of *Zostera marina* from the Atlantic American coast and from the western coast of Europe, the A. has found within the air spaces and in cells of the diseased leaves an organism that appears to be a mycetozoan very similar to the genus *Labyrinthula*.

**Renouf Louis P. W.** - *Zostera* Disease on the Coast of County Cork, I. F. S. [*De morbo in Zostera ex litoribus* County Cork, I. F. S.]. Nature, CXXXIII, 3372, 912. London (1934). **b - 433**

Some observations as to the beginning, spreading and recovery of the disease of *Zostera marina* and *Z. nana*.

**Robson G. C.** - Notes on the *Cephalopoda*. XVIII. On a Remarkable Form of Radula in the Genus *Graneledone* [*Notæ de Cephalopodis. XVIII. De notanda quadam forma radulæ ad genus « Graneledone » pertinentis*]. Ann. & Magaz. Natur. Hist., 10th ser., XII. London (1933). **b - 434**

**Tutin T. G.** - The Fungus on *Zostera marina* [*De mycetibus in « Zostera marina »*]. Nature, CXXXIV, 3389, 573. London (1934). **b - 435**

Discussion as to the occurrence of the fungus *Ophiobolus halimus* as parasitic on *Zostera nana*.

**Well Nelson A. & ZoBell Claude E.** - *Achromobacter ichthyodermis*, n. sp., the Etiological Agent of an Infectious Dermatitis of Certain Marine Fishes [*A. i., n. sp., causa dermatitis infectivae aliquorum piscium marinorum*]. 2 figs., Proc. Nat. Acad. Sc., XX, 2, 123-126. (1934). **b - 436**

First appearance of the disease. Microscopical examination of direct smears from the *Fundulus* lesions. Pure cultures of the etiological agent and their characteristics.

# OECOLOGIA.

## Adaptatio loco ambienti - Tropismum.

**Abe Noboru** - Ecological Observations on *Batillaria multiformis* (Lischke) [*Observationes ecologicæ circa speciem « Batillaria multiformis »* (Lischke)]. 7 figs., 3 tabl., Sc. Rep. Tôhoku Imp. Univ., Fourth Ser., Biol., VIII, 4, 383-398. Sendai, Japan (1934). **b - 437**

Habitat. Method of locomotion. Behaviour: time of creeping; direction of creeping; number of individuals in creeping in relation to moon (migration); movement of *Batillaria* affected by light; movement of *Batillaria* affected by stream (experiment on rheotropism).

**Barnes T. Cunliffe** - Further Observations of the Salt Requirements of *Ligia* in Bermuda [*Observationes ulteriores de salis necessaria quantitate speciei « Ligia » ad Bermudas pertinentis*]. 1 fig., 4 tabl., Biol. Bull., LXVI, 2, 124-132. Lancaster, Pa. (1934). **b - 438**

The present paper describes the longevity of *Ligia baudiniana*, a littoral isopod of the Bermuda, in weaker solution of single salts, in antagonistic solutions, and when living in air with access to salt solutions. It is shown that the toxicity series for the chief cations in sea water for *L. baudiniana* changes with the concentration of the single salts.

**Berg L. S.** - Ueber die vermeintliche Meereselemente in der Fauna und Flora des Baikalsees [*Opiniones de elementis marinis in fauna et flora lacus* Baikal] (Russ. Text, Dtsch. Rés.). Bull. Acad. Sc., U. R. S. S., Cl. Sc. Mathém. et Natur., 2/3, 303-326. Léningrad (1934). **b - 439**

Vf. widerlegt die von G. J. Werestschagin (1928) geäusserte Ansicht, nach welcher im Baikalsee marine Elemente jurassischer Herkunft vorkommen sollen. Die Fauna des Baikalsees enthält keine solchen Elemente. Die endemischen Formen des Sees (mit der Ausnahme von wenigen Immigranten aus dem Eismeere) stellen entweder alte Süsswasserstypen oder Relikte der obertertiären Binnenseefauna Asiens dar.

**Blum Harold F.** - L'orientation du Copépode *Harpacticus fulvus* sous l'influence de la lumière [*De orientatione speciei « Harpacticus fulvus » lucis influentiæ causa*]. Arch. Int. Physiol., XXXVIII, 1-8. Paris (1934). **b - 440**

**Blum Harold F.** - Le mécanisme d'orientation de la larve de *Homarus vulgaris* sous l'influence de la lumière [*De mechanismo pro orientatione larvæ Homari vulgaris lucis influentiæ causa*]. 1 fig., Bull. Inst. Océanogr., 660, 1-4. Monaco (1934). **b - 441**

Expériences conduites dans le but de démontrer que l'orientation de la larve du homard à la lumière et sa direction sont deux mécanismes intimement liés.

**Brunelli Gustavo** - Le caratteristiche biologiche dell'ambiente lagunare e degli stagni salmastri [*Caracteristicæ biologicæ in ambiente lacunari et in stagnis salmacidis*]. Boll. Pesca, Piscicolt. e Idrobiol., X, 1, 18-28. Roma (1934). **b - 442**

Studio dei fattori termici, chimici e fisici che determinano nelle acque salmastre quelle oscillazioni ambientali caratteristiche che a loro volta modificano l'aspetto biologico delle lagune e degli stagni salmastri. Organismi indicatori.

**Butcher R. W.** - *Zostera*. Report on the Present Condition of Eel Grass on the Coasts of England, based on a Survey during August to October, 1933 [*Zostera. Relatio de præsentibus condicionibus in litoribus Anglicis. Relationis fundamenta ponuntur in inspectione quadam peracta a mense Augusto ad mensem Octobrem 1933*]. 3 figs., Journ. Cons. Expl. Mer, IX, 1, 49-65. Copenhague (1934). **b - 443**

History of the epidemic. Distribution of *Zostera* in England. Details of places particularly examined. Present distribution elsewhere in Britain. Discussion on the cause and effect of the disappearance of *Zostera*.

**Carl G. C.** - Further Study of Lost Lagoon [*De* Lost Lagoon. *Studium ulterius*]. Ann. Rep. Biol. Board Canada, 1933, 70. Ottawa (1934). **b - 444**

Results of the analysis of the salt-content of the water of the Lost Lagoon. Observations on mortality of marine species in the lake due to the disintegration of the blue-green alga, *Anabaena spiroides*.

**Chaisson A. F.** - Adaptation of Salmon and Trout Fry in Tidal Water [*De adaptatione salmonis et larvarum tructae in aquis aestuosis*]. Ann.

Rep. Biol. Board Canada, 1933, 17-18. Ottawa (1934). **b - 445**

Results of experiments carried out on the fry of Atlantic salmon and brown trout to determine the extent to which they would survive transference to sea water.

**Clark A. E.** - The Effects of Temperature and Salinity on Sperms and Larvae of *Ostrea virginica* [*Effectus temperaturæ et salinitatis in sperma et larvas speciei* « *Ostrea virginica* »]. Ann. Rep. Biol. Board Canada, 1932, 22. Ottawa (1933). **b - 446**

Results of observations made in order to determine to what extent the oyster might be limited in abundance and distribution through extreme temperatures and variations in salinity affecting it during spawning and subsequently.

**Clark A. E.** - Effect of Oxygen Content of Water on Oyster Larvae [*De oxygeno in aqua eiusque effectibus in larvas ostreæ*]. Ann. Rep. Biol. Board Canada, 1933, 18. Ottawa (1934). **b - 447**

Results of an attempt made in order to define the lowest oxygen content of the water that would support the life of the developing oyster larvae, showing that even sudden lowering of the oxygen content of the water would not greatly affect the oyster larvae.

**Davidson Viola M.** - Fluctuations in the Abundance of Planktonic Diatoms in the Passamaquoddy Region, New Brunswick [*Fluctuationes in copia Diatomœarum planctonicarum regionis* Passamaquoddy, N. B.]. 33 figs., Contr. Canad. Biol. & Fish., n. ser., VIII, 28, 357-407. Toronto (1934). **b - 448**

Collections made during a period of seven and a half years (1924-1931) show three dominant species: *Thalassiosira Nordenskiöldi*, *Chaetoceros debilis* and *Biddulphia aurita*.

There is no apparent lack of nutrient salts, nitrates, phosphates and silica being reduced but never depleted. Light is an important factor, but its effect is not clearly distinguishable. Marked reduction in surface salinity from river discharge with consequent stability of the water precedes the spring maximum of phytoplankton, and to a less degree local rainfall of summer has a corresponding effect.

**Davy de Virville Ad.** - Observations et expériences sur les variations de l'alcalinité dans les flaques littorales [*Observationes et experimenta in variationes alcalinitatis in puteis litoreis*]. C. R. Acad. Sc., CXCVIII, 12, 1178-1179. Paris (1934). **b - 449**

Les variations quotidiennes de l'alcalinité dans les flaques du littoral, dépendent de la lumière. Elles semblent donc bien être en rapport très étroit avec l'assimilation chlorophyllienne particulièrement intense des Algues vertes.

**Davy de Virville Ad.** - Sur les principaux types de flaques du littoral atlantique [*De præcipuis typis in puteis litoreis atlanticis*]. C. R. Acad. Sc., CXCIX, 16, 734-736. Paris (1934). **b - 450**

En se basant sur leur flore et sur leur écologie l'A. distingue les flaques du littoral atlantique de la manière suivante: Flaques à Chlorophycées, flaques à Algues calcaires, à Cystosires, à *Halopithys pinastroides* et *Ceramium rubrum*, à Fucacées, flaques battues, flaques à *Bifurcaria tuberculata* et *Himanthalia lorea*, à *Chorda filum*, à Laminaires communes, à Floridées, à Zostères.

**Derjugin K. M.** - Einfluss der Meerengen und deren hydrologischen Haushaltes auf die Fauna der Meere und auf die weitere Evolution der letzteren [*De marinis fretis eorumque regimine hydrologico. Agitur de influentia in faunam marium deque eius evolutione ulteriore*] (Russ. Text, dtsch. Rés.). Mém. Inst. Hydrol., X, 369-375. Léningrad (1933). **b - 451**

Die Bedeutung des hydrologischen Haushaltes der Meerengen der Binnen- und Randmeere für das Verständnis des hydrologischen Haushaltes sowie der Fauna dieser Meere. Als Beispiele sind der Bosphorus nebst den Dardanellen, der Eingang ins Weisse Meer und die Meere des Fernen Ostens angeführt. Neue Vorschläge in Bezug auf die hydrologischen Beobachtungen von Binnen- und Randmeeren.

**Dons Carl** - Norges strandfauna. IV. Utbredelsen av *Patella vulgata* [*De fauna litorea Norvegiæ. IV. De distributione speciei* « *Patella vulgata* »]. 3 fig., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 49, 185-186. Trondheim (1934). **b - 452**

Questa specie è stata trovata lungo la costa norvegese fino alla latitudine di 70° 40' N. Sembra che essa eviti i fjords dove l'acqua è più ferma e dove facilmente si formano ghiacci.

**Drilhon-Courtois Andrée** - Sur la régulation de la concentration minérale du milieu intérieur chez quelques Crustacés, et leur adaptation aux changements de salinité [*Agitur de regulatione concentrationis mineralis pro medio interno aliquorum Crustaceorum deque eorum adaptatione ad mutationes salsedinis*]. C. R. Acad. Sc., CXCVIII, 11, 1079-1081. Paris (1934). **b - 453**

L'enrichissement de l'hémolymphe en cations provenant du milieu extérieur (*Astacus*) ou la déperdition en sels de ce même liquide sanguin au profit de l'eau extérieure (*Carcinus*) sont le témoignage d'un mécanisme de perméabilité de ces Crustacés et d'un automatisme réglant la composition minérale et partant la pression osmotique interne par rapport aux variations de la concentration moléculaire extérieure.

**Elton Charles** - The Ecology of Animals [*De animalium oecologia*]. viii + 97 pp., Methuen's Monographs on Biological Subjects, Methuen and Co., Ltd. London (1933). **b - 454**

The A. is the first one who has tried to write a book on the animal inter-relations including also habitats and economic problems. One part of the animal ecology is illustrated by fishing researches carried on in the North Sea. A special interest is dedicated to the study of the different marine environments.

**Fischer Piette E.** - Faune et flore de Saint Servan en 1934 [*Fauna et flora in* Saint-Servan *a. 1934*]. Bull. Labor. Saint-Servan, XIII, 22-30. (1934). **b - 455**

Etudes sur les variations de la faune et de la flore marines d'une année à une autre. Rapports avec les variations de la salinité et celles des divers autres éléments climatériques; interactions des prédateurs et de leurs proies. Algues, Phanérogames, Spongiaires, Coelentérés, Crustacés, Lamellibranches, Gastéropodes, Céphalopodes, Tuniciers. Variations du peuplement d'un fond marin. La fosse de Port-Saint-Jean.

**Fischer Piette E.** - Sur la distribution verticale des organismes fixés dans la zone des fluctuations de la mer [*Agitur de distributione verticali organismorum in zona fluctuationum maris fixorum*]. C. R. Acad. Sc., CXCVIII, 19, 1721-1723. Paris (1934). **b - 456**

On peut dire que, dans la zone des fluctuations de la mer, l'ordre de succession verticale des espèces communes demeure sensiblement le même sur une grande étendue des côtes et qu'il est réglé, avant tout, par le régime de fréquence des périodes d'immersion ou d'humectation, encore plus que par la durée de ces périodes.

**Foxon G. E. H.** - Phototropism in *Porcellana* Larvae [*De phototropismo in larvis generis « Porcellana »*]. Nature, CXXXIV, 3377, 104. London (1934). **b - 457**

The reactions of *Porcellana* larvae to light examined in relation to Loeb's theory, the view of Russell and the study of Spooner.

**Gaver (van) F. & Timon-David J.** - Recherches sur le peuplement du canal souterrain du Rove (Note préliminaire) [*Inquisitiones in organisma quae vivunt in canali subterraneo* Rove (*Nota prior*)]. 3 fig., Bull. Inst. Océanogr., 641, 1-11. Monaco (1934). **b - 458**

Le canal de Marseille au Rhône a créé un habitat nouveau. Etude spéciale de la faune de la partie qui traverse en souterrain la chaîne de la Nerthe. On y trouve la juxtaposition d'espèces nettement euryhalines et d'autres généralement considérées comme strictement sténohalines. Il est intéressant de remarquer que ces formes marines s'accomodent ici d'une eau dont la salinité ne dépasse pas les trois quarts de la moyenne méditerranéenne.

**Gruvel A.** - Sur quelques-unes des causes qui arrêtent la pénétration des espèces animales dans le canal de Suez [*Causæ quæ impediunt penetrationem animalium in canalem* Suez *nomine*]. C. R. Acad. Sc., CXCVIII, 13, 1265-1267. Paris (1934). **b - 459**

Causes d'ordre mécanique du côté de Port-Saïd, causes d'ordre chimique du côté de Suez. Variations très sensibles de la salinité des eaux du grand lac et du petit lac Amers et de leurs abords dans le canal, qui représentent un grand danger pour les espèces à larves démersales.

**Hollister Gloria** - Salt and Fresh-water Viability of Fish [*De piscium adaptatione ad aquam dulcem et salmacidam*]. 1 fig., 1 diagr., Bull. New York Zool. Soc., XXXVII, 6, 183-187. New York (1934). **b - 460**

Account of some experiments undertaken with *Fundulus bermudae, Gambusia, Abudefdus marginatus, Eupomacentrus leucostictus, Haemulon sciurus, Diplodus argenteus, Eucinostomus californiensis, Iridio bivittata, Thallasomma bifasciatum, Lophogobius glaucofraenum, Blennius cristatus, Histrio gibba* and others in order to study the influence of different environments, variations from fresh to salt water and vice versa.

**Horasawa Isamu** - A Survey of the Influence of Sea Water near Yûrakû-tyô Bridge, Tôkyô [*De inspecta influentia aquæ marinæ apud* Yûrakû-tyô Bridge, Tôkyô] (In Jap.). 1 fig., Jap. Journ. Limnol., II, 3, 96-97. Tokyo (1933). **b - 461**

The abundance of Ciliates varies in relation to the Cl-content and joins the maximum in the mixed zone of fresh and sea waters. The plankton contains both fresh and marine forms.

**Kitching J. A., Macan T. T. & Cary Gilson H.** - Studies in Sublittoral Ecology. I. A Submarine Gully in Wembury Bay, South Devon [*De eocologia sublitorea. I. Agitur de quadam gula submarina in Baja* Wembury, South Devon]. 2 figs., 11 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 677-705. Plymouth (1934). **b - 462**

A diving elmeth can be used successfully on the British coast. An ecological survey extending to a depth of 10 feet below low water of ordinary spring tides has been made. Below low water of ordinary spring tides upward facing rock surfaces were occupied by a « *Laminaria* forest association ». Below L. W. O. S. T. vertical or overhanging rock surfaces were occupied by a « *Distomus-Halichondria* association ». Barnacles play an important part in the recolonisation of bare rock surfaces.

**Klähn Hans** - Anpassung, Erhaltung und Vernichtung rezenter und postglazialer Mollusken der mecklenburgischen Ostseeküste und sich daraus ergebende Schlüsse bezüglich der Eigenschaften des mecklenburgischen Litorinameeres [*Adaptatio, conservatio, destructio molluscorum recentium et postglacialium in litoribus Mecklenburgensibus Maris Baltici conclusionesque de præcipuitatibus maris Mecklenburgensis* Litorina *nomine*]. 19 Abb., 2 Taf., Arch. Hydrobiol., XXVII, 1, 61-127. Stuttgart (1934). **b - 463**

Vergleichende, möglichst genau, vor allem variationsstatistisch festgelegte Untersuchungen rezenter Muscheln der offenen See und einer Bucht (Kroy bei Alt-Gaarz an der Ostsee) ergeben eine Anpassung an die Wasserbewegung, welche sich durch grössere Dicke, breiteres Schloss und etwas bedeutendere Maximalgrösse der Muscheln der offenen See gegenüber denen der Bucht dokumentieren. Es folgt weiter, dass die Intensität der Wasserbewegung zwischen derjenigen der offenen See bei Warnemünde und der Bucht Kroy lag, dass der Salzgehalt der Litorina-Bucht bei Warnemünde grösser als der jenige der heutigen See bei diesem Ort war und dass das Litorinameerwasser der mecklenburgischen Küste ebenso wie das Wasser der heutigen See daselbst angenähert kalkgesättigt gewesen sein muss.

**Kramp P. L.** - An Exceptional Occurrence of *Rhizostoma octopus* and *Chrysaora hysoscella* in the Danish Waters in 1933 [*De speciebus « Rhizostoma octopus » et « Chrysaora hysoscella » in aquis Danicis a. 1933. Agitur de earum notanda præsentia*]. 2 figs., 2 tabl., Journ. Cons. Expl. Mer, IX, 2, 211-221. Copenhague (1934). **b - 464**

Description of the distribution of three species of *Scyphomedusae* i. e. *Cyanea Lamarcki* Pér., *R. octopus* (L.) and *C. hysoscella* (L.) which have been rather peculiar in the Danish waters in 1933. Comparison of the occurrence of the two last-mentioned species in different years. Causes of the variations in their occurrence. Hypothetical explanation of the occurrence of the two medusae in Danish waters in recent years, particularly 1933, when both were exceptionally abundant.

**Lami Robert** - Sur l'alcalinisation spécifique et la répartition des Algues dans les cuvettes littorales [*De alcalinisatione specifica et distributione Algarum in puteis litoreis*]. C. R. Acad. Sc., CXCIX, 13, 615-617. Paris (1934). **b - 465**

La valeur maximum du pH in vitro est, pour une espèce, voisine de celle que présente l'eau immédiatement proche de cette même espèce observée pendant le jour et à la même époque, dans des cuvettes littorales de la même région isolées de la mer depuis quelques heures. Ces valeurs ont été déterminées pour 8 espèces d'Algues.

Diverses Algues végétant dans une cuvette à flore algale non homogène se groupent selon leur pH spécifique.

**Luther Alex** - Ueber eine Coccolithinee aus dem Finnischen Meerbusen [*De quibusdam Coccolithineis in Sinu Finlandico*]. 6 Abb., Mem. Soc. pro Fauna et Flora Fennica 1932-1933, 9, 165-171. Helsinki (1933-34). **b - 466**

Die vom Vf. beobachtete Form ist ohne Zweifel identisch mit Scherfels (1927) *Hymenomonas roseola* (= *H. Scherffeli* Conrad) und wohl auch mit *Pontosphaera stagnicola* Chodat &Rossillo (= *H. stagnicola* Kamptner 1930). Vermutung anderer Synonymen. Das Verhalten von *H. roseola* im Wasser mit verschiedenem Salzgehalt.

**M'Gonigle R. H.** - Analysis of Certain Fish Mortality Data [*Analysis aliquorum datorum de mortalitate piscium*]. Ann. Rep. Biol. Board Canada, 1933, 26. Ottawa (1934). **b - 467**

Conclusion justified by a statistical analysis undertaken of some extensive data upon various phases of mortalities associated with the following species of fish: Atlantic Salmon

(*Salmo salar*), land-locked Salmon (*S. s. sebago*), rainbow Trout (*S. irideus*), speckled Trout (*Salvelinus fontinalis*), and lake Trout (*Cristivomer namaycush*). The analysis has been confined to the stages of life from the freshly fertilized egg to the parr stage of the October following, i. e. about a year.

**Miyadi Denzaburo** - On Marine Relict *Mysidacea* [*Mysidacea marina relicta*] (In Jap., Engl. Rés.). 2 tabl., Bull. Jap. Soc. Scient. Fish., I, 6, 291-298. Tokyo (1933). **b - 468**

Japanese fresh-water Mysids are treated in this paper and their ecology is compared with that of a glacial marine relict *Mysis relicta*. Japanese relict *Mysidacea* may be identified with either *Neomysis awatschensis* and *N. nigra*. Those from Etorohu-Sima of the Kurile Islands, Hokkaido and the Kwanto Plain belong to the former, and those from the Japan Sea coast of southern Honsyu are referred to the latter.

**Moore Hilary B.** - The Biology of *Balanus balanoides* I. Growth Rate and its Relation to Size, Season and Tidal Level [*De biologia speciei « Balanus balanoides ». I. De rythmo accretionis eiusque correlatione cum dimensionibus, anni tempore, maris livello*]. 4 figs., 9 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 851-868. Plymouth (1934). **b - 469**

The growth rate of the Barnacles varies greatly with age, season and tide level, but in general there is a period of maximum growth in the summer and very little growth in the winter. Growth, except during the first year, is greatest higher up the shore. Young Barnacles, which settle too late in the year, have their growth retarded by the summer heat, but almost catch up in size the earlier settled spat, by the beginning of the next year. Most of the lower- and middle-zone Barnacles die in their third year, but those from the extreme top zone may live for five years or more.

**Moore Hilary B.** - A Comparison of the Biology of *Echinus esculentus* in Different Habitats [*De biologia speciei « Echinus esculentus » pro differentibus « habitat » comparata*]. 5 figs., 6 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 869-885. Plymouth (1934). **b - 470**

There are two types of ground at Port Erin, differing widely in the general environmental conditions, and each with a characteristic type of urchin on it. Physical conditions on the grounds. Ripening of the gonads. Gonad volumes. Time of spawning. The relation of spawning to temperature. General character of the Urchins from the different grounds.

**Moore Hilary B.** - Occurrence of the Floating Barnacle in British Waters [*Lepas fascicularis natans in aquis anglicis*]. Nature, CXXXIII, 3365, 651. London (1934). **b - 471**

Correction of errata in a work by Orton & Rawlinson (Nature, CXXXIII, 3359, 418) on this subject.

**Needler A. W. H.** - Hydrography of Malpeque Bay Area ; Winter Conditions [*De hydrographia in Baja* Malpeque. *Condiciones hiemales*]. Ann. Rep. Biol. Board Canada, 1933, 30-31. Ottawa (1934). **b - 472**

Results of a study of the conditions under ice, which are of importance in connection with the survival « winter-killing » and movements of the forms living in the Malpeque Bay area ; rate of formation of the ice ; protection of the bottom water from cooling offered by the fresher surface layer under the ice ; stability of stratification of the water under ice during the winter months.

**Nikitine B. N. & Malm E.** - L'influence de l'oxygène, des ions hydrogène et de l'acide carbonique sur la distribution verticale du plankton de la Mer Noire [*De influentia oxygeni*, pH *et acidi carbonici in distributionem verticalem planctonicam Ponticam*]. 7 tabl., 4 diagr., Ann. Inst. Océanogr., XIV, 4, 137-171. Paris (1934). **b - 473**

Les AA. ont tenté d'établir l'influence de l'oxygène, du carbone dioxyde et de la concentration en ions hydrogène sur plusieurs formes zooplanktoniques de la Mer Noire et d'approcher ainsi la question du rôle que jouent ces facteurs du milieu, au point de vue écologique. Les résultats des expériences conduites par eux mêmes et les observations dans les conditions naturelles de la mer, ainsi que de nombreuses données de littérature, permettent aux AA. de reconnaître les rôles essentiels et quelquefois même décisifs de l'oxygène et de $CO_2$ parmi les facteurs conditionnant la distribution verticale des organismes dans la mer.

**Orton J. H.** - Bionomical Studies on *Cardium edule* with Special Reference to Mortality in 1933 [*Studia bionomica speciei « Cardium edule ». Agitur particulatim de eius mortalitate, a. 1933*]. 4 figs., 8 tabl., James Johnstone Mem. Vol., 97-120. Liverpool (1934). **b - 474**

Results of observation and study of a high degree of mortality of *C. edule* carried out in relation to the general biology of *C. edule* during the summer of 1933, in the course of investigations on the bionomics of this shellfish on the Cark beds, Morecambe Bay. General biological conditions and mortality in 1933. Viability of the affected *C. edule*. Parasites of *C. edule*. Seasonal quantitative distribution of healthy and affected *C. edule*. On overcrowding. Variation in size with habitat. Temperature conditions on the beds in 1933. Conclusions. Acknowledgments. Literature cited.

**Orton J. H. & Rawlinson Ruth** - The Floating Barnacle on the North Cornish Coast in the Summer of 1933 [*Lepas fascicularis natans praeter litora merid. ad* Cornwall *pertinentia æstate 1933*]. 1 fig., Nature, CXXXIII, 3359, 418. London (1934). **b - 475**

Occurrence of fifty individuals of *L. fascicularis* on the shore at New Train Bay. Most of them floated freely, a little group was attached to floating fronds of *Fucus* and *Ascophylum* in different ways. Discussion on different floating habits. Hypotheses as to the causes of the curious occurrence of this species in this locality ; probably this interesting floating barnacle may often serve as a useful indicator of important physical events.

**Pentland E. S.** - Experiments with Salt-Water Amphipods [*De experimentis, amphipodorum ex aqua salsa auxilio perfectis*]. Ann. Rep. Biol. Board Canada, 1932, 34-35. Ottawa (1933). **b - 476**

Experiments on resistance to low salinity of three species of *Gammarus* : *G. annulatus*, *G. locusta* and *Galliopius laeviusculus*. Observations on the hatching of the eggs of *G. marinus* and *G. annulatus*, and on the rate of growth of the same species. In two cases the period between moults was determined for two females of both the species respectively.

**Pérez Charles** - Exposé de biologie zoologique. 1 : Les Pagures ou Bernards l'Ermite (un exemple d'adaptation) [*Biologia zoologica. 1 : Paguri vel Eupagurus bernhardus (adaptationis exemplum)*]. 33 pp., (Actualités Scient. et Industr., 101), Hermann et C.ie. Paris (1934). **b - 477**

L'A. donne des brèves informations sur la biologie générale des espèces les plus communes de Bernards l'ermite et en considérant l'adaptation des espèces-type distribue les *Paguridea* selon une succession évolutive.

**Phifer Lyman D.** - $A_5$. 9. Periodicity of Diatom Growth in the San Juan Archipelago [*$A_5$. 9. De periodicitate accretionis Diatomœarum in archipelago* San Juan]. Proc. Fifth Pacific. Sc.

Congr., 2047-2049. Victoria & Vancouver, B. C. (1933). **b - 478**

Analysis of the two types of annual cycles of phytoplankton production found in this region, the first, that of the main channels, and the second, that of long narrow bays. Discussion as to the factors controlling the diatom growth, namely nutrient salt content, instability of the surface water and illumination.

**Poulsen Erik M.** - On the Remarkable Inflow of Coalfish into the Kattegat in 1932 [*De notabili immigratione speciei « Gadus virens » in* Kattegat, *a. 1932*]. 2 figs., 2 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, 3-ème partie, Appendices 1933-1934, LXXXIX, 81-83. Copenhague (1934). **b - 479**

The causes of this inflow are to be sought in the salinity and temperature anomalies prevailing in the Kattegat during 1932. The fate of these larvae and youngfish. Tables indicating the length of larvae and salinity.

**Prenant Marcel** - Exposé de biologie écologique. 1: Adaptation, écologie et biocoenotique [*Biologia oecologica. 1: Adaptatio, oecologia et biocenosis*]. 60 pp., (Actualités Scient. et Industr., 103), Hermann et C.ie. Paris (1934). **b - 480**

**Prenant Marcel** - Modifications récentes de flore et de faune marines dans le Morbihan et la Baie de Quiberon [*Variationes recentes floræ et faunæ maris in regione* Morbihan *et in baja* Quiberon]. Bull. Inst. Océanogr., 648, 1-8. Monaco (1934). **b - 481**

Documents sur la régression actuelle des herbiers de Zostères et sur ses conséquences. Extension récente des Laminaires dans le Morbihan.

**Raffy Anne** - Influence des variations de salinité sur l'intensité respiratoire de la telphuse et de l'écrevisse [*De variatione salsedinis eiusque influentia in intensitatem respirationis in speciebus « Telphusa fluviatilis » et « Potamobius astacus »*]. 1 table, C. R. Acad. Sc., CXCVIII, 7, 680-681. Paris (1934). **b - 482**

L'écrevisse est nettement sténohaline, elle maintient son taux respiratoire dans le milieu inhabituel et cela presque jusqu'à la mort. La telphuse présente une totale euryhalinité ; elle abaisse progressivement sa consommation d'oxygène au fur et à mesure qu'elle est dans un milieu plus concentré.

**Remane A.** - Die Brackwasserfauna (Mit besonderer Berücksichtigung der Ostsee) [*De fauna aquæ salmacidæ* (*Agitur particulatim de aqua Maris Baltici*)]. 5 Abb., 1 Tab., Zool. Anz., 7 Suppl.-Band, 34-74. Leipzig (1934). **b - 483**

Der Vf. hat für das Studium der Abnahme der marinen und Brackwasserarten die folgenden Vergleichsgebiete gewählt. I. Das deutsche Nordseegebiet ; II. die deutsche Beltsee ; III. die südliche Ostsee bis nördlich Gotland ; IV. die restlichen nördlichen Gebiete, worüber auch eine Tabelle gegeben wird. Versuche zur Erklärung der Artenarmut. Die Brackwassertiere. Die Einteilung der Brackwässer. Die Lebensgemeinschaften des Brackwassers. Vergleich der Ostsee mit anderen Brackwassergebieten. Zur physiologischen Erklärung der biologischen Brackwasserphänomene.

**Ritchie A. D.** - The Habitat of *Procerodes ulvæ* [*Procerodes ulvæ eiusque « habitat »*]. Journ. Mar. Biol. Assoc., XIX, 2, 663-668. Plymouth (1934). **b - 484**

*P. ulvae* has been found living in streams with calcium content as low as 5 mgm. per litre. Its upper limit does not appear to be affected by the calcium content of the water. The animals at the upper limit are liable to about 5 days' exposure to fresh water if calm weather coincides with neap tides. Animals living in water of 8-10 mgm. Ca per litre have been found alive at the end of such a period.

**Russell E. S.** - The Behaviour of Animals: an Introduction to its Study [*De animalium adaptatione : introductio in studium*]. 6 pl., viii + 184 pp. Edward Arnold and Co. London (1934). **b - 485**

**Saemundsson Bjarni** - Probable Influence of Changes in Temperature on the Marine Fauna of Iceland [*De probabili quadam influentia variationum temperaturæ in faunam marinam Islandicam*]. 1 map, Rapp. Pr. - Verb. Cons. Expl. Mer, (Scient. Rep. North-Western Area Comm. for 1930-1932), LXXXVI, 1-6. Copenhague (1934). **b - 486**

Some introductory remarks on the increase of the surface-temperature in the Norwegian Sea and in the waters round South-Greenland and Iceland during the last decennium. As a consequence, a general trend of migration to more northern waters has been observed for the icelandic species, the Cod (*Gadus callarias* L.), the Herring (*Clupea harengus* L.) and the Capelan (*Mallotus villosus*, O. F. Müller) as well as for other Fishes before very rarely seen in Icelandic waters, as the Witch (*Pleuronectes cynoglossus* L.) the Turbot (*Rhombus maximus* L.), the Basking Shark (*Selache maxima* (Gunn.)), the Tunny (*Orcynus thynnus* (L.)), the Mackerel (*Scomber scombrus* L.), the Skipper (*Scombresox saurus* Wlb.), the Sunfish (*Orthagoriscus mola* L.), the Scopelid (*Paralepis Krøyeri* Lth.), and a great many Whales.

**Saunders L. C.** - The Fresh-Water Shrimps (Amphipods) of Vancouver Island [*De Amphipodis ex aqua dulci ad* Vancouver *insulam pertinentibus*]. Ann. Rep. Biol. Board Canada, 1933, 100. Ottawa (1934). **b - 487**

Brief account of a preliminary study of certain waters on Vancouver island from the point of view of their amphipod population representing a very important trout food. Notes on *Corophium volutator*, a marine species which penetrates considerable distances up the tidal zones of streams entering the sea and is able to exist in fresh-water for considerable periods of time.

Brief summary of experiences carried out with larvae of the mussel crab, *Pinnotheres*, in order to study the light intensity and temperature as factors controlling the rate of swimming of the larvae.

**Welsch J. H.** - Studies on (1) Light and the Behaviour of Marine Organisms; (2) Biology of *Pinnotheres maculatus* Say [(*1*) *De luce ac ratione agendi organismorum marinorum.* (*2*) *Pinnotheres maculatus* Say *eiusque biologia*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 51. Woods Hole, Mass. (1933). **b - 498**

Brief information upon a survey of the effect of intensity of illumination on the behaviour (especially rate of locomotion) of a number of marine Invertebrates, made during the summer 1932 and additional data obtained on the biology of *Pinnotheres maculatus* Say.

**Yocom Harry B.** - Observations on the Experimental Adaptation of Certain Fresh-water Ciliates to Sea water [*Ciliata aquæ dulcis. Observationes de eorum adaptatione experimentali in aqua marina*]. Biol. Bull., LXVII, 2, 273-276. Lancaster, Pa. (1934). **b - 499**

Experiments carried out in order to establish if *Euplotes patella*, a common fresh-water form, might be gradually adapted to live in sea water. This species was used because some of the species of *Euplotes* are known to live in salt water. The results are very doubtful.

**Zinovjev A. P.** - Saline and Brackish Basins of the Troitsk District, Ural Region. The Fauna of *Copepoda* and *Phyllopoda* [*De bacinis salsis et salmacidis in districtu* Troitsk, *in regione Montium Uralium. Copepoda et Phyllopoda*]. 5 tabl., Bull. Inst. Rech. Biol., IX, 6/8, 271-295. Perm (1934). **b - 500**

This paper represents a part of the elaboration of materials collected with the view of an hydrobiological study of the basins of the Troitsk Reserves and its neighbourhood, collected by the author from 1929 to 1932 incl. and contains a summary of the observations of the animal life of basins more or less saline. The results allow to make some conclusions concerned with the problem of the genesis of saline basins, their formation, their development, and the causes of the difference of composition of their waters. The species of the fauna of the basins observed are scanty, and variations in the composition of the population are observed not only in different lakes, but in the same lake.

## Animalium societas - Biocenosis - Symbiosis.

**De Buen Fernando** - Fondos de Terebrátulas y Crinoideos en el Mediterráneo occidental [*Terebratulæ et Crinoidea in Mediterraneo occidentali*]. Bol. Soc. Españ. Hist. Natur., XXXIV, 8/9, 439-444. Madrid (1934). **b - 501**

El A. da los resultados de la exploración de especiales fondos poblados densamente de Braquiópodos y Crinoideos, señalando su biocenosis y las condiciones oceánicas en que viven.

Resultados de los abundantes dragados efectuados, en la planicie continental balear, a bordo del guardacostas « Xauen ».

**Fage L. & Legendre R.** - Les Annélides Polychètes du genre *Iphitime*. A propos d'une espèce nouvelle commensale des Pagures, *Iphitime Paguri* n. sp. [*Polychæta generis « Iphitime ». I. Paguri, species nova commensalis Pagurorum*]. 5 fig., Bull. Soc. Zool. France, LVIII, 299-305. Paris (1934). **b - 502**

Une large enquête montre que les Brachyures les plus divers : *Macropodia, Gonoplax, Portunus* peuvent servir d'hôte à l'*Iphitime Cuenoti*.

Une nouvelle espèce, que les AA. proposent d'appeler *I. Paguri* a été rencontrée sur les branchies d'*Eupagurus bernhardus* (L.). Caractères de distinction parmi les deux espèces d'*Iphitime* considérées.

**Giltay Louis** - Note sur l'association de *Balanus concavus pacificus* Pilsbry (Cirripède) et *Dendraster excentricus* (Eschscholtz) (Echinoderme) [*Nota de consociatione inter speciem « Balanus concavus pacificus »* Pilsbry *et speciem « Dendraster excentricus »* (Eschscholtz)]. 4 fig., Bull. Mus. R. Hist. Natur. Belgique, X, 5, 1-7. Bruxelles (1934). **b - 503**

Différentes sous-espèces du genre *Balanus concavus* connues depuis le Tertiaire.

Position de *B. c. pacificus* sur le disque de *Dendraster excentricus*. Dommages que le balane provoque à l'échinoderme. Avantages de la fixation pour les Balanes.

**Gohar H. A. F.** - Partnership between Fish and Anemone [*Consociatio inter piscem quemdam et actiniam*]. Nature, CXXXIV, 3382, 291. London (1934). **b - 504**

The A. adds some information to the known habits of the commensals : *Amphiprion bicinctus* and *Actinia quadricolor*.

**Iljin B. S.** - Biocoenose des halistatischen Gebiets des Schwarzen Meeres [*De biocoenosi in zona halistatica Ponti Euxini*]. Priroda, 7, 63-65. Leningrad (1933). **b - 505**

Die hier lebenden Formen, *Idothea algirica, Syngnathus Schmidti, Nautilograpsus minutus* und *Gasterosteus aculeatus* sind als diesem Lebensbezirk besonders angepasste Organismen zu bezeichnen. Charakteristika, Milieuverhältnisse.

**Raffy Anne** - Études physiologiques sur les associations animales. L'intensité respiratoire des Pagures et de leurs commensaux [*Studia physiologica de consociationibus animalium. De intensitate respiratoria Pagurorum eorumque commensalium*]. Bull. Inst. Océanogr., 643, 1-7. Monaco (1934). **b - 506**

L'A. en se tenant aux seules conclusions qui ressortent de ses données numériques, conclut que les Pagures et leurs commensaux respirent plus activement lorsqu'ils sont réunis que lorsqu'ils sont séparés, sans en déduire nécessairement qu'il y a là un cas de commensalisme physiologique.

**Yonge C. M.** - Origin and Nature of the Association between Invertebrates and Unicellular *Algæ* [*De origine et natura consociationis inter Invertebrata et algas unicellulares*]. Nature, CXXXIV, 3375, 12-15. London (1934). **b - 507**

Author's experimental research and a critical examination of recent work on this type of symbiosis, have enabled him to throw some light on the origin and nature of this association. Analysis of the symbiosis of the *Algae* with carnivore and herbivorous or omnivorous animals. Transference of an alga from one type of animal to another. Many gradations as to the nature of the association. From this summary it is concluded that by symbiosis is meant only a relationship which is mutually advantageous to both parties, then the only adequately investigated cases which meet this requirement are *Paramecium bursaria, Chlorohydra* and the reef-building Corals (and probably all *Anthozoa*).

## Parasiti.

**Adam W.** - Prosobranches parasites [*Prosobranchia parasitica*]. 16 fig., Mém. Mus. R. Hist. Natur. Belgique, h. sér., Résult. Scient. voyage aux Indes orient. Néerl. de LL. AA. RR. le Prince et la Princesse Léopold de Belgique, II, 14 (2), 85-115. Bruxelles (1934). **b - 508**

Parmi les Mollusques étudiés, il se trouve quelques exemplaires du genre *Thyca*, qui permettent de décrire le mâle nain, inconnue à l'heure actuelle, de l'espèce *Thyca crystallina*. D'autre part il y a quelques *Melanella*, dont *M. holothuricola* est nouvelle.

**Ass M. J.** - *Anoplura* der Walrosse [*Anoplura in Trichechis*] (Russ. Text, Dtsch. Rés.). 13 Abb., 1 Tab., Trans. Arct. Inst., IX, 89-105. Leningrad (1934). **b - 509**

Beobachtungen über *Antarctophthirius trichechi* Bohem., eine *Anoplura* vom Walross (*Trichechus rosmarus*). Es werden zum ersten Male Abbildungen der verschiedenen Larvenstadien dieser Insekten gemacht.

**Atkins D.** - Two Parasites of the Common Cockle *Cardium edule :* a Rhabdocoele *Paravortex cardii* Hallez and a Copepod *Paranthessius rostratus* (Canu) [*Paravortex cardii* Hallez *et Paranthessius rostratus* (Canu) *parasiti in specie « Cardium edule »*]. Journ. Mar. Biol. Assoc., XIX, 2, 669-676. Plymouth (1934). **b - 510**

Account of British parasites of *C. edule* in view of the serious mortality reported in this species in the summer of 1933.

**Baylis H. A.** - A Little-known Nematode Parasite of the Eel [*De nematode parum cognito parasito in anguilla*]. 3 figs., Ann. & Magaz. Natur. Hist., 10th Ser., XIII, 74, 235-240. London (1934). **b - 511**

Redescription of the species new to England, *Paraquimperia tenerrima*, from the intestine of *Anguilla anguilla*.

**Bolívar Izquierdo Ignacio** - Sobre dos Mizostómidos de las costas de España (Anel.) [*De duobus Myzostomatis præter litora hispanica*]. 1 fig., Bol. Soc. Españ. Hist. Natur., XXXIV, 10, 489-496. Madrid (1934). **b - 512**

El A. da una ligera descripción de la especie *Myzostoma ciniferum*, que infesta los individuos de *Antedon bifida* y llama la atención sobre los problemas biológicos y morfólogicos mas importantes que plantea el estudio de estos animales. La posición sistemática de esta especie.

**Bonnot P.** - Parasites of Fishes [*Parasiti Piscium*]. Calif. Fish and Game, XIX, 1, 9-15. (1933). **b - 513**

**Gibbons Norman E.** - The Slime and Intestinal Flora of Some Marine Fishes [*De muco et flora intestinali aliquorum Piscium marinorum*]. 2 tabl., Contr. Canad. Biol. & Fish., VIII, 22, 275-290. Toronto (1934). **b - 525**

A study was made of the slime and faeces of 43 fishes, representing 11 marine species. Eighty species and varieties of *Bacteria* were isolated, 22 from slime only, 14 from faeces only, and 44 from both slime and faeces. This study would indicate that the flora of the slime and faeces of marine fish is quite similar.

**Gibbons Norman E.** - Lactose-fermenting *Bacteria* from the Intestinal Contents of Marine Fish [*De Bacteriis qui lactosium fermentant in continentia intestinali Piscium marinorum*]. 2 tabl., Contr. Canad. Biol. & Fish., VIII, 23, 291-300. Toronto (1934). **b - 526**

From 112 marine Fishes examined for the presence of lactose-fermenting *Bacteria*, 31 strains were isolated which produced acid and gas in this sugar and 3 which produced acid only. Ten strains belonged to the genus *Aerobacter*, 8 being *A. aerogenes* and 2 probably varieties of *A. cloacae*. Nine were soil types and the relationship of one was doubtful.

**Guberlet John E.** - Notes on some *Onchocotylinæ* from Naples with a Description of a New Species [*Onchocotylinæ quædam neapolitanæ. Notæ et descriptio novæ cuiusdam speciei*]. 1 table, Pubbl. Staz. Zool. Napoli, XII, 3, 323-336. Napoli (1932-1933). **b - 527**

The gills of several specimens each of ten species of Elasmobranchs taken in the vicinity of Naples were examined for parasites belonging to the sub-family *Onchocotylinae*. This sub-family is placed in the family *Polystomatidae*.

*Onchocotyle canicula* is recorded from *Scyllium stellare* and *S. canicula*. *Squalonchocotyle vulgaris* is reported from *Mustelus laevis*. *Squalonchocotyle catenulata* n. sp. is described from *Mustelus laevis*.

*Hirmocystis* (?) *parapeneopsisi* sp. nov. and *Protomagalhaensia* (?) *attenuata* sp. nov. Sporonts and early associations; unique associations; associations of larger individuals, cysts, diagnosis, habitat, systematic position. *Aggregata* sp.

**Stephensen K.** - Some New Copepods, Parasites of Ophiurids and Echinids. (Papers from Dr. Th. Mortensen's Pacific Expedition 1914-16, 64) [*Nonnulla Copepoda nova parasitica in Ophiuridis et Echinidis*]. 7 figs., Vidensk. Medd. Dansk Naturhist. For. København, 93, 197-213. København (1933). **b - 549**

*Cancerilla durbanensis* n. sp. on *Amphipholis squamata*, *Cancerillopsis* n. gen. near *Cancerilla*, type *C. nanaimensis* n. sp. on *Amphiodia urtica*, *Arthrochordeumium asteromorphae* n. sp. in *Asteromorpha koehleri*, *Ophioika* n. gen. (taxonomic position not given), type *O. ophiacanthae* n. sp. ♀ in *Ophiacantha severa*, *Dichelina* n. gen. near *Hatschekia* and *Dichelestium*, type *D. phormosomae* in *Phormosoma bursarium*.

**Stunkard H. W. & Nigrelli R. F.** - Observations on the Genus *Sterrhurus* Looss, with a Description of *Sterrhurus branchialis* sp. nov. (*Trematoda, Hemiuridæ*). [*Observationes in genus* « *Sterrhurus* » Looss *et descriptio speciei novæ S. branchialis*]. 2 figs., Biol. Bull., LXVII, 3, 534-543. Lancaster, Pa. (1934). **b - 550**

The study of a species of *Sterrhurus* from the gills of the cutlass fish, *Trichiurus lepturus* Linn. shows that it is specifically distinct from all previously described forms. The name *S. branchialis* is proposed for it. Description of digestive system, male and female reproductive systems, copulatory organs and excretory system for the species. Comparisons with other species of the genus and with allied genera.

**Timon-David Jean** - Recherches sur les Trématodes Parasites des Oursins en Méditerranée [*Inquisitiones in Trematodes parasitos echinorum Maris Mediterranei*]. 6 fig., Bull. Inst. Océanogr., 652, 1-16. Monaco (1934). **b - 551**

Après un bref aperçu sur l'habitat des différentes espèces d'oursin observées, l'A. donne la description: d'une métacercaire de *Zoogonus mirus* parasite chez *Sphaerechinus granularis*, *Paracentrotus lividus* et chez *Arbacia aequituberculata*; et de *Metacercaria psammechini* nov. sp., trouvée chez *Sphaerechinus granularis*, associée à *Zoogonus mirus*.

**Uyemura M.** - Ueber einige neue Ciliaten aus dem Darmkanal von japanischen Echinoideen [*De quibusdam Ciliatis novis parasiticis in intestino Echinoideorum japonicorum*]. Sc. Rep. Tokyo

Bunr. Daig., Sect. B., I, 14, 181-191. Tokyo (1933). **b - 552**

Zwei neue Ciliaten, *Entorhipidium fukui* n. sp. und *Conchophthirus striatus* n. sp., sind in verschiedenen Arten von japanischen Meeresschweinchen gefunden worden.

**Yamaguti S.** - Studies on the Helminth Fauna of Japan. Part 2. Trematodes of Fishes [*Studia faunæ helminthologicæ Japoniæ. Pars IIa. Trematodes Piscium*]. 145 figs., Jap. Journ. Zool., Trans., V, 3, 249-541. Tokyo (1934). **b - 553**

Description of many species from both marine and freshwater Fishes. Several new genera and new species were found.

**Yamaguti S.** - Studies on the Helminth Fauna of Japan. Part 4. Cestodes of Fishes [*Studia faunæ helminthologicæ Japoniæ. Pars IVa. Cestodes Piscium*]. 187 figs., Jap. Journ. Zool., Trans., VI, 1, 1-112. Tokyo (1934). **b - 554**

The selachian Cestodes described in this paper were collected for the most part at Kuki on the Pacific coast of Mie Prefecture, but the teleostean materials are from various localities (Inland Sea, Toyama Bay, Lake Biwa, etc.). It is very interesting to note that the marine forms from such different Fishes as Sharks, Sunfishes, Swordfishes, Codfishes, etc. are also widely spread.

# BIOGEOGRAPHIA.

## Geographica distributio.

**Athanassopoulos G.** - Sur la présence des Pélamydes (*Pelamys sarda* Bl.) dans la Méditerranée orientale [*Pelamys sarda* Bl., *in Mediterraneo orientali*]. Rapp. Pr.-Verb. Comm. Expl. Scient. Méditerranée, VIII, Annexe I, 315-316. Paris (1934). **b - 555**

Information sur l'abondance inaccoutumée de Pélamydes dans les eaux grecques en 1933. Alternance entre les Auxides et les Pélamydes dans ces eaux. Modification de la route suivie ordinairement par ces Poissons migrateurs comme cause de leur présence inattendue, provoquée par un changement d'intensité du courant du détroit des Dardanelles.

**Awerinzew S.** - Ueber die Verteilung von *Mallotus villosus* im Barentsmeer [*Mallotus villosus. De eius distributione per Mare* Barents]. 4 Karten, Journ. Cons. Expl. Mer, IX, 1, 79-82. Copenhague (1934). **b - 556**

Die unerhört wechselnde Verteilung von *Mallotus villosus* im Barentsmeer wird hier für jeden Monat beschrieben und in Karten gezeigt. Ohne ganz sichere Schlüsse in Bezug auf diese Schwankungen zu ziehen, stellt der Vf. sie mit den Strömungen und der Verbreitung gewisser Planktonarten zusammen.

**Barnard K. H.** - Second Occurrence of the Whale-Shark (*Rhineodon typus*) in South Africa [*Rhineodon typus iterum collectus in Africa meridionali*]. Nature, CXXXIV, 3376, 66. London (1934). **b - 557**

This specimen was found stranded on the sands at Kommetje Bay (on the west side of the Cape Peninsula).

**Barnard K. H.** - The Lobster, *Enoplometopus occidentalis*, Randall, in South Africa [*Enoplometopus occidentalis*, Randall, *in Africa merid.*]. Nature, CXXXIV, 3391, 665. London (1934). **b - 558**

Its presence on the Natal coast is interesting and worthy of record.

**Belloc Gérard** - Note sur la limite méridionale de l'aire de distribution du Merlu [*Nota de limite meridionali distributionis speciei « Merlucius merluccius »*]. Rev. Trav. Off. Pêch. Marit., VI, 1, 63-65. Paris (1933). **b - 559**

L'A. démontre que le merlu européen est abondant au large du Cap Blanc (Mauritanie) et que sa présence a été reconnue jusqu'au delta du Sénégal. Il n'a pas été encore possible de préciser la limite méridionale de sa distribution, mais il est probable qu'elle doit être située dans les parages du Cap Vert et peut-être même plus au Sud.

**Berg L. S.** - Sur la distribution amphi-boréale (interrompue) de la faune marine dans l'hémisphère Nord [*De distributione amphi-boreali faunæ marinæ per hemisphærium septentrionale*] (En russe). Bull. Soc. Géogr. Etat, LXVI, 1, 69-78. Léningrad (1934). **b - 560**

Description des animaux marins amphi-boréaux (Poissons, Mollusques, Echinodermes, Crustacés, Mammifères). Quelques données sur leur distribution dans les eaux polaires. Les causes du caractère amphi-boréal de leur distribution.

**Bērziņš Bruno V. A.** - *Cottus bubalis* Euphr. im Rigaer Meerbusen [*Cottus bubalis* Euphr. *in Sinu Cylipeno*]. Fol. Zool. et Hydrobiol., V, 1, 81-82. Riga (1933). **b - 561**

Diese Art, die nach einer Angabe 1883 nur längs der schwedischen Küste nordwärts bis Stockholm anzutreffen war, ist in späterer Zeit auch im Finnischen und Rigaer Meerbusen aufgefunden worden. Möglich ist, dass sie wegen ihrer grossen Aehnlichkeit mit dem gewöhnlichen *C. scorpius* L. einfach übersehen worden ist.

**Boettger Caesar R.** - Die Ausbreitung der Wollhandkrabbe (*Eriocheir sinensis* Milne-Edw.) in Europa [*De distributione speciei « Eriocheir sinensis »* Milne-Edw. *in Europa*]. Sitz. ber. Ges. Naturforsch. Freunde, III, 399-415. Berlin (1934). **b - 562**

Einige Vermutungen in Bezug auf die Zeit, Weise und Ursachen der Uebersiedlung nach Europa und die dortige Verbreitung. Neue Fundorte eingetragen. Möglichkeit fernerer Ausbreitung. Verwechslung mit *Dromia vulgaris*. Bibliographie.

**Brambell F. W. & Cole H. A.** - Occurrence of an Enteropneust in Wales [*De quodam enteropneusta in* Wales]. Nature, CXXXIII, 3372, 913. London (1934). **b - 563**

A small enteropneust was found on the Anglesey coast of the Menai Straits. It has been identified as a species of *Dolichoglossus*. Occurrence of adult Enteropneusts around the coasts of the British Islands.

**Brunelli G. & Bini G.** - Sulla immigrazione di una specie di *Teuthis* dal Mar Rosso al Mar Egeo [*De immigratione cuiusdam speciei ad genus « Teuthis » pertinentis a Mari Rubro ad Mare Erythræum*].

Atti R. Accad. Naz. Lincei, XIX, 4, 255-260. Roma (1934). **b - 564**

Si riportano i risultati di studi, fatti durante diverse spedizioni, sulle specie di Pesci che abitano il canale di Suez, e che son passate attraverso il canale da un mare all'altro. Si nota quindi la presenza di un genere indo-pacifico, il *Teuthis siganus* nelle acque dell'Egeo.

**Chabanaud Paul** - Contribution à l'étude de la faune ichthyologique du Canal de Suez [*Contributio in studium faunæ ichthyologicæ in Canali* Suez]. Bull. Soc. Zool. France, LVIII, 5, 287-292. Paris (1933). **b - 565**

Le présent travail, suite aux notes déjà publiées sur le même sujet, contient diverses observations amplificatives ou rectificatives, formulées à propos de déterminations antérieures.

**Chemin E.** - Une excursion algologique aux Iles Anglo-Normandes [*Navigatio algologiæ causa suscepta ad insulas Anglo-Normannas*]. 1 carte, Bull. Labor. Saint-Servan, XII, 1-22. Rennes (1934). **b - 566**

Liste des Algues recoltées par stations : Château Elisabeth, Les Ecréhous, Grottes Gouliot, Anse de Bordeaux, Baie du Petit-Bot. Caractères particuliers à chacune de ces stations, mention des espèces remarquables soit par leur taille, soit par leur abondance, soit par leur rareté. Considerations générales sur l'ensemble de la flore et ses rapports avec les contrées voisines et remarques sur trois espèces qui n'avaient pas été signalées jusqu'ici : *Laminaria ochroleuca* de la Pyl., *Falkenbergia Hillebrandii* (Born.) Falk. et *Asparagopsis armata* Harv.

**Dons Carl** - Zoologische Notizen XXIV. Ueber die Verbreitung der *Pleurophyllidia Lovéni* [*Notitiæ zoologicæ, XXIV. De distributione speciei* « *Pleurophyllidia Lovéni* »]. 1 fig., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 48, 183-184. Trondheim (1934). **b - 570**

Diese Art, welche zum erstenmal 1853 im Oslofjord nachgewiesen worden ist, scheint zur Zeit im Begriff sich nordwärts zu verbreiten und ist neuerdings viermal in den Gewässern des Trøndelags gefunden. Beschreibung.

**Feldmann Jean** - Les Laminariacées de la Méditerranée et leur répartition géographique [*Laminariaceæ Maris Mediterranei earumque distributio geographica*]. 13 fig., Bull. Trav. Stat. Aquicult. et Pêche Castiglione 1932, 2, 143-184. Alger (1934). **b - 571**

Tableau de détermination des Laminariacées méditerranéennes. Description, répartition géographique et écologie des espèces suivantes : *Laminaria Rodriguezii* Bornet, *L. iberica* (Hamel) Lami ; *Phyllaria reniformis* (Lamour.) Rostafinski, *Ph. purpurascens* (C. Ag.) Rostafinski ; *Saccorhiza bulbosa* (Hudson) De la Pylaie. Remarques sur la répartition géographique des Laminariacées méditerranéennes.

**Fischer-Piette E.** - Remarques de systématique et de biogéographie sur les Patelles des côtes françaises [*Considerationes de systematica et biogeographia Patellarum ad litora gallica pertinentium*]. 2 fig., Bull. Mus. Nat. Hist. Natur., 2e sér., VI, 3, 280-285. Paris (1934). **b - 572**

L'A. étudie les Patelles des côtes françaises, en vue de préciser la valeur des coupures spécifiques à établir, à l'aide de mesures de la radula, et en examinant aussi la forme des dents de la radula. Il donne ici les premiers résultats concernant les Patelles océaniques, qui comprennent les espèces : *Patella vulgata, P. intermedia, P. depressa* et *P. lusitanica*.

**Glassell Steve A.** - Affinities of the Crab Fauna of California [*Fauna carcinologica Californiensis. Quæstio de affinitate*]. Journ. Wash. Acad. Sc., XXIV, 296. Washington, D. C. (1934). **b - 573**

The study undertaken by the A. shows that the total number of Crabs in the Gulf of Maine is 197. A detailed analysis of this fauna indicates an infusion of southern forms.

**Goodwin G. G.** - Occurrence of a Gray Seal at Atlantic City, N. J. [*Halichoerus gryphus in* Atlantic City, N. J.]. Journ. Mammal., XIV, 1, 73. Baltimore, Md. (1933). **b - 574**

First state record of *Halichoerus gryphus*.

**Gurjanova E.** - The *Crustacea* of the Kara Sea and the Ways of the Penetration of Marine Atlantic Fauna into the Arctis [*Crustacea Maris Karensis. Agitur etiam de penetratione faunae marinae Oceani Atlantici in regiones arcticas*] (In Russ., Engl. Rés.). 1 map, C. R. Acad. Sc. U. R. S. S., I, 2, 91-96. Léningrad (1934). **b - 575**

The seven zoogeographical groups of *Crustacea* in the Kara Sea. Dependence of the distribution of these 7 groups in the Kara Sea upon the distribution of depths and salinity, and upon the origin of each group. Demonstration, on hand of the geographical distribution of the Atlantic species observed in the Kara Sea, of the way of the penetration of Atlantic fauna into the arctic region.

**Heldt H.** - Note sur la capture de l'Esturgeon (*Acipenser* L.) dans les mers tunisiennes [*Acipenser sturio. De eius captura in maribus tunetanis*]. 3 fig., Rapp. Pr.-Verb. Comm. Expl. Scient. Méditerranée, VIII, 81-84. Paris (1934). **b - 576**

Description d'un exemplaire d'*Acipenser sturio* capturé sur la côte nord tunisienne. C'est la première fois qu'on rencontre cette espèce dans les eaux tunisiennes.

**Hylmö D. E.** - Algenimmigration nach der schwedischen Westküste [*De immigratione Algarum in litus occid. Suetiæ*]. 4 Abb., Bot. Not., 1/3, Jubileumsskrift., 377-390. Lund (1934). **b - 577**

*Fucus inflatus* L., *Callithamnion roseum* (Roth.) ; Bemerkungen über ihr Vorkommen in Schweden, wo sie vorzugsweise wachsen, und wie sie dahingekommen sind. Geographische Verbreitung. Bastardenformen.

**Kylin Harald** - Några algfynd från bohusländska kusten [*De algis repertis in litoribus Provinciæ* Bohuslän (*in Suetia*)]. Bot. Not., 1/3, Jubileumsskrift, 391-394. Lund (1934). **b - 578**

Le specie seguenti sono nuove per la costa occidentale svedese : *Codium tomentosum*, *Arthrocladia villosa*, *Chantransia stricta*, *Ch. gynandra*, *Cruoriopsis gracilis*, *Compsothamnion gracillimum* e *Callithamnion bipinnatum*. Per ogni specie l'A. dà la diagnosi e la sinonimia.

**Lami Rob.** - Nébulosité et brumes régionales comme facteurs possibles de la répartition géographique des Algues [*Nebulæ et caligines regionales possibiles factores distributionis geographicæ algarum marinarum*]. Rev. Algol., VII, 1/2, 181-182. Paris (1934). **b - 579**

D'après les études de la flore algale du Golfe de Gascogne et du Golfe normand-breton, qui présente un caractère ou d'éléments plus méridionaux que ceux qui devraient normalement s'y rencontrer, l'A. pense que la nebulosité doit être un facteur très important dans la répartition des espèces.

**Lami Rob.** - Stations nouvelles de quelques Algues rares dans la Manche occidentale [*Algæ quædam raræ in Freto Britannico occid. Stationes novæ*]. Rev. Algol., Notes, VII, 1/2, 182-184. Paris (1934). **b - 580**

*Laminaria Lejolisii*, *Codium difforme*, *Sporochnus pedunculatus* et *Arthrocladia villosa*, *Dasnya punica*, *Griffithsia barbata*, *Naccaria Wigghii*.

**Matheson Colin & Cowley Lionel F.** - *Pseudorca crassidens* (Owen) on the Glamorgan Coast [*Pseudorca crassidens* (Owen) *in litore* Glamorgan]. 1 fig., Nature, CXXXIII, 3371, 870. London (1934). **b - 581**

Note on a school of these Cetaceans stranded at Whiteford Sands, Llanmadog. Occurrence of schools of these rare Dolphins.

**Meyer Karl** - Die geographische Verbreitung der tripyleen Radiolarien des Südatlantischen Ozeans [*Radiolaria tripylaria. De eorum geographica distributione per Oceanum Atlanticum merid.*]. Wiss. Ergebn. Dtsch. Atlant. « Meteor »-Exped. 1925-1927, XII, 122-198. Walter de Gruyter & Co. Berlin & Leipzig (1933). **b - 582**

Die Ergebnisse der verschiedenen Fänge sind in fünf Tabellen mit fünf verschiedenen Tiefen angegeben. Der erste Teil dieser Arbeit umfasst die Verteilung der *Microtripylea* im westlichen und südlichen Aequatorialbezirk des Atlantischen Ozeans und der zweite Teil die Verteilung der *Macrotripylea*. Der Vf. ist der Ansicht, dass der Gehalt an Phosphor der hauptsächliche Faktor für Verteilung der *Radiolaria* ist. Das Vorkommen gewisser vorherrschender Typen wie *Aulacantha scolymantha*, *Coelodendrum ramosissimum* und *C. furcatissimum* sind besonders erörtert im Vergleich mit den Befunden anderer Expeditionen.

(Siehe auch Rés.: Naturwiss., 46, 778, 1934).

**Oshima Masamitsu** - Occurrence of *Cryptosaras couesii* in the Japanese Waters [*Cryptosaras couesii in aquis Japoniis*]. 1 fig., Rec. Oceanogr. Works in Japan, VI, 1, 108-109. Tokyo (1934). **b-583**

Description of an interesting specimen of this deep sea fish, unrecorded until now from the Japanese waters, and taken in Japan Sea, off the coast of Touchizaki, Akita Prefecture.

**Pesta O.** - Zoogeographische Berichte über Crustaceen [*Zoogeographica relatio de Crustaceis*]. Zool. Anz., CIV, 274-282. Leipzig (1933). **b - 584**

Neue Fundorte für *Valdiviella insignis*, *Penilia Schmackeri*, *Microniscus*, *Lernaeenicus*, *Brancinecta granulosa*. Verzeichnis der Dekapoden von Hawai; Notiz über die Verbreitung und Wanderungsgeschwindigkeit der *Eriocheir sinensis*.

**Redeke H. C.** - On the Occurrence of two Pelagic Copepods, *Acartia bifilosa* and *Acartia tonsa*, in the Brackish Waters of the Netherlands [*Copepoda duo pelagica, Acartia bifilosa et A. tonsa in aquis salmacidis Hollandiæ*]. 3 figs., Journ. Cons. Expl. Mer, IX, 1, 39-45. Copenhague (1934). **b - 585**

The planktonic Copepod *Acartia* (*Acanthacartia*) *tonsa* Dana made its appearance in the Netherlands between the years 1912 and 1916. Here it is nowadays extremely abundant and one of the most common Copepods of the brackish, especially mesohaline, waters of the Netherlands. *Acartia* (*Acanthacartia*) *bifilosa* (Giesbr.), still very common in the first decade of this century seems to have completely disappeared from the Netherlandic waters and is replaced by *Acartia tonsa*.

**Renfors Lauri** - Ein Vertreter der Familie *Spionidæ* (*Annelida, Polychæta*) aus dem Finnischen Meerbusen [*Prototypus ex familia Spionidarum* (*Ann. Pol.*) *Sinus Finnici*]. 1 Abb., Mem. Soc. pro Fauna et Flora Fennica, 1932-33, IX, 31-32. Helsinki (1933-34). **b - 586**

Kurzer Bericht über einen kleinen in der Bucht Balget zwischen Tvärminne und Hanko gefundenen Polychaeten, der offenbar keiner der bisher aus Finnland bekannten Arten angehörte. Nach dem Vf. handelt es sich von *Pygospio elegans* Claparède.

**Rensch Bernhard** - Die Molluskenfauna von Pulu Weh und ihre zoogeographischen Beziehungen. (Aus den Ergebnissen der Sunda-Expedition Rensch) [*Fauna molluscorum in* Pulu Weh *eiusque correlationes zoogeographicæ*]. 11 Abb., Zool. Anz., CII, 7/8, 195-208. Leipzig (1933). **b - 587**

Der Vf. berichtet über 20 Arten von der Insel Pulu Weh in der Nähe von Sumatra.

**Russell F. S.** - On the Occurrence of the Siphonophores *Muggiæa atlantica* Cunningham and *Muggiæa kochi* (Will) in the English Channel [*Muggiæa atlantica* Cunningham *et M. kochi* (Will.) *in Freto Britannico*]. Journ. Mar. Biol. Assoc., XIX, 2, 555-558. Plymouth (1934). **b - 588**

Examination of all the collections made since the year 1913. It seems possible that both species are essentially inhabitants of less contamined coastal waters. When occurring in British waters they generally first appear towards the end of the summer and often continue on through the autumn to the January or February in the following year.

**Schuh R. E.** - On the Distribution of *Sorocarpus* [*De distributione generis « Sorocarpus »*]. Rhodora, XXXV, 347. (1933). **b - 589**

This genus is distributed on the east coast of North America, on the coasts of the British Isles, Heligoland and in the Baltic Sea.

**Schuh R. E.** - On *Polysiphonia fibrillosa* in New England [*De Polysiphonia fibrillosa in Anglia Nova*]. Rhodora, XXXV, 391-392. (1933) **b - 590**

Geographical distribution of this species, which at south of Cape Cod, where it is very common, must be considered an immigrant from the west coast of Europe.

**Seurat L. G.** - Présence de l'*Astrospartus arborescens* (Rondelet) dans la Baie de Castiglione [*Astrospartus arborescens in baja* Castiglione]. 13 fig., 1 pl., Bull. Trav. Stat. Aquicult. et Pêche Castiglione 1932, 2, 135-142. Alger (1934). **b - 591**

Cette découverte vient compléter les données concernant

la distribution de cet échinoderme sur le plateau continental (étage côtier) de l'Afrique mineure.

Travaux d'auteurs précédents où cette espèce a été mentionnée pour la Méditerranée et la Mer Tyrrhénienne. Synonymie. Bibliographie.

**Stechow E.** - Vorkommen eines nordischen Hydroiden, *Corymorpha Sarsi* Steenstrup, im Schwarzen Meer [*Corymorpha Sarsi* Steenstrup, *species nordica in Ponto Euxino reperta*]. Zool. Anz., CVII, 197-198. Leipzig (1934). **b - 592**

**Steuer A.** - Zur planmässigen Erforschung der geographischen Verbreitung des Haliplanktons, besonders der Copepoden [*Inquisitiones methodicæ in distributionem geographicam haliplanctonicam. Agitur particulatim de Copepodis*]. Zoogeographica, I. (1933). **b - 593**

Der Vf. unterscheidet für das Hochseeplankton die folgenden Gebiete: das arktische, das gemässigte, das subtropische, das tropische, das südlich subtropische und das antarktische, und macht weiter eine Differenzierung in eine atlantische und pacifische Region, was an verschiedenen Beispielen und an Hand begleitender Verbreitungskarten gezeigt wird. Nötige Bedingungen für die weitere Entwicklung der Tiergeographie, Entwurf von der Durchführung von Küstenexpeditionen für Untersuchungen.

**Tattersall W. M.** - A Fish New to the British Fauna [*Piscis quidam novus in fauna anglica*]. Ann. and Magaz. Natur. Hist. (10), XIII, 75. London (1934). **b - 594**

*Ruvettus pretiosus* has been collected for the first time in British waters in September 1933. Its geographical distribution, its size.

**Thomsen Ellen** - *Sepia officinalis* L. Found Alive in Danish Waters [*S. o.* L. *viva reperta in aquis Danicis*]. Vidensk. Medd. Dansk naturhist. Foren i. København, 215-218. København (1933-1934). **b - 595**

*Sepia officinalis* was found in Danish waters south of Skagen for the first time on June 20th 1933. Measurements. Other forms of *Sepia* occurring in the North Sea.

**Topsent E.** - Étude d'Eponges littorales du Golfe de Gabès [*Studium de Spongis litoreis in Sinu* Gabès]. 3 fig., Bull. Trav. Stat. Aquicult. et Pêche Castiglione 1932, 2, 69-102. Alger (1934). **b - 596**

La liste des espèces recueillies par M. le Prof. Seurat contient les groupes suivants: Dictyocératines, Monaxonellides, Tétractinellides, Calcaires. Elle apporte une légère contribution à la connaissance des Eponges de la Méditerranée. En particulier, elle mérite une certaine attention du fait que la plupart de ses éléments ont été obtenus à marée basse, notamment dans les prairies de Posidonies et de Caulerpes et dans les chenaux de la Mer des Biban.

**Whitley G. P.** - Marine Zoogeographical Regions of Australasia [*Regiones marinae zoogeographicae Australienses*]. Austral. Natural., VIII, 166-167. Sydney (1932). **b - 597**

**Wulff A.** - Ein Zitterrochen aus der Nordsee [*Torpedo marmorata Maris Nordici*]. 1 Abb., Fischmarkt, I, 1, 17-18. Cuxhaven (1933). **b - 598**

Bericht über zwei Funde von Zitterrochen (*Torpedo marmorata*) im Herbst 1932 in der Nähe von Helgoland und im Herbst 1921 in den dänischen Gewässern bei Frederikshavn, welche die einzigen Angaben über das Vorkommen dieses Fisches in den nördlichen Gewässern zu sein scheinen. Unterscheidung von der benachbarten Form, *T. nobiliana*. Beschreibung einer Besonderheit dieser Formen, eines paarigen elektrischen Organs.

**G. A. S.** - Distribution of Marine Animals and the History of the Continents [*De distributione animalium marinorum et historia terrarum continentium*]. Nature, CXXXIV, 3392, 706. London (1934). **b - 599**

Paper read before Section D (Zoology) of the British Association meeting in Aberdeen. Some reflexions as to the presence of former sea connexions linking up the Atlantic, the Pacific and the Indian Oceans on the basis of a homogen fauna, the Primnoids, found on both sides of Central America and in the Indian Ocean and European Atlantic. The remarkably scattered distribution of the Primnoids sustains the theory of Wegener of the splitting up of a southern continental mass later drifted away in different parts.

## Migrationes.

**Alm Gunnar** - Salmon in the Baltic Precincts [*Salmo in propinquitatibus maris Baltici*]. 18 figs., 33 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, XCII, 1-63. Copenhague (1934). **b - 600**

After some introductory remarks on preceding investigations and proposals on research work the A. here gives a report on his investigations undertaken on scales obtained from 5.249 salmon of which 2.597 are river fish and 2.652 sea fish: I. Age; II. Fishing returns; III. Salmon markings and hook-finds in the Baltic; IV. The Salmon's occurrence and migrations in the Baltic. There is also a proposal to a convention (in German) between 9 Baltic States as to a regulation of the Salmon fishery in the Baltic.

**Beebe William & Tee-Van John** - American Fresh-water Eels in Bermuda [*Anguillæ americanæ ex aqua dulci in Bermudis*]. 1 fig., Bull. New York Zool. Soc., XXXVII, 6, 181-183. New York (1934). **b - 601**

Referring to some records of fresh-water Eels in brackish ponds in Bermuda the AA. here make some reflections as to the migrations and stays of the American and European Eels.

**Berg L. S.** - Summer and Winter Races in Anadromous Fishes [*Pisces anadromi eorumque stirpes hiemales et æstivæ*] (In Russ., Engl. Rés.). Bull. Acad. U. R. S. S., Cl. Sc. Mathém. & Natur., 5, 711-732. Léningrad (1934). **b - 602**

The author claims that among many anadromous Fishes - *Salmonidae, Acipenseridae, Cyprinidae, Percidae*, and *Petromyzontidae* - summer and winter races occur, analogous to those known in crops. He describes these two different races in *Oncorhynchus keta, Salmo salar, S. salar brevipes, Oncorhynchus tschawytscha, Salmo trutta, S. trutta caspicus, Acipenser stellatus, A. guldenstädti, Huso huso, Acipenser ruthenus, Lampetra fluviatilis, Rutilus rutilus caspicus, R. frisii, Barbus brachycephalus, Chalcalburnus chalcoides, Pelecus cultratus, Lucioperca lucioperca.*

**Bjerkan Paul** - Marking Experiments of Plaice (*Pleuronectes platessa*) [*Pleuronectes platessa. Quæstio de marchaturis ad experimentum*]. 3 figs., Rapp. Pr.-Verb. Cons. Expl. Mer. (Scient. Rep. North-Eastern Area Comm. 1934), LXXXVIII, 1-6. Copenhague (1934). **b - 603**

From these experiments undertaken principally during 1931 and 1932 at several localities along the Norwegian coast as is shown in maps indicating the distances passed by the marked Fishes it is seen that the migration generally takes place between the different parts of the coast and later on farther out to sea. It has also been found that there is a distinct difference in the habits of plaice found at the different localities.

**Bowman Alexander** - Marking Experiments on Lemon Soles in Scottish Waters during the Period 1919-1931 (inclusive) [*De marchatione speciei « Pleuronectes microcephalus » in aquis Scotis ab a. 1919 ad a. 1931 inclusum*]. 4 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, 3-ème partie, Appendices 1933-1934, LXXXIX, 53-56. Copenhague (1934). **b - 604**

Methods of recapture and ports of landing. Spawning. Migrations : season, rate, non-migrants. Mean rate of recapture.

**Clarke George L.** - Further Observations on the Diurnal Migration of Copepods in the Gulf of Maine [*Observationes ulteriores de migratione diurna Copepodorum in Sinu* Maine *nomine*]. 6 figs., 4 tabl., Biol. Bull., LXVII, 3, 432-455. Lancaster, Pa. (1934). **b - 605**

Observations were made on the diurnal migration of Copepods in relation to submarine irradiation and other external factors. The variation with depth of the light intensity, the temperature, chemical constituents, and the phytoplankton was observed. The migration of the Copepods was found to be more closely correlated with the changes in the submarine irradiation than with changes in the hydrographic conditions or in the phytoplankton.

**Clarke George L.** - The Diurnal Migration of Copepods in St. Georges Harbor, Bermuda [*De migratione diurna Copepodorum in Sinu* St. Georges]. 1 table, Biol. Bull., LXVII, 3, 456-460. Lancaster, Pa. (1934). **b - 606**

To sum up, the Copepods *Calanopia americana* and *Acartia spinata* were found to exist in St. Georges Harbor in large number near the surface and in the deeper strata at night and to migrate to the bottom at sunrise, the former species apparently burrowing into the mud. The diurnal migration appears to be correlated primarily] with changes in light intensity during the course of the day and is partly under the control of other environmental factors.

**Clarke George L.** - Diurnal Migration of Zoöplankton in Relation to the Penetration of Light, and Studies of the Physiology of Copepods [*De migratione diurna zooplanctonica pro lucis penetratione et studiis physiologicis de Copepodis*]. Woods Hole Oceanogr. Instit., Rep. 1933, App., 20-21. Woods Hole, Mass. (1934). **b - 607**

Some results of the investigation of the diurnal migration of Copepods made from the « Atlantis » using five simultaneous closing nets at a 54-hour station in the deep water Gulf of Maine and at a 24-hour station on Georges Bank. Measurements of the penetration of the blue component of the daylight into the sea by means of photo-electric photometers. Determination of the vertical distribution of the phytoplankton and measurements of additional factors. Development in the laboratory of a suitable technique for raising copepod cultures. Qualitative and quantitative analysis of the plankton catches.

**Clemens W. A. & Clemens L. S.** - Statistical Study of Sockeye Salmon Runs [*Oncorhynchus nerka* Walb. *Studium statisticum eius migrationum*]. Ann. Rep. Biol. Board Canada, 1933, 74. Ottawa (1934). **b - 608**

Results of a statistical study of the annual collection of scales and length, weight, sex data from random samplings of the runs of sockeye salmon to the Fraser, Skeena and Nass Rivers and to Rivers inlet in 1932.

**Davidson Frederick A.** - The Homing Instinct and Age at Maturity of Pink Salmon (*Oncorhynchus gorbuscha*) [*De instinctu Salmonum qui locum suæ originis repetunt. Agitur etiam de ætate maturitatis*]. 10 figs., Bull. Bur. Fish., XLVIII, 15, 1-39. Washington, D. C. (1934). **b - 609**

Marking experiments by removing two fins of the fry of *Oncorhynchus gorbuscha* have been carried out at the Federal hatchery on the Duckabush River in the State of Washington and one in Snake Creek at Olive Cove, Alaska. From the results obtained it is conceivable that the extent to which the pink salmon return of their parent streams to spawn may be dependent upon the proximity of other pink salmon streams in the vicinity. It may also be assumed with relative certainty that the pink salmon consistently mature at the close of their second year of life.

**Elsey C. R.** - On the Migration of Oyster Larvae [*De larvis ostreæ earumque migratione*]. Ann. Rep. Biol. Board Canada, 1933, 77-78. Ottawa (1934). **b - 610**

Account of a test provided in Ladysmith Harbour in 1932 in order to study the distribution and the migration of oyster larvae ; coincidence between heaviest spatting and the paths of maximum current velocity.

**Fage Louis** - Migrations verticales périodiques des animaux benthiques littoraux [*Animalia benthonica litorea eorumque migrationes verticales periodicæ*]. 7 figs., Rapp. Pr.-Verb. Cons. Expl. Mer, LXXXV, Append., 60-69. Copenhague (1933). **b - 611**

Discussion des résultats de pêches pélagiques faites pendant plusieurs années à Banyuls-sur-Mer qui ont fait l'objet de publications spéciales sur les Annélides, les Pycnogonides et les Crustacés. Ces pêches qui se faisaient la nuit, ont procuré une grande majorité d'espèces franchement benthiques et qui se prennent de jour sur le fond. Le rythme nycthéméral des espèces benthiques littorales étudiées, lié au fonctionnement du système nerveux, est déterminé par les réactions à l'éclairement ; les transformations internes liées au développement des gonades peut modifier l'allure de ce rythme ; la crise de maturation sexuelle expliquerait la subordination de ce rythme à un rythme saisonnier à longues périodes. La prédominance si fréquente des mâles dans le plancton serait causée par le métabolisme propre à chaque sexe et, accessoirement, par le dimorphisme qui en résulte.

**Foerster R. E.** - The Return of Adult Sockeye Salmon from a Known Escapement [*Oncorhynchus nerka* Walb. *Quæstio de eius reditu a quodam noto refugio*]. 1 table, Ann. Rep. Biol. Board Canada, 1932, 86-87. Ottawa (1933). **b - 612**

Data on the returns of marked seaward migrating Salmons by removal of certain fins, carried on at Cultus Lake for a number of years. The recoveries were : Puget Sound, Strait of Juan de Fuca, Bellingham and Fraser River.

**Foerster R. E.** - Downstream Migration [*Oncorhynchus nerka* Walb. *De migratione secundum flumen*]. 1 table, Ann. Rep. Biol. Board Canada, 1933, 79-80. Ottawa (1934). **b - 613**

Results of the regular annual count of downstream migrating sockeye salmon from Cultus Lake made during the spring of 1933 in order to determine the number of survivors from the propagation of 1931-32, combined natural and artificial.

**Foerster R. E.** - The Recovery of Marked Sockeye Salmon [*Oncorhynchus nerka* Walb. *Quæstio de iteratis capturis*]. 1 table, Ann. Rep. Biol. Board Canada, 1933, 80-81. Ottawa (1934). **b - 614**

Report of the returns obtained in the commercial fishery after the marking of young salmon in Cultus Lake with the purpose to establish, firstly, the reliability of the « parent stream » theory, and, secondly, the percentage return of adult sockeye from a known escapement of seaward migrants. Similar marking was done at Eagle River on the Shuswap system to obtain data relative to the success of restocking upper Fraser spawning areas with eggs from the lower Fraser. An account is given of the recoveries made both in the fishing areas and at the spawning grounds.

**Foerster R. E. & Pritchard A. D.** - Report on the Marking of Pink Salmon Fingerlings at Cultus Lake in 1932 [*Relatio de marchatura larvarum ad speciem « Oncorhynchus gorbuscha » pertinentium in lacu* Cultus *a. 1932*]. 1 table, Ann. Rep. Biol. Board Canada, 1933, 83-84. Ottawa (1934). **b - 615**

Results of the marking and release of a number of fingerlings reared from pink salmon eggs. Three noteworthy points observed in connection with returns, regarding the life-history of salmon, their migration and the « parent stream » theory.

**Huntsman A. G.** - Herring and Water Movements [*Aquarum motus eorumque influentia in aringum*]. 4 figs., 2 tabl., James Johnstone Mem. Vol., 81-96. Liverpool (1934). **b - 616**

Study of the movement of the Herring (*Clupea harengus*) in the Passamaquoddy region of southern New Brunswick, during the period in his life history from the stage of metamorphosis up to the stage of approaching sexual maturity, on hand of capture of herring in the stationary weirs. Temperature, feeding, light, enemies, and tidal currents do not seem to be directly effective in moving the fish any considerable distances. Direct observation in a cove or small inlet shows that the herring is affected in distribution by differential movements of the waters layers, set up by fresh water inflow.

**Järvi T. H.** - Angaben über das Alter der in Finnland gefangenen Lachse vor der Auswanderung, nebst einigen Bemerkungen über ihre Wanderungen [*De ætate aliquorum Salmonum in Finlandia captorum ante exitum. Adiunguntur observationes de eorum migrationibus*]. 2 Abb., Rapp. Pr.-Verb. Cons. Expl. Mer, XCI, 11-13. Copenhague (1934). **b - 617**

Unter Hinweisung auf den Vortrag von Dr. Alm über die Biologie des Ostsee- Lachses (Rapp. Pr.-Verb., XCII) zeigt der Vf. an Hand reichen Materiales aus den finnländischen Flüssen, dass zwischen den nördlichen und den südlichen Lachsen in Bezug auf das Alter vor der Auswanderung in die Dauer ihres Aufenthaltes im Meere sowie die Wachstumsgeschwindigkeit ein grosser Unterschied vorhanden ist. Vermutung zwei verschiedener Wanderungsgebiete, eines im Westen (dem Bottn. Meerbusen und den südl. Teil der Ostsee), und eines im Osten (dem Finnischen und Rigaischen Meerbusen); ihr Zusammenhang mit den Strömungen des Oberflächenwassers.

**McC. Mottley C.** - The Spawning Run of Kamloops Trout at Paul Creek [*De migratione gamica speciei « Salmo kamloops » in* Paul Creek]. 1 table, Ann. Rep. Biol. Board Canada, 1933, 88. Ottawa (1934). **b - 618**

1. Time and duration of the run. 2. The size of the run. 3. Proportions of the sexes. 4. Age composition of the run. 5. Frequency of spawning. 6. General results.

**McC. Mottley C.** - The Factors Influencing the Spawning Migration of Rainbow Trout [*Factores qui influunt in migrationem generandi causa, speciei « Salmo irideus »*]. Ann. Rep. Biol. Board Canada, 1933, 90. Ottawa (1934). **b - 619**

Account of an investigation on the factors which influence the spawning migration of the Kamloops trout at Paul Lake with particular regard to the part played by temperature.

**McKenzie R. A.** - Cod Tagging Along Outer Coast of Nova Scotia [*De marchatione speciei « Gadus morrhua »*]. Ann. Rep. Biol. Board Canada, 1933, 27-28. Ottawa (1934). **b - 620**

Account and illustration of the returns from preliminary and exploratory tagging of the cod along the outer coast of Nova Scotia.

**Pritchard A. L.** - The Tagging of Spring Salmon in British Columbia in 1929 and 1930 [*De marchatione speciei « Oncorhynchus tschawytscha » in Columbia Britannica a. 1929 et 1930*]. 1 table, Ann. Rep. Biol. Board Canada, 1932, 95-96. Ottawa (1933). **b - 621**

Reports, given in a table, of spring salmon tagging made in order to establish their principal routes of migration.

**Pritchard A. L.** - The Natural Run of Pink Salmon (*Oncorhynchus gorbuscha* Walbaum) in Massett Inlet During 1932, with Summary Showing the Efficiency of Natural Propagation [*De migratione naturali speciei « Oncorhynchus gorbuscha »* Walbaum *in* Massett Inlet *a. 1932. Compendium efficacitatem propagationis naturalis ostendens*]. 1 table, Ann. Rep. Biol. Board Canada, 1932, 96-97. Ottawa (1933). **b - 622**

Results and discussion of experiments begun with installation of counting fences in Massett Inlet, Queen Charlotte islands, during the spring 1930. Enumeration of the spawning adults in the fall and count of the down-stream fry migrants in the spring 1931. Examination of the adult run in the fall of 1932. Since all data at present on hand indicate that the pink salmon matures at the end of the second year, observations can be considered as reflecting the complete cycle of development. The results for the cycle are tabulated.

**Pritchard A. L.** - The Return in 1932 from the Marking of Pink Salmon Fry Migrants in 1931 [*De larvis marchatis migrantibus a. 1931 ad speciem « Oncorhynchus gorbuscha » pertinentibus earumque reditu a. 1932*]. Ann. Rep. Biol. Board Canada, 1932, 97-98. Ottawa (1933). **b - 623**

Results of an investigation carried on by means of removing the adipose fins from 185.000 salmon fry during the down-stream migration at Massett Inlet, in the spring of 1931 in order to establish definitely at what age this fish would reach maturity and whether they would return when mature to spawn in the same area. It is shown that there is a strong tendency on the part of the pink salmon in this locality to return to their native spawning area.

**Pritchard A. L.** - Natural Run of Pink Salmon [*Oncorhynchus gorbuscha* (Walbaum)] in Massett Inlet [*De migratione naturali speciei « Oncorhynchus gorbuscha »* (Walbaum) *in* Massett Inlet]. Ann. Rep. Biol. Board Canada, 1933, 92. Ottawa (1934). **b - 624**

Account of investigation of the natural runs of pink salmon commenced with the installation of adult and fry counting fences in McClinton creek, Massett inlet, in the summer of 1930. During the autumn of 1932 another adult migration was examined and in the spring of 1933 the fry resulting from there were counted. The results of this investigation are reported in the present paper.

**Pritchard A. L.** Return of Marked Pink Salmon in 1933 [*« Oncorhynchus gorbuscha » anno 1933 marchatus iterum captatus*]. 1 table, Ann. Rep. Biol. Board Canada, 1933, 94. Ottawa (1934). **b - 625**

Summary of recoveries of the release in the spring of 1931 of the fry resulting from the transfer of eggs from the Tlell River to McClinton Creek on the Queen Charlotte Islands and marked by the removal of the adipose and left ventral fins to ensure identification.

**Pritchard A. L.** - Pacific Salmon Migration: The Tagging of the Coho Salmon in British Columbia in 1929 and 1930 [*De migratione salmonis oceani Pacifici : De marchatione speciei « Oncorhyn-*

*chus gorbuscha » in Columbia Britannica a. 1929 et 1930*]. 4 figs., 8 tabl., Biol. Board Canada, Bull., XL, 1-24. Ottawa (1934). **b - 626**

The experiments undertaken are expressed in tables giving localities and dates of tagging and recaptures as well as weight of the fish when tagged. The distances traversed from the time of tagging to recapture have been reported considerably smaller than most of those for the spring salmon but greater than those for the pinks and the chums. As the location of the tagging bases moved southward the returns from the northern districts decreased and those from the southern increased. Although these experiments indicate that the runs of coho are mainly local, other reports have demonstrated that in many cases, migrations do cross international boundaries.

**Pritchard A. L.** - Pacific Salmon Migration: The Tagging of the Spring Salmon in British Columbia in 1929 and 1930 [*De migrationibus Salmonis Oceani Pacifici. De marchatione speciei « Oncorhynchus tschawytscha » in Columbia Britannica a. 1929 et 1930*]. 3 figs., 9 tabl., Biol. Board Canada Bull., XLI, 1-31. Ottawa (1934). **b - 627**

Lists, maps and tables concerning numbers tagged and recaptured with indication of time, localities, weights at tagging and recapture, percentage of recapture etc. General discussion of results obtained and of Spring Salmon migration.

**Sylvest E.** - Les causes des migrations de l'anguille, jeune et adulte [*Causæ migrationum anguillæ juvenis et adultæ*]. Bull. Franç. de Piscicult., juin (1933). **b - 628**

**Tåning Vedel Å.** - Marking Experiments with Plaice in East Icelandic Waters [*Pleuronectes. Marchationes ad experimentum perfectæ in Islandia orientali*]. 2 figs., 12 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer (Scient. Rep. North-Western Area Comm. 1930-1932), LXXXVI, 1-13. Copenhague (1934). **b - 629**

Account of the results obtained from the marking experiments of 1931 compared with those of 1905. Migrations: Direction, length, velocity, season. Age and size of plaice when migrating from the East coast. Rate of growth in length. Intensity of fishery.

**Tåning Vedel Å.** - Survey of Long Distance Migrations of Cod in the North Western Atlantic according to Marking Experiments [*Inspectio migrationum maximo spatio in Atlanticum nord.-occid. speciei « Gadus morrhua » per marchationem*]. 3 figs., 4 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, 3-ème partie, Appendices, 1933-1934, LXXXIX, 5-11. Copenhague (1934). **b - 630**

Short résumé of the results obtained from the marking experiments at the Faroes, Iceland and Greenland during recent years expressed in tables and maps. Necessity of extending the marking experiments into the entire area of the North Atlantic in order to get a clearer view of the connection between migration and fluctuations.

**Templeman W.** - Migrations of the Lobster [*De migrationibus homari*]. Ann. Rep. Biol. Board Canada, 1932, 40-41. Ottawa (1933). **b - 631**

Results of the observations on the returns from the 950 new-shell Lobsters tagged at the Magdalen Island in 1931 and 450 Lobsters tagged in Malpeque Bay.

**Vladykov V. D.** - Seasonal Distribution of the Haddock of the Halifax Area [*De distributione speciei « Gadus æglefinus » pro anni tempore per regionem* Halifax]. Ann. Rep. Biol. Board Canada, 1932, 41. Ottawa (1933). **b - 632**

(1) Spring (spawning) run, (2) Summer run, and (3) Fall-winter run.

**White H. C.** - Observations on Atlantic Salmon in Apple River, N. S. [*Observationes circa salmonem atlanticum in flumine* Apple]. Ann. Rep. Biol. Board Canada, 1932, 42. Ottawa (1933). **b - 633**

Observations on a native stock of Salmons in natural conditions (1) Observations on smolts, (2) utilization of the Apple River by the salmon for spawning, (3) results of tagging of salmon.

**White H. C.** - A Spawning Migration of Salmon in E. Apple River [*De migratione gamica salmonis in flumen* Apple *orient.*]. Ann. Rep. Biol. Board Canada, 1933, 41. Ottawa (1934). **b - 634**

New observations on the run of salmon in the East Apple river which represent an evidence in substantiation of the theory advanced that the presence of salmon parr in a stream is a factor causing adult salmon to ascend certain streams.

---

**V. E.** - The Marking of Fishes in the Barents Sea [*De marchatione Piscium in Mari* Barents]. (In Russ. & Engl.). Bull. Arct. Inst., 1, 18 & 43. Leningrad (1934). **b - 635**

Marking operations (on 21.897 Fishes) carried out from 1928 to 1932 by the Oceanographic Institute show that the cod migrates in autumn and winter to the Norwegian shores for spawning.

---

**An.** - Whale-Marking in South Georgia [*De marchatione Balænarum in Georgia merid.*]. Nature, CXXXIV, 3390, 599. London (1934). **b - 636**

Short note on the experiments undertaken by the Discovery Committee at the Marine Biological Station in South Georgia. A new method indicated that promises good results.

# PLANCTON ET BENTHOS.

**Aikawa H.** - On the Planktology of Okhotsk Sea in Autumn [*Agitur de plancton maris* Okhotsk *autumno*]. (In Jap., Engl. Rés.). 2 figs., 3 tabl., Bull. Jap. Soc. Scient. Fish., II, 4, 175-182. Tokyo (1933). **b - 637**

Autumnal plankton associations observed in Okhotsk Sea in 1928, '29, and '32 may be referred to three main water masses, viz. 1) Oyazio waters, 2) Tusima current waters and 3) the neritic waters in the northern part of Okhotsk Sea. Constitution and characteristics of these communities.

**Aikawa H.** - On the Quantitative Analysis of Plankton Associations in the Seas Surrounding Japan [*De analysi quantitativa consociationum planctonicarum in maribus prœter Japoniam*] (In Jap., Engl. Rés.). Journ. Imp. Fish. Exp. Stat., 5, 237-272. Tokyo (1934). **b - 638**

**Allen W. E.** - Marine Plankton Diatoms of Lower California in 1931 [*Diatomeœ planctonicœ marinœ in California inferiore a. 1931*]. 1 fig., Bot. Gaz., XCV, 3, 485-492. Chicago, Ill. (1934). **b - 639**

Great abundance of plankton Diatoms was found in surface catches along the coast of Lower California from a locality near Pt. San Eugenio to a locality near Pt. San Lazaro, a distance of more than 100 miles. Greatest productivity appeared near shore. The diatom populations were similar to those of the California coast in respect to component genera and species.

**Bernstein Tamara** - Zooplankton des nördlichen Teiles des Karischen Meeres [*Agitur de zooplancton in parte septentrionali Maris* Kara]. (Russ. Text, Dtsch. Rés.) 14 Abb., 8 Tab., Trans. Arct. Inst., IX, 3-58. Leningrad (1934). **b - 640**

Beobachtungen über das auf den Expeditionen 1930 und 1931 in der nördlichen Hälfte des Karischen Meeres sowie im Gebiet zwischen Franz-Joseph Land und der Insel Wiese gesammelte Material: die ausgeführten Stationen, die zur Planktonsammlung gebrauchten Netze, Anzahl der Formen, welche in den Proben der Schnitte 1931 enthalten waren, mit einem vollständigen Verzeichnis der Zooplankton-Formen des beobachteten Materiales sind auch angegeben. Der Einfluss der Zirkulation des Golfstromwassers im Polarbecken auf die Zusammensetzung des beobachteten Planktons ist besprochen. Von den beschriebenen Arten ist eine Art, *Fritillaria polaris* sp. nov., neu.

**Braarud Trygve** - A Note on the Phytoplankton of the Gulf of Maine in the Summer of 1933 [*Notœ de phytoplancton in Sinu* Maine *œstate 1933*]. 3 tabl., Biol. Bull., LXVII, 1, 76-82. Lancaster, Pa. (1934). **b - 641**

The few observations made by the A. suggest that there exist considerable fluctuations in the composition of the phytoplankton of the waters of the Gulf of Maine and adjacent areas in the summers of different years, perhaps not so much in a purely qualitative respect as in the relative abundance of the various species.

**Braarud Trygve** - Investigations of Phytoplankton [*Inquisitiones in phytoplancton*]. Woods Hole Oceanogr. Instit., Rep. 1933, App., 19. Woods Hole, Mass. (1934). **b - 642**

Results of the examination by means of centrifuging and subsequent counting of about 100 samples of sea water, collected during the work of the International Passamaquoddy Fisheries Commission for quantitative studies of the microplankton of the Bay of Fundy and the Gulf of Maine. Some information on twenty samples from two stations in the Gulf of Maine. Fairly large variations of the quantity of phytoplankton at the same locality from one year to another.

**Clarke George L.** - Diurnal Migration of Plankton in the Gulf of Maine and its Correlation with Changes in Submarine Irradiation [*De migratione planctonica diurna in Sinum* Maine *eiusque correlatione cum variationibus irradiationis submarinœ*]. 5 figs., 6 tabl., Biol. Bull., LXV, 3, 402-436. Lancaster, Pa. (1933). **b - 643**

The vertical distribution is studied in particular for the following species: *Centropages typicus*, *Calanus finmarchicus* and *Metridia lucens*. The adult females of *Metridia* exhibited the most marked diurnal migration, the level of maximum abundance rising in the afternoon and during the night and falling in the morning. These movements were found to coincide to a considerable extent with changes in submarine irradiation. This investigation confirms the idea that light is the most important factor controlling diurnal migration.

**Clarke George L.** - Vertical Distribution and Vertical Migrations of Plankton, in the Atlantic Basin, in Relation to Penetration of Light [*De distributione et migrationibus verticalibus planctonicis in bacinum atlanticum earumque correlatione cum lucis penetratione*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 32. Woods Hole, Mass. (1933). **b - 644**

Brief account of collections made to determine the vertical distribution of zooplankton at 10 « Atlantis » stations, the vertical distribution of phytoplankton, determined at one station, and of the results of measurements of the intensity of daylight falling on deck and penetrating to depths down to 175 meters beneath the sea surface, made at 13 stations.

**Clarke George L.** - Vertical Distribution and Diurnal Migrations of Plankton in Relation to the Penetration of Light [*De distributione et migrationibus diurnis planctonicis earumque correlatione cum lucis penetratione*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 40-41. Woods Hole, Mass. (1933). **b - 645**

Information as to the methods of investigation and analysis used during the study of diurnal migration and vertical distribution of plankton in the Gulf of Maine.

**Clarke G. L. & Oster R. H.** - The Penetration of the Blue and Red Components of Daylight into Atlantic Coastal Waters and its Relation to Phytoplankton Metabolism [*Agitur de penetratione componentium ceruleorum et rubrorum lucis diurnœ in aquas litoreas Oceani Atlantici eiusque correlatione cum metabolismo phytoplanctonico*]. 6 figs., 4 tabl., Biol. Bull., LXVII, 1, 59-75. Lancaster, Pa. (1934). **b - 646**

Apparatus and methods used in photoelectric measurements of blue and red submarine irradiation at two stations in the Gulf of Maine and at four localities in the Woods Hole region. Five bodies of water are considered according to their decreasing transparency to both blue and red light. The ratios of the transmissive exponents for red light to those for blue light in each locality vary from 2.9 to 1.2, the higher values being characteristic of clearer water.

Note on the metabolism of the phytoplankton. Vertical distribution of the phytoplankton in the Gulf of Maine in relation to the penetration of light.

**Collin G., Drummond J. C., Hilditch T. P. & Gunther E. R.** - Observations on the Fatty Constituents of Marine Plankton. II. General Character of the Plankton Oils [*Observationes circa constituentes crassos plancton marini. II. Caracteres generales oleorum planctonicorum*]. 3 tabl., Journ. Exp. Biol., XI, 2, 198-202. London (1934). **b - 647**

Extraction. General character of the plankton oils. Fatty acids. Non-saponifiable constituents of zooplankton oil.

**Cooper L. H. N.** - The Variation of Excess Base with Depth in the English Channel with Reference to the Seasonal Consumption of Calcium by Plankton [*Agitur de basis excessus variationibus pro Freti Britannici profunditate quoad calcii consumptionem per plancton pro anni tempore*]. 3 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 747-754. Plymouth (1934). **b - 648**

In the English Channel has been established by a statistical method a small difference in specific alcalinity between the surface and bottom waters during the summer. This is attributed to a removal of calcium from the surface waters by plankton. An attempt has been made to calculate the production of calcareous plankton.

**Cooper L. H. N.** - The Determination of Phosphorus and Nitrogen in Plankton [*Phosphori et azoti in plancton determinatio*]. 2 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 755-759. Plymouth (1934). **b - 649**

Phosphorus in plankton has been determined by digestion with sulphuric acid and perhydrol followed by colorimetric determination. Nitrogen has been readily determined by the micro-Kjeldahl method of Parnas and Wagner.

**Cupp Easter E.** - Analysis of Marine Plankton Diatom Collections Taken from the Canal Zone to California during March, 1933 [*Diatomeæ marinæ planctonicæ. Analysis earum collectionum captarum in regione a* Canal Zone *ad Californiam mense Martio 1933*]. 1 fig., 1 table, Trans. Amer. Microscop. Soc., LIII, 1, 21-29. Lancaster, Pa. (1934). **b - 650**

Forty-two surface catches of Diatoms and Dinoflagellates, taken in this region, were examined. *Chaetoceros* sp., *Ch. curvisetus* and *Ch. decipiens* were the most abundant species with the group *Chaetoceros* species far in the lead.

Most of the species and genera recorded are well represented along the California coast.

No correlation between diatom or dinoflagellate abundance and temperature was evident. The dinoflagellate production was negligible.

**Dakin W. J.** - The Plankton Calendar of the Continental Shelf of the Pacific Coast of Australia at Sydney Compared with that of the Irish Sea [*Kalendarium planctonicum plateæ continentalis ad litora australiensia Oceani Pacifici apud* Sydney, *comparatum cum kalendario planctonico litorum Maris Hiberni*]. 3 figs., James Johnstone Mem. Vol., 164-175. Liverpool (1934). **b - 651**

The first striking feature of the plankton catches made at Sydney was the presence not only of the same genera of plants and animals as in British seas but often of the same species. The second feature to which the A. would call attention here is the demonstration for the first time in the Southern Hemisphere of a plankton curve of production which runs in a manner strikingly similar to that worked out by the Liverpool School for the Irish Sea.

The main interest in these comparisons seems to the A. to lie in their bearing upon the problem of the causation of the plankton rhythm.

**Dakin W. J. & Colefax A.** - The Marine Plankton of the Coastal Waters of New South Wales. I. The Chief Planktonic Forms and their Seasonal Distribution [*Plancton marinum aquarum litorearum in* New South Wales. *I. Præcipuæ formæ planctonicæ earumque distributio pro anni tempore*]. Proc. Linn. Soc. N. S. Wales, LVIII, 186-222. Sydney (1933). **b - 652**

**Davidson V. M.** - The Summer Phytoplankton in the Region of Halifax [*De phytoplancton æstivo tempore in regione* Halifax]. Ann. Rep. Biol. Board Canada, 1932, 22-23. Ottawa (1933). **b - 653**

Results of the study of collections of phytoplankton made with N° 18 net at different stations; quantitative distribution; study of the nannoplankton.

**Drummond J. C. & Gunther E. R.** - Observations on the Fatty Constituents of Marine Plankton. III. The Vitamin A and D Content of Oils derived from Plankton [*De observatis crassis constituentibus planctonicis marinis. III. Vitaminæ A et D quæ in oleis a plancton derivatis continentur*]. 3 tabl., Journ. Exp. Biol., XI, 2, 203-209. London (1934). **b - 654**

The A. has examined for vitamin A and vitamin D the oils separated from phytoplankton and zooplankton respectively, in view of the relations which are believed to exist between the vitamin content of the diet and that of the fats stored in an animal's body.

**Fage L.** - Pêches planctoniques à la lumière, effectuées à Banyuls-sur-Mer et à Concarneau. III. Crustacés [*Piscationes planctonicæ, lucis auxilio peractæ in* Banyuls-sur-mer *et in* Concarneau. *III. Crustacea*]. 14 fig., Arch. Zool. Exp. et Gén., LXXVI, 3, 105-248. Paris (1933). **b - 655**

**Fasmer H.** - The Distribution of the Phytoplankton in the Strait of Georgia [*De distributione phytoplanctonica per Georgianum Fretum*]. Ann. Rep. Biol. Board Canada, 1932, 85. Ottawa (1933). **b - 657**

Results of the analysis of samples of water taken in the Strait of Georgia in order to determine and to count the phytoplankton, and to study variations in number and in composition at different depths. An example of similar variations is given.

**Fasmer H.** - Quantitative Plankton Studies in the Strait of Georgia [*Studia planctonica quantitativa in Freto Georgiano*]. Ann. Rep. Biol. Board Canada, 1933, 78-79. Ottawa (1934). **b - 658**

Results of the completed counting and identification of the phytoplankton taken during the oceanographical investigation of the Strait of Georgia in 1932.

**Fish C. J.** - The Biology of Zoöplankton in the Gulf of Maine and Bay of Fundy with Special Reference to Production and Dispersal [*De biologia zooplanctonica in Sinu* Maine *et in Baja* Fundy. *Agitur particulatim de zooplanctonica productione et dispersione*]. Woods Hole Oceanogr. Instit. Rep. 1933, App., 21-22. Woods Hole, Mass. (1934). **b - 659**

Brief account of studies accomplished as a part of an oceanographical program sponsored by the International Passamaquoddy Fisheries Commission, and concerned with: Physical hydrography. Volume of zoöplankton: a) quantitative distribution, and b) annual fluctuation. Biology of zoöplankton: the biology of some species endemic in the Gulf of of Maine.

**Frost N., Lindsay S. T. & Thompson H.** - Plankton. 6 maps, Rep. Newfoundland Fish. Res. Comm., Ann. Rep., II, 2, 47-59. Plymouth (1934). **b - 660**

After some general remarks on the distribution of the plankton in arctic waters and in those of Newfoundland, the authors give an analysis of various groups in the plankton observed, i. e.: *Medusae, Ctenophora*, etc. Worm-like organisms, Crustaceans, *Copelata: Oikopleura vanhöffeni, Fritillaria, O. labradoriensis, O. dioica*. Distribution of cod eggs and larvae in 1933.

**Gardiner A. C.** - Variations in the Amount of Macroplankton by Day and Night [*De macroplancton eiusque variationibus quantitativis pro die nocteque*]. 3 figs., 2 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 559-567. Plymouth (1934). **b - 661**

Observations were made off Liverpool, Nova Scotia, in May, 1932. The common species were *Thysanoëssa raschii, Th. inermis, Sagitta elegans, Calanus finmarchicus* and *C. hyperboreus*. All the above occurred in the collections made during the night in larger numbers than in those in the daytime. No such discrepancy appeared in the case of the fish ova.

**Gemeinhardt K.** - Biologische Sonderuntersuchungen. Lief. 3. Die Silicoflagellaten des Südatlantischen Ozeans [*Inquisitiones biologicæ. Fasc. 3. Silicoflagellata Oceani Atlantici merid.*]. Wiss. Ergebn. Dtsch. Atlant. Exped. a. d. Forsch.-u. Vermessungsschiff « Meteor », 1925-1927, XII, 1, 274-312. Walter de Gruyter. Berlin u. Leipzig (1934). **b - 662**

**Gran H. H.** - Investigation of Phytoplankton [*Inquisitiones in phytoplancton*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 41. Woods Hole, Mass. (1933). **b - 663**

Information of an intensive quantitative survey of the horizontal and vertical distribution of phytoplankton in the parts of the Gulf of Maine, and of Georges Bank visited by the « Atlantis » in August 1932, carried out by the author, as well as on a series of experiments on the influence of soluble organic compounds of iron on cultures of planktonic Diatoms.

**Gunther E. R.** - Observations on the Fatty Constituents of Marine Plankton. I. Biology of the Plankton [*Observationes circa maris crassos constituentes planctonicos. I. Biologia planctonica*]. 3 figs., 13 tabl., Journ. Exp. Biol., XI, 2, 173-197. London (1934). **b - 664**

Collections of phyto- and zooplankton made off the Isle of Man were examined for vitamin content, and for chemical and biological characteristics. The important species entering into the composition of the plankton are noted and a new method of estimating plankton catches is described.

The works of preceding investigators on the subject under consideration.

**Hart T. John** - On the Phytoplankton of the South-West Atlantic and the Bellingshausen Sea, 1929-31 [*Phytoplancton Oceani Atlantici sud-occid. et Maris* Bellingshausen, *a. 1929-31*]. Discovery Rep., (Govmt. Depend. Falkland Isls.), VIII, 1-268. Univ. Press. Cambridge (1934). **b - 665**

Methods and instruments. Different sections of the different plankton types. Necessary conditions for the production of plankton, factors as currents, ice, weather, light etc. In an appendice the plankton production of the Ost-Cumberlandbay (South Georgia) and the causes of its scarcity are dealt with.

**Harvey H. W.** - Annual Variation of Planktonic Vegetation, 1933 [*De variationibus annuis vegetationis planctonicæ a. 1933*]. 5 figs., 1 table, Journ. Mar. Biol. Assoc., XIX, 2, 775-792. Plymouth (1934). **b - 666**

Observations were made at positions off Plymouth throughout the year 1933. The spring diatom outburst. The first outburst of larvae. The outburst of *Rhizosolenia alata* in May and of *R. stolterfothii* in June. The August scarcity. The autumn and winter conditions. The inshore station.

**Hessle Chr. & Vallin Sten** - Undersökningar över plankton och dess växlingar i Oestersjön under åren 1925-1927. [*De inquisitionibus in plancton eiusque variationibus in Baltico a. 1925-1927*] (Engl. Rés.). 42 figs., Appendix with 24 tabl. and 3 maps on pl., Svenska Hydrogr. Biol. Komm. Skr., Ny ser.: Biol., I, 5, 1-132. Stockholm (1934). **b - 667**

I. The extent and methods of the investigations. II. Topography and hydrography. III. Phytoplankton. IV. The different species of zooplankton. V. The origin and distribution of the Baltic plankton. VI. The composition of plankton in the different parts of the Baltic. VII. Comparison between the plankton production during the years 1925, 1926 and 1927. VIII. Herring fishery and plankton production in the Baltic. Literature.

**Issel Raffaele** - Materiali per la conoscenza delle caratteristiche locali e delle variazioni a lungo periodo nel plancton mediterraneo [*Res collectæ ad cognoscendas præcipuitates loci, variationesque maximo spatio temporis, in plancton Maris Mediterranei*]. (Ricerche fatte a Genova - S. Giuliano), Boll. Mus. Labor. Zool. Anat. Comp. R. Univ. Genova, XIII, 73, 3-14. Genova (1933). **b - 668**

Descrizione sommaria delle variazioni constatate nel microplancton di Genova, tra il 1915 e il 1933. Le invasioni in massa di *Chaetoceros rostratus* risulterebbero comuni a tutto il Mediterraneo, ma solo dal 1923 in poi. Fra Genova e il Golfo interno di Napoli si notano differenze locali caratteristiche. Vien segnalato l'effetto di anormali piovosità sulla produzione invernale di *Thalassiothrix*.

**Jeffers G. W. & Jeffers A. M.** - The Distribution of Zooplankton in Passamaquoddy Bay [*De distributione zooplanctonica per Bajam* Passamaquoddy]. Ann. Rep. Biol. Board Canada, 1933, 23-24. Ottawa (1934). **b - 669**

Horizontal distribution of zooplankton: results of observations on about 40 stations both in the passages and inside and outside the passages in Passamaquoddy Bay. Vertical distribution of zooplankton: results of two series of horizontal tows of ten-minute duration made at various depths.

**Kearney C. E.** - The Animal Plankton of the Halifax Area [*Zooplancton in regione* Halifax]. Ann. Rep. Biol. Board Canada, 1932, 26. Ottawa (1933). **b - 670**

Important position of the macroplankton in the metabolism of the sea. Comparative observations on tows taken monthly in various points off the southeast coast of Nova Scotia. *Calanus finmarchicus*, the dominant species in the plankton.

**Kearney C. E.** - Animal Plankton of the Halifax Region [*Zooplancton in regione* Halifax]. Ann. Rep. Biol. Board Canada, 1933, 24-25. Ottawa (1934). **b - 671**

Account of a quantitative comparison of tows taken off the Nova Scotia coast in the Halifax area during May, June, and July. Some information as to the occurrence of *Calanus finmarchicus*, *C. hyperboreus*, and *Sagitta elegans* in the area under consideration.

**Kokubo Seiji & Tamura Tadashi** - On the Seasonal and Vertical Distribution of the Plankton of Aomori Bay [*De distributione planctonica verticali pro anni tempore per Bajam* Aomori]. 31 figs., 31 tabl., Sc. Rep. Tôhoku Imp. Univ., Fourth Ser., Biol., VIII, 4, 297-333. Sendai, Japan (1934). **b - 672**

Hydrographical conditions: temperature, specific gravity, dissolved oxygen; change of pH; colour and transparency of sea water. Results of observation. General remarks: seasonal change in quantity; change of vertical distribution; dominating species; relation of plankton to hydrographical conditions.

**Künne C.** - Ueber die Leptomedusen *Helgicirrha Schulzii* Hartlaub und *Eirene viridula* (Péron und Lesueur). Zool. Anz., CVI, 27-34. Leipzig (1934). **b - 673**

**Lebour M. V.** - Plankton. - School. Sc. Rev., XV, 58. London (1933). **b - 674**

**Mackintosh N. A.** - Distribution of the Macroplankton in the Atlantic Sector of the Antarctis [*Macroplancton. De eius distributione per zonam atlanticam Oceani Antarctici*]. Discovery Rep. (Govmt. Depend. Falkland Isls.), IX, 65-160, Univ. Press. Cambridge (1934). **b - 675**

The conical stramin net used. The species identified. Diurnal variations. Categories of the relative abundance of species according to the average number per haul. Distribution and abundance of all identified species. Plankton communities. Connection between macroplankton and the distribution of Whales.

**Oster Robert H.** - Penetration of Red Light into the Sea and Its Relation to the Phytoplankton Population [*De lucis rubræ penetratione in mare eiusque correlatione cum fauna et flora phytoplanctonica*]. Woods Hole Oceanogr. Instit., Rep. 1933, App., 26-27. Woods Hole, Mass. (1934). **b - 676**

Results of the measurements of the penetration of the red light in the sea-water by means of the photo-electric method of Poole and Atkins. Attempt has been made to determine the possible relation between the intensity of the red light and the population density of phytoplankton on hand of samples of phytoplankton collected at different depths. Some results of the investigation carried out.

**Parenzan Pietro** - Rotazione biologica naturale. Successione delle « facies » bentoniche marine [*De rotatione biologica naturali. Facies benthonicæ marinæ earumque successiones*]. Boll. Zool., V, 4, 137-144. Napoli (1934). **b - 677**

L'A. studia il fenomeno del susseguirsi di determinate facies bentoniche in una data zona e indica tale fenomeno col nome di « rotazione biologica naturale ». Egli passa poi in rassegna i fattori che determinano tale « rotazione » dividendoli in: fisici e biologici e questi ultimi in bio-causali e bio-casuali. Infine basandosi sui dragaggi eseguiti da Colombo, da Gast e da lui stesso nel Golfo di Napoli, l'A. pensa che si possano distinguere degli « elementi biocenotici stabili » e degli « elementi biocenotici instabili ».

**Phifer Lyman D.** - Vertical Distribution of Diatoms in the Strait of Juan de Fuca [*De distributione verticali Diatomearum per Fretum* Juan de Fuca]. 3 figs., 4 tabl., Univ. Wash. Publ. in Oceanogr., I, 3, 83-96. Seattle, Wash. (1934). **b - 678**

Material collected during a cruise of the « Medea » in July, 1932. Methods of collecting samples and counting species.

A total of 36 species of Diatoms was found in this region. The dominant species from both centrifuged and net samples were: *Chaetoceros crucifer*, *Ch. debilis*, *Ch. pseudocrinitus*, *Ch. radicans*, *Ch. Vanheurckii* and *Skeletonema costatum*.

**Phifer Lyman D.** - Phytoplankton of East Sound, Washington, February to November, 1932 [*De phytoplancton in* East Sound, Wash. *a mense Februario ad mensem Novembrem 1932*]. 2 figs., 1 table, Univ. Wash. Publ. in Oceanogr., I, 4, 97-110. Seattle, Wash. (1934). **b - 679**

This paper gives the occurrence and distribution of phytoplankton (*Diatomaceae*, *Dinoflagellata*, *Silicoflagellata*) in the Sound, and the variation of its abundance in relation to the different months.

**Rakhmanova S.** - Studies on the Plankton of the Tartar Strait. Preliminary Investigation [*Plancton in Freto* Tartar. *Inquisitiones priores*]. (In Russ., Engl. Rés.). Bull. Far East. Branch. Acad. Sc. U. S. S. R., 1/2/3, app., 1-3. Vladivostok (1933). **b - 680**

Results of the analysis of 480 samples of plankton collected during two cruises (10/V-28/VII and 14/VII - 12/VIII, 1931) between Cape Povorotny and Alexandrovsk (Sachalin Island). Distribution and composition of the plankton. Concentration of the plankton and density of herring swarms.

**Redfield A. C.** - On the Proportions of Organic Derivatives in Sea Water and Their Relation to the Composition of Plankton [*De organicis derivatis in aqua marina. Quæstio de proportione deque eorum correlatione cum planctonica compositione*]. 5 figs., 2 tabl., James Johnstone Mem. Vol., 176-192. Liverpool (1934). **b - 681**

On hand of data obtained on different stations by the « Dana » in the course of the Carlsberg Foundation's oceanographical expeditions around the world in 1908-1909 and the « Atlantis » in the deep waters of the western Atlantic Ocean, the author discusses the correspondence between the proportions of phosphate and nitrate in the seas and the composition of living matter.

**Rose Maurice** - Recherches préliminaires sur le plankton de profondeur de la Baie d'Alger [*Inquisitiones priores in plancton in profundum bajæ Algariensis*]. 5 fig., Bull. Trav. Stat. Aquicult. et Pêche Castiglione, 1933, 1, 43-81. Alger (1934). **b - 682**

Méthodes employées. Liste, par mois, des formes reconnues par l'A., récoltées à une profondeur de 200 m. -O. Comparaison avec la faune pélagique superficielle: Liste de Copépodes communs à la surface et à la profondeur; liste de Copépodes particuliers à la surface; liste de Copépodes spéciaux à la profondeur.

**Russell F. S.** - The Vertical Distribution of Marine Macroplankton. XII. Some Observations on the Vertical Distribution of *Calanus finmarchicus* in Relation to Light Intensity [*Macroplancton marinum eiusque distributio verticalis. XII. Inquisitiones in distributionem verticalem speciei « Ca-*

*lanus finmarchicus*»]. 3 figs., 4 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 569-584. Plymouth (1934). **b - 683**

The female *Calanus* in July preferred higher intensities of light than did the females in August; this change was coincident with a change in the *Calanus* population as shown by size measurements. A similar change in distribution and in population was shown by the males. The females in July were living in intensities of 20,000 m. c. and more; but those in August were avoiding such high intensities. The males in July avoided intensities of 40,000 m. c. and over, while in August their upper limit was about 10,000 m. c.

**Rylov W. M.** - Zur Hydrologie und Planktonkunde einiger Seen im Unterlaufe des Flusses Syr-Darja (Aktschatau und Kara-Kul-Seen) [*De hydrologia et studiis planctonicis aliquorum lacuum in inferiore parte regionis* Syr-Darja (*Lacus* Aktschatau *et* Kara-Kul)]. 2 diagr., 4 Tab., Mém. Inst. Hydrol., X, 389-401. Léningrad (1933). **b - 684**

Temperaturverteilung, Bearbeitung der Planktonproben der salzigen Aktschatau- und Kara-Kul Seen. Ergebnisse der von der Fischerei-Station am Aral-See ausgesandten Expedition. Der erste See stellt ein Beispiel eines im Steppen- und Wüstengebiete wahrscheinlich seltenen Typus dar, in welchem im Sommer eine Temperaturstratifikation normalerweise vorliegt, während der Kara-Kul See durch eine Homothermie im Sommer charakterisiert ist. Es sind einige Angaben über die Zusammensetzung der Phyto- und Zooplankton der beiden Seen, zugefügt.

**Sawyer W. R.** - Comparative Penetration of Light into Sea Water [*Agitur de lucis penetratione comparativa in aquam marinam*]. Ann. Rep. Biol. Board Canada, 1933, 34. Ottawa (1934). **b - 685**

Results of a study of the phytoplankton conditions in the Bay of Fundy and the Gulf of Maine, which has shown that they are strikingly different. Observations on total solar radiation received daily per unit of horizontal surface during the year 1932 calculated for a representative station in the Bay of Fundy and the Gulf of Maine showing that the vertical extent of the photosynthesis and the greater incident solar radiation in the Gulf of Maine along with the more transparent water is undoubtedly an important factor in producing a greater phytoplankton population there than in the Bay of Fundy.

**Sears Mary** - Zoöplankton Studies [*Studia zooplanctonica*]. Woods Hole Oceanogr. Instit., Rep. 1933, 31, Woods Hole, Mass. (1934). **b - 686**

1. The distribution of the zoöplankton on the continental shelf, Cape Cod to Chesapeake Bay; 2. Siphonophores collected during the «Thor» expedition to the Mediterranean, 1908 and 1910.

**Seiwell Gladys E.** - Chemical Studies of Plankton in Sea Water [*Studia chimica planctonica aquæ marinae*]. Woods Hole Oceanogr. Instit., Rep. 1933, 31-32. Woods Hole, Mass. (1934). **b - 687**

Brief account of chemical studies on the organic carbon and phosphorus content of marine plankton, undertaken with a view to calculation of organic production, based on theoretical calculation of oxygen and phosphorus consumption in the tropical Atlantic Ocean. Results of a comparison of several methods for determination of iron in sea water undertaken in preparation for a study of the iron content and consumption of iron by the phytoplankton.

**Sømme Jacob D.** - Animal Plankton of the Norwegian Coast Waters and the open Sea I. Production of *Calanus finmarchicus* (Gunner) and *Calanus hyperboreus* (Krøyer) in the Lofoten Area [*Agitur de zooplancton in aquis prope litus Norvegum et in mare apertum. Productio speciei «Calanus finmarchicus» et «C. hyperboreus» in zona* Lofoten]. 45 figs., 26 tabl., Fiskerid. Skr., Ser. Havunders. (Rep. Norw. Fish. and Mar. Invest., IV, 9), 1-163. Bergen (1934). **b - 688**

This is the first part of an investigation carried out for the purpose of studying the more general laws of horizontal distribution and the production capacity of different areas of the sea as regards plankton animals. General part: Damas's circulation hypothesis. Special part I: Systematics, differentiation of species by measurements, quantitative determination of biological groups. Ch. I. Life history of *Calanus finmarchicus* and *Calanus hyperboreus*. Ch. 2. Measurements and methods for counting. Special part II: Biology and distribution of *Calanus finmarchicus* and *Calanus hyperboreus* in Norwegian coast waters. Ch. 3. Some observations on the biology of *Calanus hyperboreus* from different parts of the Norwegian coast. Ch. 4. Investigations in the Lofoten Area and the winter conditions in *Calanus finmarchicus* and *Calanus hyperboreus*. Ch. 5. Cessation of the winter condition and the period of spawning in *Calanus finmarchicus* and *Calanus hyperboreus*.

**Steuer Adolf** - Zur Fauna des Canal di Leme bei Rovigno [*De fauna canalis* Leme *nomine apud Arupinum*] (Dtsch. Text, ital. Rés). 24 Abb., Thalassia, I, 4, 1-44. Jena (1933). **b - 689**

Generalità sul Plancton e su alcuni dei suoi componenti. Morfologia e biologia di *Penilia avirostris* Dana, dei *Phoronidea* e delle loro larve. Su di una seconda specie adriatica di Enteropneusti.

**Stevenson J. A.** - Daily Vertical Distribution in St. Croix Zooplankton [*De distributione verticali diurna zooplanctonica in* St. Croix]. Ann. Rep. Biol. Rep. Canada, 1933, 37. Ottawa (1934). **b - 690**

Results of a series of plankton hauls showing the vertical distribution throughout a complete daily cycle for the following four species, the first two of which form an important article in the food of the giant scallop, as shown by stomach contents: Tintinnid (sp.), *Distephanus speculum*, *Mytilus* veligers, and *Aurelia* planulae.

**Thiemann K.** - Das Plankton der Flussmündungen [*Agitur de plancton in æstuariis fluminum*]. Wiss. Ergebn. Dtsch. Atlant. Exped. «Meteor» 1925-1927, XII, I. Teil, 3 Lief., 199-273. Walter de Gruyter & Co. Berlin & Leipzig (1934). **b - 691**

Die Aufgabe dieses Werkes ist die Veränderungen in Verteilung und Zusammensetzung des Planktons an den Mündungen der Elbe, des Amazonas, La Plata, Niger, Bimbia, Kamerun und Kongo zu erklären. Der Vf. unterscheidet an den Flussmündungen drei Zonen mit verschiedenen Farben: 1. eine Zone des blauen Wassers im Aussengebiet mit grösserer Meerestiefe und wenig Plankton, 2. eine Zone des olivgrünen Wassers im Küsten- oder Schelfgebiet mit starker Bevölkerungsdichte des Planktons, 3. eine Zone des Flussunterlaufes mit gelblichem, planktonarmem und detritusreichem Wasser. Zum Schluss wird eine schematische Uebersicht über Plankton-, Salz-, Detritusgehalt, Wasserfarbe und- tiefe im Mündungsgebiet eines Idealflusses gegeben.

**Thor S.** - Einzelne neue, besonders norwegische *Eupodes*-Arten mit einigen älteren Arten verglichen [*De novis quibusdam speciebus præcipue Norvegis ad genus «Eupodes» pertinentibus. Comparatio cum aliis speciebus*]. Zool. Anz., CV, 201-215. Leipzig (1934). **b - 692**

**Vatova A.** - Ricerche quantitative sul bentos del Golfo di Rovigno [*Inquisitiones quantitativæ benthonicae in Sinu Arupinensi*]. Note Ist. Biol. Rovigno, 12, 3-12. Venezia (1934). **b - 693**

Risultati delle ricerche quantitative compiute col prendisaggio di Petersen, nell'anno 1932-33, nel Golfo di Rovigno fino a 15 miglia marine dalla costa. La fauna dell'Adriatico sett. è assai ricca di specie ma povera di individui. Le biocenosi

distinte in base a 207 saggi sono 5: *Schizaster-Chiajei*, *Schizaster-Turritella*, *Tellina*, *Lima-fragilis*, *Venus*. Forme caratteristiche che accompagnano le dette biocenosi. Il peso complessivo della sostanza organica nel Golfo di Rovigno importa 143,8 gr. pro m². Non sono compresi in questa cifra i saggi del Canal di Leme.

**Wulff A.** - Ueber Hydrographie und Oberflächenplankton nebst Verbreitung von *Phæocystis* in der Deutschen Bucht im Mai 1933 [*De hydrographia et plancton ad superficiem, cum notis de distributione speciei* « *Phæocystis* » *per* Deutsche Bucht *mense Majo 1933*]. 2 Abb., Ber. Dtsch. Wiss. Komm. Meeresf. N. F., VII, 3, 343-350. Leipzig (1934). **b - 694**

An Hand der durch Untersuchung des Oberflächenplanktons festgestellten Verbreitung bestimmter Planktongemeinschaften oder einzelner Leitformen bestimmter Wasserarten wird die Verteilung und der Anteil der in der Deutschen Bucht im Mai 1933 vorhandenen Wasserarten aufgezeigt. Es wird über die quantitative Verbreitung der Kolonien von *Phaeocystis globosa* im Oberflächen- und Bodenwasser berichtet; ein Vergleich dieser Verbreitung mit dem Vorkommen von Jungheringen liessen auf dieser Fahrt keine eindeutigen Beziehungen zueinander erkennen.

# BIOLOGIA DESCRIPTIVA.

## Organisma navibus noxia.

**Coe W. R.** - Destruction of Mooring Ropes by *Teredo;* Growth and Habits in an Unusual Environment [*De cavis ancorariis eorumque destructione per speciem* « *Teredo* ». *Agitur etiam de accretione et consuetudinibus Teredinis in ambiente anomalo*]. Science, LXXVII, 2002, 447-449. New York (1933). **b - 695**

The great damages caused to the mooring ropes by *Teredo morsei*. Habits of the young Mollusks in the rope. The ropes are less suitable than wood for normal growth and sexual maturity of the teredos, therefore many of them die before reaching the reproductive period.

The unprecedented abundance of this species in 1930 is thought to have resulted from unusually favorable conditions for the survival of the larvae.

**Elsey C. R.** - Infection Periods of the Wood-Borers, *Bankia setacea* and *Limnoria lignorum* [*B. setacea et L. lignorum. Periodus infestationis ligni*]. Ann. Rep. Biol. Board Canada, 1932, 85. Ottawa (1933). **b - 696**

Results of the exchange of blocks of Douglas fir, placed for twelve months in Departure Bay, Vancouver Harbour, Boundary Bay and Massett Inlet, and for five months at Prince Rupert in order to determine at what time of year protection of boats and other wooden structures is most necessary against the infection by *Bankia* and *Limnoria*.

**Legendre R.** - Les peintures de carènes. Le point de vue biologique de la protection des métaux dans l'eau de mer [*De carinis earumque coloratione. Agitur de tutela ferenda metallis in aqua marina immersis, ex scientia biologica*]. 8 fig., La Nature, 2869, 445-450. Paris (1931). **b - 697**

Communication au Congrès International d'Aviation Coloniale, Octobre 1931. Considérations sur le mécanisme de fixation et de développement des organismes vivants qui encrassent et encroûtent les corps immergés. Etude biologique de la salissure des coques, les différents facteurs dont dépend la salissure de la coque; la nature des êtres que l'on rencontre le plus communément fixés sur les navires; compte rendu du travail de Visscher à ce sujet; les trois types de « crasse »; aspect biologique de la corrosion; élaboration de données nécessaires pour l'établissement d'une formule de peinture de carènes protégeant à la fois contre la corrosion et l'encrassement.

**Neu Wolfgang** - Der Schiffsbewuchs als biologisches und technisches Problem [*Agitur de organismis in navium carinis viventibus ex biologia et technica*]. Der Biologe, I, 12. München (1932). **b - 698**

Protozoaires, Spongiaires, Coelentérés, Vers, Mollusques, Crustacés, Vermidiens, Protocordés, Poissons, Mammifères.

**Brightwell L. R.** - On the Seashore [*In ora maritima*]. viii + 119 pp., (Discovery Books), Thomas Nelson & Sons, Ltd. Edinburgh & London (1934). **b - 712**

**Crane Jocelyn** - Deep-sea Creatures of Six Net Hauls [*Organisma in mari peralto sexies capta piscationibus*]. 10 figs., 2 tabl., Bull. New York Zool. Soc., XXXVII, 6, 174-181. New York (1934). **b - 713**

Rose-lighted Dragonfish (*Echiostoma*) from five hundred fathoms. In the four-hundred-fathom net were grayish pallid round-mouths and the whitish young of dark-brown abyssal Cyclothones. Myctophids or lanternfish ; *Photonectes ; Melanocetus*, thread Eels, *Systellaspis* and others. This article also contains some graphs showing the proportions of the principal groups of animals caught in a typical deep-sea haul and the gradual decrease in the numbers of deep-sea animals caught between 400 and 900 fathoms.

**D'Ancona Umberto** - V. Faune et flore des eaux saumâtres (Appendice) [*De fauna et flora aquarum salmacidarum.* (*Appendix*)]. 1 fig., Rapp. Pr.-Verb. Comm. Expl. Scient. Méditerranée, VIII, 167-184. Paris (1934). **b - 714**

Appendice des rapports déjà publiés par l'A. au cours des deux dernières années sur le même sujet. Il ne s'y occupe que des travaux concernant les eaux saumâtres au point de vue général et de ceux qui traitent en particulier des eaux saumâtres de la Méditerranée y compris la Mer Noire et la Mer d'Azov. Ces dernières, à cause du grand nombre des recherches importantes dont elles ont été dernièrement objet, fournissent une documentation très intéressante, même au point de vue de l'océanographie et de la biologie générale. Une liste bibliographique de 51 titres complète l'ouvrage.

**Demel K. & Dłuski S.** - Compte rendu d'une excursion scientifique sur le banc central de la Baltique [*Navigatio quadam scientifica ad banchum centralem Maris Baltici. Relatio*]. (En pol., rés. franç.). 12 fig., 2 tabl., Arch. Hydrobiol. & Ichtyol., VIII, 48-74. Suwalki (1934). **b - 715**

Compte rendu d'une excursion scientifique sur le bateau-école polonais « Dar Pomorza » dans la région méridionale du banc central de la Baltique, région délimitée par les latitudes 55° 27' N - 55° 48' N et les longitudes 16° 33' E - 17°42' E. Cette région est caracterisée par l'abondance de *Macoma baltica*

et de *Pontoporeia affinis.* Dans des profondeurs considérables on a capturé 7 espèces arctiques. Les AA. donnent aussi les résultats des sondages effectués, les données obtenues au cours des observations thermiques ainsi que des observations sur la salinité.

**Duncan F. Martin** - Animals of the Sea (Romance of Reality Series) [*Animalia marina* (*Fabulosa enarratio rerum verarum*)]. T. C. & E. C. Jack, Ltd. London (1934). **b - 716**

Quelques Mémoirs récents relatifs à la faune insulaire méditerranéenne (Méditerranée occidentale) [*Fauna insularum Maris Mediterranei occid. Opera recentiora de fauna insulari Maris Mediterranei occ.*]. Rapp. Pr.-Verb. Comm. Expl. Scient. Méditerranée, VIII, 263-271. Paris (1934). **b - 717**

Vu que nos connaissances actuelles sur la faune des îles de la Mer Méditerranée occidentale présentent encore des lacunes considérables, l'A. a cru opportun de dégager dans le présent rapport l'essentiel des recherches accomplies sur divers groupes zoologiques de ces îles qui présentent un grand intérêt, puisqu'elles comblent quelques-unes des lacunes dont ci-dessus, avec référence spéciale aux mémoires ayant une portée générale, biogéographique et biologique ou pratique. L'index bibliographique très étendu contient des références exactes sur les travaux pris en considération.

**Gillespie A. S.** - The Distribution of Some Common Rocky Shore Animals: with Special Reference to the West Coast of Anglesey [*De quibusdam consuetis animalibus marinis. Quæstio de eorum distributione per oram quamdam marinam scopulosam. Agitur particulatim de litoribus occid. regionis* Anglesey]. North Western Natural., VIII, 114-120. (1933). **b - 718**

**Gislén Torsten** - Evolutional Series towards Death and Renewal [*Evolutionis series ad mortem et renovationem*]. 22 figs., Ark. f. Zool., 26 A, H. 3, 16, 1-19. Stockholm (1934). **b - 719**

The purpose of this paper is with some examples to elucidate the different modes used by evolution for a certain adaptation. It aims to show what the circumstances are when the result turns out to be fitted for surviving, or is subjected to a rapid extinction, and to what degree we may sometimes surmise a correlation between the change developed and the extintion or revival of the form-series. As an object for demonstration the A. has selected some evolutionary series among the Echinoderms.

**Harrison Matthews L.** - The Marine Deposits of the Patagonian Continental Shelf [*De sedimentis marinis in planitie continentali Patagonica*]. 13 pl., Discovery Rep. (Govmt. Depend. Falkland Isls.), 175-208. Univ. Press. Cambridge (1934). **b - 720**

## Bacteria.

**Baker M. C.** - Primitive *Bacteria* in Sea Water [*Bacteria primigenia in aqua marina*]. Ann. Rep. Biol. Board Canada, 1932, 18. Ottawa (1933). **b - 737**

Description of a failed attempt to demonstrate the presence of « primitive forms » of *Bacteria* in sea water, using Sherman's method (see « Science », Dec. 11, 1931; « Journal of Infectious Diseases », vol. 51, Jan. 16, 1932).

**Carey Cornelia L. & Waksman Selman A.** - The Presence of Nitrifying *Bacteria* in Deep Seas [*De Bacteriis nitrificantibus in maribus peraltis*]. Science, LXXIX, 2050, 349-350. New York (1934). **b - 738**

From these observations it has been proved to be beyond any doubt that the process of nitrification in the sea is brought about by *Bacteria* that are inhabitants of the sea bottom.

**Reuszer Herbert W.** - Marine *Bacteria* and their Rôle in the Cycle of Life in the Sea. III. The Distribution of Bacteria in the Ocean Waters and Muds about Cape Cod. [*Agitur de bacteriis marinis eorumque functione quoad vitæ circulum in mari. III. Distributio bacteriorum per aquas oceanicas et loca limosa quæ* Cape Cod *circumdant*]. 2 figs., 7 tabl., Biol. Bull., LXV, 3, 480-497. Lancaster, Pa. (1933). **b - 739**

A revision of the investigations concerning the number of *Bacteria* and their distribution in sea water has been made. The studies reported in this paper concern the number of *Bacteria* found in ocean waters and muds in the region of Cape Cod, Mass., and their variation with distance from shore, depth of water, depths in the mud, and carbon content of the mud.

**Waksman Selman A.** - The Rôle of *Bacteria* in the Cycle of Life in the Sea [*Bacteria. De eorum functione quoad vitæ circulum in mari*]. 16 figs., Scient. Monthly, XXXVIII, January, 35-49. New York (1934). **b - 740**

The cycle of life in the sea and bacterial activities. Methods of study of marine *Bacteria.* Nature of the bacterial population of the sea. Decomposition of plant and animal residues and transformation of nitrogen. Organic matter in sea-water and in the marine bottom.

**Waksman Selman A. & Carey C. L.** - Rôle of *Bacteria* in Decomposition of Plant and Animal Residues in the Ocean [*Agitur de parte quam bacteria capiunt quoad decompositionem residuorum animalium et vegetalium in Oceano*]. Proc. Soc. Exp. Biol. & Med., XXX, 526-527. New York (1933). **b - 741**

**Waksman Selman A. & Reuszer H. W.** - Studies in Marine Bacteriology [*Studia bacteriologiæ marinæ*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 36. Woods Hole, Mass. (1933). **b - 742**

Account of work in marine bacteriology dealing with the determination of the total numbers of *Bacteria* present in sea water and bottom deposits, and with the occurrence of *Bacteria* capable of carrying on specific physiologic processes. Indication on the methods of approach, and summary of the results so far obtained.

**Waksman Selman A., Reuszer H. W., Carey C. L., Hotchkiss M.,** assist. by **Renn C. E.** - Report of Studies in Marine Bacteriology [*Relatio de studiis bacteriologiæ marinæ*]. Woods Hole Oceanogr. Instit., Rep. 1930-32, 49-51. Woods Hole, Mass. (1933). **b - 743**

Summary of the results of the investigations in the field of marine bacteriology inaugurated in 1931 and which were centred in 1932 largely around four general problems: 1. the abundance and distribution of the bacterial population in the sea water and bottom deposits of the Gulf of Maine, the continental shelf and certain bays about Cape Cod; 2. decomposition of zoöplankton and algal residues by *Bacteria*; 3. the rôle of *Bacteria* in the nitrogen cycle of the sea; 4. the abundance and chemical nature of marine humus.

**Waksman Selman A., Reuszer H. W., Carey C. L., Hotchkiss M., Brice W. F. & Renn C. E.** - Investigations in Marine Bacteriology [*Inquisitiones in bacteriologiam marinam*]. Woods Hole Oceanogr. Instit., Rep. 1933, 35-37. Woods Hole, Mass. (1934). **b - 744**

Account of the investigations which represent to a large extent continuations of those of 1932, namely: 1) the abundance and distribution of the bacterial population in the sea, 2) decomposition of algal residues by *Bacteria*, 3) the rôle of *Bacteria* in the nitrogen cycle of the sea, especially in nitrification and nitrogen-fixation, 4) the abundance and chemical nature of marine humus in the sea bottom.

**Zobell C. E. & Feltham C. B.** - A 5.21 - Are there Specific Marine *Bacteria*? [*Sunt bacteria peculiaria marina*?]. 2 tabl., Proc. Fifth Pacific Sc. Congr., III, Victoria & Vancouver (1933). **b - 745**

Sea water provides for the cultural requirements of marine *Bacteria* better than do other solutions. Sea water inhibits the multiplication of many non-marine micro-organisms, although they are benefited by five to ten per cent. sea water. While many of the marine forms appear to be obligate halophiles, there seems to be something in sea water, besides the common salts which makes it indispensable to the development of some of the marine *Bacteria*. The toxicity of sea water for non-marine *Bacteria* is due not only to its high salt concentrations, but to some other factors as well.

**Zobell C. E. & Feltham C. B.** - Preliminary Studies on the Distribution and Characteristisc of Marine *Bacteria* [*Bacteria marina eorumque distributio et peculiaritates. Studia priora*]. 5 figs., Bull. Scripps Instit. Oceanogr. Univ. Calif., La Jolla, Calif. Techn. Ser., III, 12, 279-296. Berkeley, Calif. (1934). **b - 746**

Technic of marine bacterial investigations. Distribution and abundance of *Bacteria*. Characteristics of bacterial flora. Importance of the marine *Bacteria* in the economy of the sea.

## Protozoa.

**Biecheler Berthe** - Sur un Dinoflagellé à capsule périnucléaire, *Plectodinium*, n. gen. *nucleovolvatum*, n. sp. et sur les relations des Péridiniens avec les Radiolaires [*Plectodinium nucleovolvatum n. gen. n. sp. correlationesque inter Peridineas et Radiolaria*]. 3 fig., C. R. Acad. Sc., CXCVIII, 4, 404-406. Paris (1934). **b - 747**

Description de ce gymnodinien nouveau. Caractéristiques par lesquelles il diffère de celui découvert par Meunier dans le plancton de la Mer de Kara et des Dinoflagellés. Existence d'une capsule périnucléaire, qui s'identifie à la capsule centrale des Radiolaires.

**Calkins Gary N.** - The Biology of the *Protozoa* 2nd ed. thoroughly rev. [*Protozoa eorumque biologia. Editio altera omnino recognita*]. 2 col. pl., 223 figs., v + 607 pp., Lea & Febiger. Philadelphia; Baillière, Tindall & Cox. London (1933). **b - 748**

The underlying theme remains the same as in the 1st edition but the material is rearranged, concentrated, and more direct. The different chapters deal with: morphology, cytology, taxonomy, physiology, reproduction, ecology, commensalism and parasitism with a treatise on human diseases due to *Protozoa*. Some changes have been made in the usual systems and more elaborate keys given to several genera.

**Campbell Arthur S.** - A Few Dinoflagellates from Laguna Beach [*Nonnulla Dinoflagellata in* Laguna Beach]. 17 figs., Journ. Entomol. & Zool., XXVI, 2, 17-21. Claremont, Calif. (1934). **b - 749**

There are three new species reported in this paper, viz., *Peridinium vagans*, *Ceratium angustula*, and *C. uteri*. The remaining species have been previously recorded along the California coast and elsewhere. The diagnoses of the new species are given in Latin.

**Cushman J. A.** - Some Notes on d'Orbigny's Models [*Notæ de exemplaribus ad* d'Orbigny *pertinentibus*]. Contr. Cushman Labor. Foramin. Res., IX, 3, 70-73. Sharon, Mass. (1933). **b - 750**

The original models of fossil and living *Foraminifera* were made about 1826 and the second edition containing a pamphlet with a list of the species was issued in 1843. A list of 100 models is given here with the localities copied from the original work of d'Orbigny.

**Cushman J. A.** - Some New Recent *Foraminifera* from the Tropical Pacific [*Foraminifera quædam nova recentioraque Oceani Pacifici tropicalis*]. 2 pl., Contr. Cushman Labor. Foramin. Res., 137, 77-95. Sharon, Mass. (1933). **b - 751**

Thirty-five new species and varieties are described and figured in this paper.

**De Saedeleer Henri** - Beitrag zur Kenntnis der Rhizopoden: morphologische und systematische Untersuchungen und ein Klassifikationsversuch [*Contributio in Rhizopoda cognoscenda: Inquisitiones in morphologiam et systematicam; exemplum distributionis in classes*]. 29 Textfig., 8 Taf. mit erklär. Text, Mém. Mus. R. Hist. Natur. Belgique, 60, 1-112. Bruxelles (1934). **b - 752**

Einleitung. Klassifikationsversuch der Rhizopoden, mit Ausnahme der Klassifikation der *Amoebaea* und der *Polythalamia*. Beobachtungen an neuen oder wenig bekannten Rhizopoden. Eine ziemlich grosse Anzahl neue Formen, Gattungen und Zusammensetzungen sind hier eingeführt worden mit Synonymen und Berichtigungen.

**Earland Arthur** - *Foraminifera.* Part. 3: The Falkland Sector of the Antarctic (excluding South Georgia) [*Foraminifera. Pars 3: Sector nomine* Falkland *in Oceano antarctico* (*Georgia meridionali excepta*)]. 10 pl., 208 pp., Discovery Rep. (Govmt. Depend. Falkland Isls.), X, Univ. Press. Cambridge (1934). **b - 753**

Several species are described for this region, some of which are new to science. Considerations on their distribution are given. A comparison is made between the foraminiferous fauna of the Bellingshausen Sea and the Weddel Sea.

**Garnjobst Laura** - Studies on *Stylonethes sterkii* sp. nov. I. Morphology and Systematic Position [*Stylonethes sterkii sp. nov. I. De morphologia et systematica*]. 1 fig., 2 pl., Journ. Mar. Biol. Assoc., XIX, 2, 707-722. Plymouth (1934). **b - 754**

This species was collected from a puddle in Chelson Meadow. Technique. General morphology. Habitat and behaviour. Systematic position. Diagnoses of the genus and of the species.

**Gemeinhardt K.** - Die Silicoflagellaten des Südatlantischen Ozeans [*Silicoflagellata Oceani Atlantici merid.*]. Wiss. Ergebn. Dtsch. Atlant. Exped. « Meteor » 1925-1927, XII, Erster Teil. Biolog. Sonderunters. 3 Lief., 274-312. Walter de Gruyter. Berlin & Leipzig (1934). **b - 755**

Systematik, Verbreitungsgebiet, Oekologie, Beziehungen zum Gesamtplankton.

**Giambra Rosa** - Alcune Peridinee del mare di Palermo [*Nonnullæ Peridineæ maris Panormitani*]. Boll. Soc. Sc. Natur. Econ. Palermo, XV, 49-52. Palermo (1933). **b - 756**

L'A. descrive 19 specie di Peridinee determinate in base all'esame delle pescate periodiche di plancton eseguite nel 1930 nel mare di Palermo. Le specie appartengono alla classe *Dinophysiales*: fam. *Dinophysiaceae* e alla classe *Peridiniales*: fam. *Ceratocoryaceae*, *Oxytoxaceae*, *Ceratiaceae*, *Gonhyaulaceae*, *Peridiniaceae*, *Goniodomaceae*, *Podolampaceae*.

**Hickson S. J.** - On *Gypsina plana* and on Systematic Position of the Stromatoporoids [*De Gypsina plana deque systematica Stromatoporoidarum*]. 13 figs., 2 pl., Quart. Journ. Microscop. Sc., LXXVI, 3, 433-480. London (1934). **b - 757**

Detailed study of *G. plana* forming a crust on dead branches of a madrepore collected in shallow water at Tahiti. Discussion as to the nature of the Stromatoporoids that the A. considers belonging to the *Foraminifera*.

**Hovasse Raymond** - Ebriacées, Dinoflagellés et Radiolaires [*Ebriacea, Dinoflagellata et Radiolaria*]. 1 fig., C. R. Acad. Sc., CXCVIII, 4, 402-404. Paris (1934). **b - 758**

D'après les considérations de plusieurs auteurs précédents et d'après l'étude des caractères nucléaires et du squelette des Ebriacées, on peut conclure que cette famille, considérée jusqu'ici incertae sedis, se trouve amenée à la limite commune des deux ordres des Rhizopodes et des Flagellés.

**Jepps M. W.** - On *Kibisidytes marinus* n. gen. n. sp. and some Other Rhizopod *Protozoa* found on Surface Films [*Kibisidytes marinus n. gen., n. sp. aliaque Rhizopoda*]. 2 pl., Quart. Journ. Microscop. Sc. (n. ser.), LXXVII, 1, 121-127. London (1934). **b - 759**

Size, shell, pseudopodia, vacuoles, nucleus, multiplication, and food are described for this new species.

**Kirby Harold jr.** - Some Ciliates from Salt Marshes in California [*De quibusdam Ciliatis in stagnis salsis ad Californiam pertinentibus*]. 4 pl., Arch. f. Protistenk., LXXXII, 1, 114-133. Jena (1934). **b - 760**

The fauna described here from salt marshes on Monterey Bay and near Berkeley on San Francisco Bay resembles very much that of the brackish water at Oldesloe, Germany. The following forms are described as new: *Sonderia pharyngea* n. sp., *Peritromus californicus* n. sp.

**Kofoid Charles Atwood & Adamson Alastair Martin** - The *Dinoflagellata*: the Family *Heterodiniidæ* of the *Peridinioidæ*. Report on the Scientific Results of the Expedition to the Eastern Tropical Pacific, in Charge of Alexander Agassiz, by the U. S. Fish Commission Steamer « Albatross », from October, 1904, to March, 1905, Lieut. Commander L. M. Garrett, U. S. N., Commanding [*Dinoflagellata: familia Heterodiniidæ*]. 22 pl., Mem. Mus. Comp. Zoöl. Harvard Coll., LIV, 1, 1-136. Cambridge, Mass. (1933). **b - 761**

35 species belonging to this family are described in this paper, five of which are new to science. The study of their distribution shows that they are restricted to warm temperate and tropical seas; all have been taken at 300 fathoms.

**Li-Sun Tai & Skogsberg Tage** - Studies on the *Dinophysoidæ*, Marine Armored Dinoflagellates, of Monterey Bay, California [*Dinophysoidæ, Dinoflagellata armata in Baja* Monterey, *Calif.*]. 2 pl., 14 figs., Arch. f. Protistenk., LXXXII, 3, 380-482. Jena (1934). **b - 762**

I. Introduction. II. Material and methods. III. Thecal morphology of the *Dinophysoidae*. IV. Relationships among certain genera of *Dinophysoidae*. V. Principles applied to the descriptions. VI. Special part: Family *Dinophysidae* Stein. Genus *Phalacroma* Stein: *Phalacroma vastiforme* sp. nov., Genus *Dinophysis* Ehrbg.: *D. rotundata* Clap. & Lach., *D. rotundiformis* sp. nov., *D. brevisulcus* sp. nov., *D. acuminata* Clap. & Lach. *D. fortii* Pavillard, *D. acuta* Ehrbg., *D. odiosa* (Pavillard), *D. caudata* Saville-Kent, *D. tripos* Gourret, Genus *Metaphalacroma* gen. nov., *M. skogsbergi* sp. nov., Genus *Proheteroschisma* gen. nov., *P. connectens* sp. nov., Genus *Pseudophalacroma* Jörgensen, *P. nasutum* (Stein) Jörgensen, Genus *Oxyphysis* Kofoid, *O. oxytoxoides* Kofoid; Bibliography.

**Macfadyen W. A. & Kenny E. J. André** - On the Correct Writing in Form and Gender of the Names of the *Foraminifera* [*De correcta scriptura nominum Foraminiferorum quoad formam et quoad genus*]. Journ. R. Microscop. Soc., ser. III, LIV, 3, 177-181. London (1934). **b - 763**

In the present note the A. considers the valid generic names in use at the present day.

**Marshall Sheina M.** - The *Silicoflagellata* and *Tintinnoinea* [*Silicoflagellata et Tintinnoinea*]. Great Barrier Reef. Exped., 1928-29. Scient. Rep., IV, 15, 623-664. British Mus. (Natur. Hist.). London (1934). **b - 764**

This study shows that it is very difficult to collect Silicoflagellates because of their small size. Fifty-six species of *Tintinnoinea* have been found, three of which are new to science. The neritic and oceanic forms are distinguished.

**Roscoe E. & Stewart Katherine C.** - Notes on the *Foraminifera* of the Type Merced at Seven Mile Beach, San Mateo County, California [*Notæ de Foraminiferis ad typum* Merced *pertinentibus in* Seven Mile Beach, San Mateo County, Calif.]. 13 pp., Trans. San Diego Soc. Natur. Hist., VII, 21, San Diego, Calif. (1933). **b - 765**

**Shupack Benjamin** - Some *Foraminifera* from Western Long Island and New York Harbor [*Foraminifera quædam in* Long Island *occid. et portu* New York]. 2 figs., 1 pl., 1 table, Amer. Mus. Novit., 737, 1-12. New York (1934). **b - 766**

This paper describes Pleistocene and recent *Foraminifera* from of the regions mentioned above. Six species of *Elphidium* (= *Polystomella*), of which two are new, and two species of *Rotalia* are dealt with. The Pleistocene and recent *Foraminifera* are identical.

**Thalmann Hans E.** - On Homonyms in *Foraminifera* [*De homonymia Foraminiferorum*]. Contr. Cushman Labor. Foramin. Res., 139, 96-98. Sharon, Mass. (1933). **b - 767**

About fifty examples of homonymous names of species are listed in this paper.

**Warthin A. S., Jr.** - *Foraminifera* from the Ross Sea [*Foraminifera Maris* Ross *nomine*]. 5 figs., Amer. Mus. Novit., 721, 1-4. New York (1934). **b - 768**

350 specimens of *Foraminifera* have been identified, belonging to thirty-six species. The following new species are described : *Trochammina rossensis* and *Cyclammina gouldi*.

## Porifera.

**Bidder Geo. P.** - Sponges without Collared Cells [*Spongia quæ carent cellulis collare præditis*]. Nature, CXXXII, 3333, 441-442. London (1933). **b - 769**

**Brøndsted H. V.** - The Godthaab Expedition 1928. *Porifera* [*Expeditio* Godthaab *nomine a. 1928. Porifera*]. 2 maps, 6 figs., Medd. om Grønland, LXXIX, 5, 3-25. København (1933). **b - 770**

Description of 39 spp. from W. Greenland, the following of which are new : *Suberites baffini, Stylostichon baffini, Halichondria lambei,* and *Gellius rhaphidophorus.*

**Brøndsted H. V.** - *Porifera*. Medd. om Grønland, CIV, 12, 3-10. København (1933). **b - 771**

21 spp. are recorded from E. Greenland, 6 for the first time in this locality.

**Brøndsted H. V.** - Sponges [*Porifera*]. 26 figs., Mém. Mus. R. Hist. Natur. Belgique, h. sér., Résult. Scient. Voyage aux Indes Orient. Néerl. de LL. AA. RR. le Prince et la Princesse Léopold de Belgique, II, 15, 1-27. Bruxelles (1934). **b - 772**

The collection of Sponges described in this paper comprises 28 species, 8 of which are new to science. The remaining 20 species have all been recorded from various places in the Indo-Australian area, it will therefore not surprise to find them in the East Indian waters.

**Burton Maurice** - Observations on Post-larval Sponges of the Genus *Suberites* [*Observationes de Spongiis post-larvalibus ad genus « Suberites » pertinentibus*]. Ann. & Magaz. Natur. Hist., XIII, 74, 312-317. London (1934). **b - 773**

Characteristics of *Suberites carnosus, S. domuncula* and *Ficulina ficus*. Examples showing that the incrusting *Suberitidae* may be post-larval stages of other species.

**Burton Maurice** - Sponges [*Porifera*]. 2 pl., Great Barrier Reef Exped., 1928-29, Scient. Rep., IV, 14, 513-621. British Mus. (Natur. Hist.) London (1934). **b - 774**

In this paper 107 species are described, 17 of which are new and five new genera are erected. A special regard is given to the nomenclature and geographical distribution of the species dealt with.

**Burton Maurice** - Zoological Results of the Norwegian Scientific Expeditions to East-Greenland. III. Report on the Sponges of the Norwegian Expeditions to East-Greenland [*Resultatus zoologici ex Norvega expeditione scientiæ causa suscepta in Groënlandiam orient. III. Relatio de Spongiis collectis expeditione perdurante*]. 4 figs., tabl., 1 map, Norg. Svalbard- o. Ish-unders. Skr. Svalbard o. Ish., 61, 1-33. Oslo (1934). **b - 775**

The material dealt with here includes 54 species of which 1 is new to science, 26 are new to the fauna of Greenland, 43 are recorded from the area north of 71° 30' Lat. N. for the first time. A systematic list with remarks on the species is given. Two facts of interest are pointed out to which more consideration will be given later, i. e. the different distribution of deep-sea and shallow-water Sponges and the remarkable connections between the Arctic fauna and that of the Indo-Pacific and Sub-Antarctic regions.

**de Laubenfels M. W.** - New Sponges from the Puerto Rican Deep [*Spongia nova in* Puerto Rican Deep]. Reports on the Collections Obtained by the First Johnson-Smithsonian Deep-Sea Expedition to the Puerto Rican Deep - Smiths. Miscell. Coll., (Publ. 3283), XCI, 17, 1-28. Washington, D. C. (1934). **b - 776**

In the entire collection there are only a few species belonging to the *Calcarea* (or *Calcispongiae*), and somewhat more of the *Hexactinellida* (or *Hyalospongiae*), but apparently no new species of either of these two orders.

All the new species are representatives of the *Demospongiae*. Twenty-seven new species are described in the present paper. These belong to 17 families, of which 4 are new, and 26 genera, of which 11 are new.

**Renouf L. P. W.** - On the Occurrence of *Plakina monolopha* Schultze on the South Coast of Co. Cork, I. F. S. [*Plakina monolopha* Schultze *in litoribus meridionalibus regionis* Co. Cork I. F. S.]. Ann. & Magaz. Natur. Hist., 10th ser., XIII, 318. London (1934). **b - 777**

**Topsent Emile** - Eponges observés dans les parages de Monaco (Première Partie) [*De observatis spongiis in propinquitatibus Arcis Monoeci. (Pars Iª)*]. 3 fig., Bull. Inst. Océanogr., 650, 1-42. Monaco (1934). **b - 778**

Description de plusieurs espèces, dont une seulement est nouvelle : *Timea fasciata*. Comparaison de la faune d'Halichondrines des parages de Monaco avec celles de Naples et de Banyuls.

**Topsent Emile** - Sur les *Aplysinopsis* Lend. [*Aplysinopsis* Lend.]. 4 fig., Bull. Inst. Océanogr., 655, 1-15. Monaco (1934). **b - 779**

Discussion au sujet de la systématique du genre *Aplysinopsis*. Description détaillée de plusieurs spécimens dans le but d'établir le polymorphisme de l'*Aplysinopsis* connue en Méditerranée, *A. massa* Szymanski.

**Topsent Emile** - Aperçu de la faune des Eponges calcaires de la Méditerranée [*Calcispongia. Quæstio de eorum fauna in Mari Mediterraneo*]. Bull. Inst. Océanogr., 659, 1-20. Monaco (1934). **b - 780**

D'après une revision des Eponges décrites par plusieurs savants, à commencer de Schmidt (1862), l'A. dresse une liste de 53 *Calcarea* actuellement citées en Méditerranée et fait de nombreux remarques à leur sujet.

## Coelenterata - Insulæ et scopuli coralliferi.

**Billard Armand** - Les Hydroïdes des Golfes de Suez et d'Akaba. [Mission Robert Ph. Dollfus en Egypte (Décembre 1927-Mars 1929)] [*Hydroida ad Sinus* Suez *et* d'Akaba *pertinentia*]. 9 fig., 1 pl., Mém. Inst. Egypte, XXI, 1-30. (1933). **b - 781**

Rapport sur 22 espèces, dont *Hebella dyssimetra*, *Diphasia heurteli* v. *simplex* et *Halecium labiatum* sont nouvelles. La distribution géographique des différentes espèces est étudiée en particulier.

**Broch H.** - Zur Kenntnis der Adriatischen Hydroidenfauna von Split [*Hydroida hadriatica e* Split *provenientia. Contributio in faunam cognoscendam*]. 45 Abb., Skr. Norsk. Vidensk.-Akad. Oslo, Mat.-Naturv. Kl., 4, 1-115. Oslo (1933). **b - 782**

**Dawydoff C.** - Quelques observations sur la morphologie externe et la biologie des *Ctenoplana* [*Ctenoplana. De morphologia externa deque biologia*]. 13 fig., Arch. Zool. Exp. et Gén., LXXV, 6, 103-128. Paris (1933). **b - 783**

Remarques générales sur la morphologie externe. Observations biologiques : état fixé, natation. Analyse morphologique de l'organographie externe : face orale, côtes méridiennes, organe aboral, bandelettes ciliées, appareil tentaculaire, papilles dorsales, gonades.

**Dons Carl** - Zoologische Notizen XXV. Ueber die nördlichsten Korallenriffe der Welt [*Notitiæ zoologicæ. XXV. De vadis coralliferis in extremis orbis regionibus septentrionalibus*]. 3 Abb., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 55, 206-209. Trondheim (1934). **b - 784**

Genre *Eirene* Eschscholtz, 1829, *E. viridula* (Péron et Lesueur, 1809). L'A. rappelle les caractéristiques essentielles de cette espèce, assez commune depuis le Danemark jusqu'à Gibraltar et dans la Méditerranée, pour la comparer avec les Méduses trouvées dans tous les océans et rapportées à cette espèce. Il précise les caractères morphologiques et examine sa répartition géographique.

**Ranson Gilbert** - Note sur une Méduse rare, *Tiaranna affinis* Hartlaub, récoltée par le « Président Théodore Tissier » au cours de sa première croisière (hiver 1933) [*Nota de specie rara « Tiaranna affinis »* Hartlaub *ex priore navigatione navis nomine* « Président Théodore Tissier » (*Hieme a. 1933*)]. Bull. Mus. Nat. Hist. Natur., 2e sér., VI, 5, 436-442. Paris (1934). **b - 799**

Description de cette espèce, récoltée dans le Golfe de Gascogne, au large de la côte nord d'Espagne. Ombrelle. Estomac, canaux radiaires. Gonades. Tentacules. Exombrelle. Répartition géographique. Affinités.

**Rawlinson Ruth** - A Comparative Study of *Metridium senile* (L.) var. *dianthus* (Ellis) and a Dwarf Variety of this Species Occurring in the River Mersey, with a Discussion on the Systematic Position of the Genus *Metridium* [*Studium comparativum speciei « Metridium senile »* (L.) *var. « dianthus »* (Ellis) *varietatisque cuiusdam nanae huius speciei quæ vivit in flumine* Mersey *nomine. Adiungitur discussio de positione systhematica generis « Metridium »*]. 5 figs., 1 table, Journ. Mar. Biol. Assoc., XIX, 2, 901-919. Plymouth (1934). **b - 800**

There is close agreement between the anatomy of a small *Metridium*-like anemone found at Dingle, Liverpool, and the typical form of *M. senile* var. *dianthus*. A considerable amount of variation occurs in both the forms. The resemblances and the differences between the Dingle form and *M. senile* indicate that the former is a dwarf variety of the latter.

A discussion on the systematic position of the genus *Metridium* lies in favour of placing it in a family by itself (*Metridiidae*).

**Rylov V. M.** - *Alcyonaceae* gesammelt von der Expedition nach Franz-Josefs Land 1929 [*Alcyonaceae collectae inter expeditionem ad Terram Francisci Josephi, a. 1929*]. (Russ. Text). Trans. Inst. Scient. Expl. North, 49, 166-170. Moscow (1931). **b - 801**

*Tamoya haplonema*, *Periphylla hyacinthina*, *Nausithoe punctata*, *Atolla wyvillei*, *A. chuni*, *Pelagia noctiluca*, *Chrysaora fulgida*, *Desmonema gaudichaudi*, *D. chierchiana* and *Phacellophora ornata* are described and their distribution studied.

**Thiel M. E.** - *Madreporaria*. Zugleich ein Versuch vergleichender Oekologie der gefundenen Formen [*Madreporaria. Agitur etiam de oecologia comparata formarum inventarum*]. Mém. Mus. R. Hist. Natur. Belgique, 1 Abb., 21 Taf., Résult. scient. Voyage Indes Orientales néerl. LL. AA. RR. le Prince et la Princesse Léopold de Belgique, II, 12, 3-175. Bruxelles (1932). **b - 803**

Die belgische Expedition nach Niederländisch Indien hat ein Gebiet bereist, das in Bezug auf seine Steinkorallenfauna noch wenig bekannt ist. An die systematische Beschreibung des Materials ist daher ein tiergeographischer Teil angeschlossen, dem schliesslich ein oekologischer Teil folgt.

Im « Systematischen Teil », der den Hauptteil der Arbeit einnimmt, werden 58 Arten beschrieben, die sich auf 26 Gattungen und 12 Familien verteilen und unter denen 10 neu sind. Die Bearbeitung konnte nur auf Grund der Hartteile vorgenommen werden, da der Weichkörper mit wenigen Ausnahmen nicht erhalten war. Besondere Aufmerksamkeit ist der Synonymie und der Berücksichtigung der Variation der verschiedenen Kolonieteile geschenkt worden, die die Wiedererkennung der einzelnen Arten immer so erschwert hat. Im « Tiergeographischen Teil » sind in einer Tabelle alle Fundorte der beschriebenen Arten zusammengestellt, und im « Oekologischen Teil » wird versucht die biologische Seite des Korallenriffproblemes zu fördern.

**Uchida Tohru** - A Saemostome *Medusa* with Some Characters of *Rhizostomæ* [*Agitur de medusa quadam ad Sæmostomas pertinente, nonnullis caracteribus Rhizostomarum prædita*]. 2 figs., Proc. Imp. Acad., X, 10, 698-700. Tokyo (1934). **b - 804**

While studying specimens of *Aurelia limbata* collected from several localities in Hokkaido and Saghalien, the A. found that this species has several characters in common with *Rhizostomae*.

**Uchida Tohru & Hanaoka Kin-Ichiro** - On the Morphology of a Stalked Medusa, *Thaumatoscyphus distinctus* Kishinouye [*De morphologia speciei « Thaumatoscyphus distinctus »* Kishinouye]. Journ. Fac. Sc., Hokkaido Imp. Univ., Ser. 6, Zool., II, 135-153. Sapporo (1933). **b - 805**

Detailed description of the external and microscopical anatomy with notes on the formation of nematocysts, abnormalities and habits (AA.).

**Uchida Tohru & Hanaoka Kin-Ichiro** - Anatomy of Two Stalked *Medusæ* with Remarks on the Distribution of the *Stauromedusæ* in Japan [*Medusæ duæ pedunculatæ earumque anatomia. Agitur etiam de distributione Stauromedusarum per Japoniam*]. Journ. Fac. Sc., Hokkaido Imp. Univ., Ser. 6, Zool., II, 211-239. Sapporo (1934). **b - 806**

A hexamerous specimen of *Haliclystus borealis* and the young stages of *H. steinegeri* are described in this paper. Notes on the distribution of the Japanese stalked *Medusae* are added.

**Verwey J.** - Koraalriffen in de Baai van Batavia en zonlicht [*De Scopulis coralliferis in Baja Batava deque luce solis*]. Trop Nat., 137. Batavia (1934). **b - 807**

**Wagin V. L.** - *Hydroidea*, im Sommer 1931 während der Expedition auf dem Expeditions-Schiff « Lomonossow » im Karischen und im Barents Meere gesammelt [*Hydroidea collecta æstate a. 1931 perdurante expeditione navis* « Lomonossow », *per mare Karense et mare Barentium*]. 1 Taf., Trans. Arct. Inst., IX, 79-87. Leningrad (1934). **b - 808**

Insgesamt sind auf 16 Stationen in den beiden Meeren 16 Arten von *Hydroidea* gesammelt worden. Es werden ein systematisches Verzeichnis der beobachteten Gattungen, sowie der Ort des Fanges für jede Gattung angegeben.

**Wiman C.** - Ein neuer Typus gotländischer Korallenriffe [*Coralliorum banchi Gotlandici omnino novi*]. 2 Abb., Bull. Geol. Inst. Univ. of Uppsala, XXIV, 279-286. Uppsala (1933). **b - 809**

Die Beobachtungen, welche dieser Arbeit zugrunde liegen, datieren sich schon von 1897-1898. Es war nämlich die Absicht des Vf. von diesen Riffen eine längere Untersuchung fortzusetzen, worüber er auch am Ende dieser Arbeit seine Bemerkungen hinzufügt. Er erzählt von seinen Forschungen auf der Insel « Stora Karlsö » beschreibt den hier entdeckten neuen Typus von Korallenbildung, wo zahlreiche Kolonien verschiedener Gattungen, hauptsächlich *Thecia*, aufgefunden worden sind.

**Yabe Hisakatsu & Eguchi Motoki** - Probable Generic Identity of *Stephanophyllia* Michelin and *Micrabacia* M. Edwrds and J. Haime [*Stephanophyllia et Micrabacia. Quaestio de eorum probabili aequalitate*]. 5 figs., Proc. Imp. Acad., X, 5, 278-281. Tokyo (1934). **b - 810**

Corresponding to the absorption of *Micrabacia* into *Stephanophyllia*, the family name *Micrabaciidae* Vaughan emend. Wells is to be altered to *Stephanophyllidae*.

## Vermes.

Brackwasser-Nematoden mit den folgenden neuen Arten: *Oncholaimus oxyuroides* n. sp., *Euchromadora Strandi* n. sp. Uebereinstimmungen dieser Nematodenfauna mit der einiger nahegelegenen Küstengebiete. Alphabetisches Artenverzeichnis.

**Allgén Carl** - Freilebende marine Nematoden aus Hallands Väderö und der nahegelegenen Küste Schonens (Südschweden). Ein Beitrag zur Kenntnis der Nematodenfauna des südlichen Kattegatts [*Nematodes marini liberi ad insulam* Hallands Väderö *et ad litus propinquum regionis* Schonens *pertinentes. Contributio in cognoscendos Nematodes ad* Kattegatt *merid. pertinentes*]. 13 Abb., Fol. Zool. & Hydrobiol., VI, 1, 49-86. Riga (1934). **b - 813**

Von den hier beschriebenen Arten sind die folgenden neu: *Halalaimus Strandi* n. sp., *Dermatolaimus parelegans* n. sp., *Oncholaimus parachiltoni* n. sp., *Paralinhomoeus Strandi-brevicaudatus* n. sp., *Tylenchus* (*Chitinotylenchus*) *zostericola* n. sp.

**Allgén Carl** - Die marinen Tylenchen [*Tylenchi marini*]. Fol. Zool. & Hydrobiol., VI, 1, 86-87. Riga (1934). **b - 814**

Kurze Charakteristik der bisher bekannten Arten: *Tylenchus fucicola* de Man, *T. mediterraneus* Micoletzky, *T.* (*Chitinotylenchus*) *gracilis* de Man, *T.* (*Chitinotylenchus*) *zostericola* Allgén.

**Allgén Carl** - Weitere Nematoden aus dem Oeresund [*Nematodes novi ad regionem* Oeresund *pertinentes*]. 1 Taf., 1 Abb., Fol. Zool. & Hydrobiol., VII, 1, 97-110. Riga (1934). **b - 815**

Beschreibung von 12 neuen Nematoden (S. auch Cap. Zool. Deel VI, Avl. 2, 1934).

**Allgén Carl** - Zwei seltene nordische Brackwasser-Nematoden der terrestrischen Gattung *Mononchus* Bastian: *M. spectabilis* Ditlevsen und *M. rotundicautus* Skwarra [*Nematodes duo rari nordici in aqua salmacida viventes ad genus terrestre* « *Mononchus* » *pertinentes*]. 4 Abb., Fol. Zool. & Hydrobiol., VII, 1, 117-122. Riga (1934). **b - 816**

Kurze Uebersicht früherer Funde von Brackwasserarten. Beschreibung der oben genannten Arten mit Vergleichstabelle zwischen *M. papillatus* Bast. und *M. spectabilis* Ditl.

**Allgén Carl** - Ueber einige freilebende Nematoden aus « Skelderviken » und ihre nordische Verbreitung [*Nematodes quidam liberi ad* Skelderviken *pertinentes. Agitur etiam de eorum distributione per regiones septentr.*]. 2 Abb., Fol. Zool. & Hydrobiol., VII, 1, 122-130. Riga (1934). **b - 817**

Die hier beschriebenen Nematoden gehören 13 Arten an, die sich auf 12 Genera verteilen.

**Allgén Carl** - Bipolarität in der Verbreitung freilebender mariner Nematoden [*Nematodes marini liberi. Quæstio de bipolaritate et distributione*]. Zool. Anz., CV, 331-334. Leipzig (1934). **b - 818**

**Annenkova N.** - Meeres-Paraoniden im Fernen Osten der U. S. S. R. [*Paraonidæ in maribus ad extremas Orientis regiones in dicione reipublicæ sovieticæ pertinentibus*]. (In Russ. u. Dtsch.). 3 Abb., C. R. Acad. Sc. U. R. S. S., III, 8/9, 656-661. Léningrad (1934). **b - 819**

Beschreibung, Diagnosis und Verbreitungsgebiet von *Paraonis ivanovi* sp. n., *P.* (*Paraonides*) *lyriformus* sp. n., *Aricidea ramosa* sp. n., *A. antennata* sp. n.

**Annenkova N.** - Kurze Übersicht der Polychaeten der Litoralzone der Bering Insel (Kommandor-Inseln), nebst Beschreibung neuer Arten [*Polychæta ad insulam* Bering *pertinentia. Relatio brevior cum descriptione novarum specierum*]. Zool. Anz., CVI, 322-333. Leipzig (1934). **b - 820**

**Berkeley E. & Berkeley C.** - *Polychæta* of the Pacific Coast [*Polychæta in litoribus Oceani Pacifici*]. Ann. Rep. Biol. Board Canada, 1932, 77. Ottawa (1933). **b - 821**

During identification of specimens of *Polychaeta* collected by workers at the Pacific Biological Station, exceptionally large individuals of *Heteromastus filobranchus* with enormous gill development have been discovered. Habitat of the form in Saanich inlet.

**Brandtner Paul** - Ergebnisse einer von E. Reisinger & O. Steinböck mit Hilfe des Rask-Ørsted Fonds durchgeführten zoologischen Reise

in Grönland 1926. 5. *Plagiostomidæ* [*Resultatus ex zoologica navigatione in Groënlandiam, a. 1926 peracta a Fundatione* Rask Ørsted. *V. Plagiostomidæ*]. 21 Abb., 4 Taf., Vidensk. Medd. Dansk naturhist. Foren. i København, XCVII, 87-150. København (1933-34). **b - 822**

Allgemeiner Teil: Körpergestalt, Grösse, Farbe. Integument. Drüsen. Muskulatur. Mesenchym. Nervensystem. Sinnesorgane. Verdauungsapparat. Exkretionssystem. Geschlechtsorgane. System. Spezieller Teil: Bestimmungstabelle. Diagnose der 14 neuen Spezies. Literaturverzeichnis.

**Broeke (ten) J. M. A.** - Sipunculiden [*Sipunculidæ*]. Mém. Mus. R. Hist. Natur. Belgique, h. sér., Résult. Scient. du Voyage aux Indes Orient. Néerl. de LL. AA. RR. le Prince et la Princesse Léopold de Belgique, II, 13, 3-4. Bruxelles (1933). **b - 823**

*Physcosoma scolops* und *Ph. nigrescens*.

**Dons Carl** - Zoologiske Notiser. XXI. Systematiske og faunistiske bemerkninger om *Miroserpula inflata* [*Notitiæ zoologicæ. XXI. Miroserpula inflata. Observationes systematicæ et faunisticæ*]. 1 Abb., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 7, 24-27. Trondheim (1934). **b - 824**

Descrizione delle differenti parti del corpo di questa specie e confronto con *Chitinopoma* e *Hyalopomatus*.

**Elmhirst Richard** - Enteropneusts in the Clyde Sea-Area [*Enteropneusta in area marina fluminis* Clyde]. Nature, CXXXIV, 3379, 183. London (1934). **b - 825**

Unpublished records from the Clyde sea-area to extend the summary of the known distribution of British Enteropneusts given in Nature of June 16 by Prof. J. W. R. Brambell and H. A. Cole.

**Fauvel P.** - Sur les caractéres spécifiques des Syllidiens [*Syllidæ earumque caracteres speciales*]. Ann. Sc. Natur., Zool., X^e^ sér., XVII, 263-271. Paris (1934). **b - 826**

**Fauvel Pierre** - Polychètes nouvelles de l'Annam [*Polychæta nova ad* Annam *pertinentia*]. 3 fig., Bull. Mus. Nat. Hist. Natur., 2^e^ sér., VI, 1, 40-43. Paris (1934). **b - 827**

Diagnose, coloration, localités des deux nouvelles espèces: *Halosydna* (*Alentia*) *annamita* et *Nereis torta*.

**Fauvel Pierre** - Annélides polychètes (Mission Robert Ph. Dollfus en Egypte, Décembre 1927-Mars 1929) [*Annelida polychæta* (*Expeditio a* Robert Ph. Dollfus *suscepta in Aegyptum, a decembre 1927 ad mensem martium 1929*]. 6 fig., Mém. Inst. Egypte, XXI, 31-83. (1933). **b - 828**

Rapport sur 78 espèces recueillies principalement dans le Golfe de Suez et dans le Golfe d'Akaba, dont une variété est nouvelle: *Syllis depressa* v. *Dollfusi*.

**Fauvel Pierre** - Annélides polychètes de Rovigno d'Istria [*Annelida polychæta Arupinensia*] (En franç., rés. all.), 4 fig., Thalassia, I, 7, 1-78. Venezia (1934). **b - 829**

Dans cette étude des Annélides Polychètes recueillies par M. le Dr. A. Vatova à Rovigno et aux environs immédiats, 106 espèces, appartenant à 25 familles différentes, ont été brièvement décrites.

Cette faune renferme naturellement une grande majorité d'espèces déjà connues de la Méditerranée et de l'Adriatique, mais si aucune de ces espèces n'est nouvelle une dizaine d'entre elles, cependant, n'avaient pas encore été signalées en Méditerranée.

**Filipjev I. N.** - The Classification of the Free-living Nematodes and their Relation to the Parasitic Nematodes [*Nematodes liberi. Quæstio de distributione in classes deque eorum correlationibus cum nematodibus parasitis*]. 8 pl., Smiths. Miscell. Collections (Publ. 3216), LXXXIX, 6, 1-63. Washington, D. C. (1934). **b - 830**

Several opinions as to the position of the *Nematoda* in the animal kingdom. Characters that the class *Nematoda* possesses in addition to the chief characters shared with the other *Aschelminthes*. Present state of the classification of the free-living and parasitic *Nematoda* and their relation from a physiological point of view. The classification proposed by the A.

**Fujiwara Tsutomu** - On a New Species of Japanese *Polychæta*, *Travisia japonica* sp. nov. [*Travisia japonica species nova*]. 11 figs., 2 pl., Jour. Sc. Hiroshima Univ., Ser. B, Div. 1 (Zool.), II, 6, 91-103. Tokyo (1933). **b - 831**

**Gravier Ch. & Dantan J. L.** - Annélides polychètes recueillies au cours de pêches nocturnes à la lumière sur les côtes d'Annam [*Annelida polychæta collecta perdurantibus piscationibus nocturnis lucis auxilio, apud litora regionis* Annam]. 129 fig., Ann. Inst. Océanogr., XIV, 3, 37-136. Paris (1934). **b - 832**

Les Annélides Polychètes qui font l'objet de ce travail ont été recueillies dans les parages de Nhatrang, au voisinage de Cauda, siège de l'Institut Océanographique de l'Indochine. Cette collection comprend trois familles: celle des Néréidiens, celle des Syllidiens et celle des Polyophthalmiens. La plus largement représentée des trois est la première. Un certain nombre de membres de cette famille sont absolument cosmopolites. La détermination des formes hétéronéréidiennes est très difficile. La famille des Syllidiens est surtout représentée par des bourgeons sexués appartenant à divers genres et aussi par des stolons différents de la souche et à dimorphisme sexuel très accusé de la tribu des Autolytés. Parmi les Ophéliens, presque tous les individus capturés sont des Polyophthalmes qui offrent à considérer un polymorphisme déconcertant dans la pigmentation, ou bien de plus rares *Armandia*.

**Horst (van der) C. J.** - The Burrow of an Enteropneust [*Agitur de refugio cuiusdam vermis ad Enteropneusta pertinentis*]. 1 fig., Nature, CXXXIV, 3396, 852. London (1934). **b - 833**

The burrows of different species of Enteropneusts as described by various authors. The typical form of the burrow of *Saccoglossus inhacensis*, that is of a more permanent nature than is usually the case in *Enteropneusta*.

**Kato Kojiro** - Polyclad Turbellarians from the Neighborhood of the Mitsui Institute of Marine Biology [*Turbellaria polycladida collecta in propinquitatibus instituti* Mitsui Institute of Marine Biology]. 14 figs., 1 pl., Jap. Journ. Zool., Trans., VI, 1, 123-138. Tokyo (1934). **b - 834**

Locality, morphological features and reproductive organs are described for 16 species, 6 of which appear to be new.

**Kato Kojiro** - *Leptostylochus gracilis*, a New Polyclad Turbellarian [*Leptostylochus gracilis, species nova ad Turbellaria polycladida pertinens*]. 2 figs., Proc. Imp. Acad., X, 6, 374-377. Tokyo (1934). **b - 835**

Description of this new species, which was discovered underneath stones in somewhat brackish water on the shore near the Mitsui Institute of Marine Biology.

**Kükenthal Willy (Gegr. von)** - Handbuch der Zoologie: eine Naturgeschichte der Stämme des Tierreiches. Band 2: *Vermes Amera*, *Vermes*

*Polymera, Echiurida, Sipunculida, Priapulida* [*Manuale zoologicum. Historia naturalis animalium. Vol. 2: Vermes Amera, Vermes Polymera, Sipunculida, Priapulida*]. Hrsg. von Thilo Krumbach, 16, Teil 1, 193-320 + xiv, Walter de Gruyter und Co. Berlin und Leipzig (1933). **b - 836**

**Monro C. C. A.** - Notes on a Collection of *Polychaeta* from South Africa [*Polychæta. Notæ de collectione quadam ex Africa septentr. proveniente*]. 20 figs., Ann. and Magaz. Natur. Hist., XI, 64, 487-509. London (1933). **b - 837**

Descriptive data on *Amphinomidae, Polynoidae, Chrysopetalidae, Syllidae Nereidae, Glyceridae, Eunicidae, Lumbrineridae, Cirratulidae, Chlorhaemidae, Capitellidae, Maldanidae, Terebellidae, Sabellidae, Serpulidae* and *Sabellaridae.*

**Monro C. C. A.** - On a Collection of *Polychæta* from the Coast of China [*Polychæta. Collectio quædam e litoribus sinensibus proveniens*]. 10 figs., Ann. and Magaz. Natur. Hist., XIII, 75, 353-380. London (1934). **b - 838**

Description of 40 spp. (belonging to 17 families), the following of which are new: *Marphysa sinensis, Neoleprea amoyensis.*

**Naville A.** - Quelques formes épitoques d'Annélides polychètes nouvelles ou peu connues, pêchées à la lumière dans la Baie de Banyuls [*Annelida polychæta nova seu parum cognita, lucis auxilio in baja* Banyuls *capta. Formæ epitochæ*]. Ann. Sc. Natur., Zool., X$^e$ sér., XVI, 2, 169-208. Paris (1933). **b - 839**

**Okuda Shiro** - Some Polychaete Annelids used as Bait in the Inland Sea [*Annelida polychæta quibus ut esca utitur*]. 2 pl., Ann. Zool. Jap., XIV, 2, 243-253. Tokyo (1933). **b - 840**

In this paper 6 species belonging to 4 families are described. Distribution of *Halla parthenopeia*, which was found for the first time in the Pacific.

**Okuda Shiro** - The Polychaete Genus, *Acrocirrus* from Japanese Waters [*Polychæta generis «Acrocirrus» in aquis japonicis*]. 9 figs., Journ. Fac. Sc., Hokkaido Imp. Univ., Ser. 6, Zool., II, 4, 197-209. Sapporo (1934). **b - 841**

*Acrocirrus Uchidai* n. sp., *A. muroranensis* n. sp. and *A. validus.*

**Okuda Shiro** - Occurrence of *Priapulus caudatus* in Northern Japan [*Priapulus caudatus in Japonia septentrionali*]. 3 figs., Proc. Imp. Acad., X, 2, 115-116. Tokyo (1934). **b - 842**

Brief description of this species found in the vicinity of the Akkeshi Marine Biological Station.

**Okuda Shiro** - A New Species of Errantiate Polychaete, *Marphysa tamurai* n. sp. [*Polychæta errantia. De nova quadam specie: Marphysa tamurai*]. 9 figs., Proc. Imp. Acad., X, 8, 521-523. Tokyo (1934). **b - 843**

Description of the new species and remarks on its affinities.

**Reimers Hans** - Morphologie der Polychaetengattung *Sphaerodorum* [*De morphologia generis «Sphærodorum»*]. 45 Abb., Zool. Jahrb. Abt. Syst. Oekol. u. Geogr. Tiere, LXIV, 1, 41-110. Jena (1933). **b - 844**

Eingehende Beschreibung der verschiedenen Körperteile der *Sphaerodorum balticum* sowie der Segmentorgane der *Ephesia gracilis.* Vergleich zwischen diesen Gattungen und Erörterung ihrer systematischen Stellung.

**Rioja Enrique** - Consideraciones acerca de la sistemática de los géneros *Serpula, Crucigera* e *Hydroides* [*Considerationes de systematica generum: Serpula, Crucigera et Hydroides*]. 12 figs., Bol. Soc. Españ. Hist. Natur., XXXIV, 4/5, 205-209. Madrid (1934). **b - 845**

Differencias dos caracteres morfológicos que separan los géneros *Serpula, Crucigera* e *Hydroides* de la subfamilia *Serpulinae.* El opérculo y su simetria, como caracteres por la distinción de las especies.

**Rioja Enrique** - Una nueva especie del género *Aricia* (*A. cornidei* n. sp.) de la ria de Pontevedra (Anel. Pol.) [*Aricia cornidei species nova collecta ad accessum fluminis* Pontevedra]. 15 figs., Bol. Soc. Españ. Hist. Natur., XXXIV, 8/9, 433-438. Madrid (1934). **b - 846**

Descripción detallada de la nueva especie. Afinidades.

**Schuurmans Stekhoven J. H.** - Die Tierwelt der Nord- und Ostsee. Lief. 26, Teil 6. f. *Nematomorpha* [*De fauna Maris Nordici et Maris Baltici. Fasc. 26. Pars 6 f: Nematomorpha*]. Begr. von Grimpe G. und Wagler E.; Hrsg. von Grimpe G. Akad. Verlagsg. m. b. H. Leipzig (1934). **b - 847**

**Sprehn C.** - Die Tierwelt der Nord- und Ostsee. Lief. 26. Teil 4. $c_2$: *Cestoidea* [*De fauna Maris Nordici et Maris Baltici. Fasc. 26. Pars 4 $c_2$: Cestoidea*] Begr. von Grimpe G. und Wagler E; Hrsg. von Grimpe G., 61-92. Akad. Verlagsg. m. b. H. Leipzig (1934). **b - 848**

**Stephen A. C.** - The *Echiuridæ, Sipunculidæ,* and *Priapulidæ* of Scottish and Adjacent Waters [*Echiuridæ, Sipunculidæ et Priapulidæ ad Scotiam eiusque propinquitates pertinentes*]. Proc. R. Phys. Soc., XXII, 4, 159-185. (1934). **b - 849**

This study deals with the distribution of the species of these groups in Scottish area, with special reference to the genera: *Priapulus, Sipunculus, Phascolosoma* and *Echiurus,* that are of economic importance as food for several food Fishes.

**Treadwell Aaron L.** - New Polychaetous Annelids [*Annelida Polychæta nova*]. Reports on the Collections Obtained by the First Johnson-Smithsonian Deep-sea Expedition to the Puerto Rican Deep. 2 pl., Smiths. Miscell. Coll. (Publ. 3236), XCI, 8, 1-9. Washington, D. C. (1934). **b - 850**

The new species described in this paper are the following: *Melaenis tropicus, Eupholoe acuminata, E. cirrata, Hyalinoecia branchiata, Alciopa mutilata, Maldanella fimbriata.*

**Uchida Tohru** - Eine neue Urannelidenart *Polygordius pacificus* n. sp. [*Polygordius pacificus, species nova*]. 1 Abb., Proc. Imp. Acad., XI, 3, 119-120. Tokyo (1935). **b - 851**

Kurze Beschreibung einer neuen Urannelidenart *P. pacificus*, welche vom Vf. gelegentlich eines Aufenthaltes in der Biologischen Anstalt Misaki im feinen Sande an einem Ebbe-Strande erbeutet worden ist, und welche durch die eigentümliche Beschaffenheit des Pygidiums, sich von *P. ijimai* und von den anderen Arten derselben Gattung unterscheiden lässt.

**Wesenberg-Lund Elise** - The Scoresby Sound Committee's 2nd East Greenland Expedition in 1932 to King Christian IX's Land. Leader: Ejnar Mikkelsen. Gephyreans and Annelids [*De altera expeditione* East Greenland *nomine a Comitatu* Scoresby Sound *a. 1932 instructa ad Terram Regis Christiani IXi Duce* Ejnar Mikkelsen. *Gephyrea et Annelida*]. 9 figs., Medd. om Grønland, CIV, 14, 1-38. København (1934). **b - 852**

The Gephyreans of the present material comprise both Priapulids, Sipunculids and Echiurids. An interesting feature is that *Priapulus bicaudatus* is represented, as the finding place in Mikisfjord is considerably more southern than the finding places hitherto known in East Greenland.

As to the Annelids 36 species were found; the following three are not hitherto known from Greenland: *Pseudoscalibregma longisetosum, Lysilla Lovéni* and *Chone Dunéri.*

**Wheeler J. F. G.** - Nemerteans from the South Atlantic and Southern Oceans [*Nemertini Oceani Atlantici merid. aliorumque Oceanorum meridionalium*]. 2 pl., Discovery Rep. (Govmt. Depend. Falkland Isls.), IX, 215-294. Univ. Press. Cambridge (1934). **b - 853**

**Wülker G. & Schuurmans Stekhoven J. H. Jr.** - Die Tierwelt der Nord- und Ostsee. Lief. 25. Teil 5.a: *Nematoda* (Allgemeiner Teil) [*De fauna Maris Nordici et Maris Baltici. Fasc. 25. Pars 5 a: Nematoda* (*Generalia*)]. 64 S., Begr. von Grimpe G. und Wagler E. Hrsg. von Grimpe G., Akad. Verlagsg. m. b. H. Leipzig (1933). **b - 854**

## Echinodermata.

**Clark Austin H.** - A New Sea-urchin from Florida [*Echinus novus ex Florida*]. Journ. Wash. Acad. Sc., XXIV, 1, 52-53. Washington, D. C. (1934). **b - 855**

*Astropyga magnifica.*

**Clark Austin H.** - A Voracious Starfish [*Luidia clathrata vorax*]. Science, LXXIX, 2054, 432. New York (1934). **b - 856**

Record of a starfish with the rays 145 mm. long from the center of the disk that had swallowed a sand-dollar or key-hole Urchin (*Mellita quinquiesperforata*) 60 mm. in diameter, and apparently had died as a result of the operation.

**Clark Austin H.** - Two New Crinoids [*Crinoidea duo nova*]. Reports on the Collections Obtained by the First Johnson-Smithsonian Deep-sea Expedition to the Puerto Rican Deep, 2 pl., Smiths. Miscell. Coll. (Publ. 3231), XCI, 4, 1-5. Washington, D. C. (1934). **b - 857**

Of the two species described in this paper: *Psathyrometra acuta* and *Diplocrinus Carolinae*, the former heretofore was known only from the Indian and Pacific Oceans.

**Clark Austin H.** - A New Genus of Brittlestars [*Quironia Johnsoni n. gen. n. sp. ad* Puerto Rico *pertinens*]. Reports on the Collections Obtained by the First Johnson-Smithsonian Deep-sea Expedition to the Puerto Rican Deep, 1 pl., Smiths. Miscell. Coll. (Publ. 3248), XCI, 13, 1-3. Washington, D. C. (1934). **b - 858**

Diagnosis, locality, description of the species *Quironia Johnsoni* n. gen. n. sp., a curious ophiuran belonging to the family *Hemieuryalidae.*

**Clark Austin H.** - A New Starfish from Puerto Rico [*Odinia antillensis ad* Puerto Rico *pertinens*]. Reports on the Collections Obtained by the First Johnson-Smithsonian Deep-sea Expedition to the Puerto Rican Deep. 1 pl., Smiths. Miscell. Coll. (Publ. 3249), XCI, 14, 1-3. Washington, D. C. (1934). **b - 859**

Detailed description of the new species: *Odinia antillensis.* The discovery of this species in the West Indian region is especially interesting as the family *Brisingidae* is known from the Caribbean region only from the single somewhat problematic species *Hymenodiscus.*

**Collin L.** - Curieuse photographie d'Oursins [*Echinorum photographia quædam notanda*]. 1 fig., Bull. Soc. Océanogr. France, XIII, 72, 1277. Paris (1933). **b - 860**

Description d'une curieuse photographie représentant une colonie de *Strongylocentrotus lividus-Toxocidaris livida* habitant une petite mare au nord de la grève du Riz, près de Douarnenez.

**Engel H.** - Holothuries [*Holothuriæ*]. 25 fig., 1 pl., 6 cartes, Mém. Mus. R. Hist. Natur. Belgique, h. sér., Résult. Scient. du Voyage aux Indes Orient. Néerl. de LL. AA. RR. le Prince et la Princesse Léopold de Belgique, III, 13, 1-42. Bruxelles (1933). **b - 861**

La collection suivante a été étudiée par l'A.: *Holothuria atra, H. vitiensis, H. monacaria; Stichopus variegatus; Pseudocucumis quinquangularis, P. africanus.* Il fait la description des animaux récoltés, une revision des *Pseudocucumis* et l'étude de leur distribution dans le monde.

**Engel H.** - Über Echinodermen aus der Nordsee und dem Nordatlantik [*Echinodermata Maris Nordici et Oceani Atlantici septentr.*]. Zool. Anz., CVII, 23-30. Leipzig (1934). **b - 862**

**Gislén Torsten** - A Small Collection of Crinoids from St. Helena (Papers from Dr. Th. Mortensen's Pacific Expedition, 1914-16, 67) [*Crinoidea. Collectio parva ex insula Sct. Helenæ proveniens*]. 9 figs., 1 pl., Vidensk. Medd. Dansk Naturhist. For. København, XCIII, 475-485. København (1933). **b - 863**

*Crinometra transversa* and *Monachocrinus incrassatus.*

**Gopola Aiyar R. & Krishma Menon M.** - Observations on the Spicules of *Salmacis bicolor* (Agassiz) and *Stomopneustes variolaris* (Lamarck) (*Echinoidea*) [*Observationes de spiculis specierum* « *Salmacis bicolor* » (Agassiz) *et* « *Stomopneustes variolaris* » (Lamarck)]. Ann. & Magaz. Natur. Hist., 10th ser., XIII, 468-473. London (1934). **b - 864**

**Heding S.** - On Some Holothurians from Hong Kong [*Holothuriæ quædam ex* Hong Kong]. 5 figs., 1 pl., Hong Kong Natural., Suppl., 3, 15-25. (1934). **b - 865**

*Colochirus crassus* v. *dyscritus; Phyllophorus cornus; Halodeima dicorona.*

**Heding S. G.** - On a New Dendrochirote Holothurian from off Timor [*De holothuria quadam nova ad familiam* « *Dendrochirotae* » *pertinente longe a litoribus insulae* Timor]. 2 figs., 1 pl., Ann. & Magaz. Natur. Hist., XIII, 76, 456-464. London (1934). **b - 866**

*Psolicucumis apneumona.*

**Livingstone Arthur A.** - Some Genera and Species of the *Asterinidæ* [*Asterinidæ. Nonnulla genera et species*]. 5 pl., Rec. Austral. Mus., XIX, 1, 1-20. Sydney (1933). **b - 867**

**Livingstone Arthur A.** - A New *Mediaster* from Queensland [*Mediaster novus ex* Queensland]. 1 pl., Rec. Austral. Mus., XIX, 1, 21-22. Sydney (1933). **b - 868**
*M. praestans.*

**Mortensen Th.** - On an Extraordinary Ophiurid, *Ophiocanops fugiens* Koehler. With Remarks on *Astrogymnotes, Ophiopteron,* and on an Albino *Ophiocoma.* (Papers from Dr. Th. Mortensen's Pacific Expedition 1914-16, 60) [*Ophiocanops fugiens* Koehler *extraordinarius. Adiunguntur observationes de generibus « Astrogymnotes », « Ophiopteron » et « Ophiocoma » albino*]. 16 figs., 1 pl., Vidensk. Medd. Dansk Naturhist. For. København, XCIII, 1-22. København (1932). **b - 869**
The genus is made type of the fam. *Ophiocanopidae* which stands apart in the *Ophiurida.* Synonymes and emendments of *Astrogymnotes* Clark. Description of an albino *O. scolopendrina.*

**Mortensen Th.** - *Ophiuroidea.* 52 figs., 3 pl., The Danish Ingolf-Exped. (Direction Zool. Mus. Univ.), IV, 8, 1-122. Copenhagen (1933). **b - 870**
Report on 61 spp. belonging to 11 families, 30 genera, collected in the N. Atlantic from the Faroes to Davis Strait. A tabular discussion of the distribution of the *Ophiuroidea* in the N. Atlantic is given. The following species are new : *Ophiacantha spinosella, O. cuspidata* (*Ophiotreta*) *danae, O. hamula, Amphilepis ingolfiana, Ophiopyren striatum, Nidrosia ophiurae* (embryo state), *Ophiura albida* v. *tuberculosa, O. nitida, O. irrorata* v. *polyacantha.*

**Mortensen Th.** - Biological Observations on Ophiurids, with Descriptions of two New Genera and four New Species (Papers from Dr. Th. Mortensen's Pacific Expedition 1914-16, 63) [*Ophiuroidea. Observationes biologicæ et descriptio duorum generum novorum et specierum novarum quattuor*]. 7 figs., 1 pl., Vidensk. Medd. Dansk Naturhist. For. København, XCIII, 171-195. København (1933). **b - 871**
*Nannophiura* n. gen. type *N. lagani* n. sp., *Amphiodia dividua* n. sp., *Amphilycus* (resembling *Amphiopholis*) n. gen., type *A. androphorus, Ophionereis vivipara* n. sp. A list is given of all known viviparous Ophiurids with their sexual characters.

**Mortensen Th.** - Echinoderms of South Africa (*Asteroidea* and *Ophiuroidea*) (Papers from Dr. Mortensen's Pacific Expedition 1914-16, 65) [*Echinodermata ad Africam Merid. pertinentia.* (*Asteroidea et Ophiuroidea*)]. 91 figs., 12 pl., Vidensk. Medd. Dansk Naturhist. For. København, XCIII, 215-400. København (1933). **b - 872**
A tabular survey of all the *Asteroidea* and *Ophiuroidea* occurring in S. African seas from Natal to Lüderitz Bay. Of the total number of Asteroids now known from that region, no less than 58 are known from nowhere else, and of the Ophiurids 56 of the total number of 82 are unknown elsewhere.

**Mortensen Th.** - The Echinoderms of St. Helena (other than Crinoids) (Papers from Dr. Th. Mortensen's Pacific Expedition 1914-16, 66) [*Echinodermata ad insulam Sct. Helenæ pertinentia, Crinoideis exceptis*]. 38 figs., 3 pl., map, Vidensk. Medd. Dansk Naturhist. For. København, XCIII, 401-472. København (1933). **b - 873**
Brief review of earlier records and list of 39 known species. Description of the waters adjacent to the island and analysis of the echinoderm fauna of the coast and coastal plateau. The following spp. are new : *Astropecten sanctae-helenae, A. variegatus, Luidia aciculata, Narcissia trigonaria* v. *helenae, Linckia formosa, Ophiacantha prolata, O. nitens, O. trivialis O. helenae, Ophiopyren atlanticum, Ophiophycis gracilis, Ophiomusium spinigerum, Echinocardium connectens.*

**Mortensen Th.** - Studies of Indo-Pacific Euryalids. [*De Euryalidis ad Oceanum Pacificum Oceanumque Indicum pertinentibus*]. 57 figs., 5 pl., Vidensk. Medd. Dansk Naturhist. For. København, XCVI, (Festskr.) II, 1-76. København (1933). **b - 874**
Discussion of different families of Euryalids. The following forms are new : *Astrothrombus chrysanthi* v. *ornatus, Astrothorax.* Key to 6 spp. : *A. misakiensis* v. *balinensis, A. tesselata, Astrochele pacifica, Astrohelix bellator* v. *paucidens, Astroglymma robillardi* v. *spinosum, Astroceras.* Diagnosis and key to spp. : *A. pergamenum* v, *granulatum, A. annulatum, A. annulatum* v. *gemmiferum ; Astroscolex* n. subg. ; *Ophiuropsis lymani* v. *simplex.*

**Mortensen Th.** - Echinoderms of Hong Kong [*Echinodermata ex* Hong Kong *provenientia*]. 9 figs., 8 pl., Hong Kong Natural., Suppl., 3, 3-14. Hong Kong (1934). **b - 875**
A list of Echinoderms previously recorded from Hong Kong is given. Twenty species are described as new to the region.

**Onoda Katsuzo** - On the Orientation of the Regular Sea-urchin *Heliocidaris crassispina* [*Heliocidaris crassispina. Quaestio de orientatione*]. 6 figs., Jap. Journ. Zool., V, 2, 159-164. Tokyo (1933). **b - 876**
Experimental results obtained by the author prove that there is a definite locomotory orientation in Spatangoids as well as in *H. crassispina.*

**Tortonese Enrico** - La conoscenza anatomica dei Clipeastridi, con note sul *Laganum laganum* (Leske) [*Clypeastridae. Quæstio de earum notione anatomica, cum notis de specie «Laganum laganum»*]. 4 fig., Boll. Zool., IV, 4, 139-147. Napoli (1933). **b - 877**
Note anatomiche comparative e loro importanza per la comprensione dell'affinità tra i vari generi di Clipeastridi per una loro più esatta suddivisione in specie.

**Tortonese Enrico** - I Crinoidi attuali e la loro diffusione [*Crinoidea hodierna eorumque propagatio*]. Natura (Riv. Sc. Natur.), XXIV, 4, 159-167. Milano (1933). **b - 878**
Breve storia dei Crinoidi dal periodo Cambriano ad oggi, con cenno dei primi autori che se ne sono occupati. L'importanza biologica dei Crinoidi non è inferiore a quella paleontologica, poichè il numero di generi e di specie viventi è molto superiore a quanto si ritiene di solito. Notizie sulla distribuzione batimetrica e geografica dei Crinoidi.

**Tortonese Enrico** - Echinodermi del Mar Ligure [*Echinodermata Maris Ligustici*]. Atti Soc. Ital. Sc. Natur. e Mus. Civico Stor. Natur., LXXIII, 3, 213-227. Milano (1934). **b - 879**
Studio biologico e sistematico della fauna echinologica del Mar Ligure. Sono comprese forme appartenenti agli Asteroidi, Ofiuroidi, Echinoidi, Oloturoidi e Crinoidi.

## Mollusca.

**Adam W.** - *Cephalopoda.* 15 fig., Mém. Mus. R. Hist. Natur. Belgique, h. sér., Résult. Scient. Voyage aux Indes Orient. Néerl. de LL. AA. RR. le Prince et la Princesse Léopold de Belgique, II, 16, 1-28. Bruxelles (1934). **b - 880**

*Nautilus pompilius, N. umbilicatus, Spirula spirula, Sepia officinalis, S. rostrata, Loligo duvaucelii, Sepioteuthis lessoniana, Octopus rugosus, O. horridus, O. globosus, O. teuthoides, O.* sp. A., *O.* sp. B, *O.* sp. C.

**Allan Joyce K.** - Opisthobranchs from Australia [*Opisthobranchia ex Australia provenientia*]. 1 pl., Rec. Austral. Mus., XVIII, 9, 443-450. Sydney (1933). **b - 881**

New species: *Aglaia taronga, A. sanguinea, Pleurobranchaea dorsalis, Dendrodoris davisi, D. albobrunnea, Discodoris palma,* and *Nembrotha livingstonei.*

**Alpers Fr.** - Beitrag zur Kenntnis der Lebensweise von *Murex* [*Contributio in biologiam generis « Murex » cognoscendam*]. Pubbl. Staz. Zool. Napoli, XIII, 2, 163-171. Napoli (1934). **b - 882**

Beobachtungen über den Fressakt der *Murex brandaris, Murex trunculus* und *Murex erinaceus* in dem Golf von Neapel, welche mit *Natica josephina, Mytilus edulis, Ostrea edulis, Nassa mutabilis, Aplysia depilans, Loligo vulgaris* u. a. gefüttert wurden.

**Archer Allan F.** - A New Variety of *Viviparus contectoides* (W. G. Binn), from Jackson Co., Florida [*Varietas nova speciei « Viviparus contectoides »* (W. G. Binn) *ex* Jackson Co. *in Florida proveniens*]. 3 figs., Nautilus, XLVII, 1, 18-20. Philadelphia (1933). **b - 883**

*Viviparus contectoides* v. *Goodrichi.*

**Bartsch Paul** - A Note on *Ryssota* (*Lamarckiella*) *oweniana* Pfeiffer [*Nota de Ryssota* (*Lamarckiella*) *oweniana* Pfeiffer]. Nautilus, XLVI, 3, 105-106. Philadelphia (1933). **b - 884**

Key to 3 subspecies.

**Bartsch Paul** - New Mollusks of the Family *Turritidae* [*Mollusca nova ad familiam « Turritidae » pertinentia*]. 8 pl., Reports on the Collections Obtained by the First Johnson-Smithsonian Expedition to the Puerto Rican Deep. - Smiths. Miscell. Coll. (Publ. 3229), XCI, 2, 1-29. Washington, D. C. (1934). **b - 885**

6 new genera and 21 new species are described in this paper.

**Bergenhayn J. R. M.** - Eine neue *Cryptoplax*-Art aus dem ostindischen Inselmeer [*Nova quædam species generis « Cryptoplax » ad Archipelagus Indiarum orientalium pertinens*]. 1 Taf., Zool. Anz., CIV, 5/6, 157-161. Leipzig (1933). **b - 886**

*Cryptoplax mjöbergi* n. sp.

**Boutan Louis** - Quelques idées générales sur le groupe des Mollusques et sur la répartition océanographique des Céphalopodes dans l'espace et dans le temps [*Mollusca. Generalia. Cephalopoda. Quæstio de distributione oceanographica quoad spatium quoad tempus*]. 18 fig., Bull. Trav. Stat. Aquicult. et Pêche Castiglione 1932, 2, 9-67. Alger (1934). **b - 887**

Les tendances scientifiques actuelles dans les Sciences Naturelles. Comparaison des Mollusques et des Vertébrés; caractères des Mollusques. Différences des restes fossiles des Vertébrés et des Mollusques. Le Nautile. La Spirule. L'Argonaute. Les autres Céphalopodes. Les Céphalopodes fossiles. Quelques réflexions sur les hypothèses et en particulier sur celles qui ont trait à l'origine de la vie à la surface du globe.

**Buddendrock (von) W.** - Beobachtungen über nesselnde Tintenfische [*Inquisitiones in Cephalopoda urticantia*]. Biol. Ztrbl., LIV, 284-287. Leipzig (1934). **b - 888**

*Zachsia*, neue Gattung für *Z. zenkewitschi* und *Z. lignaui.*

**Coen Giorgio** - Saggio di una Sylloge Molluscorum Adriaticorum [*Sylloge Molluscorum Adriaticorum. Exemplum*]. 10 tav., Mem. R. Comit. Talassogr. Ital., No. CXCII, viii + 229 pp. Venezia (1933). **b - 890**

Saggio sulla fauna di Molluschi adriatici rilevato dal materiale raccolto nel Museo Civico di Storia Naturale in Venezia, (costituito da quattro importantissime collezioni: Spinelli, A. P. Ninni, Stalio, Adriatica e da una quinta raccolta personale dell'A.), dal materiale esaminato nel Museo Civico di Storia Naturale di Milano, nel Gabinetto del Seminario Vescovile di Chioggia, con l'aggiunta dei nomi di quelle specie non riscontrate in queste raccolte e citate come adriatiche in opere classiche sulla malacofauna adriatica, e corredato di osservazioni sul habitat e sulla sinonimia delle specie.

**Corea Lois F.** - New Marine Mollusks [*Mollusca marina nova*]. Reports on the Collections Obtained by the First Johnson-Smithsonian Deep-sea Expedition to the Puerto Rican Deep, 3 pl., Smiths. Miscell. Coll. (Publ. 3258), XCI, 16, 1-9. Washington, D. C. (1934). **b - 891**

The present paper deals with a small well-defined group consisting of six species which appears to be unnamed and to which is here given the name *Buchema*, a new subgenus of *Carinodrillia* Dall.

**Cotton Bernard C.** - *Pelecypoda* of the Flindersian Region, Southern Australia [*Pelecypoda ex regione* Flindersian *provenientia in Australia meridionali*]. 7 figs., Rec. South Austral. Mus., V, 2, 173-178. Adelaide (1934). **b - 892**

The species listed in this paper belong to the following families: *Veneridae, Petricolidae, Tellinidae, Semelidae, Garidae, Solenidae, Donacidae, Mactridae, Amphidesmatidae, Hiatellidae, Gastrochaenidae, Teredidae. Circe weedingi, Gastrochaena frondosa* and *Bankia Gabrieli* are described as new.

**David Lore** - Zoologische Ergebnisse der Reisen von Dr. Kohl-Larsen nach den Subantarktischen Inseln bei Neuseeland und nach Südgeorgien [*Resultatus zoologici expeditionum a D.* Kohl-Larsen *peractarum in insulas sub-antarcticas præter Novam Zelandiam et Georgiam meridionalem*]. 6 Abb., Senckenbergiana, XVI, 2/3, 126-137. Frankfurt a. M. (1934). **b - 893**

Verzeichnis mit Angabe von Fundort, und Beschreibung der bedeutendsten Formen von Mollusken, Loricaten, Gastropoden, Bivalven von Südgeorgien, Stewart Insel und Campbell-Insel. Zu Thiele's (1912 S. 256) Bemerkungen über die antarktischen Schnecken und Muscheln ist nichts wesentlich Neues hinzugefügt.

**Davies A. M.** - The Bases of Classification of the *Lamellibranchia* [*Lamellibranchiata. Fundamenta ad instituendam distributionem in classes*]. Proc. Malacol. Soc. London, XX, 6, 322-326. London (1933). **b - 894**

**Dons Carl** - Zoologiske Notiser XVIII. Om utbredelsen av *Hanleya nagelfar* [*Notitiæ zoologicæ. XVIII. De distributione speciei « Hanleya nagelfar »*] 3 figs., Kongel. Norsk. Vidensk. Selsk. Forh., V, 39, 151-153. Trondheim (1393). **b - 895**

Short note on 5 specimens of *Hanleya nagelfar* and one of *Hanleya abyssorum* with table indicating locality, length, anterior and posterior valves of these species.

**Forrest J. E., Waterston A. R. & Stephen A. C.** - Scottish Records of Cephalopods [*Notitiæ de Cephalopodis Scotis*]. Scottish Natural., 205, 29. Edinburgh (1934). **b - 896**

**Frost N.** - Notes on a Giant Squid (*Architeuthis* sp.) Captured at Dildo, Newfoundland in December, 1933 [*« A. Harveyi » gigas in Dildo (Terranova) captus mense Decembri 1933*]. 5 figs., 3 pl., Rep. Newfoundland Fish. Res. Comm., Ann. Rep., II, 2, App. C., 100-113. Plymouth (1934). **b - 897**

Synopsis of previous records of capture of giant Cephalopods in Newfoundland waters. Description of the giant squid captured at Dildo, Trinity Bay, Newfoundland. Brief description of particular organs: caudal fin, eyes, tentacular arms, sessile arms, radula, internal organs, pigmentation. Discussion of species: differences between *Architeuthis Harveyi* and *A. princeps*.

**Frost N. & Thompson H.** - Hydrographic and Biological Investigations. C. Squid [*Loligines*]. 1 map, Rep. Newfoundland Fish. Res. Comm., Ann. Rep., II, 2, 59-64. Plymouth (1934). **b - 898**

Distribution in the Newfoundland waters of *Illex illecebrosus*, and *Gonatus fabricii*.

**Graham Alastair** - The Structure and Relationships of Lamellibranchs Possessing a Cruciform Muscle [*Lamellibranchiata musculo cruciformi prædita. Quæstio de structura et affinitate*]. 13 figs., Proc. R. Soc. Edinburgh, 1933-34, LIV, 2, 158-187. Edinburgh (1934). **b - 899**

Comparative description of the anatomy of the five following Bivalves belonging to the *Tellinacea: Gari tellinella, Tellina crassa, Macoma balthica, Scrobicularia plana*, and *Donax vittatus*. Description of one member of the *Solenidae, Cultellus pellucidus*. Anatomy of two members of the *Solecurtidae, Solecurtus scopula* and *S. chamasolen*. On the basis of these descriptions the family *Solecurtidae* is shown to be more properly classified with the tribe *Tellinacea* than with the *Solenidae*. The relationships of the above Lamellibranchs are discussed.

**Grimpe G.** - Studien über die Cephalopoden des Sundagebietes. I. Zur Kenntnis der Gattung *Loliolus* Steenstrup 1856 [*Cephalopoda in regione nomine* Sunda. *I. Inquisitiones ad genus « Loliolus »* Steenstrup *1856 cognoscendum*]. 8 Abb., 1 Taf., Jenaische Ztschr. Naturwiss. (Festschr. Ludwig Plate), LXVII, 469-486. Jena (1932). **b - 900**

Weitläufiger Bericht über die Morphologie und Systematik von *Loliolus typus*, für welche den Namen *L. buitendijki* n. sp. s. subsp.. vorgeschlagen wird, da ein gewisser Zweifel in Bezug auf die Identität und die Lage des Originales *L. typus* vorliegt. Neues über die Taxonomie der Familie *Loliginidae*.

**Hertlein Leo George** - Three preoccupied Names in *Pectinidæ* [*Pectinidae. Quaestio de tribus nominibus quibus jam usum est*]. Nautilus, XLVII, 2, 62-64. Philadelphia (1933). **b - 901**

*Pecten waluensis* (*P. thomasi* Mansfield, preocc.), *P. suteri* (*P. radiatus* Hutton, preocc.), *P. vaun* v. *wythei* (/*P. vaun flabellum*, Cooke preocc.).

**Hertling H.** - Kamm-Muscheln bei Helgoland [*Pectinidæ ad regionem* Helgoland *pertinentes*]. 7 Abb., Natur u. Volk, LXIV, 9, 355-362. Frankfurt a. M. (1934). **b - 902**

*Pecten maximum, P. jacobaeus, Chlamys opercularis* (L.), *Ch. varia* (L.), *Ch. tigerina*. Bewegungs- und Ruhestellungen, verschiedene Arten von Fortbewegung; Körperbau: Augen und ihre Funktion; Lebensweise und Habitat. Bibliographie.

**Kuroda Tokubei & Kikuchi Kanzaemon** - Studies on the Molluscan Fauna of Toyama Bay. 1 [*Studia faunæ Molluscorum Bajæ* Toyama] (In Jap., Engl. Rés.). 4 figs., 1 pl., 1 map, Venus, IV, 1, 1-14. Kyoto (1933). **b - 903**

Description of forms inhabiting the calcareous sandy rocks of the tidal zone of the western shore; of the common littoral species of the southern and western coasts of Honshû, Shihoku and Kyûshû. Notes on 8 species of *Dentalium*, four of which are new.

**Labbé Alphonse** - Les Silicodermés Labbé du Muséum d'Histoire Naturelle de Paris. Première partie : Classification, formes nouvelles ou peu connues [*Silicodermata* Labbé *ad* Muséum d'Histoire Naturelle de Paris *pertinentia. Pars Iª : systematica, formæ novæ et parum cognitæ*]. 81 fig., Ann. Inst. Océanogr., XIV, 5, 173-246. Paris (1934). **b - 904**

Après avoir résumé brièvement la morphologie externe et interne des Silicodermés et discuté sur leur classification, l'A. décrit en détail les spécimens du Muséum.

On a pu constater que cette collection est très riche et intéressante parce qu'elle présente un grand nombre de Dendrobranchiés, qui sont presque inconnus des auteurs qui ont étudié les Oncidiadés.

**Labbé Alphonse** - Opisthobranches et Silicodermés (Oncidiadés) [*Opisthobranchia et Silicodermata*]. 39 fig., 1 pl., Mém. Mus. R. Hist. Natur., h. sér., Résult. Scient. Voyage aux Indes Orient. Néerl. de LL. AA. RR. le Prince et la Princesse Léopold de Belgique, II, 14 (1), 1-83. Bruxelles (1934). **b - 905**

La collection étudiée par l'A. comprend : deux Tectibranches, dont l'espèce *Xanthonella* (*Phanerophtalmus*) *Engelii*, est nouvelle ; un nudibranche ; un prosobranche diotocarde ; sept espèces d'Oncidiadés, dont trois nouvelles : *Oncidium Leopoldi, O. Straelenii, O. Astridae*.

L'A. fait un exposé sommaire au sujet du sous-ordre des *Silicodermatae* nov., pour préciser les principaux traits de leur organisation et pour souligner un certain nombre de données nouvelles.

**Lamy Ed.** - Coquilles marines recueillies par M. E. Aubert de la Rüe dans l'Amérique du Sud [*Conchæ marinæ collectæ ab* E. Aubert de la Rüe *in America meridionali*]. 1 fig., Bull. Mus. Nat. Hist. Natur., 2e sér., VI, 5, 432-435. Paris (1934). **b - 906**

Liste des Coquilles recueillies en trois points : dans le Pacifique sur la côte de Colombie, dans l'Atlantique à Wilhemstaad (île de Curaçao) et à Cristobal [Colon] (isthme de Panama). Description détaillée et illustration de la nouvelle espèce *Drillia Auberti* n. sp.

**Leloup E.** - Amphineures [*Amphineura*]. 2 pl., Mém. Mus. R. Hist. Natur. Belgique, h. sér., Résult. Scient. du Voyage aux Indes Orient. Néerl. de LL. AA. RR. le Prince et la Princesse Léopold de Belgique, II, 13, 15-33. Bruxelles (1933). **b - 907**

Les Amphineures, recueillis aussi bien sur les côtes baignées par l'Océan Indien que sur les côtes des îles de l'Océan Indo-Pacifique, appartiennent à huit espèces réparties en six genres différents. *Acanthochites Leopoldi* est une espèce nouvelle.

**Leloup E.** - Contributions à l'étude de la faune belge. IV. Les Polyplacophores de la côte Belge [*Contributiones ad faunam belgicam studendam. IV. Polyplacophora e litoribus belgicis*]. 1 carte, Bull. Mus. R. Hist. Natur. Belgique, X, 17, 1-23. Bruxelles (1934). **b - 908**

Les Chitons étudiés appartiennent à quatre espèces arctiques : *Lepidopleurus asellus, L. cancellatus ; Trachydermon cinereus* et *T. albus*.

Pour chaque espèce l'A. donne : bibliographie, origine et matériel, distribution géographique.

**Løyning Paul** - *Loricata* and *Gastropoda* from the Siberian Arctic Ocean [*Loricata et Gastropoda in Oceano Arctico siberiano*]. 4 figs., 2 pl., Norw. North Polar. Exped. « Maud » 1918-1925, Scient. Res., V, 14, 1-20. (1932). **b - 909**

List of 16 spp. New species : *Buccinum totteni* v. *crassisculpta, Neptunea satura* v. *elongata, Anomalisipho conulus* monstr. *reversa*, and *Bela nobilis* v. *brevispira*.

**Nomura Stihei & Tunoda Haruhiko** - Recent *Mollusca* from Onahama, Hukusima-Ken [*Mollusca recentiora ex* Onahama (Hukusima-Ken *in Japonia*) *provenientia*] (In Jap.). Saitô Hô-on Kw. Hak. Zikô Tok., 1-19. (1933). **b - 910**

The present paper deals with : 91 species of *Pelecypoda*, 101 of *Gastropoda*, 5 of *Amphineura*, 9 of fresh-water and 3 of land Mollusks.

**Odhner Nils H.** - The *Nudibranchiata*. 3 pl., Brit. Antarctic (Terra Nova) Exped., 1910, Natur. Hist. Rep., Zool., VII, 5, 229-310. Brit. Mus. (Natur. Hist.). London (1934). **b - 911**

The Nudibranchs are divided by the A. into four groups: *Doridacea, Arminacea, Eolidacea* and *Dendronotacea*. One new genus and nine new species are described. Consideration about the gills of a new species of *Bathydoris*.

**O'donoghue C. H.** - Kelaart's Work on *Nudibranchiata* of Ceylon [*Nudibranchiata ceylonensia. Opus a* Kelaart *peractum*]. 1 pl., Proc. Malacol. Soc. London, XX, 4, 221-226. London (1933). **b - 912**

A critical study of 8 papers with a copy of the plates.

**Okada Yaichirô & Fujita Tadashi** - Distribution of Japanese *Turbo* Shells [*De distributione specierum japonensium ad genus « Turbo » pertinentium*] (In Jap.). 9 figs., 1 map, Venus, IV, 2, 101-113. Kyoto (1933). **b - 913**

19 species and 3 subspecies of Japanese *Turbo* are described and notes on their distribution given.

**Otuka Yanosuke** - Description of a New *Dentalium* from Southern Japan [*De specie nova ad genus « Dentalium » pertinente ex Japonia merid.*]. 6 figs., Venus, IV, 3, 159-161. Kyoto (1933). **b - 914**

*Dentalium (Antalis) Marukawai*, n. sp.

**Parenzan Pietro** - Revisione delle specie mediterranee del genere *Astropecten* [*Recognitio specierum mediterranearum ad genus « Astropecten » pertinentium*]. 10 fig., Boll. Zool., V, 6, 201-222. Napoli (1934). **b - 915**

L'A. passa in rivista le specie mediterranee del genere *Astropecten* e stabilisce una netta distinzione dell'*A. myosurus* Perrier, considerato finora come semplice varietà dell'*A. bispinosus* per insufficienza di caratteri distintivi costanti. Mette in evidenza importanti anomalie strutturali in esemplari di *A. irregularis* var. *pentacanthus*, anomalie che corrispondono al carattere specifico della forma chiamata *A. irregularis* var. *serratus* dell'Atlantico. Egli presenta infine una chiave analitica per la determinazione delle specie mediterranee e dà notizie sulla loro ecologia.

**Phillips J. B.** - Description of a Giant Squid Taken at Monterey, with Notes on Other Squid Taken off the California [*Loligo gigas apud* Monterey *captus. Descriptio cum notis de aliis « Loligo » longe a litoribus Californianis captis*]. Calif. Fish and Game, XXIX, 2, 128-136 (1933). **b - 916**

**Pilsbry H. A. & Aguayo C. G.** - Marine and Freshwater Mollusks new to the Fauna of Cuba [*Mollusca marina et Mollusca aquæ dulcis nova in fauna insulæ* Cuba]. Nautilus, XLVI, 4, 116-123. Philadelphia (1933). **b - 917**

Topical list.

**Powell A. W. B.** - The High-tidal *Mollusca* of Rangitoto Island, Auckland ; with Descriptions of a New Genus and two New Species [*Mollusca ad insulam* Rangitoto *pertinentia, tempore maris accessus. Descriptio novi cuiusdam generis duarumque novarum specierum*]. 7 figs., Trans. & Proc. New Zealand Inst., LXIII, 2, 144-153. Wellington, N. Z. (1933). **b - 918**

*Rangitotoa* n. gen. with the sp. *R. insularis*, n. sp. and *Kellia maoria* n. sp.; 6 other spp. are described with indications of the spp. they are feeding on.

**Powell A. W. B.** - Two New Molluscs of the *Pectinidae* from 600 to 700 Fathoms, four hundred Miles west of New Plymouth [*Mollusca duo nova ad familiam Pectinidarum pertinentia quæ jacent in profunditatem 600-700 brachiarum*]. 1 pl., Trans. & Proc. New Zealand Inst., LXIII, 3, 370-372. Wellington, N. Z. (1933). **b - 919**

*Palliolum fosterianum* and *Chlamys kiwaensis*.

**Pruvot-Fol A.** - *Opisthobranchiata*. (Mission Robert Ph. Dollfus en Egypte, Décembre 1927-Mars 1929). Mém. Inst. Egypte, XXI, 89-160. (1933). **b - 922**

Les formes suivantes sont nouvelles : *Phyllobranchillus orientalis ; Armina Semperi* v. *erythraea, Goniodoridella Savi-*

*gnyi, Archidoris O'Donoghuei, Glossodoris quadricolor, G.* (?) *albomaculata* v. *erythraea, G. Dollfusi, Spongiodoris rigida, Erythrodoris Dollfusi, Phyllodesmium bellum* (*Eolidia bella* Rüpp. et Leuck. = *P. hyalinum* Ehrbg.).

**Richardson Frank** - Diurnal Movements of the Limpets *Lottia gigantea* and *Acmaea persona* [*De motibus diurnis specierum* « *Lottia gigantea* » *et* « *Acmaea persona* »]. Journ. Entomol. & Zool., XXVI, 4, 53-55. Claremont, Calif. (1934). **b - 923**

The objects of this study were several: first, to consider, the natural daily movements of the Limpets in question; second, to see if any action of the Limpets might be homologous or analogous to the homing instinct of bird; and finally, if the Limpets have any attachment, instinctive or otherwise, for a definite spot or region and if so what determining factors are involved.

**Schenck Hubert G.** - Classification of Nuculid Pelecypods [*Pelecypoda nuculidæ eorumque distributio in classes*]. 7 tabl., 5 pl., Bull. Mus. R. Hist. Natur. Belgique, X, 20, 1-78. Bruxelles (1934). **b - 924**

Review of the literature. Taxonomic units eligible for selection as members of the family *Nuculidae*. Definition of the family *Nuculidae*. Size of the family *Nuculidæ*. List of names that have been used with generic name *Nucula*. What is a family?

**Schindewolf O. H.** - Concerning the Evolution of the *Cephalopoda* [*De evolutione Cephalopodorum*]. Biol. Rev., IX, 4, 458-459. London (1934). **b - 925**

The A. answers to the criticism made by Spath in his article on « The Evolution of the *Cephalopoda* » (Biol. Rev., VII, 1933) and lists the principal conclusions of his investigations contrary to those arrived at by Spath.

**Stevenson J. A.** - Occurrence of Squids at St. Andrews [*De specie* « *Loligo pealii* » *in regione* St. Andrews]. Ann. Rep. Biol. Board Canada, 1933, 36. Ottawa (1934). **b - 926**

Results of observations on the occurrence and the size of *L. pealii* taken by the Biological Station weir during the summer 1933, and on the occurrence of the cestode parasite, *Phyllobothrium loliginis*, in the alimentary tracts of the squids.

**Strong A. M., Hanna G. D. & Hertlein L. G.** - The Templeton Crocker Expedition of the Academy of Sciences, 1932. Marine *Mollusca* from Acapulco, Mexico, with Notes on other Species [*De expeditione* Templeton Crocker *ab Academia Scientiarum a. 1932 peracta. Mollusca marina ex* Acapulco *in Mexico, cum notis de aliis speciebus*]. 2 pl., Proc. Calif. Acad. Sc., XXI, 10, 117-130 S. Francisco, Calif. (1933). **b - 927**

Among the spp. recorded there are three new ones, *Mitra zaca, Calliostoma bonita*, and *C. rema*.

**Takagi S.** - Measurements of Shells of *Turbo cornutus* from Shimané Prefecture [*Turbo cornutus a Præfectura regionis nomine* Shimané *proveniens. Quæstio de mensura eius concharum*] (In Jap.). 4 figs., Venus, IV, 3, 181-183. Kyoto (1933). **b - 928**

*Stylodactylus discissipes, Exhippolysmata ensirostris, Mimocaris heterocarpoides, Enoplometopus occidentalis, Axius novaezealandiae, Callianassa rosae, Hapalonotus reticulatus, Ralumia dahli, Nautilothelphusa*, subg. in *Parathelphusa*, Typus *P.* (*N.*) *zimmeri, Metaplax longipes*. Verteilung.

**Bogorov B. G.** - Seasonal Changes in Biomass of *Calanus finmarchicus* in the Plymouth Area in 1930 [*Calanus finmarchicus. Quæstio de mutationibus pro anni tempore quoad biomassam in propinquitatibus urbis* Plymouth *a. 1930*]. 8 figs., 5 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 585-612. Plymouth (1934). **b - 935**

In order to study the changes of biomass and size of *Calanus finmarchicus* raw weight, dry weight, and length measurements are determined. In the course of the year both biomass and size vary appreciably, and are characteristic for each season. For the area under investigation three periods of reproduction are specified. The relation between size of organism and hydrological conditions is also considered.

**Boone Lee** - Scientific Results of the World Cruise of the Yacht « Alva », 1931, William K. Vanderbilt, Commanding. *Crustacea : Stomatopoda* and *Brachyura* [*Resultatus scientifici e navigatione per orbem pamphilii « Alva » a. 1931, Duce* William K. Vanderbilt. *Crustacea : Stomatopoda et Brachyura*]. 109 pl., Bull. Vanderbilt Mar. Mus., V, 1-210. Huntington, L. I. ; New York, U. S. A. (1934). **b - 936**

The species described in this paper belong to the following families : Order *Stomatopoda : Squillidae*. Order *Decapoda : Calappidae, Leucosiidae, Raninidae, Dromiidae, Portunidae, Xanthidae, Grapsidae, Gecarcinidae, Ocypodidae*. For each species the A. gives : type, distribution, technical description and references.

**Boschma H.** - *Ligella*, a nomen nudum. Correction to Papers from Dr. Th. Mortensen's Pacific Expedition 1914-16, 55. *Rhizocephala*. [*Ligella, nomen nudum. Correctiones ad opera expeditione in Oceanum Pacificum perdurante perfecta a Doct.* Mortensen *a. 1914-16*]. Vidensk. Meddel. Dansk Naturhist. For., XCIII, 169-170. København (1933). **b - 937**

**Breemen (van) Lies** - Zur Biologie von *Balanus improvisus* (Darwin) [*De biologia speciei « Balanus improvisus »* (Darwin)]. Zool. Anz., CV, 247-257. Leipzig (1934). **b - 938**

Verteilung, Veränderlichkeit der Schale, Wachstum, Fortpflanzung, Lebenslänge.

**Burkenroad Martin David** - Littoral *Penaeidæ* Chiefly from the Bingham Oceanographic Collection, with a Revision of *Penæopsis* and Description of Two New Genera and Eleven New American Species [*Penæidæ litoreæ. Agitur particulatim de Penæidis ad collectionem oceanographicam* Bingham *pertinentibus. Adiunguntur recognitio Penæidarum et descriptio duorum generum novorum undecimque specierum novarum americanarum*]. 40 figs., Bull. Bingham Oceanogr. Coll., IV, 7, 1-109. New Haven, Conn. (1934). **b - 939**

The present observations on littoral and sublittoral Penaeids of the world are a continuation of the preceding discussion of this fauna (Burkenroad, 1934). The present studies are also chiefly centered about American *Penaeinae* and *Eusicyoninae*. Approximately forty-one species of *Penaeinae* and *Eusicyoninae* (including those described in this paper), divisible among eleven genera, are known to occur on the Atlantic and Pacific coasts of America, of which twenty are Pacific, and five may be regarded as common to the two coasts. List of new genera, subgenera, species and subspecies. Systematic account.

**Chappuis P. A.** - Süss- und Brackwasser-Copepoden von Bonaire, Curaçao und Aruba [*Copepoda aquæ dulcis ac salmacidæ in* Bonaire, Curaçao *et* Aruba]. 11 Abb., Zool. Jahrb. Abt. f. Systematik, LXIV. Jena (1933). **b - 940**

Kritische Revision verschiedener Gattungen, Verbesserungen und Bestimmungsschlüssel. *Elaphoidella Sewelli* ist wahrscheinlich synonym mit *Neogaea* subsp. *americana*. Ein Anhang enthält eine Richtigstellung mehrerer, diese Gattung betreffenden Irrtümer in der eben erschienenen Arbeit von Willey über Harpacticiden von Bermuda und der Woods Isle Region.

Descrizione di una nuova specie di *Paralophogaster*, *P. macrops* n. sp., facente parte del materiale carcinologico raccolto dal prof. Luigi Sanzo durante la Crociera eseguita nel Mar Rosso dalla R. Nave « Ammiraglio Magnaghi » nel 1923-24.

**Dam (van) Anna J.** - Die *Decapoda* der Siboga-Expedition. VIII. *Galatheidea : Chirostylidæ* [*Decapoda ex expeditione* « Siboga ». *VIII. Galatheidea : Chirostylidæ*]. 50 Abb., Weber Max Siboga-Expeditie, 119 (Monogr. 39 a$^7$). 1-46. (1933). **b - 942**

Allgemeine Erörterung der Morphologie der ost-indischen *Chirostylidae* mit Beschreibung sämtlicher von der Expedition gesammelten Arten. Tafel und Verzeichnis der Verteilung aller bekannten *Chirostylidae*. Bibliographie.

**Dons Carl** - Norges strandfauna II. Decapoder [*Fauna litorea Norvegiæ. II. Decapoda*]. 1 fig., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 11, 38-41. Trondheim (1934). **b - 943**

*Carcinus maenas* Leach., *Cancer pagurus* Lin., *Hyas araneus* Lin., *H. coarctatus* Leach., *Eupagurus bernhardus* Lin., *E. pubescens* Krøyer, *Galathea nexa* Embleton, *Homarus gammarus* (Lin.), *Crangon crangon* (Lin.), *Sclerocrangon boreas* (Phipps), *Athanas nitescens* Leach., *Spirontocaris pusiola* (Krøyer), *Hippolyte varians* Leach., *Pandalus Montagui* Leach. Per tutte le specie è data la distribuzione e per *Carcinus maenas* anche la descrizione.

**Dons Carl** - Norges strandfauna III. Isopoder [*Fauna litorea Norvegiæ. III. Isopoda*]. Kongel. Norsk. Vidensk. Selsk. Forh., VI, 24, 94-96. Trondheim (1934). **b - 944**

*Tanais tomentosus* Krøyer, *Limnoria lignorum* (Rathke), *Idothea baltica* (Pallas), *I. pelagica* Leach, *I. granulosa* Rathke, *I. viridis* (Slabber), *I. neglecta* G. O. Sars, *I. emarginata* (Fabr.), *Jaera albifrons* Leach, *Janira maculosa* Leach, *Janiropsis breviremis* G. O. Sars, *Munna Krøyeri* Goodsir, *Ligia oceanica* (Lin.), *Porcellio scaber* Latr. Distribuzione e sinonimia.

**Dons Carl** - Zoologiske Notizen XXIII. Brachyuren und Anomuren der Møre-Küste [*Notitiæ zoologicæ XXIII. Brachyura et Anomura ex litoribus* Møre]. 1 Abb., Kongel. Norsk. Vidensk. Selsk. Forh., VI, 29, 111-114. Trondheim (1934). **b - 945**

Von den hier angegebenen Formen haben die folgenden neue Nordgrenzen bekommen : *Portunus tuberculatus* Roux, *P. arcuatus* Leach, *Anapagurus laevis* Thompson, *A. chiroacanthus* Lilljeborg.

**Fage Louis** - Sur la présence d'organes lumineux chez les Amphipodes pélagiques [*Organa luminescentia in Amphipodis pelagicis*]. 1 fig., C. R. Acad. Sc., CXCVIII, 18, 1631-1633. Paris (1934). **b - 946**

Caractéristiques d'une espèce nouvelle, capturée par 500 m. de profondeur, au large de la côte atlantique du Maroc. Elle porte de chaque côté du mésosome, au niveau du sixième segment, trois organes lumineux. L'A. propose d'appeler cette nouvelle espèce : *Streetsia nyctiphanes* sp. nov.

**Giltay L.** - *Pycnogonida* from the Coast of British Columbia [*Pycnogonida in litoribus Columbiæ Britannicæ*]. Canad. Field Natural., XLVIII, 49-50. Ottawa (1934). **b - 947**

**Gorbunow G.** - Die Decapoden Crustaceen der Nördlichen Hälfte des Karischen Meeres [*Crustacea decapoda in area septentrionali Maris Karensis*] (Russ. Text, dtsch. Rés.). 1 Taf. a. T., Trans. Arct. Inst., IX, 59-77. Leningrad (1934). **b - 948**

Ergebnisse der Bearbeitung der vom Vf. gemachten Sammlungen von Decapoden-Krebsen, die er teilweise ein 1929 und hauptsächlich in 1930 in der nördlichen Hälfte des Karischen Meeres an Bord des Eisbrechers « Sedow » gemacht hatte. Es sind die folgenden 8 Arten beschrieben : *Spirontocaris spinus* (Sowerby), *S. turgida* (Krøyer), *Hetairus polaris* (Sabine), *Eualus gaimardi* (M. Edwards), *Bythocaris payeri* (Heller), *Pandalus borealis* Leach., *Sclerocrangon ferox* G. O. Sars, *Sabinea septcarinata* (Sabine).

**Grobben Karl** - Die Dekapodenspermien und die Stellung der *Eucyphidea* (Garneelen) im Stammbaum der dekapoden Crustaceen [*Decapoda. Quæstio de spermatis deque positione Eucyphideorum in arbore genealogica Crustaceorum decapodorum*]. 2 Abb., Sitz.-ber. Akad. Wiss., Abt. 1, CXLIII, 8/10, 285-292. Wien (1934. **b - 949**

Unter Hinweisung auf die von Beurlen und Glaessner auf breiter paläontologischer Basis durchgeführten Untersuchungen (Systematik der *Crustacea Decapoda* auf stammesgeschichtlicher Grundlage. Zool. Jahrb. Abt. f. Systematik, Oekol. u. Geogr. d. Tiere, LX, 1930), geht der Vf. hier in seiner Untersuchung von einem Vergleich unter den Spermien bei den verschiedenen dekapodischen Gruppen aus. Es ergibt sich daraus die Möglichkeit für die Stenopiden und Nephropsiden mit Thalassiniden sowie auch für die Eucyphiden auf einen gemeinsamen Ursprung zu schliessen.

**Gurjanova E.** - Zur Amphipodenfauna des Karischen Meeres [*Amphipoda Maris Karensis*]. 4 Abb., Zool. Anz., CIII, 5/6, 119-128. Leipzig (1933). **b - 950**

Schlüssel zu 14 Spezies.

**Hale Herbert M.** - *Tanaidacea* and *Isopoda* collected by the Great Barrier Reef Expedition, 1928-1929 [*Tanaidacea et Isopoda collecta perdurante navigatione nomine* « Great Barrier Reef Expedition » *1928-1929*]. Ann. and Magaz. Natur. Hist., XI, 65, 557-561. London (1933). **b - 951**

**Monod Théodore** - Isopodes marins des campagnes du « de Lanessan » [*Isopoda marina e navigationibus navis* « de Lanessan »]. 45 pl., Note Inst. Océanogr. Indochine, Stat. Marit. Cauda, 23, 1-22. Saïgon (1934). **b - 960**

Espèces appartenant aux familles suivantes : *Idoteidae, Cirolanidae, Corallanidae, Barybrotidae, Cymothoidae, Sphaeromathidae.*

Pour chaque espèce l'A. donne : synomymie, localités et distribution.

**Nouvel L.** - Observations statistiques et biométriques sur *Leander serratus* (Penn.) et *Lysmata seticaudata* Risso [*Observationes statisticæ et biometricæ circa species* « *Leander serratus* » (Penn.) *et* « *Lysmata seticaudata* » Risso]. Bull. Inst. Océanogr., 642, 1-8. Monaco (1934). **b - 961**

Comparaison entre les caractères sexuels de *Lysmata seticaudata*, hermaphrodite et ceux d'une espèce unisexuée, en l'occurrence *Leander serratus*. Observations relatives à la taille, à la fréquence des sexes, à la croissance et au dimorphisme du rostre, des antennes et des antennules.

**Okada Yaichirô** - The Soft Body of *Spirula* [*Corpus molle Spirulæ*] (In Jap.). Venus, IV, 2, 144-145. Kyoto (1933). **b - 962**

The species here described was found in a tunny.

**Orr A. P.** - On the Biology of *Calanus finmarchicus*. Part IV. Seasonal Changes in the Weight and Chemical Composition in Loch Fyne [*Calanus finmarchicus. Quæstio de biologia. Pars IV*a *De variationibus ponderis et compositionis chemicæ pro anni tempore in* Loch Fyne]. 5 figs., 4 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 613-632. Plymouth (1934). **b - 963**

*Calanus finmarchicus* having a great importance as a fish food the A. has undertaken this research in order to ascer-

tain, in conjunction with the observations on size and distribution by Marshall (1933) and Nicholls (1933) recorded in part I and II of this series, what changes in weight and chemical composition took place through the year.

Since it seems possible that differences between male, female and the later copepodite stages might exist, these were separated before analyses were made. No stages younger than the fifth copepodite were dealt with.

**Pesta Otto** - Marine Harpacticiden aus dem Hawaiischen Inselgebiet. I. Beitrag. [*Harpacticidæ marinæ regionis Insularum* Hawaii. *I. Contributio*]. Kolor. Taf., 8 Abb., Zool. Jahrb. Abt. Syst. Oekol. u. Geogr. Tiere, LXIII, 2, 145-162. Jena (1932). **b - 964**

*Tegastes pulcher* n. sp., *T. edmondsoni* n. sp., *T. tenuis* n. sp., *Syngaster pietschmanni* n. sp., *S. gregoryi* n. sp., *S. latus* n. sp.

**Pesta Otto** - Eine neue *Pontella*-Spezies (*Copepoda*) aus dem Südchinesischen Meer [*Nova quædam species generis « Pontella » in Mari Sinensi meridionali*]. 6 Abb., Zool. Anz., CII, 3/4, 92-95. Leipzig (1933). **b - 965**

*Pontella kieferi* in der Sammlung S. K. H. Prinz. Leopold Reise 1932.

**Pesta Otto** - Krebstiere oder *Crustacea*. 1: Ruderfüsser oder *Copepoda* (4. *Monstrilloida*, 5. *Notadelphyoida*, 6. *Caligoida*, 7. *Lernaeoida*). 42 Abb., iv + 68 S., Die Tierwelt Deutschlands und der angrenzenden Meeresteile nach ihren Merkmalen und nach ihrer Lebensweise. Teil 29. Begr. von Dahl Friedrich; Weitergeführt von Maria Dahl und Hans Bischoff. Gustav Fischer. Jena (1934). **b - 966**

Dieser Teil bildet den Abschluss der Bearbeitung der *Copepoda* und behandelt parasitisch lebende Formen, die in vielen Fällen bisher wenig bekannt sind.

**Rammner W.** - Die Cladoceren der « Meteor »-Expedition [*Cladocera per expeditionem* « Meteor » *collecta*]. Wiss. Ergebn. Dtsch. Atlant. « Meteor » - Exped. 1925-1927, XII, Walter de Gruyter & Co. Berlin & Leipzig (1933). **b - 967**

Diese Funde stammen aus 8 Stationen der südafrikanischen und 11 der südamerikanischen Küste. Die marinen Cladoceren sind im wesentlichen an die Küsten gebunden, am wenigsten vielleicht noch *Evadne spinifera*. Die eigenartige Verteilung mariner Cladoceren deutet auf das mögliche Vorhandensein einer Verbindung zwischen dem Gebiete des heutigen Atlantischen Ozeans und dem indomalaiischen Gebiet während der mesozoischen und der frühtertiären Zeit hin.

**Rathbun Mary J.** - A New Crab of the Genus *Cyclodorippe* [*Cyclodorippe genus novum*]. Reports on the Collections Obtained by the First Johnson-Smithsonian Deep-sea Expedition to the Puerto Rican Deep, 1 pl., Smiths. Miscell. Coll. (Publ. 3230), XCI, 3, 1. Washington, D. C. (1934). **b - 968**

Description, type, locality and distribution of the new species: *C. Bouvieri*.

**Sakai T.** - A New Genus and Some New Species of Crabs from Simoda [*Genus novum speciesque quædam novæ Cancrorum e* Simoda]. 1 pl., Sc. Rep. Tokyo Bunr. Daig., Sect. B., I, 12, 137-144. Tokyo (1933). **b - 969**

*Schizophroida* n. gen. and the following four new species: *S. simodaensis*, *S. manazumana*, *Caphyra yo-okadai*, and *Parapinnixa asiatica*.

**Santucci Renato** - Un crostaceo abissale cieco sui fondi a « Scampi » del Mar Ligure [*Crustaceum quoddam abyssale in fundo qui italice dicitur* « a Scampi » *Maris Ligustici*]. 2 fig., Corr. Pesca, VIII, 2, 1-2. Roma (1934). **b - 970**

L'A. esamina una specie di crostaceo nuova per il Golfo di Genova pescata nel rastrellamento dei fondi a Scampi del Mar Ligure, il *Polycheles typhlops* Heller, crostaceo decapodo rettante della famiglia degli *Eryonidae*.

**Schmitt Waldo L.** - Four New Species of Decapod Crustaceans from Porto Rico [*Crustacea decapoda. Species novæ quattuor portoricenses*]. 4 figs., Amer. Mus. Novit., 662, 1-9. New York (1933). **b - 971**

Representative of three new species of Shrimps, one constituting a new genus and a new hermit crab, are described in this paper under the following names: *Synalpheus osburni*, *Periclimenes portoricensis*, *Gnathophylloides* (n. gen.) *mineri*, and *Paguristes tortugae*.

**Sheppard Edith M.** - Isopod *Crustacea*. I. The Family *Serolidae*. [*Crustacea isopoda. I. Familia* « *Serolidae* »]. 22 figs., 1 pl., Discovery Rep. (Govmt. Depend. Falkland Isls.), VII, 253-362. Univ. Press. Cambridge (1933). **b - 972**

Description of the spp. of *Serolidae* found in the S. Atlantic and Antarctic Oceans with key to 37 known spp. of *Serolis*. The following spp. are new: *Serolis kempi*, *S. elliptica*, *S. orbiculata*, *S. nototropis*, *S. platygaster*, *S. aspera*, *S. discoverii*.

**Shoemaker Clarence R.** - Three New Amphipods [*Amphipoda tria nova*]. Reports on the Collections Obtained by the First Johnson-Smithsonian Deep-sea Expedition to the Puerto Rican Deep. 3 figs., Smiths. Miscell. Coll. (Publ. 3246), XCI, 12, 1-6. Washington, D. C. (1934). **b - 973**

Description of three species new to science, designated here as *Cyphocaris Johnsoni*, *Westwoodilla longimana*, and *Rhachotropis lobata*.

**Smith Verna Lucas** - *Ostracoda* in the St. Andrews Region [*Ostracoda in regione* St. Andrews]. Ann. Rep. Biol. Board Canada, 1933, 36. Ottawa (1934). **b - 974**

Results of the continuation of the systematic study of marine and freshwater *Ostracoda* commenced on the Pacific coast in the vicinity of the Atlantic Biological Station. Description of the representatives of 8 marine genera, comprising 13 species from a depth of approximately 15 metres, and of a collection of 6 species of 4 genera taken in the tidal zone.

**Stephensen K.** - *Ceinina japonica* (n. gen., n. sp.) a New Aberrant Species of the Amphipodan Family *Talitridæ* from Japan [*Ceinina japonica species nova aberrans ex Amphipodis Japonicis*]. 4 figs., Trans. Sapporo Natur. Hist. Soc., XIII, 2, 63-68. (1933). **b - 975**

Description and affinities of this species living into the stem of the alga *Undaria pinnatifida*.

**Torelli Beatrice** - Eufausiacei del Mar Rosso [*Euphausiacea Maris Rubri*]. 3 tav., Mem. R. Comit. Talassogr. Ital., No. CCVIII, 1-18. Venezia (1934). **b - 976**

Studio di 15 specie di Eufausiacei raccolte durante la campagna idrografica della R. Nave « Ammiraglio Magnaghi ».

**Ward Melbourne** - New Genera and Species of Marine *Decapoda Brachyura* from the Coasts of New South Wales and Queensland [*Decapoda* *brachyura. Genera et species nova ad litora* New South Wales *et* Queensland *pertinentia*]. 3 pl., Austral. Zool., VII, 5, 377-394. Sydney (1933). **b - 977**

*Lyreidus australiensis* n. sp., *Cryptocnemus planus* n. sp., *Lissomorpha* n. gen., *L. haswelli* n. sp., *Jonas leuteanus* n. sp., *Gonioneptunus whiteleggei* n. sp., *Aeneacancer* n. gen., *A. molleri*, n. sp., *Paraetisus* n. gen., *P. globulus*, *Actaea capricornensis* ; *Calvactaea* n. gen., *C. tumida* n. sp., *Heteropilumnus granulimanus* n. sp., *Prolybia* n. gen., *P. australiensis* n. sp. ; *Rathbunaria* n. gen. (family uncertain), *R. sculptissima* n. sp., *Manella brevimana* n. sp., *Cleistostoma mcneilli* n. sp., *Ilyoplax dentata* n. sp., *Prismatopus* n. gen., *P. albanyensis* n. sp., *Paramithrax parvispinosus* n. sp.

**Wilson C. B.** - Studies on Copepods [*Studia de Copepodis*]. Woods Hole Oceanogr. Instit., Rep. 1933, 38. Woods Hole, Mass. (1934). **b - 978**

Summary of the work of identification and recording of the planktonic Copepods captured during the last cruise of the « Carnegie ». Compilation of list of species for each of the 200 localities in the Atlantic Ocean north of the equator and in the Pacific Ocean from 52° north to 40° south latitude. Study of an exceptional towing taken from « Atlantis » with a closing net at a depth of 2000 meters south of Georges Bank, and of a series of 17 Copepod towings from the vicinity of Bermuda Islands.

**Zimmer C.** - Zoological Results of the Norwegian Scientific Expeditions to East-Greenland. III. Die Cumaceen der norwegischen Expeditionen nach ost-Grönland, 1929, 1930, 1931 und 1932. [*Resultatus zoologici e navigationibus scientiae causa a Norvegis susceptis in Groënlandiam orientalem a. 1929, 30, 31, 32. III. Cumacea*]. 1 Taf., Norg. Svalbard-o. Ish.-unders., Skr. Svalbard o. Ish., 61, 34-40. Oslo (1934). **b - 979**

Beschreibung der erbeuteten Arten mit Verzeichnis der Stationen, wo sie gefunden worden sind.

## Tunicata.

**Ärnbäck-Christie-Linde Augusta** - Northern and Arctic Invertebrates in the Collection of the Swedish State Museum (Riksmuseum) XII. *Tunicata. 4. Cionidae, Ascidiidæ, Agnesiidæ, Rhodosomatidæ* [*De Invertebratis nordicis et arcticis in Collectione ad* Riksmuseum *pertinente. XII. Tunicata, 4. Cionidæ, Ascidiidæ, Agnesiidæ, Rhodosomatidæ*]. 22 figs., 6 pl., Kgl. Svenska Vetensk. Akad. Handl., Tredje Ser., XIII, 3, 1-91. Stockholm (1934). **b - 981**

Synopsis of familiae and subfamiliae. Synopsis of genera and species. Geographical and bathymetrical distribution and general observations. Zoogeographical summary. List of works referred to.

**Coifmann Isabella** - Ascidiacei raccolti dalla R. Corvetta « Vettor Pisani » negli anni 1882-1885 [*Ascidiacea collecta a corbita regia* « Vettor Pisani » *a. 1882-1885*]. 4 fig., Ann. Mus. Zool. R. Univ. Napoli, N. S., VI, 9, 1-7. Napoli (1933). **b - 982**

Note descrittive.

**Harant Hervé & Vernières Paulette** - Tuniciers pélagiques provenant des croisières du Prince Albert I.er de Monaco [*Tunicata pelagica ex expeditionibus a Principe Alberto I.* de Monaco *peractis*]. Résult. Camp. Scient. accomplies par Albert I.er Prince Souverain de Monaco, Fasc. LXXXVIII, 1-48. Monaco (1934). **b - 983**

Les AA. ont divisé le travail en trois parties inégales, consacrées respectivement aux Salpes, Doliolums, et Pyrosomes. Pour chacune de ces parties ils ont adopté le même plan. Introduction historique et bibliographique ; classification et tableaux de détermination, étude particulière des espèces. A la fin de la troisième partie spéciale les AA. ont consacré à l'ensemble des Tuniciers pélagiques étudiés : un résumé des résultats enregistrés ; une liste par station des espèces recueillies ; un index bibliographique ; une table alphabétique des matières.

**Huus J.** - Die Tierwelt der Nord- und Ostsee. Lief. 25. Teil 12. $a_3$. *Ascidiacea* [*De fauna Maris Nordici et Maris Baltici. Fasc. 25. Pars 12 $a_3$ : Ascidiacea*]. 49-116. Akad. Verlagsg. m. b. H., Leipzig (1933). **b - 984**

Beschreibung des äusseren Baus und der inneren Anatomie. Konservierungsmethode. Systematische Verhältnisse mit Diagnosen und Schlüsseln. Physiologisches. Entwicklung. Larven. Parasiten.

**Ihle J. E. & Ihle-Landen-Berg M. E.** - Anatomische Untersuchungen über Salpen. III. Der Nucleus. IV. Allgemeines über den Darmkanal der Salpen [*Investigationes anatomicæ in Salpas. III. Nucleus. IV. Generalia de canale intestinali Salparum*]. 19 Abb., 1 Taf., Zool. Anz., CIV, 1/2, 41-56; 1 Abb., 7/8, 194-200. Leipzig (1933). **b - 985**

III. Beschreibung der Anatomie des Nucleus von den folgenden Arten : *Salpa fusiformis*, *Ihlea punctata*, *Iasis zonaria*, *Ritteriella hexagona*, *R. amboinensis*, *Thalia democratica*, und *Cyclosalpa pinnata*.

IV. Vergleichende Anatomie in Bezug auf den Darmkanal von : *Ihlea*, *Salpa*, *Iasis*, *Thalia*, *Thetys*, *Pegea*, und *Traustedtia*.

**Kükenthal Willy (Gegr. von)** - Handbuch der Zoologie : eine Naturgeschichte der Stämme des Tierreiches. Band 5, Hälfte 2 : *Tunicata*. Lief. 3 [*Manuale zoologicum : Historia naturalis animalium. Voluminis V.*$^{i}$ *II*$^{a}$ *dimidia pars : Tunicata. Fasc. 3.*$^{us}$]. Hrsg. von Thilo Krumbach, 193-272. Walter de Gruyter und Co. Berlin u. Leipzig (1933). **b - 986**

**Oka Asajiro** - Ueber das Vorkommen von *Styela partita* in Japan [*Styela partita in Japonia*]. 2 Abb., Proc. Imp. Acad., X, 3, 184-186. Tokyo (1934). **b - 987**

Die hier beschriebene Art, *Styela partita*, die bis jetzt nur an der Küste von Yokohama gefunden worden ist, bietet ein deutliches Exempel der diskontinuierlichen Verbreitung der Ascidien dar.

**Oka Asajiro** - Ueber *Molstyela*, eine merkwürdige neue Gattung von einfachen Ascidien [*Molstyela genus novum notandum Ascidiarum simplicium*]. 3 Abb., Proc. Imp. Acad., X, 5, 292-294. Tokyo (1934). **b - 988**

Bericht über den Fund einer merkwürdigen Styelide, die in der inneren Organisation eine echte *Styela* ist, äusserlich aber die Merkmale einer typischen *Molgula* aufweist. *Molstyela* nov. gen., *Molstyela izuana* nov. sp.

**Oka Asajiro** - Ueber *Clavelina coerulea* n. sp., die erste von Japan bekannt gewordene *Clavelina* [*Clavelina cærulea n. sp. quæ considerari po-*

*test species primum cognita in Japonia*]. Proc. Imp. Acad., X, 6, 365-366. Tokyo (1934). **b - 989**

Die alte Gattung *Clavelina*, die sonst in ihrer typischen Form nur vom Mittelmeer und Nordwesteuropa bekannt ist, ist zum erstenmal auch in Japan vorgefunden worden, und zwar in einer Form, die der *C. lepadiformis* sehr nahe steht. *C. coerulea* n. sp.

**Oka Asajiro** - Eine zweite *Gamaster*-Art (*Ascidiae Simplices*) [*Species altera ad genus « Gamaster » pertinens*]. 2 Abb., Proc. Imp. Acad., X, 9. 594-596. Tokyo (1934). **b - 990**

*Gamaster japonicus* nov. sp. Vergleich mit *G. dakarensis*, der einzigen bis jetzt bekannten Art der Gattung *Gamaster*; Diagnose und Fundort.

**Oka Asajiro** - Ueber *Cynthia iburi* n. sp., eine neue *Cynthia*-Art mit quergerichteten Keimenspalten [*De Cynthia iburi n. sp., nova quaedam Cynthia cum branchiotomibus transversis*]. 2 Abb., Proc. Imp. Acad., X, 10, 695-697. Tokyo (1934). **b - 991**

Beschreibung, Fundort, verwandte Form.

**Pruvot-Fol Mme A.** - Sur le nom de genre *Fritillaria* H. Fol [*Genus « Fritillaria » H. Fol. Quœstio de nomine*]. Bull. Mus. Nat. Hist. Natur., 2e sér., VI, 2, 184-185. Paris (1934). **b - 992**

L'A. propose : *Fritillaria* (Quoy, vernaculaire et M. S.) H. Fol 1872 (de novo). Quant au type il restera : *Fritillaria pellucida* (Busch) (= *Eurycercus pellucidus* Busch, *Fritillaria furcata* Vogt ; Gegenbaur ; Fol et auct.).

**Salfi Mario** - Osservazioni sulla evoluzione delle colonie e sullo sviluppo degli abbozzi blastogenetici dei Didemnidi [*Didemnidæ. Observationes circa evolutionem coloniarum progressionemque delineationum blastogeneticarum*]. Arch. Zool. Ital., XVIII, 1/2, 203-245. Napoli (1933). **b - 993**

Genesi delle colonie di *Leptoclinum gelatinosum* (M.-Edw.). Aspetto del processo blastogenetico, interpretazione di ascidiozoi di colonie di *Tridídemnum cereum* (Giard.) e *Leptoclinum gelatinosum* (M.-Edw.) in blastogenesi e considerazioni generali. Origine e sviluppo degli abbozzi blastogenetici. Elementi ontogenetici nella costituzione degli abbozzi blastogenetici.

**Thompson Harold** - The *Tunicata* of the Scottish Area, their Classification, Distribution and Ecology. Part IV. Sedentary *Tunicata* (concluded). Order *Krikobranchia* [*Tunicata ad regionem scotam pertinentia. De eorum dispositione in classes, distributione et oecologia. Pars IVa : Tunicata sessilia (Finis). Ordo « Krikobranchia »*]. 17 charts, 13 pl., Fish., Scotland, Scient. Invest., 1934, 1, 1-44. Edinburgh (1934). **b - 994**

The forms dealt with in this paper belong to the following families : *Polycitoridae*, *Didemnidae*, *Synoicidae*. For each species a detailed description and the distribution are given. Some notes are furnished on eggs and larvae. In a postscript additional records of species referred to in Part I are given.

## Pisces et Cyclostomata.

**Altnöder K.** - Die Aussetzung von Bachforellen (*Salmo fario* L.) in die Ostsee. Vorwort von Prof. Dr. H. Henking [*Salmo fario L. Quœstio de distributione per Mare Balticum. Prof. Doct. H. Henking præfatus est*]. 1 Abb., 2 Kart. 4 Tab., Ber. Dtsch. Wiss. Komm. Meeresf. N. F., VII, 1, 2-23. Leipzig (1934). **b - 995**

Einleitende Bemerkungen über im Ostseegebiet gemachte Verpflanzungen und Markierungen. Wiederfänge an markierten Bachforellen. Wanderungen und Laichen der markierten Bachforellen. Längenwachstum. Gewichtszunahme. Nahrung. Vorschläge für weitere Untersuchungen.

**Antipa Gr.** - Les Esturgeons de la Mer Noire. Leur biologie et les mesures nécessaires pour leur protection [*Acipenseridæ ponticæ. De biologia et tutela*]. Rapp. Pr.-Verb. Comm. Expl. Scient. Méditerranée, VIII, 61-75. Paris (1934). **b - 996**

Court aperçu général sur l'état de nos connaissances au sujet de la systématique et la biologie des Esturgeons. A. Les espèces fluviales : *Acipenser ruthenus* L., *A. glaber* Marsigli ; B. Les espèces marines : *A. sturio* L., *A. stellatus* Pall., *A. guldenstaedtii* Brandt, *Huso huso*. Les mesures à prendre pour la protection des Esturgeons dans la Mer Noire, dont la production est en continuelle décroissance. Rôle de la Commission Internationale dans l'organisation de la protection ci-dessus.

**Beebe William** - Three New Deep-sea Fish seen from the Bathysphere [*Pisces abyssales tres novi bathysphæra conspecti*]. 3 figs., Bull. New York Zool. Soc., XXXVII, 6, 190-193. New York (1934). **b - 997**

*Bathyembrys istiophasma* gen. et spec. nov., *Bathyceratias trilychnus* gen. et spec. nov. and *Bathysidus pentagrammus* gen. et spec. nov. Descriptions and drawings. (See also Contr. New York Zool. Soc. Dpt. Trop. Res., N. 461, 1934).

**Beebe William** - Deep-sea Fishes of the Bermuda Oceanographic Expeditions. Family *Idiacanthidæ* [*Pisces in magnis profunditatibus viventes, ex expeditionibus oceanographicis ad insulas Bermudas. Idiacanthidæ*]. 81 figs., Zoologica. Scient. Contr. New York Zool. Soc., XVI, 4, 149-241. New York (1934). **b - 998**

Summary of important points. General account : classification, distribution, development. *Idiacanthus fasciola* : Bermuda specimens ; specimens previously recorded ; adult specific characters ; development ; ecology ; study materials ; synonymy and references.

**Beebe William & Tee-Van John** - A New Genus and Species of Scaleless Blenny *Somersia furcata*, from Bermuda [*Somersia furcata, nov. gen. nov. sp. ex insulis Bermudis*]. 1 fig., Amer. Mus. Novit., 730, 1-3. New York (1934). **b - 999**

Diagnosis of the new genus. Description of the new species : type, field characters, measurements and counts.

**Berg L. S.** - *Acipenser güldenstädtii persicus*, a Sturgeon from the South Caspian Sea [*Acipenser güldenstädtii in Mari Caspio meridionali*]. Ann. & Magaz. Natur. Hist., 10th ser., XIII, 317-318. London (1934). **b - 1000**

**Bertin Léon** - Mise au point de la systématique des Poissons abyssaux appartenant aux genres *Saccopharynx* et *Eurypharynx* [*Recognitio systematica piscium abyssalium ad genera « Saccopharynx » et « Eurypharynx » pertinentium*]. Bull. Mus. Nat. Hist. Natur., 2e sér., VI, 1, 26-31. Paris (1934). **b - 1001**

Les *Saccopharynx* et les *Eurypharynx* ont été réunis par Gill et Ryder (1883) dans un sous-ordre de Poissons apodes, celui des Lyomères. Principaux caractères et clé dichotomique de ce sous-ordre. Diagnose des deux familles des Saccopharyngidés et des Eurypharyngidés qui se composent toutes les deux d'un seul genre, dont on donne la synonymie. Exposé succinct de leur distribution géographique.

**Bertin Léon** - Une nouvelle espèce de Poissons abyssaux : *Saccopharynx Schmidti* [*Saccopharynx Schmidti, species nova Piscium abyssalium*]. C. R. Acad. Sc., CXCVIII, 18, 1633-1635. Paris (1934). **b - 1002**

Diagnose. Caractères différentiels. Caractères métriques. Lieu et date de capture.

**Bigelow Henry B. & Schroeder W. C.** - *Chordata.* 12 d *Marsipobranchii* (Lampreys). 12 e *Elasmobranchii* (Sharks and Rays). 12 f *Holocephali* (Chimaeroids). 35 figs., Canad. Atlantic Fauna (Contr. No. 61 of Woods Hole Oceanogr. Instit.), 12, 1-38. Toronto (1934). **b - 1003**

Popular name, external features, size and geographical range are given for each species.

**Bohn Georges** - Leçons de Zoologie et Biologie générale. 6 : Vertébrés inférieurs (Poissons, Batraciens, Reptiles) [*Zoologia et Biologia generalis. 6. Vertebrata inferiora* (*Pisces, Batrachia, Reptilia*)]. 96 pp., (Actualités Scient. et Ind. 183), Hermann et Cie. Paris (1934). **b - 1004**

**Bonde (von) C.** - Note on the Swahili Names of Certain Fishes of Zanzibar Island [*Nota de denominatione quæ tribuitur piscibus insulæ* Zanzibar *ex idiomate* Swahili]. South African Journ. Sc., XXX, October, 351-354. Johannesburg (1933). **b - 1005**

The A. gives some examples of the great confusion existing with regard to local names of Fishes, and deals with a few of the more common Swahili names describing edible fish met with in the markets. In a list are given the Swahili names of seventy-three Fishes, together with the scientific and common names.

**Borcea I.** - Révision systématique et distribution géographique des Gobiidés de la Mer Noire et particulièrement des eaux roumaines [*Gobiidæ Ponti Euxini et aquarum Rumenarum. Recognitio systematica et distributio geografica*]. 91 fig., 8 pl., Ann. Scient. Univ. Jassy, XIX, 1/4, 1-231. Jassy (1934). **b - 1006**

L'A. s'est limité à décrire aussi clairement que possible les différentes espèces qu'on rencontre dans les eaux roumaines tant maritimes, que saumâtres ou fluviatiles, insistant particulièrement sur les caractères vraiment spécifiques. Pour toutes les espèces il a étudié minutieusement la disposition des pores muqueux et des séries de papilles cyathiformes et il a poursuivi l'habitat et la distribution géographique. Il a considéré aussi chaque espèce, au point de vue de son origine et au point de vue économique.

**Borcea I.** - Données pour servir à la systématique et à la biologie des Mugilidés. Formes de la Mer Noire (Littoral Roumain) [*Dati pro systematica et biologia Mugilidarum. Formæ Ponticæ* (*Litus Rumenum*)]. 18 fig., Ann. Scient. Univ. Jassy, XIX, 1/4, 247-286. Jassy (1934). **b - 1007**

*Mugil cephalus, M.* (*Liza*) *ramada, M.* (*L.*) *auratus, M.* (*L.*) *saliens.* Tout en contrôlant pour ces espèces les caractères déjà invoqués par divers savants comme ayant une réelle valeur pour la systématique, l'A. a été entraîné à porter spécialement l'attention sur l'aspect, l'arrangement et sur des particularités des écailles dans la région céphalique et sur le reste du corps, sur les particularités du système des canaux muqueux de la peau et des écailles, ainsi que sur certaines particularités anatomiques.

**Borcea I.** - Note préliminaire sur les Clupéides de la région littorale roumaine de la Mer Noire et des eaux intérieures [*Clupeidæ ad regionem litoream Rumenam Ponti Euxini et ad aquas internas pertinentes. Nota prior*]. 1 fig., Ann. Scient. Univ. Jassy, XIX, 1/4, 382-390. Jassy (1934). **b - 1008**

Discussion au sujet des différentes espèces de Clupéides, décrites par plusieurs auteurs pour la Mer Noire. Description détaillée de l'espèce : *Caspialosa maeotica* Grimm.

**Borodin N. A.** - Scientific Results of the Yacht « Alva » Mediterranean Cruise, 1933, in Command of William K. Vanderbilt. Fishes [*Resultatus scientifici e navigatione per Mare Mediterraneum a pamphilio* « Alva » *peracta a. 1933, duce* William K. Vanderbilt. *Pisces*]. 2 pl., Bull. Vanderbilt Mar. Mus., I, 4, 103-123. Cambridge, Mass. (1934). **b - 1009**

Annotated systematic list of species. List of references. As new are described : *Pristipomoides Vanderbilti, Cynoscion fusiformis, Trachinotus madeirensis, Trachinoides moroccanus.*

**Breder C. M. Jr.** - Atlantic *Synentognathi* [*Synentognathi Oceani Atlantici*]. Papers Tortugas Labor. & Carnegie Instit. Washington, XXVIII. Washington, D. C. (134). **b - 1010**

Discussion on the behaviour, swimming attitudes, habitat and development of certain *Belonidae* and their relatives. Notes on their feeding habits and enemies.

**Brunelli G.** - Rapporto sulla biologia dello Storione [*Acipenser. Nota de biologia*]. Rapp. Pr.-Verb., Comm. Expl. Scient. Méditerranée, VIII, 77-79. Paris (1934). **b - 1011**

Graduale diminuzione dello storione che si verifica in diverse Nazioni. Revisione delle specie esistenti in ciascuna Nazione del bacino del Mediterraneo. Alcuni accenni circa il programma di studî sulla biologia dello storione e sulle condizioni fisico-chimiche dell'ambiente in cui si verifica la riproduzione di questo pesce allo scopo di elaborare una regolamentazione della sua pesca.

**Bückmann A.** - Die Schollenbevölkerung der Deutschen Bucht im Jahre 1933 [*Populatio solearum in* « Deutsche Bucht » *a. 1933*]. 4 Tab., 1 Anhang., Ber. Dtsch. Wiss. Komm. Meeresf. N. F. VII, 1, 24-37. Leipzig (1934). **b - 1012**

Prüfung der Brauchbarkeit der Methode die Häufigkeit und die Dichte der Bevölkerung zu beurteilen. Die Verteilung der Schollen. Arealdichte der verschiedenen Altersgruppen und ihre Abnahme. Mittlere Länge, Länge über 23,0 cm. der Altersgruppen 1929-1933. Prozentuale Alterszusammensetzung der marktfähigen Schollen 1933. Vergleich mit den Verhältnissen in der südwestlichen und zentralen Nordsee. Aussichten für kommende Jahre und wichtige Aufgaben.

**Bückmann A.** - Untersuchungen über die Naturgeschichte der Seezunge, die Seezungenbevölkerung und den Seezungenfang in der Nordsee [*Inquisitiones in historiam naturalem speciei* « *Solea vulgaris* » Quensel, *in populationem et modum captandi in Mari Nordico*]. 14 Abb., 24 Tab., Ber. Dtsch. Wiss. Komm. Meeresf. N. F., VII, 2, 1-66. Leipzig (1934). **b - 1013**

Einleitende Bemerkungen über frühere Untersuchungen und Methode der Altersbestimmungen. Die Naturgeschichte der Seezunge. Die Zusammensetzung der Bevölkerung. Der Seezungenfang. Rationelle Ausnutzung des Bestandes. Vorschläge für weitere Untersuchungen.

**Bückmann A.** - Ueber die Jungschollenbevölkerung der deutschen Wattenküste der Nordsee [*Species* « *Pleuronectes platessa* » *ad litus maris Nordici pertinens in area vadorum. Quæstio de juve-*

*nibus*]. 3 Abb., Ber. Dtsch. Wiss. Komm. Meeresf. N. F., VII, 3, 319-327. Leipzig (1934). **b - 1014**

1. Die allgemeine Verbreitung der Schollen des ersten Lebensjahres im Untersuchungsgebiet; 2. Der Einfluss der Tiden auf die Verteilung der Schollen und die Rückwirkung der Tidenwanderungen auf die Grösse der Fänge. 3. Die Unregelmässigkeit der Verteilung der Jungschollen und die Unzuverlässigkeit der festgestellten durchschnittlichen Fangdichte. 4. Die jahreszeitlichen Wanderungen der Schollen. 5. Das Wachstum der Schollen.

**Bückmann A.** - Die Hauptlinien der internationalen Schollenuntersuchungen der letzten Jahre [*Ratio præcipua inquisitionum internationalium in Pleuronectidas recentioribus annis*]. 4 Diagr., 2 Taf., Journ. Cons. Expl. Mer, IX, 3, 309-338. Copenhague (1934). **b - 1015**

A. Die allgemeinen Ziele der Untersuchungen. B. Die Abgrenzung der Bestände. C. Die Fluktuationen. D. Die Wachstumsgeschwindigkeit. E. Der Einfluss der Bestandsschwankungen auf den Ertrag der Fischerei. F. Die Wirkung der Fischerei auf den Bestand. G. Massnahmen zur rationellen Ausnutzung der Schollenbestände. Verzeichnis der im Text angeführten Schriften.

**Chabanaud Paul** - Variabilité de *Lirus ovalis* C. V. (*Pisces Stromateidæ*) [*Lirus ovalis* C. V. *Quæstio de variabilitate*]. Bull. Mus. Nat. Hist. Natur., V, 4, 285-289. Paris (1933). **b - 1016**

Formules et proportions d'un remarquable spécimen, le plus grand qui soit connu de cette espèce provenant de l'Atlantique. Tableau contenant, rangés par ordre décroissant du total des éléments constitutifs de la nageoire dorsale, l'ensemble de tous les individus décrits précédemment, ou mentionnés par Tate Regan. Observations au sujet des affinités de ces exemplaires et considérations sur la variation de leur taille.

**Chabanaud Paul** - Les grandes subdivisions de l'ordre des Poissons hétérosomes sont-elles justiciables d'un criterium discriminatif? [*Partitiones magnae piscium « Heterosomata » discriminationem admittunt?*]. C. R. Acad. Sc., CXCVII, 19, 1064-1065. Paris (1933). **b - 1017**

L'A. passe en revue les caractères discriminatifs sur lesquels est basée la classification des *Heterosomata*, dont Regan est l'auteur. Il considère ensuite d'autres caractères (la position de l'oeil migrateur chez l'adulte et le mode d'insertion de la partie épicranienne de la notoptère) et leur importance comme bases d'un critérium discriminatif.

**Chabanaud Paul** - Poissons hétérosomes recueillis par M. le Professeur A. Gruvel et par MM. R.-Ph. Dollfus et J. *Careproctus Scottae* new species: holotype, paratypes, description, relationships with the other species.

**Clarke W. J.** - Saury Pike (*Scombresox saurus*) at Scarborough [*Scombresox saurus ex urbe* Scarborough]. Naturalist, 100. London (1933). **b - 1023**

**D'Ancona Umberto** - Sur quelques espèces pontiques et méditerranéennes du genre *Syngnathus* [*Nonnullæ species Ponti Euxini et Maris Mediterranei ad genus « Syngnathus » pertinentes*]. Ann. Scient. Univ. Jassy, XIX, 1/4, 236-238. Jassy (1934). **b - 1024**

Parmi les exemplaires pontiques examinés, l'A. a reconnu quatre espèces: *S. variegatus*, *S. typhle*, *S. bucculentus*, *S. Schmidtii*. A ces espèces il faut ajouter, selon Rathke, *S. tenuirostris*. Des quatres espèces indiquées, *S. variegatus*, *S. bucculentus*, et *S. Schmidtii* sont particulières à la Mer Noire; *S. typhle* est commun à la Mer Noire et à la Méditerranée.

**D'Ancona Umberto** - Le specie mediterranee del genere *Syngnathus* [*Species mediterraneæ ad genus « Syngnathus » pertinentes*]. 4 fig., 3 tav., Mem. R. Comit. Talassogr. Ital., No. CCX, 3-82. Venezia (1934). **b - 1025**

Specie e unità sistematiche minori. Caratteri distintivi delle specie del gen. *Syngnathus*. Cenni storici sulla sistematica dei Singnatidi mediterranei. Specie mediterranee del gen. *Syngnathus*: *Syngnathus typhle* L., *S. acus* L., *S. variegatus* Pallas, *S. taenionotus* Canestr., *S. abaster* Risso, *S. Agassizii*, Kaup, Canestr. (nec Michah.), *S. bucculentus* Rathke, *S. phlegon* Risso, *S. Schmidti* Popov. Notizie generali sui *Syngnathus* mediterranei.

**Daniel Frank** - The Elasmobranch Fishes [*Elasmobranchii*]. xi + 322 pp., Third Edition. Univ. Calif. Press. Berkeley, Calif. (1934). **b - 1026**

New informations on the transformation of the endostyle into the thyroid gland, on the lymphatic system, on the homologies of the carotid artery between Elasmobranchs and higher Vertebrates. New studies on the ampulla of Lorenzini.

**De Buen Fernando** - Presencia de anillas de goma abrazadas al cuerpo de agujas *Rhamphistoma belone* (L.) [*Rhamphistoma belone* (L.) *Anuli gummati circum corpus*]. Bol. Soc. Españ. Hist. Natur., XXXIV, 7, 395-396. Madrid (1934). **b - 1027**

Unas conjeturas para interpretar hecho tan curioso.

**De Buen Fernando** - *Discocephali* de España (Peces) [*Discocephali ad Hispaniam pertinentes*]. 2 figs., Bol. Soc. Españ. Hist. Natur., XXXIV, 7, 397-412. Madrid (1934). **b - 1028**

La distribución de los *Echeneidae* en España se simplifica extraordinariamente en el momento actual; se han dado a conoscer sólo dos especies: *Remora remora* y *Echenesis naucrates*. Bibliografía.

**De Buen Fernando** - Notas sobre los *Gaidropsaridae* (Peces). Un nuevo género (*Onogadus* nov. gen.) y una nueva especie (*Gaidropsarus barbatus* nov. sp.) [*Notæ de piscibus ad familiam « Gaidropsaridæ » pertinentibus. Onogadus novum genus et Gaidropsarus barbatus nova species*]. 1 fig., Bol. Soc. Españ. Hist. Natur., XXXIV, 10, 499-504. Madrid (1934). **b - 1029**

Discussión sobre la sistemática de los géneros de la familia *Gaidropsaridae*. Creación del nuevo género *Onogadus*. Clave provisional de las especies con tres barbillas de la familia *Gaidropsaridae*. Descripción de : *Gaidropsarus barbatus* De Buen nov. sp.

**De Buen Fernando** - Estudios raciales basados en el numero de vértebras en la sardina, *Sardinia pilchardus* (Walb.) [*Sardinia pilchardus* Walb. *Stirpis studium cuius fundamenta ponuntur in numero vertebrarum*]. 1 fig., Journ. Cons. Expl. Mer, IX, 3, 339-345. Copenhague (1934). **b - 1030**

En resumen, parecen existir, basando el estudio en el número de vertebras, las siguientes razas de Sardinas (*Sardinia pilchardus* Walb.) : Mediterráneo : Adriatica ? ; Mediterránea septentrional ; Mediterránea meridional.

Atlántico : De Azores y Madera ; Atlántica meridional ; Cantábrica ; De la Mancha.

**Delsman H. C. & Hardenberg J. D. F.** - Indische Zeevisschen 4. Djapoeh (*Dussumieria*) en Makassaarsche vischjes (*Spratelloides*) [*Pisces marini Indici. 4. Dussumieria et Spratelloides*]. Trop. Natuur, XXII, 10-13. Batavia (1933). **b - 1031**

Contains notes on the taxonomy, life-history, distribution and economic use of the *Dussumieria*- and *Spratelloides*-species, which occur in the Indo-Australian Archipelago.

**Delsman H. C. & Hardenberg J. D. F.** - De Indische Zeevisschen en Zeevisscherij [*De piscibus marinis Indicis deque piscatu*]. 282 fig., Edited Visser and Co. Welterveden, 388 pp. Batavia (1934). **b - 1032**

Contains description and life history of the common genera and species of Fishes occurring in the Indo-Australian Archipelago, together with notes on their economic value and their distribution. Furthermore there are chapters on the biology, the fisheries, the anatomy and systematics of the Fishes in general and a chapter on the productivity of the Indo-Australian seas.

**Gandolfi-Hornyold A.** - La civelle de Sète de janvier et février 1934 [*Juvenis anguilla ex* Sète *mensibus januario et februario 1934*]. Bull. Soc. Centr. Aquicult. et Pêche, XLI, 71-76. Paris (1934). **b - 1041**

**Gandolfi-Hornyold A.** - Observations sur la taille et le sexe de la petite anguille argentée des Valli de Comacchio [*Observationes circa dimensiones et sexum parvae anguillæ argentatæ in Vallibus* Comacchio *nomine*]. 1 table, Bull. Soc. Océanogr. France, XIV, 80, 1398-1401. Paris (1934). **b - 1042**

Importance de la pêche et de l'industrie de l'anguille des Valli (étangs d'eau salée) de Comacchio, en Italie. Leur développement dans les autres pays. Les 4 stades de la vie de l'anguille. Différence dans le développement sexuel de l'anguille jaune et de l'anguille argentée. Résumé des résultats des recherches de l'A. sur l'anguille des Valli de Comacchio faites dans le but principal de déterminer aussi exactement que possible les longueurs maximum et minimum pour le mâle et la longueur minimum pour la femelle argentée.

**Gilson A.** - Annual Concentration of Spent Herring along the French and Belgian Coasts in 1933-1934 [*De annua concentratione aringorum qui productus germinales deposuerunt, praeter litora gallica et belgica, a. 1933-1934*]. 1 Diagr., Rapp. Pr.-

Verb. Cons. Expl. Mer, 3ème partie, Appendices 1933-1934, LXXXIX, 101-103. Copenhague (1934). **b - 1043**

A study of this concentration appearing regularly every winter in the coastal region between Cape Gris-Nez and the Scheldt has been made continually since the year 1930. Information as to the quantity (scarcity or abundance) of different stages observed and the factors concerned with this phenomenon. A conjectural sketch of the life-history of the herring in the most southernly parts of the North Sea is also given.

**Giltay Louis** - Poissons [*Pisces*]. 29 fig., Mém. Mus. R. Hist. Natur. Belgique, h. sér., Résult. Scient. du Voyage aux Indes Orient. Néerl. de LL. AA. RR. le Prince et la Princesse Léopold de Belgique, V, 3, 1-129. Bruxelles (1933). **b - 1044**

Au cours de ce voyage ont été recueillis près de 850 spécimens de Poissons comprenant 205 espèces différentes, dont 6 espèces sont nouvelles : *Dasybatis uylenburgi*, *Leptocephalus manokwariensis*, *Diaphus astridae*, *Synchiropus Leopoldi*, *Eviota*, *lachdeberei*, *E. nigriventris*. Liste des espèces classées par région. Liste systématique des espèces recueillies. Remarques générales sur la faune ichthyologique indo-australienne.

**Graham Michael** - The North Sea Cod [*Gadus morrhua Maris Nordici*]. 3 figs., Journ. Cons. Expl. Mer, IX, 2, 159-171. Copenhague (1934). **b - 1045**

I. The safety of the stock of the cod in the North Sea : results of an attempt to find a sensitive indicator of the effect of fishing on the stock, which can be examined frequently on hand of the usual biological research, investigations of age, migrations, maturity, and the rest. This indicator is the average survival of fish of a given year. Information as to the basis for interpretation of the indications given by the method of observations described. II. Prediction : Illustration of a method of prediction based upon the relation between the landings of the smallest marketable cod and the landings of large cod three and four years later. III. Miscellanea : Some information on the growth-rates of the North Sea cod; factors influencing this question ; the problem of the cod migrations ; the importance of the scale rings ; research needed concerned with cod liver oil.

**Hansen M. Paul** - Synopsis of Investigations into Fluctuations in the Stock of Cod at Greenland during the Years 1930-1933 [*Synopsis investigationum circa fluctuationes speciei « Gadus callarias » in Groënlandia a. 1930-1933*]. 7 figs., 1 chart, 4 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer (Scient. Rep. North-Western Area Comm. 1930-1932), LXXXVI, 1-11. Copenhague (1934). **b - 1046**

Age-determinations, exclusively from the otoliths, for various localities grouped in districts, concerning the year-classes 1912 and 1917, 1922, 1924, 1926 and younger year classes. Racial investigations. Investigations into spawning cod in the Godthaabsfjord.

**Hardenberg J. D. F.** - Notes on Some Genera of the *Engraulidæ* [*De quibusdam generibus ad familiam « Engraulidæ » pertinentibus*]. Natuurk. Tijdschr. v. Nederl. Ind., XCIII, 230-256. s'-Gravenhage (1933). **b - 1047**

It is pointed out that separation of the genera *Stolophorus*, *Engraulis* and *Anchoviella* (pro parte) cannot be maintained. These three genera should be united into one genus, viz. *Stolephorus*, this being the oldest name.

In a second part it is pointed out that the generic names *Thrissocles*, *Scutengraulis* and *Thrissina* cannot be maintained separately. The genera mentioned above should be united into one genus, *Thrissa*.

**Hardenberg J. D. F.** - New *Stolephorus*-species of the Indo-Australian Seas [*Species novæ ad genus « Stolephorus » marium indo-australiensium pertinentes*]. Natuurk. Tijdschr. v. Nederl. Ind., XCIII, 258-263. s'-Gravenhage (1933). **b - 1048**

Contains the description of 4 new species with 6 subspecies.

**Hardenberg J. D. F.** - Some New or Rare Fishes of the Indo-Australian Archipelago II. [*Piscium species novæ et raræ ad Archipelagus Indo-australiense pertinentes. II*]. Treubia, XIV, 215-226. Buitenzorg (1933). **b - 1049**

Contains descriptions of 12 species, belonging to 11 genera.

**Hardenberg J. D. F.** - Some New or Rare Fishes of the Indo-Australian Archipelago. III [*Piscium species quædam novæ et raræ ad Archipelagus Indo-australiense pertinentes*]. Treubia, XIV, 287-297. Buitenzorg (1934). **b - 1050**

Contains the description of 13 species, belonging to 9 genera.

**Hardenberg J. D. F.** - Additional Notes to my Paper « The Fishfauna of the Rokan-Mouth » [*Notæ additiciæ operi « De fauna ichthyologica in accessu fluminis* Rokan]. Treubia, XIV, 299-312. Buitenzorg (1934). **b - 1051**

Contains notes on the altered circumstances since 1929 (described in the above-named paper in Treubia 1931). A complete list of the fish-species occurring in the mouth of the Rokan River is given.

**Hardenberg J. D. F.** - Some Remarks on the Genus *Stolephorus* Lacépède in the Indo-Australian Archipelago [*Considerationes quædam de genere « Stolephorus »* Lacépède *in Archipelago Indo-australiensi*]. Treubia, XIV, 313-375. Buitenzorg (1934). **b - 1052**

Contains descriptions of all species known from the Indo-Australian Archipelago (9 in total). Detailed statistical differences within each species are given.

**Hart J. L.** - Determination of Subspecies of Anchovy Present in British Columbia Waters [*Determinatio subspeciei Engraulis in aquis Columbiæ Britannicæ viventis*]. Ann. Rep. Biol. Board Canada, 1933, 86. Ottawa (1934). **b - 1053**

Account of a preliminary taxonomic examination of *Engraulis mordax* and an investigation of its life-history which confirm the identity of the British Columbia anchovy with the ocean subspecies *E. m. mordax*.

**Heldt H.** - Le Thon rouge et sa pêche [*Thynnus ruber. Quæstio de piscatura*]. 48 fig., nombr. tabl., Rapp. Pr.-Verb. Comm. Expl. Scient. Méditerranée, VIII, 187-255. Paris (1934). **b - 1054**

Introduction. Place dans la classification et caractères spécifiques. Distribution géographique, bathymétrique et chronologique. Migrations. Ponte ; Développement ; Croissance. Nourriture. Pêche. Industrie et statistiques. Conclusions. Index bibliographique (pp. 248-255).

**Herre Albert W.** - Twelve New Philippine Fishes [*Duodecim Pisces novi in insulis Philippinis*]. Copeia, 1, 17-25. New York (1933). **b - 1055**

*Solenostomus phantasticus*, *Dampieria atrofasciatus*, *Pseudochromus colei*, *P. simillimus*, *Holacanthus chapmani*, *Hemipteronotus nigromaculatus*, *Scarus*, *ophtalmistius*, *S. visayanus*, *Mars caeruleo-maculatus*, *Gladiogobius*, relationships not stated, but considered «a true goby » erected for *G. ensifer*, *Callionymus zaspilus*, and *Opisthognathus suluensis*.

**Hodgson William C.** - The Natural History of the Herring of the Southern North Sea [*Historia naturalis aringi in parte septentrionali Maris Nordici*]. 120 pp., The Buckland Lectures for 1933, Edward Arnold and Co. London (1934). **b - 1056**

**Holly Maximilian** - *Cyclostomata.* 57 Abb., xiv + 62 S., Das Tierreich, Lief. 59. Walter de Gruyter und Co. Berlin u. Leipzig (1933). **b - 1057**

Morphologischer Charakter, Diagnose der Ordnungen, Familien, Gattungen und Untergattungen mit Schlüsseln dieser Gruppen und Arten. Für jede Form folgt eine Beschreibung und in den meisten Fällen auch eine Abbildung mit Angabe der Verteilung. Synonymen.

**Hubbs Carl L. & Schultz Leonard P.** - Description of Two New American Species Referable to the Rockfish Genus *Sebastodes,* with Notes on Related Species [*Descriptio duarum specierum novarum Americanarum ad genus « Sebastodes » pertinentium. Adiunguntur notæ circa species affines*]. 1 table, 2 pl., Univ. Wash. Publ. in Biol., II, 2, 15-44. Seattle, Wash. (1933). **b - 1058**

Revision of the species referred to the subgenera *Sebastosomus, Auctospina* and *Pteropodus.* The new names employed in this paper are : *Sebastodes columbianus* n. sp. *S. littoris* n. sp.

**Huntsman A. G.** - Effect of Wind on Herring [*Ventus eiusque effectus in aringum*]. Ann. Rep. Biol. Board Canada, 1933, 21. Ottawa (1934). **b - 1059**

Results of an analysis of the daily catches of weirs on the East and West sides of Inner Passamaquoddy Bay in relation to the direction and strength of wind, reveal that during the part of the year when the water is warm or being warmed the herring on the whole keep sufficiently near the surface to be carried in the wind drift and that they are carried passively and do not stem against such a weak, general movement of the water.

**Huntsman A. G.** - Relation of Herring to Fresh Water [*Correlatio inter aringum et aquam dulcem*]. Ann. Rep. Biol. Board Canada, 1933, 22. Ottawa (1934). **b - 1060**

Some results of a study showing that the relation of herring to freshwater is quite complicated. Movements of the herring in relation to the movements of the surface water as a result of hydrodynamic forces set up by the light fresh water.

**Huntsman A. G. & McNairn N. A.** - Fatness in the Herring [*Aringi crassitudo*]. Ann. Rep. Biol. Board Canada, 1933, 23. Ottawa (1934). **b - 1061**

Results of the examination of herring from different districts on account of its fatness, the criterion used being the relation of the weight to the length. Relationship between the fatness of the herring and the abundance of planktonic food. Gradation of fatness with size.

**Joubin** (Publiée sous la direction de M. le Prof.) - Faune ichthyologique de l'Atlantique Nord [*Fauna ichthyologica Oceani Atlantici septentrionalis*]. 24 pl., Cons. Int. Expl. Mer, 14. Copenhague (1933). **b - 1062**

Le Germon (*Germo alalunga* Gmelin) : systématique, bibliographie, habitat, mode de pêche, observations biologiques.

Poissons trouvés dans des estomacs de Germon appartenant aux familles suivantes : *Engraulidae, Maurolicidae, Sternoptychidae, Anotopteridae, Congridae, Chlorophthalmidae, Paralepidae-Sudidae, Myctophidae, Belonidae, Scomberesocidae, Gaidrosparidae, Merlucidae, Bothidae, Syngnathidae, Tetragonuridae, Carangidae, Sparidae, Girellidae, Mullidae, Caproidae, Scorpaenidae, Triglidae, Blenniidae, Brotulidae.* Pour chaque espèce l'A. donne : systématique, habitat, taille et développement.

**Lissner H.** - On Races of Herrings [*Aringus. Quæstio de stirpibus*]. 2 tabl., Journ. Cons. Expl. Mer, IX, 3, 346-364. Copenhague (1934). **b - 1068**

In this paper the methods of racial investigations on Herrings developed by Friedrich Heincke and by his successor have been examined. A new hypothesis is given in which are pointed out the necessity of considering the influence of external factors, the so-called « plasticity » or « lability », of starting the investigations from material of uniform maturity and of considering the geographical areas at a basis for subdivision of races.

Tous les exemplaires étudiés appartiennent à l'espèce *Trigla hirundo* L. syn. *T. corax* C. Bonap., dont l'A. donne une diagnose détaillée.

**Norman J. R.** - Notes on Flatfishes (*Heterosomata*). V. Four New Species from the Atlantic Coast of America [*Heterosomata. V. Species novæ quattuor ex litoribus Atlanticis Americanis*]. Ann. & Magaz. Natur. Hist., XII, 68, 201-204. London (1933). **b - 1077**

*Syacium longleyi, Etropus longimanus, E. intermedius,* and *Monolene antillarum.*

**Norman J. R.** - A Systematic Monograph of the Flatfishes (*Heterosomata*) Vol. I. *Psettodidæ, Bothidæ, Pleuronectidæ* [*Heterosomata. Vol. I$^{um}$: Psettodidæ, Bothidae, Pleuronectidæ. Monographia systhematica*]. viii + 459 pp., British Mus. (Natur. Hist.). London (1934). **b - 1078**

The principal part of this work includes the systematics of the *Heterosomata* for which there are given a description and an illustration of every species with the characteristics of families, subfamilies and genera, the classification of which rather differs from the one commonly used. The other parts deal with the fossil *Heterosomata*, development of the asymmetry, anatomy, especially respiration organs, mimicry and albinismus and genetics. (See Abstract in: Journ. Cons. Expl. Mer, IX, 3, 426).

**Parr Albert Eide** - Two New Records of Deep Sea Fishes from New England with Description of a New Genus and Species [*De inventis duobus novis piscibus abyssalibus in regione* New England. *Adiungitur descriptio novi cuiusdam generis novaeque speciei*]. 2 figs., Copeia, IV, 176-179. New York (1933). **b - 1079**

Key to 3 recognized genera including *Stomioides*, near *Stomias*, type *Stomioides Nicholsi* from the stomach of *Xiphias gladius.*

**Parr Albert Eide** - Report on Experimental Use of a Triangular Trawl for Bathypelagic Collecting with an Account of the Fishes Obtained and a Revision of the Family *Cetomimidæ* [*Relatio de experientiis, retis cuiusdam triangularis auxilio perfectis ad collectiones bathypelagicas parandas. Adiungitur relatio de piscibus captis et recognitio familiae « Cetomimidae »*]. 21 figs., Bull. Bingham Oceanogr. Coll., IV, 6, 1-59. New Haven, Conn. (1934). **b - 1080**

General discussion of the method with a diagrammatic sketch of the relative dimensions and appearance of trawl and ship. Results of the trawling undertaken at Atlantis Station 1478, in 25° 39' Northern Latitude and 77° 18' Western Latitude to about 1050-1100 meters vertical depth on February 20, 1933. This single haul yielded a total of 47 different species of deepsea fish represented by 491 specimens, of which there were 118 specimens of species other than those of the genus *Cyclothone.*

Several new species are described and a new sub-family and genus.

Preliminary results of the ichthyological material collected during three expeditions to the vast area from Cape Cheljuskin to Bering Strait, sent out by the Soviet Government. Preliminary list and diagnosis of Fishes collected by the Hydrographical Expeditions in 1913-1914 and by the Expedition on the ice-breaker « Lütke » in 1929, of which the following species is new to science : *Liparis Laptevi* n. sp. Some general observations on the ichthyofauna of the Siberian Sea on hand of material collected by the « Vega »-Expedition 1878, the Russian Polar Expedition 1900-1903, the expedition of the steamer « Lütke » 1929, the Hydrographical Expedition in the Pacific during the voyage of the vessels « Tajmyr » and « Vaigatch ».

**Poulsen Erik M.** - Biology of the Dab in Danish Waters [*Pleuronectes flesus in aquis Danicis. De biologia*]. 7 figs., 9 tabl., Rep. Danish Biol. Stat., XXXVIII, 9-30. Copenhagen (1933). **b - 1086**

The yield of the Danish dab fishery 1909-1931 exposed in graphs and tables as to the different regions shows a remarkable increase. The occurrence of the dab in the Danish waters. Racial characters, spawning time, growth ; age and length of the dab upon attaining sexual maturity. The occurrence of dab in the Limfjord.

**Raitt D. S.** - A Preliminary Account of the Sandeels of Scottish Waters [*Ammodytes ad aquas Scotas pertinentes. Nota prior*]. 4 diagr., 4 charts, Journ. Cons. Expl. Mer, IX, 3, 365-372. Copenhague (1934). **b - 1087**

Notes on the four species of *Ammodytes*, *A. tobianus*, *cicerellus*, *lanceolatus*, *marinus*. Discussion on their geographical distribution, characteristics, breeding times, importance in the economics of the sea.

**Rauther M.** - Kl. III. *Euichthyes*. 156 + 124 Abb., Bronn's Kl. u. Ordn. des Tierreichs (*Vertebrata*). Echte Fische, VI, (Abt. 1, Buch 2), Lief. 3; 329-488 ; Lief. 4, 489-628. Leipzig (1933). **b - 1088**

Diese Serie behandelt die vergleichende Anatomie und die Morphologie der Klasse *Euichthyes*. Der erste Teil enthält eine Uebersicht aller veröffentlichten Angaben über die Anatomie und die Cytologie des Integumentes, im zweiten, dritten und vierten Teil werden das Skelett und sein Bau, die Form des Körpers, die Bewegung und die Muskulatur besprochen.

**Reid Earl D.** - Two New Congrid Eels and a New Flatfish [*Congridæ. Species duæ novæ. Pleuronectidæ. Species nova*]. Reports on the Collections Obtained by the First Johnson-Smithsonian Deep-sea Expedition to the Puerto Rican Deep. 2 figs., 1 pl., Smiths. Miscell. Coll. (Publ. 3251), XCI, 15, 1-11. Washington, D. C. (1934). **b - 1089**

Generic characteristics of the congrid Eels. Key to genera of *Congridae* discussed in this paper. Description of the following new species : *Ariosoma selenops*, *Congrina thysanochila*, *Poecilopsetta albomarginata*.

**Remotti Ettore** - Il problema sistematico del gen. *Mullus* L. e suoi aspetti endocrini [*De systematica generis « Mullus » L. eiusque aspectibus endocrinis*]. 9 fig., Boll. Mus. Labor. Zool. e Anat. Comp. R. Univ. Genova, XIII, 69, 3-20. Genova (1934). **b - 1090**

L'A. osserva alcuni casi anomali di *Mullus*, nei quali, in concomitanza con una condizione iperplasica della tiroide, su caratteri di *surmuletus* si ha sovrapposizione di elementi propri del *barbatus*. Sulla base di tale reperto, che dimostra la stretta relazione tra le due specie, riprende l'esame di queste, in rapporto al loro equilibrio endocrino, e pone in rilievo, parallelamente alla variabilità dell'abito esterno, un correlativo polimorfismo della tiroide ; le diversità glandolari, dal *barbatus* al *surmuletus*, facendosi particolarmente manifeste durante il periodo del differenziamento morfologico della regione cefalica. L'A. è indotto a ritenere le forme già ascritte alle due discusse specie come varianti endocrine di un'entità sistematica unica, la differente distribuzione ecologica potendo essere il fattore della variazione, o viceversa la sua conseguenza, quale portato, in tal caso, delle diversità d'esigenze ambientali create dalle differenze d'equilibrio ormonico. Tale forma potrebbe essere indicata allora come *Mullus mediterraneus*.

**Ricker W. E.** - Factors in Cultus Lake Affecting the Development and Survival of Young Sockeye Salmon [*Oncorhynchus nerka in regione* Cultus Lake. *Quæstio de factoribus qui in accretionem influunt et in vitam superstitem*]. Ann. Rep. Biol. Board Canada, 1933, 95-97. Ottawa (1934). **b - 1091**

Account of an investigation carried out to determine what environmental factors may exist in Cultus lake affecting young sockeye salmon, and how and to what extent they influence the survival rate. The investigation has followed three main lines : (a) general limnological studies of the lake ; (b) study of the food of fingerling sockeye, and (c) study of the food of predaceous Fishes. The methods used in each case are standard among limnologists. Bi-monthly temperature series, water samples and plankton hauls were taken at a representative central station. A gang of gill nets from 5/8 in. to 5 in. in stretched mesh, set regularly, afforded samples of predaceous Fishes and from their stomach were taken most of sockeye used in the food studies.

**Roule Louis** - Les Poissons et le monde vivant des eaux. Etudes ichthyologiques et philosophiques. **Roxas Hilario A.** - A Review of Philippine *Mugilidæ* [*Mugilidæ. Recognitio specierum ad insulas Philippinas pertinentium*]. 2 pl., Philipp. Journ. Sc., LIV, 3, 393-431. Manila (1934). **b - 1094**

Discussion on the various genera proposed under the family *Mugilidae*. Check list of the species of Mullets so far reported from Philippine seas, lakes and rivers. Key to the Philippine species of *Mugil*. One new species, *Myxus philippinus*, is described.

**Russell F. S.** - Tunny Investigations Made in the North Sea on Col. E. T. Peel's Yacht. « St. George », Summer, 1933, Part I. Biometric Data [*Thunnus thynnus. Inquisitiones peractæ per Mare Nordicum pamphilii* « St. George » *auxilio, æstate 1933. Pars Iª. Dati biometrici*]. 8 figs., 4 tabl., Journ. Mar. Biol. Assoc., XIX, 2, 503-522. Plymouth (1934). **b - 1095**

Details are given of the types of hooks lost in tunny in the North Sea in the summer 1933. Data are given on the measurements made on thirty-two large migrating fish caught in the North Sea in August and September, 1933. It was found that there was a tendency for fish with short second dorsal fins to have short first dorsal, anal, and caudal fins, and for those with long second dorsals to have these other three fins long.

**Russell F. S.** - The Tunny, *Thunnus thynnus*, Linnaeus. An Account of its Distribution and Biology [*Thunnus thynnus* L. *De eius distributione et biologia*]. 2 figs., Sc. Progress, XXVIII, 112, 634-649. London (1934). **b - 1096**

Brief outline of the distribution of the tunny that indicates at once that it is a migratory fish. The methods and localities of the commercial fisheries for tunny. Detailed discussion on the theories concerning its life history.

**Schultz Leonard P. & Chapman Wilbert M.** - A New Osmerid Fish, *Spirinchus dilatus*, from Puget Sound [*Spirinchus dilatus, sp. nov. ex* Puget Sound]. 2 pl., 2 tabl., Ann. & Magaz. Natur. Hist., ser. 10, XIII, 67-78. London (1934). **b - 1097**

Holotype. Comparison with *S. thaleichthys*, *S. starksi* and *S. lanceolatus*. Description and size.

**Schultz Leonard P. & Welander Arthur W.** - The Cottoid Genus *Hemilepidotus* of the North Pacific [*Genus Hemilepidotus Oceani Pacifici septentrionalis*]. 2 tabl., Journ. Pan-Pacific Res. Instit., IX, 2, 5-6. Honolulu, Hawaii (1934). **b - 1098**

The results of a biometrical study confirm the view of Gilbert and Burke that *H. jordani* is specifically distinct from *H. hemilepidotus* and contradict the statement of Schmidt that the two forms are only subspecifically distinct.

**Smith Hugh M.** - Contributions to the Ichthyology of Siam. XV. The Sea Catfish *Trachysurus leiotetocephalus* [*Contributiones ad faunam ichthyologicam cognoscendam regionis Siamensis. XV. Trachysurus leiotetocephalus marinus*]. Journ. Siam Soc., Natur. Hist., Suppl., IX, 3, 299-300. Bangkok (1934). **b - 1099**

The commercial importance of this species, its size, its occurrence.

**Smith Hugh M.** - Contributions to the Ichthyology of Siam. XVIII. The Blenniid Fishes of Siam, with Descriptions of New Species [*Contributiones ad faunam ichthyologicam cognoscendam regionis Siamensis. XVIII. Blenniidæ*]. 2 pl., Journ. Siam Soc., Natur. Hist., Suppl., IX, 3, 315-323. Bangkok (1934). **b - 1100**

With one exception all of the known Siamese Blenniids belong to the family of *Blenniidae* and are of very small size, inhabiting the shallow waters of rocky shores of the mainland and islands, especially tide pools. Of the species described here the following are new : *Petroscirtes masyae* n. sp., *Enchelyurus analis* n. sp., *Salarias siamensis* n. sp., *Cirripectes indrambaryae* n. sp. There is also given a key even including genera of Blennies occurring in India, the East Indies, the Philippines and other oriental regions which may be found in Siamese waters.

**Smith Hugh M.** - Contributions to the Ichthyology of Siam. XIX. New and Rare Fish Records from Siam [*Contributiones ad faunam ichthyologicam cognoscendam in regione Siamensi. XIX. Species novæ et raræ*]. Journ. Siam Soc., Natur. Hist., Suppl., IX, 3, 323-325. Bangkok (1934). **b - 1101**

*Rasbora heteromorpha, Ophicephalus marulius, Mactotrema caligans, Ophiocara porocephala, Zonogobius semidoliatus.*

**Scott E. O. G.** - Observations on Some Tasmanian Fishes, with Descriptions of New Species [*Observationes circa pisces quosdam Tasmaniæ et descriptio novarum specierum*]. 2 figs., 3 pl., Papers & Proc. R. Soc. Tasmania for 1933, 31-52. Tasmania (1934). **b - 1102**

The present paper falls into three sections : 1) Some general observations ; 2) Additions to the Tasmanian list : *Exonautes cribrosus, Solegnathus robustus* ; 3) Description of a new species of *Galaxias* (*G. cleaveri*) and a new species of *Agrostichthys* (*A. benhami*).

**Taranetz A.** - New Data on the Ichthyofauna of the Bering Sea [*De ichthyofauna Maris* Bering. *Notæ additiciæ*] (In Russ., Engl. Rés.). 4 figs., 3 tabl., Bull. Far East. Branch Acad. Sc. U. S. S. R., 1/2/3, 67-78. Vladivostok (1933). **b - 1103**

This paper contains the results of investigations conducted in 1931 and 1932 in the Bering Sea by expeditions of the Pacific Scientific Institute of Fisheries. It deals however only with 31 species of fish, of which new data, concerning their biology, systematics and distribution, have been obtained. Two new species and one subspecies are described.

**Tesch J. J.** - Herring Races in the Southern North Sea [*De stirpibus aringorum in parte meridionali Maris Nordici*]. 16 figs., 2 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, 3-ème partie, Appendices, 1933-1934, LXXXIX, 45-52. Copenhague (1934). **b - 1104**

The following investigations carried out in the autumn of the years 1927, 1928, 1932, and 1933 are based on the frequency of vertebrae as is here shown in numerous graphs and tables. Two types with different spawning times are pointed out, which, however, are not to be distinguished by their length in their first winter of scaled existence.

**Toner G. C.** - Notes on the Alewife (*Pomolobus pseudoharengus*). Canad. Field Natural., XLVIII, 51-52. Ottawa (1934). **b - 1105**

Conclusions as to the different stages and spawning periods of two fresh water species and the breeding and migration of the sea-lamprey, *Petromyzon marinus* Linn. Some *Ammocoetes* probably belonging to the sea-lamprey are recorded.

**Vinciguerra D.** - Res ligusticae. LXII. Del genere *Hymenocephalus* (Pesci Macruridi) e particolarmente della specie mediterranea (*H. italicus*) Gigl.) [*Res ligusticæ. LXII. Genus Hymenocephalus (Pisces macruridæ). Agitur particulatim speciei mediterraneæ « H. italicus »* Gigl.]. 1 fig., 1 tav., Ann. Mus. Civ. Stor. Natur. Giacomo Doria, LVI, 1932-34, 14-26. Genova (1934). **b - 1109**

L'A. dopo aver parlato della zona a *Nephrops norvegicus* qualificata « fondo a Scampi » in una zona a occidente del porto di Genova, prende in esame una raccolta di materiale costituito da 146 *Hymenocephalus italicus* pescati al largo di Voltri (350-450 m. di profondità) e a Sud di Portofino (400 m. di profondità).

**Vladykov V. D.** - Young Haddock in the Halifax Area [*Gadus æglefinus juvenis in regione* Halifax]. Ann. Rep. Biol. Board Canada, 1932, 41-42. Ottawa (1933). **b - 1110**

Abundance of young Haddocks (2 to 3 years old) in the Halifax area and of exceptionally large numbers of this fish in St. Margaret Bay during the summer of 1932. Forecast of good catches of commercial haddock in the future. Analysis of the stomach content of several hundreds of haddock. Difference in diet between the young and adult haddock. Experiments on young Haddocks kept in tanks with running seawater. Some observations on the food of these Haddocks.

**Vladykov V. D.** - Haddock Races along the North Atlantic Coast [*Gadus æglefinus præter litora nordica Oceani Atlantici*]. 1 table, Ann. Rep. Biol. Board Canada, 1933, 40. Ottawa (1934). **b - 1111**

Results of observations of 500 Haddocks procured from four different localities examined as to the following racial characters, (1) number of vertebrae, and (2) number of gill-rakers of the first gill-arch on the left side of the fish; the results suggest the presence of at least two different races (« Nova Scotia » and « New England ») of haddock along the North American coast.

**Vladykov V. D.** - Young Haddock in the Vicinity of Halifax, N. S. [*Gadus æglefinus juvenis præter* Halifax, N. S.]. 8 tabl., Contr. Canad. Biol. & Fish., VIII, 29, 409-419. Toronto (1934). **b - 1112**

This study is based on five hundred and seventy-six Haddocks caught in Eastern passage and Bedford basin. The material from both localities consisted of the broods of 1928, 1929, 1930 and 1931; the three-year-old fish (brood 1929) were most abundant in both places, comprising over 70 %. A striking inverse relationship between water temperatures and number of fish caught was established. The highest catches were made at temperatures from 4 to 7° C., whereas between 11 and 13° C. only small occasional catches were obtained.

**Weed Alfred C.** - Notes on Fishes of the Family *Hemirhamphidæ* [*De piscibus ad familiam « Hemirhamphidæ » pertinentibus. Notæ*]. Zool. Ser. Field Mus. Natur. Hist., XX, 41-66. Chicago (?). **b - 1113**

**Whitley Gilbert** - A New Fish, Reputed to be Poisonous, from Queensland [*Piscis novus ex regione* Queensland *venenosus consideratus*]. 1 pl., 1 fig., Mem. Queensl. Mus., X, 4, 175-179. Brisbane (1934). **b - 1115**

*Lutjanus coatesi* sp. nov. (Red bass). Diagnosis, colour, locality, affinities.

**Whitley Gilbert** - Notes on Some Australian Sharks [*De quibusdam Squalis australiensibus. Notæ*]. 3 pl., 4 figs., Mem. Queensl. Mus., X, 4, 180-200. Brisbane (1934). **b - 1116**

These notes, which are the result of 12 years' studies carried on in the Museums of Australia and New Zealand as well as in the field are preliminary descriptions to a « Shark Book » to be issued as a popular guide. The following genera and species are new: *Nebrodes concolor ogilbyi* subsp. nov., *Gillisqualus* gen. nov., *G. amblyrhynchoides* sp. nov., *Galeolamnoides* gen. nov. There is also a list given of the Sharks of Australia and New Zealand with an indication of their size, breeding methods and harmfulness to man.

**Whittaker W. R.** - Age Composition of the Pilchard Catch as Shown by the Otoliths [*Clupea pilchardus. Compositio specierum capturarum ex aetate per otholithos determinata*]. Ann. Rep. Biol. Board Canada, 1933, 103. Ottawa (1934). **b - 1117**

Results of the examination of the otoliths of a representative portion of the pilchard catch at Nootka and Ecoole for the 1932 season, in order to determine the age composition of the catch and to judge upon the cause of those fluctuations in abundance of fish which from time to time affect the fishery.

**Wilby G. V.** - New Records of Fish on the Coast of British Columbia [*Dati novi de piscibus ad Columbiam Britannicam pertinentibus*]. Ann. Rep. Biol. Board Canada, 1933, 103-104. Ottawa (1934). **b - 1118**

Account of the results of a critical examination made of the material of the Pacific Biological Station at Nanaimo and the collection in addition of about 500 specimens from the Strait of Georgia. List of new genus and species and of new records.

**Wilby G. V.** - Ichthyological Treasures from the « Albatross » Expeditions in Canadian Waters [*Collectio ichthyologica ex navigationibus navis* « Albatross » *per undas canadenses*]. Canad. Field Natural., XLVIII, 121-126. Ottawa (1934). **b - 1119**

Gives a list of many species of Fishes taken in Canadian waters by this vessel; also a bibliography.

**Wood Henry** - Scottish Investigations on Adult Herring Shoals in the North Western North Sea, 1933 [*Inquisitiones a Scotis peractæ in turmas aringorum adultorum in parte nord-occid. Maris Nordici, a. 1933*]. 4 figs., 8 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, 3-ème partie, Appendices 1933-1934, LXXXIX, 57-67. Copenhague (1934). **b - 1120**

This season offered a special interest from the biological point of view on account of the sudden changes in the distribution and the composition of the shoals on the drift-net grounds and adjacent areas. Age composition in different regions. Distribution and suggested movements. Racial analysis. Exceptional samples. The Berwick coast. The spring spawners of the Firth of Forth.

**Yessipov W. K.** - Brief Review of the Ichthyofauna of the Kara Sea [*Recognitio brevior de fauna ichthyologica in Mari* Kara] (In Engl., Russ. Rés.). Arctica, 1, 169-186. Leningrad (1933). **b - 1121**

Short history of the investigation of the Kara Sea. Review of the ichthyofauna of this sea: list of the Fishes of the Kara Sea which contains 24 species of salt-water Fishes, 7 species of migratory and semi-migratory fish and 9 species of fresh-water Fishes, which have been found to enter from the rivers into the brackish waters of the Ob Bay and the Gulfs of Yenissey and Pjassina. At the end of the paper a bibliographic index is given, which includes but the most important works on the ichthyofauna and fisheries of the Kara Sea and the rivers discharging themselves into it.

**Huber Ernst,** arr. by **Brazier Howell A.** - Anatomical Notes on Pinnipedia and Cetacea [*Pinnipedia et Cetacea. Notæ anatomicæ*]. ills., Carnegie Instit., Publ. 447. Washington, D. C. (1934). **b -1129**

The A. deals with the *Pinnipedia* (*Otariidae, Phocidae*) and *Cetacea* (*Tursiops truncatus, Monodon monoceros*).

**Klikh N.** - Le phoque du Groenland [*Phoca Groënlandica*] (En russe). Sov. Sever, 6, 93-94. Moskva (1933). **b - 1130**

**Lönnberg Einar** - *Prodelphinus Graffmani* n. sp. a New Dolphin, from the Pacific Coast of Mexico [*Prodelphinus Graffmani, species nova ex litoribus mexicanis Oceani Pacifici*]. 1 fig., 1 pl., Ark. f. Zool., 26 A, H. 4, 19, 1-11. Stockholm (1934). **b - 1131**

The material available for measurements and classification of this dolphin from Acapulco consists of the skin with the fins in situ, the upper jaw with the tooth row complete on the right side, and the complete lower jaw.

A detailed discussion follows from which it becomes quite clear that this Dolphin is quite distinct from all known members of the genus *Prodelphinus* not only with regard to its colour, but also with regard to morphological characteristics as far as the available material can prove. The A. ventures therefore to name it *P. Graffmani* n. sp.

**Meniam C. Hart** - A Hypothetical « Sanctuary » for Ocean-Dwelling Seals [*Agitur de sanctuario quodam hypothetico ad usum phocarum oceanicarum*]. Science, LXXX, 2069, 186-187. New York (1934). **b - 1132**

Critical note putting in evidence the errors made by C. W. Hobley in his recent leaflet, in which he states the necessity of studying the bionomics of Hood and Harp Seals and of protecting immature animals.

**Plekhanov P.** - Détermination de l'âge chez le phoque [*Aetatis determinatio in Phoca*] (En russe). 3 fig., Bull. Naoutchno-Issl. Inst. Zool. Univ. Moscou, 88-91. Leningrad-Moskva (1933). **b - 1133**

**Serène Raoul** - Sur un échouage de *Kogia breviceps* Gray à proximité de l'Institut Océanographique de Nhatrang (Annam) [*Kogia breviceps* Gray *in arena prope Institutum Oceanographicum civitatis* Nhatrang (*in* Annam)]. Bull. Mus. Nat. Hist. Natur., 2e sér., VI, 4, 398-399. Paris (1934). **b - 1134**

L'A. a pu observer l'animal encore vivant et assister à l'échouage proprement dit. Après l'échouage il a pratiqué un examen des caractères spécifiques du Cétacé et a opéré quelques mensurations. Rareté de cette espèce, signalée et reconnue pour la première fois dans la Mer de Chine.

**Steven G. A.** - A Short Investigation into the Habits, Abundance, and Species of Seals on the North Cornwall Coast [*Inquisitio brevis in consuetudines, abundantiam et species phocarum præter litora regionis* North Cornwall]. 3 charts, Journ. Mar. Biol. Assoc., XIX, 2, 489-501. Plymouth (1934). **b - 1135**

Grey Seals (*Halichoerus gryphus*) are present in considerable numbers, and are probably the commonest Seals in Cornish waters. Brown Seals (*Phoca vitulina*) appear to be few around Cornwall.

In the course of three trips to the herring grounds in the vicinity of St. Ives five Seals were sighted. Seven others were also seen at various other times and places in the course of five days spent in that locality. During a single night at sea in Port Isaac Bay eight Seals were sighted. In an appendix detailed log of observations and events is given.

**Takashima Haruo** - A Handlist of Japanese Marine Mammals [*Mammalia Japonica marina. Cathalogus*] (In Jap.). Trans. Natur. Hist. Soc. Formosa, XXIII, 126/127, 249-258. (1933). **b - 1136**

Brief notes on 35 species.

**Towsend Charles H.** - The Fur Seal of the Galapagos Islands [*Arctocephalus galapagoensis ex Insulis* Galapagos]. 14 pp., Zoologica, New York Zool. Soc., XVIII, 2. New York (1934). **b - 1137**

This study deals with several specimens of *Arctocephalus galapagoensis* captured in 1932 and '33. Eleven photographs of these Seals are presented in this paper.

**Wheeler J. F. G.** - On the Stock of Whales at South Georgia [*Turma balænarum ad Georgiam meridionalem pertinens*]. Discovery Rep. (Govmt. Depend. Falkland Isls.), IX, 351-372, Univ. Press. Cambridge (1934). **b - 1138**

**Zenkovitsch B.** - Some Data on Whales of the Far East [*De balænis ad extremas Orientis regiones pertinentibus. Notæ et dati*]. (In Russ. & Engl.). 1 table, C. R. Acad. Sc. U. R. S. S., II, 6, 388-392. Léningrad (1934). **b - 1139**

In this paper author presents the results of his observations on the food of the Californian grey whale, *Rhachianectes glaucus* (Cope), the sex and age of *Physeter macrocephalus* (Lin.), and of weighing of two fin whales, *Balaenoptera physalus* (Lin.) and one humpback whale, *Megaptera nodosa* (Bonn.), made to ascertain approximately the average weight of a whale. The observations have been made during the second expedition, 1933, of the 1st Soviet Whaling Fleet « Aleut ».

## Animalia incertae sedis.

**Cooper G. Arthur** - New Brachiopods [*Brachiopoda nova*]. Reports on the Collections Obtained by the First Johnson-Smithsonian Deep-sea Expedition to the Puerto Rican Deep, 2 pl., Smiths. Miscell. Coll. (Publ. 3241), XCI, 10, 1-5. Washington, D. C. (1934). **b - 1142**

*Gryphus Bartschi* and *Argyrotheca Johnsoni.*

**Leloup E.** - Brachiopodes [*Brachiopoda*]. Résult. Scient. du voyage aux Indes Orient. Néerl. de LL. AA. RR. le Prince et la Princesse Léopold de Belgique, Mém. Mus. R. Hist. Natur. Belgique, h. sér., II, 13, 7-14. Bruxelles (1933). **b - 1143**

Les Brachiopodes recueillis appartiennent à deux espèces assez communes dans ces parages de l'Océan Indo-Pacifique : *Lingula anatina* Bruguière et *Frenulina sanguinea* (Chemnitz). L'A. en donne : la synonymie, la description et la distribution géographique.

**Okada Yaichiro** - Bryozoa Fauna in the Vicinity of the Shimoda Marine Biological Station [*Agitur de fauna bryozoica apud stationem biologicam marinam in* Shimoda]. 2 pl., Sc. Rep. Tokyo Bunr. Daig., sect. B., II, 26, 1-202. Tokyo (1934). **b - 1144**

22 species are described, of which *Iodictyum Shimodai* is new.

**Stekhoven J. H. S.** - Bryozoen und Nematoden [*Bryozoa et Nematodes*]. Zool. Anz., CV, 57-59. Leipzig (1933). **b - 1145**

**Yabe Hisakatsu & Hatai Kotora** - The Recent Brachiopod Fauna of Japan. (1) New Genera and Subgenera [*Brachiopoda japonica recentiora.* (1) *Genera et subgenera nova*]. 4 figs., 1 table, Proc. Imp. Acad., X, 9, 586-589. Tokyo (1934). **b - 1146**

In a list the total number of genera and species known from the seas around Japan together with their geographic distribution in the Pacific Ocean is given. 30 species in 13 genera and 1 subgenera distributed in 4 families are discriminated among the numerous specimens of Brachiopods collected by the surveying ship « Sôyô-maru ». The new forms described in this paper are as follows : *Neohemithyris*, gen. nov., *Surugathyris* subgen. nov., *Nipponithyris* gen. nov.

**Yabe Hisakatsu & Hatai Kotora** - The Recent Brachiopod Fauna of Japan. (2) New Species [*Brachiopoda japonica recentiora.* (2) *Species novæ*]. 44 figs., Proc. Imp. Acad., X, 10, 661-664. Tokyo (1934). **b - 1147**

*Hemithyris pellucida, Terebratulina pacifica, T. kyusyuensis, Jolonica nipponica, Dallina obessa, D. triangularis, Laqueus quadratus, L. japonicus, L. proprius, L. orbicularis.*

**Zirpolo Giuseppe** - *Zoobotryon verticillatum* (Delle Chiaje). 115 fig., 11 tav., Mem. Pont. Acc. Sc. Nuovi Lincei, ser. II, XVII, 109-442. Roma (1933). **b - 1148**

Studio completo morfologico, fisiologico ed embriologico sullo *Zoobotryon verticillatum* (Delle Chiaje), briozoo comunissimo ed abbondante nel Golfo di Napoli. Lo *Zoobotryon verticillatum* (Delle Chiaje) vive nel Golfo di Napoli, nel Golfo di Trieste, nel Mar Rosso, nell'Oceano Indiano, nell'Atlantico, nei Mari Australiani, nel Mediterraneo e sulle Coste africane.

## Plantae marinae.

**Allen W. E.** - Marine Plantation Diatoms of Lower California [*Diatomeæ marinæ in California meridionali*]. Bot. Gaz., XCV, 485-492. Chicago, Ill. (1934). **b - 1149**

Twenty-nine genera have been found in the plankton Diatoms in surface waters off the coast of Lower California from Pt. San Eugenio to Pt. San Lazaro.

**Ålvik Gunnar** - Plankton-Algen norwegischer Austernpollen. I. Systematik und Vorkommen der Arten [*De algis planctonicis in bacinis norvegicis ostrearum. I. De systematica et speciebus*]. 10 Tab., 2 Taf. mit 36 Abb., 5 Abb. i T., Bergens Mus. Årb., Naturv. r., H. 1, 6, 1-47. Bergen (1934). **b - 1150**

Beschreibung der Austernpollen. Das Nannoplankton in den Austernpollen. Die Herstellungen von Speziesreinkulturen der Algen. Beschreibung der gezüchteten neuen Spezies von Algen : *Chlorococcum submarinum* n. sp., *Chlorella spärckii* n. sp., *Carteria micropapillata* n. sp., *Brachynema bacillare* nov. gen. et n. sp. (*Heterocontae*), *Catella rubra* nov. gen. et n. sp. (*Cyanophyceae*) und *Synechococcus gaarderii* n. sp.

**Børgesen F.** - Some Marine Algae from the Northern Part of the Arabian Sea with Remarks on their Geographical Distribution [*Algæ quædam marinæ in parte septentr. Maris Arabici. Adjunguntur observationes de earum geographica distributione*]. 8 figs., 2 pl., Kgl. Danske Vidensk. Selsk., Biol. Medd., XI, 6, 1-72. København (1934). **b - 1151**

Systematically arranged list of the species hitherto found at Karachi, Okha Port and Dwarka : *Chlorophyceae, Phaeophyceae, Rhodophyceae*. Tables of species showing their geographical distribution. Some plant geographical considerations.

**Brujewicz S. W., Trofimov A. V. & Hartmann A. N.** - The Iodine Content of the *Algæ* of White-Sea and Murman Coast [*Algæ Maris Albi et litorum* Murman *nomine. Agitur de jodio quod continent*] (In Russ., Engl. Rés.). 1 fig., 7 tabl., Trans. Oceanogr. Inst., III, 3, 61-78. Moscow (1933). **b - 1152**

Results of the determination of the iodine-content of about 120 species of different *Algae* gathered in the White Sea and along the Murman Coast, chiefly *Laminaria*. The iodine-content has been determined after dry ashing (Fellenberg) and sometimes by wet burning (Pfeiffer). Ashes and moisture have been determined.

**Brujewicz S. W. & Tschajkina I. A.** - Hydrochemical Observations in the Northern Part of the Kola Fjord (Barents Sea) in Summer 1931 [*Observationes hydrochymicæ in parte septentrionali Bajæ* Kola (*Maris* Barents) *æstate 1931*]. (In Russ., Engl. Rés.). Trans. Oceanogr. Inst., III, 3, 120-124. Moscow (1933). **b - 1153**

Results of investigation on salinity, dissolved oxygen, pH, phosphates and nitrites content of the water in the Kola Fjord ; variation and changes in the hydrochemical elements during the various seasons of the year. In an appendice a Table of Results of the hydrochemical observations performed in 1931 in the Northern Part of Kola Fjord simultaneously with botanical observations on the the growth of the iodine containing *Algae* and a study of the intensity of the photosynthetic process in different months are given.

**Butcher R. W.** - Notes on the Variation of the British Species of *Zostera* [*De variatione specierum britannicarum ad genus « Zostera » pertinentium*]. Rep. Bot. Exchange Club for 1933, X, 592-597. (1934). **b - 1154**

**Carmin Jos.** - *Algæ* of Palestinian Shores [*Algæ ex litoribus Palestinæ*]. Bull. Inst. Océanogr., 653, 1-7. Monaco (1934). **b - 1155**

List of collected *Algae : Chlorophyceae, Phaeophyceae, Rhodophyceae, Diatomeae*. General observations and notes on the geographical distribution, predominant species in different zones, abundance, reproduction periods, migration of the species listed.

**Chemin E.** - Une excursion algologique aux îles Anglo-Normandes [*Navigatio algologica ad insulas Anglo-Normannas*]. 1 carte, Bull. Labor. marit. Saint-Servan, XII, 1-22. Rennes (1934). **b - 1156**

Études algologiques dans les îles de Jersey, Guernesey et Sercq et dans l'archipel des Ecréhous. Étude chronologique des stades de l'extension d'espèces exogènes, *Falkenbergia Hillebrandii* et *Asparagopsis armata*. Comparaison de la flore des îles avec celle du littoral normano-breton, qui forme avec elles la province nord-armoricaine. Interprétation des différences observées.

**Chemin E.** - La flore algologique de l' île d'Aurigny dans ses rapports avec celle du Cotentin [*Correlatio inter floram algologicam insulæ* d'Aurigny *et floram regionis* Cotentin]. 2 cartes, Bull. Labor. marit. Saint-Servan, XIII, 6-21. Rennes (1934). **b - 1157**

Description des diverses stations de l'île. Étude des espèces apparues dans la région au cours de ces dernières années. Définition d'une province nord-armoricaine et d'une province lutétienne.

**Flowers Seville** - Vegetation of the Great Salt Lake Region [*Agitur de vegetatione in regione* Great Salt Lake]. Bot. Gaz., XCV, 353-418. Chicago, Ill. (1934). **b - 1159**

Description of the *Algae* native to the waters of the Great Salt Lake, of the *Algae* living in salt-marshes in the vicinity, and in sloughs, wetter and more saline than the marshes.

**Fott B.** - Stades persistants de *Bryopsis muscosa* Lamouroux [*B. muscosa* Lam. *Stadia persistentia*]. 10 fig., Mém. Soc. R. Sc. de Bohème, Cl. Sc., 2, 1-4. Prague (1934). **b - 1160**

Observations faites à Villefranche-sur-Mer sur la persistance de *B. muscosa*, une espèce d'algue commune de la flore marine de la Côte d'Azur. Schéma de la phase germinative du filament segmenté de l'algue en question et observations sur les kystes qui se rapprochent des états persistants segmentés.

**Häyrén Ernst** - Einige Algenfunde aus dem Finnischen Meerbusen [*De Algis in Sinu Finlandico*]. Mem. Soc. pro Fauna et Flora Fennica, IX, 1932-1933, 172-173. Helsinki (1933-34). **b - 1161**

Bericht über einige vom Vf. wie von zwei anderen Personen gesammelte Algenarten, besonders *Ceramium, Cladophora* und *Enteromorpha*.

**Hoffmann C.** - Die Tierwelt der Nord- und Ostsee. Lief. 25. Teil 1. c : Die Vegetation der Nord- und Ostsee [*De fauna Maris Nordici et Maris Baltici. Fasc. 25. Pars 1 c : De vegetatione Maris Nordici et Maris Baltici*]. 32 S., Begr. von Grimpe G. & Wagler E. Hrsg. von Grimpe G., Akad. Verlagsg. m. b. H. Leipzig (1933). **b - 1162**

**Howe Marshall A.** - Plants that Form Reefs and Islands [*Plantæ vada insulasque formantes*]. Scient. Monthly, XXXVI, June, 549-552. New York (1933). **b - 1163**

Importance of some *Algae* as reef-building and land-forming by secreting or precipitating lime from the surrounding water. Particular study of the island of Funafuti, of the Ellice Islands group in the « South Seas ».

**Howe Marshall A.** - Hawaiian *Algæ* collected by Dr. Paul C. Galtsoff [*Algæ ex insulis* Hawaii, *collectæ a Dr.* P. C. Galtsoff]. 5 figs., Journ. Wash. Acad. Sc., XXIV, 32-42. Washington, D. C. (1934). **b - 1164**

Fourteen marine *Algae* from Karreohe Bay, Ohau and thirteen from Pearl and Hermes Reef are described. One species of *Trichogloea* and two of *Laurencia* are new.

**Inagaki Kwan' iti** - Red *Algæ* in the Gulf of Osyoro and Neighbouring Sea [*Rhodophyceae in Sinu* Osyoro *et mari adiacente*] (In Jap.). 31 figs., Rep. Stat. Algal Res., Hokkaido Imp. Univ., 2, 1-77. (?) (1933). **b - 1165**

69 species of *Rhodophyceae* are described in this paper. A key for the determination of the genera is given.

**Kireeva M. S. & Schapova T. F.** - Report on Stationary Works undertaken by the Department of Bottom *Algæ* of the State Oceanographical Institute for the Study of Iodine-bearing *Algæ* [*Relatio de operibus peractis a Sectione pro Algis ad* « State Oceanographical Institute » *pertinente, algis jodium producentibus studendis*]. (In Russ., Engl. Rés.). 2 charts, 11 figs., 15 tabl., Trans. Oceanogr. Inst., III, 3, 29-49. Moscow (1933). **b - 1166**

Record of stationary observations carried on since the month of May, 1931, on iodine-bearing *Algae* of the Murman Coast in Kolsky Fjord and off the Kildin Island (White Sea). Determination of yearly increase of iodine-bearing *Algae, Laminaria, Fucus* and *Ascophyllum*. Study on sporogenesis in *Laminaria saccharina* f. *membranacea* J. Ag. and *L. digitata* d. *genuina* Kjellm. f. *typica* Kjellm. Definition of increase of frond by months. Investigations in Volokovaja Bay for determining the stock of raw material of *Laminaria*.

**Kylin H.** - On Three Species of *Delesseriaceæ* from New Zealand [*Delesseriaceæ. Species tres ex Nova Zelandia*]. Trans. of New Zealand Inst., LXIII. (?) (1933). **b - 1167**

*Myriogramme undulatissima* Kylin changes into *Erythroglossum undulatissimum* (J. Ag.) Kylin, *M. oviformis* Kylin is similar to *Abroteia suborbicularis* Harv., *Erythroglossum Laingii* Kylin is described as a new species.

**Lewis I. F. & Taylor W. R.** - Notes from the Woods Hole Laboratory [*Notæ ex Laboratorio in* Woods Hole]. 1 pl., Rhodora, XXXV, 413, 147-154. (?) (1933). **b - 1168**

Some notes on the *Algae* collected by Dr. Jordan at the Pennikese Island, off Woods Hole.

Variations in the abundance of several species. Occurrence of *Tilopteris Mertensii* and *Sphacelaria plumigera* for the first time in America. Dispersion of *Zostera marina* in 1932 from the Atlantic littoral of the United States.

**McFarlane Constance & Bell Hugh P.** - Observations of the Seasonal Changes in the Marine *Algæ* in the Vicinity of Halifax, with Particular Reference to Winter Conditions [*Observationes de variationibus pro anni tempore Algarum marinarum præter* Halifax. *Agitur particulatim de condicionibus hiemalibus*]. 2 figs., Proc. Nova Scotian Inst. Sc. Halifax, XVIII, 3, 134-176. (?) (1934). **b - 1169**

Notes on frequency, habitat and season of eighty species are given in the present paper. From autumn till the middle of January the dominant species are: *Ilea, Scytosiphon, Dumontia, Polysiphonia*; until the end of April: *Monostroma, Spongomorpha, Bangia*; and thereafter *Laminaria, Chorda, Polysiphonia*, etc., gradually replaced by *Chordaria*, which becomes dominant by June. In late August and early September a barren period prevails.

**Meyer K. I.** - Report on the Work of the Expedition for Determining the Stock of Seaweeds in the White Sea [*Relatio de operibus ab expeditione peractis ad copiam Algarum Maris Albi determinandam*] (In Russ., Engl. Rés.). 3 maps, 11 tabl., Trans. Oceanogr. Inst., III, 3, 7-28. Moscow (1933). **b - 1170**

Staff of the expedition sent out by the Oceanographic Institute. Results of investigations on the spreading of the seaweeds vegetation along the explored coastal areas; seaweeds of industrial importance; their composition as to species, their distribution in relation to bottom-conditions and other factors, the maximum depth reached by those *Algae*. Exploration of experimental areas (1 sq. meter each) in order to obtain numerical data on the richness in alga of the various points of the White Sea. Investigation of drift-weeds supplied by the sea.

**Miki Shigeru** - On the Sea-grasses of Japan. (1) *Zostera* and *Phyllospadix*, with Special Reference to Morphological and Ecological Characters [(*1*). *Zostera et Phyllospadix ad Japoniam pertinentes. Agitur particulatim de eorum morphologia et characteristicis oecologicis*]. 8 figs., Bot. Magaz., XLVII, 843-862. Tokyo (1933). **b - 1171**

The following four species are considered really endemic: *Zostera asiatica, Z. caespitosa, Phyllospadix japonicus* and *Ph. iwatensis*. Morphological observations on rhizomes.

The *Zostera* species grow on muddy and sandy places of the bay, *Phyllospadix* lives upon the rocks washed by open sea-water.

Some species of these two genera live only in temperate sea, others in cold currènt sea, still others have a wide distribution.

**Miranda F.** - Materiales para una flora marina de las rías bajas gallegas [*Res collectæ ad floram marinam comparandam in accessibus fluminum Galleciae*]. 6 figs., 1 lám., Bol. Soc. Españ. Hist. Natur., XXXIV, 2/3, 165-180. Madrid (1934). **b - 1172**

El A. tuvo la ocasión de recoger durante el año 1933, en la ría de Pontevedra, unas Algas marinas. El A. puede dar algunas adiciones a la flora ficológica española. Estas son las que siguen: *Vaucheria coronata, Polysiphonia urceolata, Choreocolax Polysiphoniae, Falkenbergia Hillebrandii, Corallina elegans, Cladophora rudolphiana, Castagnea Zosterae, Punctaria latifolia, Cruoria purpurea, Rhodochorton velutinum, Callocolax neglectus, Gonimophyllum Buffhami, Rhodochorton membranaceum, Holmsella pachyderma, Colaconema Bonnemaisoniae, Bonnemaisonia clavata*. Otras adiciones a la flora ficológica española. Hallazgos interesantes desde el punto de vista de la distribución de las Algas marinas en las costas españolas. Los tipos de curvatura del ramo carpogónico en el género *Callithamnion*.

**Miyabe Kingo & Nagai Masaji** - *Laminariaceæ* of the Kurile Islands [*Laminariaceæ ex insulis* Kurile] (In Engl., Jap. Rés.). Trans. Sapporo Natur. Hist. Soc., XIII, 85-102. (?) (1933). **b - 1173**

Description of the species and keys for their identification. 11 species of *Laminaria*, of which two are new, 3 of *Cymathaere*, 1 of *Kjellmanella, Costaria, Hedophyllum*, 2 of *Arthrothamnus*, 1 of *Thalassiophyllum*, 5 of *Alaria* and 1 of *Pleuropterum* are dealt with in this paper.

**Nagai Masaji** - On a New Species of *Cymathære* from the Kurile Islands [*De nova quadam specie ad genus* « *Cymathære* » *pertinente ex insulis* Kurile]. 6 figs., Proc. Imp. Acad., IX, 531-534. Tokyo (1933). **b - 1174**

Diagnosis of the new species *C. fibrosa* found for the first time in the Kurile Islands.

**Nagai Masaji** - Meeresalgen aus Kamtschatka [*Algæ marinæ e* Kamtschatka] (In Dtsch., Jap. Rés.). Trans. Sapporo Natur. Hist. Soc., XIII, 12-19. (?) (1933). **b - 1175**

Bericht über eine Sammlung von 4 Chlorophyceen, 8 Phaeophyceen und 4 Rhodophyceen aus der Ost- und Westküste.

**Okamura K.** - Icones of Japanese *Algæ* [*Tabulæ Algarum Japonensium*] (In Engl. & Jap.). 5 pl., VII, 1, 1-7, Publ. by the Author. Tokyo (1933). **b - 1176**

The present paper concerns the following species: *Chrysymenia grandis, Griffithsia tenuis, Pleonosporium kobayashii, Nemastoma lancifolia, Odonthalia ochotensis, Sargassum kashiwajimanum*.

**Okamura K.** - On *Gelidium* and *Pterocladia* of Japan [*Gelidium et Pterocladia in Japonia*].

18 pl., Journ. Imp. Fish. Inst., XXIX, 2, 47-67. Tokyo (1934). **b - 1177**

Distinction between *Gelidium* and *Pterocladia*. Key to the Japanese species of *Gelidium*. The following new forms are recorded : *Gelidium tenue* sp. nov., *G. subfastigiatum* sp. nov., *G. vagum* sp. nov., *G. decumbensum* sp. nov., *G. clavatum* sp. nov., *Pterocladia tenuis* sp. nov., *P. densa* sp. nov.

**Okamura K.** - Notes on *Algæ* Dredged from the Pacific Coast of Tiba Prefecture [*Notæ de Algis, machinæ vada verrentis auxilio repertis, in litoribus Oceani Pacifici ad Præfecturam* Tiba *pertinentibus*]. 1 pl., Rec. Oceanogr. Works in Japan, VI, 1, 13-18. Tokyo (1934). **b - 1178**

There is only one species new to science : *Rhodymenia cuneifolia*. This paper throws much light on the depth inhabited by *Algae*.

**Parke M. W.** - Algological Records from the Manx Region [*De Algis repertis in regione* Manx]. Mar. Biol. Stat., Port Erin, 46th Ann. Rep. Oceanogr. Dept. Univ. Liverpool, 35-39. Liverpool (1933). **b - 1179**

**Pavillard Jules** - Les Péridiniens et Diatomées pélagiques de la Mer de Monaco pendant les années 1907 et 1908 [*Peridineæ et Diatomeæ pelagicæ Maris Arcis Monoeci a. 1907 et 1908*]. 1 fig., 3 tabl., Bull. Inst. Océanogr., 654, 1-6. Monaco (1934). **b - 1180**

Notes préliminaires qui ont pour but de faire connaître, année par année, les produits de l'analyse purement systématique des récoltes successives et de l'étude particulière des individualités spécifiques nouvelles, critiques ou mal connues.

**Politis Jean** - Algues marines de l'Ile de Crète [*De Algis marinis ad insulam Cretam pertinentibus*]. Rapp. Pr.-Verb. Comm. Expl. Scient. Méditerranée, VIII, 257-261. Paris (1934). **b - 1181**

Historique des explorations de l'Ile de Crète au point de vue de ses richesses végétales, depuis 1548 jusqu'à nos jours. Compte rendu d'un voyage de trois semaines en Crète, fait par l'A. en 1925 ; liste des Algues de Crète récoltées et déterminées.

**Rees Ethel M.** - Some Observations on *Bifurcaria tuberculata* Stakh. [*Observationes quædam de Bifurcaria tuberculata* Stakh.]. Ann. of Bot., XLVII, 180. London (1933). **b - 1182**

Geographical distribution, habitat and anatomical features are studied for the species under consideration. A part of this monograph is devoted to the growth and development of this species.

**Ruud Føyn Birgithe** - Ueber den Lebenscyklus einiger Braunalgen [*De cyclo vitali in Phæophyceis*]. Bergens Mus. Årb., Naturv. r., H. 1, 2, 1-9. Bergen (1934). **b - 1183**

Vorläufige Mitteilung über einige im Sommer 1932 auf der biologischen Station auf Herdla ausgeführte experimentellzüchterische und cytologische Untersuchungen von *Ectocarpus siliculosus*, *Dictyosiphon chordaria*, *Mesogloia vermiculata* und *Eudesme zosterae*.

**Schiffner Viktor** - Meeresalgen aus Süd-Dalmatien, gesammelt von Franz Berger [*Algæ marinæ ex Dalmatia merid.*, *Franciscus* Berger *collegit*]. 4 Abb., Oesterr. Bot. Ztschr., LXXXII, 283-304. Wien (1933). **b - 1184**

Verzeichnis über etwa 100 Meeresalgen von der Halbinsel Sabbioncello und 28 von der Insel Lacroma. Beschreibung einer neuen Gattung *Pseudogelidium*, vier neuer Arten und Varietäten. Kritische Bemerkungen über die Formen von *Laurencia obtusa*, *Cladophora utriculosa* und *Dictyota*.

**Setchell William Albert** - Hong Kong Seaweeds. III. *Sargassaceæ* [*Algæ marinæ ex* Hong Kong. *III. Sargassaceæ*]. 18 pl., Hong Kong Natural., Suppl., 2, 1-49. (1933). **b - 1185**

Fourteen species of the genus *Sargassum* are described and figured. Description of two new species of the subgenus *Bactrophycus*.

**Setchell William Albert** - Some early Algal Confusions. II. [*Veteres confusiones in Algis determinandis*]. 19 pl., Univ. Calif. Publ. in Bot., XVII, 9, 187-254. Berkeley, Calif. (1933). **b - 1186**

Emendations of species from older herbaria, especially of the genera *Codium*, *Sargassum*, *Fucus* and *Halochloa*. Discussion on the synonymes.

**Setchell W. A. & Gardner N. L.** - De Gigartinis. Rev. Algol., VII, 1/2, 131-138. Paris (1934). **b - 1187**

Conspectus collocationis specierum Gigartinarum quoad subgenera. Species Gigartinae australianae Janardinianae rexaminatae. Revisiones nomenclaturae specierum.

**Setchell W. A. & Gardner N. L.** - A Preliminary Survey of *Gigartina* [*Recognitio prior generis « Gigartina »*]. 19 pl., Univ. Calif. Publ. in Bot., XVII, 10, 255-340. Berkeley, Calif. (1933). **b - 1188**

After having revised the entire content of species attributed, at present, to the genus, the AA. here suggest a tentative classification on the basis of the generic name *Gigartina*, as established by Stackhouse in 1809, with emphasis on the Californian species so far as they may be representative. Four series are erected with 7 subgenera ; description of every species. *Gigartina boryi* sp. nov., *G. Harveyana* (Kuetz.) comb. nov., *G. turneri* sp. nov., *G. cristata* (Setchell) comb. nov., *G. Agardhii* nom. nov.

**Sietti H.** - Nouvelle contribution à l'histoire naturelle de l'île d'Alboran [*Contributiones novæ in historiam naturalem insulæ* d'Alboran]. 3 pl., Bull. Soc. Sc. Natur. du Maroc, XIII, 1/3, 10-22. (?) (1933). **b - 1189**

**Skopintzev B. A.** - On the Iodine Containing *Algæ* [*De algis quæ jodium continent*] (In Russ.). 2 tabl., Trans. Oceanogr. Inst., III, 3, 52-60. Moscow (1933). **b - 1190**

Brief account and summary of existing Russian and foreign publications on iodine content in *Algae* and on expeditions organized with the aim of the biochemical and physiological study of these *Algae*.

**Skopintzev B. A. & Mikailovskaja L. A.** - Iodine Content in White-Sea Water [*Agitur de aquis Maris Albi deque jodio quod eæ aquæ continent*] (In Russ., Engl. Rés.). 6 tabl., 1 fig., Trans. Oceanogr. Inst., III, 3, 79-87. Moscow (1933). **b - 1191**

Data obtained by a new method of determination of the iodine-content of the water of the White Sea. Determination of the correlation between iodine-content and the currents. Some data on the iodine content of *Laminaria digitata* and *L. saccharina* in % % from the absolute dry substance.

**Stevens N. E.** - Disappearance of *Zostera marina* along the Atlantic Coast of North America [*Dilabitur Zostera marina præter litora atlantica Americæ Septentrionalis*]. Int. Bull. of Plant Protection, VII, Sept., 198. Rome (1933). **b - 1192**

**Trofimov A. V.** - On the Forms of Iodine in Algae [*De jodio eiusque variis formis in Algis*]

(In Russ., Engl. Rés.). 3 tabl., Trans. Oceanogr. Inst., III, 3, 88-94. Moscow (1933). **b - 1193**

Results of determination of iodine content in over 40 samples of *Algae* from the White Sea. Total and mineral iodine in the *Algae*. Mineral iodine in the *Algae* preserved by means of different methods of preservation. Influence of the method of preservation on the iodine-content. Forms of iodine in different parts of *Algae*. The species of *Algae* investigated were the following ones: *Laminaria digitata*, *L. saccharina*, *Desmarestia*, *Ascophyllum*, *Polyides rotundus*, *Ptilota*, *Fucus inflatus*, *F. serratus*, *Alaria esculenta* and *F. vesiculosus*.

**Trofimov A. V.** - Potentiometric Determination of Mineral Iodine in *Algœ* [*De jodio minerali in algis eiusque determinatione potentiometrica*] (In Russ., Engl. Rés.). 3 tabl., 2 diagr., Trans. Oceanogr. Inst., III, 3, 95-102. Moscow (1933). **b - 1194**

Critical analysis of the existing methods of determination of mineral iodine in *Algae* and their comparison with the method of potentiometric titration. The advantages of the latter, its accuracy illustrated on hand of practical examples, whose data are recorded in tables.

**Westbrook M. A.** - *Antithamnion Spirographidis* Schiffner. Journ. of Bot., LXXII, 65-68. London (1934). **b - 1195**

Structure, cells dimension and reproduction of this species found in the water of Devonport Dockyard. Differences from *A. cruciatum*. Geographical distribution.

**Yamada Y.** - Notes on Some Japanese *Algœ*. V. [*Algœ quœdam japonicœ. Nota Va*]. 4 pl., Journ. Faculty Sc., Hokkaido Imp. Univ., ser. V, II, 3, 277-285. Sapporo (1933). **b - 1196**

*Bornetella ovalis*, *Caulacanthus Okamurai*, *Chrysymenia pacifica*, *Farlowia irregularis*, *Ptilonia Okadai*. *Phycodrys radicosa* (Okamura) Yamada and Inagaki n. comb.

**Yamada Y.** - On Two Genera of *Algœ* in the Sea of Japan [*Algœ Maris Japonici. Genera duo*]. (In Jap.). 2 figs., Rep. Stat. Algal Res., Hokkaido Imp. Univ., 1, 7-10. (?) (1933). **b - 1197**

*Ptilota Okadai* sp. nov. and *Cymopolia* sp. are described in the present paper.

## PALAEOBIOLOGIA.

**Airaghi Carlo** - Echinidi paleogenici della Sirtica e del Fezzan orientale [*Echinidœ paleogenicœ ad Tripolitaniam et ad* Fezzan *orient. pertinentes*]. 1 tav., Missione Scient. R. Accad. d'Italia a Cufra (1931-IX), III, 61-81. Roma (1934). **b - 1198**

Gli Echinidi terziari della Tripolitania qui descritti ammontano a 24 specie di cui 4 nuove per la scienza. Sono i primi e soli Echinidi terziari che si conoscono finora per la Tripolitania.

**Airoldi M.** - Le Corallinacee del Pleistocene della Somalia [*Corallinaceœ ad pleistocenicam œtatem Somaliœ pertinentes*]. (Paleontologia della Somalia: Fossili raccolti dalle Missioni Stefanini-Paoli (1913) e Stefanini-Puccioni (1924) e da altri). 3 fig., 2 tav., Palaeontogr. Ital., XXXII, suppl. n. 1, 79-96. Siena (1933). **b - 1199**

Studio dei resti di Corallinacee raccolti da G. Stefanini nella panchina pleistocenica di Obbia e dintorni, in Somalia, con parecchie specie nuove dei generi *Archaeolithothamnium*, *Lithothamnium*, *Lithophyllum*.

**Airoldi M.** - Contributo allo studio delle Corallinacee del Terziario Italiano. I: Le Corallinacee dell'Oligocene ligure-piemontese [*Contributio in studium Corallinacearum ad Tertiariam œtatem italicam pertinentium. I: Corallinaceœ œtatis oligocenicœ Ligustico-Pedemontanœ*]. 4 tav., 3 fig., Palaeontogr. Ital., XXXIII, III, 55-83. Siena (1933). **b - 1200**

Descrizione e illustrazione di 23 specie di Corallinacee oligoceniche liguri piemontesi, appartenenti a parecchi generi, taluni dei quali rarissimi allo stato fossile, con diverse specie nuove.

**Basse Eliane** - Paléontologie de Madagascar. XVIII. Faune malacologique du Crétacé supérieur du Sud-Ouest de Madagascar [*Palaeontologia madagascariensis. XVIII. Fauna malacologica ad œtatem cretaceam superiorem pertinens in parte sud-occid. insulœ* Madagascar]. 5 fig., 9 pl., Ann. Paléontol., XXI, 3/4, 91-168. Paris (1933). **b - 1201**

Parenté, distribution géographique et stratigraphique de 66 Pélécypodes et 103 Gastéropodes de la partie sud-ouest de Madagascar. Index des genres et espèces décrits.

**Bieda F.** - Remarques sur la nomenclature et la classification de certaines espèces de Nummulines. IIème partie [*De quibusdam Nummulinis. Considerationes de nomenclatura et systematica. Pars IIa*]. 1 pl., Bull. Int. Acad. Pol. Sc. & Lettres, Cl. Sc. Mathém. et Natur., sér. B: Sc. Natur., 6/8. B. II, 177-187. Cracovie (1933). **b - 1202**

Description de *Nummulina parva* Dow. formes A et B, et *N. praelucasi* formes A et B, provenant de Gan ainsi que des échantillons, se trouvant à Lausanne, qui furent déterminés par de la Harpe comme *N. burdigalensis-garunnensis*.

**Bieda F.** - Remarques sur la nomenclature et la classification de certaines espèces de Nummulines. IIIème partie [*De quibusdam Nummulinis. Considerationes de earum nomenclatura et systematica. Pars IIIa*]. 1 pl., Bull. Int. Acad. Pol. Sc. et Lettres, Cl. Sc. Mathém. et Natur., sér. B: Sc. Natur., 9/10 B. II, 291-303. Cracovie (1934).

(—) C. R. Mensuels Cl. Sc. Mathém. et Natur., 10, 6, Cracovie (1934). **b - 1203**

L'A. démontre que *Nummulina gallensis* Heim et *N. Partschi* de la Harpe sont des espèces différentes; par contre *N. granifera* Douv. est identique à *N. Partschi*. *N. taurica* doit être supprimée.

**Berry W.** - *Fusulina* from Peru and Bolivia [*Fusulinae Peruvienses et Bolivianae*]. 1 pl., Pan-Amer. Geol., LIX, 269-272. (?) (1933). **b - 1204**

Description of three species, two of which are new to science.

**Branson C. C.** - Permian Sharks of Wyoming and of East Greenland [*De Squalis ætatis permianæ ad regiones* Wyoming *et* East Greenland *pertinentibus*]. Science, LXXIX, 2054, 431. New York (1934). **b - 1205**

Discussion as to the synonymy of *Arctacanthus uncinatus* n. gen. n. sp. from East Greenland and *Dolophonodus uncinatus* from the Phosphoria formation of Wyoming.

**Broili F.** - Die Gattung *Pteraspis* in den Hunsrückschiefern [*Pteraspis in stratis ardesianis ad regionem* Hunsrück *pertinentibus*]. 6 Textfig. 1 Taf., Sitzungsber. mathem.-naturw. Abt. Bayer. Akad. Wiss., 1, 1-10. München (1933). **b - 1206**

Nachdem der Vf. eingehend den neuen Befund beschrieben und mit früher bekannten Arten der Gattung *Pteraspis* verglichen hat, schliesst er, dass es sich hier um eine neue Art handelt, *Pteraspis Smith-Woodwardi* sp. n., dadurch gekennzeichnet, dass die Mediandorsalplatte auffallend schlank ist und dass die grösste Breite derselben ungefähr in der Mitte liegt. (S. Rez. Naturwiss., 21, 355, 1934).

**Broili F.** - Ein zweites Exemplar von *Cheloniellon* [*Ch. exemplar alterum*]. 3 Taf., 7 Textfig., Sitzungsber. mathem. naturw. Abt. Bayer. Akad. Wiss., 1, 11-32. München (1933). **b - 1207**

Infolge der ganz isolierten Stellung dieser Art innerhalb der niederen Krebse wird für sie eine eigene Subklasse, *Cheloniellida* mit der einzigen Gattung und Art *Cheloniellon calmani*, aufgestellt. Diagnose, Beziehungen und Vergleiche. (S. Rez. Naturwiss. 21, 355, 1934).

**Broili F.** - Weitere Fischreste aus den Hunsrückschiefern [*Piscium relicta nova in stratis ardesianis regionis* Hunsrück]. 6 Taf., 15 Textfig., Sitzungsber. mathem.-naturw. Abt. Bayer. Akad. Wiss., 2, 269-313. München (1933). **b - 1208**

Bericht über die folgenden in der unterdevonischen Hunsrückschiefer gefundenen Fossilien: *Gemündina stürtzi* Traquair, welche, dem Vf. nach, dem Genus *Asterosteus* ähnlich aber mit ihm nicht identisch ist, *Paraplesiobatis heinrichsi* gen. et spec. nov., *Messariostoma granulosum* gen. et spec. nov. Für jede Form folgen Diagnose und Angabe des Fundortes.

**Broili F.** - Ein Macropetalichthyide aus den Hunsrückschiefern [*Macropetalichthys proveniens a stratis ardesianis regionis* Hunsrück]. 7 Abb., 1 Taf., Sitzungsber. mathem.-naturw. Abt. Bayer. Akad. Wiss., 3, 417-437. München (1933). **b - 1209**

Nach einem eingehenden Studium in Bezug auf das Schädeldach und die Ventralseite des Restes scheint es dem Vf. den Fund mit Vorbehalt als *Macropetalichthys ? prumiensis* E. Kayser zu bezeichnen. Die von vielen Forschern betretene Meinung, dass diese *Macropetalichthyidae* zu den Elasmobranchiern und zwar der Ordnung *Stegoselachii* A. S. Woodward gehöre, findet hier eine ausgezeichnete Bestätigung.

**Bulman M. B. Oliver** - On the Graptolites prepared by Holm. VI. Structural Characters of some *Dictyonema* and *Desmograptus* Species from the Ordovician and Silurian Rocks of Sweden and the Baltic Region [*De Graptolitibus ab* Holm *paratis*]. Ark. f. Zool., XXVI A, 5, 9 pp. Stockholm (1933). **b - 1210**

9 plates without text.

**Bulman M. B. Oliver** - On the Graptolites Prepared by Holm [*De Graptolitibus ab* Holm *paratis*]. 19 figs., 9 pl., Ark. f. Zool., XXVI A, H. 1, 5, 1-52. Stockholm (1934). **b - 1211**

VI. Structural characters of some *Dictyonema* and *Desmograptus* species from the Ordovician and Silurian rocks of Sweden and the East Baltic region. Variation in the structure of *Dictyonema*. Stratigraphical importance of the structural characters of *Dictyonema*. Descriptive section: *D. flabelliforme* f. *typica*, *D. cotyledon* n. sp., *D. dubium* n. sp., *D. rhinanthiforme* n. sp., *D. estlandicum*, n. sp., *D. Wimani* n. sp., *D. Holmi* n. sp., *D. inconstans* n. sp., *D. peltatum* Wiman, *D. cervicorne* Holm, *D.* sp. *a*, ? *D.* sp. *b*, *D.* sp. *c*, ? *D. stolon*; *Desmograptus idoneus* n. sp., ? *D.* sp. *a*.

**Chapman F., Parr W. J. & Collins A. C.** - Tertiary *Foraminifera* of Victoria, Australia. The Balcombian Deposits of Port Phillip, Part III [*Foraminifera tertiaria in* Victoria]. 4 pl., Journ. Linn. Soc. London, Zool., XXXVIII, 553-577. London (1934). **b - 1212**

The present report deals principally with genera formerly assigned to the *Rotaliidae*, but now divided among several new families. Six new species and two new varieties are described.

**Cipolla Francesco** - Briozoi fossili del deserto libico e del Fezzan orientale [*Bryozoa fossilia in deserto Lybico et in* Fezzan *orientali*]. Nota preliminare. Boll. Soc. Sc. Natur. e Econ. di Palermo, XV, 13-16. Palermo (1933). **b - 1213**

L'A. illustra il materiale paleontologico raccolto dalla recente missione Desio nel deserto Libico e nel Fezzan orientale, nel 1931, determinando 12 specie di Briozoi, che per la prima volta vengono illustrati per questa regione.

**Cipolla Francesco** - Il Trias dei dintorni di Palermo. Parte I. La fauna triassica dei calcari delle cave di Bellolampo. Lamellibranchi (Pettinidi) [*Aetas triassica apud Panormum. Pars I$^a$. De Fauna triassica substantiarum calcarearum apud* Bellolampo. *Lamellibranchiata* (*Pectinidæ*)]. 1 tav., Giorn. Sc. Natur. e Econ., XXXVII, 17-32. Palermo (1933). **b - 1214**

L'A. continua lo studio del Trias di Palermo, iniziato da Giovanni Di Stefano e Mariano Gemellaro, con la illustrazione dei Lamellibranchi dei calcari delle cave di Bellolampo.

**Cooper G. Arthur** - Evaluation of internal Characters in the Classification of the *Brachiopoda* [*Aestimatio peculiaritatum internarum in Brachiopodis in classes distribuendis*]. Bull. Geol. Soc. America, XLIV, 1, 193-194. New York (1933). **b - 1215**

**Coryell H. N. & Salmon Eleanor S.** - A Molluscan Faunule from the Pierre Formation in Eastern Montana [*Parva fauna Molluscorum ex formatione* Pierre *nomine in regione* Montana *orient.*]. 13 figs., Amer. Mus. Novit., 746, 1-18. New York (1934). **b - 1216**

The report includes a general summary of the stratigraphy of the Pierre formation. The fossils described consist entirely of *Mollusca*; thirty-five species in all are represented; of these, eight are *Gastropoda*, ten *Cephalopoda*, fifteen *Pelecypoda*, and two *Scaphopoda*. The two new species described are Ammonoid *Cephalopoda*.

**Cottreau J.** - Note sur des Échinides provenant du Crétacé du Damergou (Niger) [*Echinidæ ætatis cretaceæ in regione* Damergou (Niger)]. Bull. Mus. Nat. Hist. Natur., 2e sér., VI, 3, 324-326. Paris (1934). **b - 1217**

Ces Échinides se trouvent dans des couches de passage appartenant soit au Cénomanien inférieur soit au Turonien tout à fait inférieur. Ils se répartissent dans les trois genres suivants: *Diplopodia* M. Coy, *Micropedina* Cott., *Hemiaster* Desor. Leur attribution spécifique demeure provisoire.

**Cushman Joseph A.** - Two New Genera, *Pernerina* and *Hagenowella*, and Their Relationship to other Genera of the *Valvulinidæ* [*Duo nova genera, Pernerina et Hagenowella, eorumque correlationes cum generibus ad familiam « Valvulinidæ » pertinentibus*]. 2 pl., Amer. Journ. Sc., XXVI, 151, 19-26. New Haven, Conn. (1933). **b - 1218**

Description and diagnosis of the two new genera of the peculiar flaring arenaceous *Foraminifera*. Figures of the structures noted in these new genera, and a graphic chart showing the relationships of the genera are given, based upon the subdivision of the peripheral portion of the chamber.

**Cushman Joseph A.** - Relationships and Geologic Distribution of the Genera of the *Valvulinidæ* [*De affinitate et geographica distributione generum ad familiam « Valvulinidæ » pertinentium*]. Contr. Cushman Labor. Foramin. Research, IX, 2, 38-44. Sharon, Mass. (1933). **b - 1219**

Study of the different stages of development. Discussion of the relationships with a table showing the geologic ranges of 26 genera. Corrections of some earlier classifications.

**Cushman Joseph A.** - New American Cretaceous *Foraminifera* [*Foraminifera cretacica nova Americana*]. 3 pl., Contr. Cushman Labor. Foramin. Research, IX, 3, 49-64. Sharon, Mass. (1933). **b - 1220**

Descriptions and illustrations of a number of new species and varieties of *Foraminifera* from the Up. Cretaceous of the Gulf Coastal Plain region, U. S. A. Many of these have a relatively short vertical range in the Amer. Cretaceous and should be found useful as index fossils for their particular portions of the Cretaceous section.

**Cushman Joseph A.** - Post-Cretaceous Occurrence of *Gümbelina* with a Description of a New Species [*Gümbelina postcretacea, cum descriptione novæ cuiusdam speciei*]. 1 pl., Contr. Cushman Labor. Foramin. Res., IX, 3, 64-69. Sharon, Mass. (1933). **b - 1221**

New localities recorded. Description of *Gümbelina goodwini* Cushman & Jarvis ; resemblances.

**Cushman Joseph A.** - Notes on the Genus *Spiroplectoides* and its Species [*De genere « Spiroplectoides » eiusque speciebus*]. 1 pl., Contr. Cushman Labor. Foramin. Res., 143, 37-44. Sharon, Mass. (1934). **b - 1222**

Seven species assigned by the A. to the genus *Spiroplectoides*, 1927, are described and figured in this paper. A list of their localities in the American Cretaceous is given.

**Cushman Joseph A.** - The Generic Position of *Cornuspira cretacea* Reuss [*De nomenclatura speciei « Cornuspira cretacea »* Reuss]. Contr. Cushman Labor. Foramin. Res., 144, 14-47. Sharon, Mass. (1934). **b - 1223**

Basing on the examination of a series of specimens from various European localities the A. comes to the conclusion that the species first named *Operculina cretacea*, after *Cornuspira cretacea* must be transferred to *Ammodiscus* Reuss, 1861.

**Cushman J. A. & Campbell A. S.** - A New *Spiroplectoides* from the Cretaceous of California [*De nova quadam specie ad genus « Spiroplectoides » pertinente in Cretaceo Californiano*]. 1 pl., Contr. Cushman Labor. Foramin. Res., 147, 70-71. Sharon, Mass. (1934). **b - 1224**

Description of the new species *S. californica*.

**Cushman J. A. & Dusenbury A. N.** - Eocene *Foraminifera* of the Poway Conglomerate of California [*Foraminifera eocenica in conglomeratione Californiensi* Poway *nomine*]. 3 pl., Contr. Cushman Labor. Foramin. Res., 145, 51-65. Sharon, Mass. (1934). **b - 1225**

Of the *Foraminifera* found in a deltoid marine conglomerate the majority belongs to *Lagenidae*. Thirty-five species and varieties are described. Four new species are dealt with.

**Cushman J. A. & Ellisor A. C.** - Two New Texas *Foraminifera* [*Foraminifera duo nova in* Texas]. Contr. Cushman Labor. Foramin. Res., 138, 95-96. Sharon, Mass. (1933). **b - 1226**

Description of *Textularia smithvillensis* and *Nonionella cockfieldensis*, both of the Claiborne Eocene.

**Cushman J. A. & Galliher E. W.** - Additional New *Foraminifera* from the Miocene of California [*Foraminifera additicia nova miocenica Californiensia*]. 7 figs., Contr. Cushman Labor. For. Res., X, 141, 24-26. Sharon, Mass. (1934). **b - 1227**

Five new species and two new varieties are described from various localities.

**Cushman J. A. & Garrett J. B., Jr.** - New Species of *Triloculina* from the Claiborne of Louisiana [*Species novæ ad genus « Triloculina » pertinentes a* Claiborne *in* Louisiana]. 1 pl., Contr. Cushman Labor. Foramin. Res., 146, 65-70. Sharon, Mass. (1934). **b - 1228**

Three species are described and figured.

**Cushman J. A. & Jarvis P. W.** - Some Interesting New Uniserial *Foraminifera* from Trinidad [*De notandis novis Foraminiferis uniserialibus, a* Trinidad *provenientibus*]. 1 pl., Contr. Cushman Labor. Foramin. Res., 148, 71-75. Sharon, Mass. (1934). **b - 1229**

Description of three new species and a new variety of *Ellipsonodosaria* and of four new species of *Chrysalogonium*.

**Cushman J. A. & Kleinpell R. M.** - New and Unrecorded *Foraminifera* from the California Miocene [*Foraminifera nova et non memorata ad ætatem miocenicam californianam pertinentia*]. 5 figs., 3 pl., Contr. Cushman Labor. Foramin. Res., X, 140, 1-23. Sharon, Mass. (1934). **b - 1230**

New species and varieties are described and figured.

**Cushman J. A. & Parker F. L.** - Notes on Some of the Earlier Species Originally Described as *Bulimina* [*De veterrimis speciebus quæ ab origine sicut Bulimina descriptæ fuerunt*]. 2 pl., Contr. Cushman Labor. Foramin. Res., 142, 27-36. Sharon, Mass. (1934). **b - 1231**

Revision of species described up to the year 1890. Examination of three collections. The various species belong to several genera : *Bulimina, Buliminella, Arenobulimina, Ataxophragmium* etc.

**Cuvillier J.** - Répartition et valeur stratigraphique de *Nummulites laevigatus* Brug. sp. dans l'Éocène égyptien [*De distributione et æstimatione stratigraphica speciei « Nummulites lævigatus »* Brug. *in Eocene Aegyptiano*]. C. R. Acad. Sc., CXCVIII, 8, 762-763. Paris (1934). **b - 1232**

Gisements égyptiens où a été trouvée cette espèce. En ce qui concerne sa valeur stratigraphique il semble que *N. laevigatus* n'ait fait son apparition dans les eaux egyptiennes de la Mésogée que dans la seconde moitié de la période lutétienne.

**David-Sylvain Élisabeth** - Sur les grands Foraminifères du synclinal de Visso (Apennin central) [*Magna Foraminifera ad synclinalem civitatis* Visso *pertinentia*]. C. R. Acad. Sc., CXCVIII, 19, 1717-1718. Paris (1934). **b - 1233**

Examen des Foraminifères appartenant à ce que les géologues italiens appellent la « Scaglia cinerea », aux silex noirs et aux formations argilo-marneuses qui les surmontent. Ces niveaux représenteraient l'Eocène supérieur, l'Oligocène et le Miocène inférieur.

**De Fiore Otto** - I Molluschi rinvenuti a Pompei. [*De repertis Molluscis Pompeianis*]. Una pagina di etnologia romana. Rend. Accad. Sc. Fis. Matem., Cl. Soc. R. Napoli, ser. IV, III, 5/8, 114-122. Napoli (1933). **b - 1234**

Nel presente studio si determinano ed enumerano 45 specie di Molluschi marini, rappresentati da 459 esemplari, finora rinvenuti a Pompei; se ne ricercano le provenienze, mediterranee ed esotiche, ed i probabili usi.

**Deflandre Georges** - Sur un foraminifère siliceux fossile des diatomites miocènes de Californie: *Silicotextulina diatomitarum* n. g. n. sp. [*Silicotextulina diatomitarum n. g., n. sp., in diatomitis ætatis miocenicæ Californianæ*]. C. R. Acad. Sc., CXCVIII, 16, 1446-1448. Paris (1934). **b - 1235**

Signalisation de la présence de ce foraminifère à test siliceux, trouvé simultanément dans plusieurs diatomites miocènes de Californie. Discussion au sujet de la structure du test de cette espèce, dont ressort la conclusion que *S. diatomitarum* est un foraminifère perforé, à test originellement siliceux, ou peut-être chitino-siliceux.

**Deflandre Georges** - Sur les microfossiles d'origine planctonique, conservés à l'état de matière organique dans les silex de la craie [*Microfossiles planctonici sicut substantia organica in silice cretacea servati*]. 11 fig., C. R. Acad. Sc., CXCIX, 19, 966-968. Paris (1934). **b - 1236**

Recherches préliminaires portées sur des galets de silex du bassin parisien. État de conservation des organismes, et des Dinoflagellés en particulier.

La preuve irréfutable de l'existence de types actuels de Dinoflagellés montre l'origine ancienne et la stabilité de certaines formes, au moins depuis le Secondaire.

**Demanet F.** - Les Brachiopodes du Dinantien de la Belgique. I.er Volume: *Atremata, Neotremata, Protremata* (pars) [*Brachiopoda ad ætatem dinantianam belgicam pertinentia. Vol. Ium: Atremata, Neotremata, Protremata (pars)*]. 17 fig., 10 pl., Mém. Mus. R. Hist. Natur. Belgique, 61, 1-116. Bruxelles (1934). **b - 1237**

Liste des auteurs cités. Description des espèces. Paléontologie stratigraphique. Paléontologie systématique. Liste alphabétique des espèces décrites ou citées.

**Desio Ardito** - Lamellibranchi paleogenici della Sirtica e del Fezzan orientale [*Lamellibranchiata palæogenica in Tripolitania et* Fezzan *orient.*]. 8 tav., Miss. Scient. R. Accad. d'Italia a Cufra (1931-IX), III, 83-130. Roma (1934). **b - 1238**

Il materiale paleontologico descritto comprende i Lamellibranchi eocenici ed oligocenici raccolti in Libia dall'A. nel 1930-31. Tutte le forme descritte sono nuove per la regione.

**Di Salvo Giovanni** - I Crostacei del terziario inferiore della provincia di Palermo [*Crustacea ad Tertiarium inferius provinciæ panormitanæ pertinentia*]. 2 tav., Giorn. Sc. Natur. Econ., XXXVI, 3, 1-48. Palermo (1933). **b - 1239**

Dopo un breve accenno di quanto si è pubblicato sui Crostacei della fauna fossile terziaria in Sicilia, l'A. che ha ripreso lo studio di questi tipici resti fossili; oltre a brevi riferimenti sui giacimenti già conosciuti, dà notizia di nuove località fossilifere e di nuove forme fossili. Le forme studiate sono 22, di cui 14 nuove per la Sicilia, per la maggior parte riferibili all'Eocene medio (Luteziano) o alla parte inferiore dell'Eocene sup. (Priaboniano). Dall'esame di esse appaiono chiari rapporti tra la fauna di Crostacei terziari di Sicilia e le coeve faune del Vicentino e Veronese e dell'Ungheria.

**Eguchi Motoki** - On a New Lower Jurassic Coral, *Isastraea Yabei* n. sp., from Hosoura near Sidugawa-Mati, Motoyosi-Gun, Rikuzen Province, Japan [*De novo quodam corallo ad ætatem giurassicam inferiorem pertinente*]. 2 pl., Jap. Journ. Geol. & Geogr., Trans., XI, 3/4, 157-160. Tokyo (1934). **b - 1240**

History of the discovery of the new species dealt with by the author; description and diagnosis of *Isastraea* (*Latimaeandra*) *Yabei* n. sp.

**Ellisor A. C.** - Jackson Group of Formations in Texas with Notes on Frio and Vicksburg [*Formationes regionis* Texas *quæ a* Jackson *nomen capiunt. Adiunguntur notæ de* Frio *et* Vicksburg]. 8 figs., 7 pl., Bull. Amer. Assoc. Petroleum Geol., XVII, 11, 1293-1350. (?) (1933). **b - 1241**

List of the *Foraminifera* found in the various formations of the Upper Eocene of Texas.

**Floridia G. B.** - Sopra alcune rocce nummulitiche del Gebel cirenaico [*De quibusdam saxis nummuliticis in* Gebel *cyrenaico*]. 1 fig., Miss. Scient. R. Accad. d'Ital. a Cufra (1931-IX), III, 31-41. Roma (1934). **b - 1242**

Esame dei campioni di calcari nummulitici raccolti nelle varie località della Cirenaica, e loro caratteristiche geo-paleontologiche.

**Floridia G. B.** - Sull'età dei calcari a *Chlamys cyrenaica* (Newton) dei dintorni di Derna [*De calcaribus apud civitatem* Derna *quae continent* «*Chlamys cyrenaica*». *Quaestio de aetate*]. 2 fig., Rend. R. Ist. Lomb. Sc. e Lett., ser. II, LXVII, 11/15, 525-528. Milano (1934). **b - 1243**

L'Autore, eseguito uno studio sui Foraminiferi contenuti in alcuni campioni di calcari a *Chlamys cyrenaica* (Newton) provenienti dai dintorni di Derna, conclude che i materiali esaminati appartengono all'Eocene superiore.

**Font J. M. i Solé Sabarís L.** - Addicions a la fauna pliocénica de Papiol [*Additiones ad faunam pliocenicam regionis* Papiol]. Bull. Instit. Cat. Hist. Natur., XXXI, 4. Barcelona (1933). **b - 1244**

Los autores estudian unos fósiles de los yacimientos pliocenos de Papiol, entre los cuales destaca un molusco lamelibranquio, género *Gastrochaena*.

**Fontana Zanco Fanny** - Nuove osservazioni sul piano Tirrenico nei dintorni di Cagliari [*De observatis depositis quaternariis marinis apud Caralim*]. Rend. Sem. Fac. Sc., R. Univ. Cagliari, III, 3, 116-125. Cagliari (1933). **b - 1245**

Descrizione di alcuni depositi quaternari marini dei dintorni di Cagliari. Le forme raccolte e determinate dimostrano trattarsi di materiale paleontologico tutt'ora rappresentato fra le forme viventi nel Mediterraneo. Il Quaternario marino dei dintorni di Cagliari è da ascriversi tutto al Piano Tirrenico.

**Fredericks George** - The Permian Fauna of the Kanin Peninsula [*De fauna permiana in paeninsula* Kanin] (In Russ., Engl. Rés.). 2 tabl., 5 pl., Trans. Arct. Inst., XIII, 5-42. Leningrad (1934). **b - 1246**

Description of the fauna collected by M. Edemsky in 1929 at the Kanin Peninsula from deposits belonging to the

Permian. Among the listed and described species the following ones are new to science: *Aviculopecten orientalis* sp. nov., *Aviculopecten* sp. nov. cf. *rossiensis* Netsch, *Conocardium kaninense* sp. nov., *Sowerbina notteiensis* sp. nov., *Ruthenia granulifera* Toula, *R. granulifera typica* Frcks, *R. granulifera gibbosa* nom. nov., *R. granulifera spitzbergensis* nom. nov., *Composita caninense* sp. nov., *Camarophoria edemskii* sp. nov. Some remarks on the Permian deposits of arctic regions complete the paper.

**Frost G. Allan** - Otoliths of Fishes from the Lower Tertiary Formations of Southern England. I. *Isospondyli, Apodes, Berycomorphi* [*Otolithi Piscium in stratis Tertiarii inferioris Angliae merid. I: Isospondyli, Apodes, Berycomorphi*]. 1 pl., Ann. and Magaz. Natur. Hist., XII, 70, 387-396. London (1933). **b - 1247**

The following spp. are new: *Otolithus (Elops) eocenicus, O. (Argentina) erectus, O. (Clupeidarum) altus, O. (C.) dilatus, O. (Albula) bartonensis, O. (Congridarum) bartonensis, O. (C.) ovatus, O. (C.) websteri, O. (C.) eocenicus, O. (Congridarum) attenuatus, O. (Ophichthys) acutus, O. (Muraenesox) minimus, O. (Congridarum) furcatus, O. (Myrus) caudatus, O. (Polymixia) eocenicus, O. (Beryx) eocenicus.*

**Frost G. Allan** - Otoliths of Fishes from the Tertiary Formations of New Zealand [*Otolithi Piscium in stratis Tertiarii Novæ Zelandiæ*]. 2 pl., Trans. & Proc. New Zealand Inst., LXIII, 2, 133-141. Wellington, N. Z. (1933). **b - 1248**

All except 3 of the 25 species are new. The types are well preserved, and in many cases strikingly like otoliths of present-day New Zealand fishes.

**Galloway J. J. & Spock Erskine L.** - Pennsylvanian *Foraminifera* from Mongolia. Part I. Field Relations (by Spock Erskine L.) Part II. Descriptions of *Foraminifera* (by Galloway J. J.) [*Foraminifera pennsylvaniana Mongoliæ. Pars Ia: Correlationes inter species. Pars IIa: Descriptio Foraminiferorum*]. 1 fig., 1 pl., Amer. Mus. Novit., 658, 1-6. New York (1933). **b - 1249**

Ancient limestones of Central Inner Mongolia. Paleozoic limestones of Western Mongolia. Age of the rock containing the *Foraminifera* described. Description of 6 species, of which *Climacammina* sp. is new.

**Gerth H.** - Neue Beiträge zur Kenntnis der Korallenfauna des Tertiärs von Java. 1. Die Korallen des Eocaen und des älteren Neogen [*Contributiones novæ ad Corallia ætatis Tertiariæ in* Java *cognoscenda. I. Corallia ex eocene et neogene vetere*]. 5 Taf., 45 S., Wetensch. Meded. Dienst Mijnbouw. N. I., 25. Bandoeng (1933). **b - 1250**

Die folgenden Arten sind neu: *Sphenotrochus javanus, Rhabdophyllia sundaica, Trochosmilia progoensis, Cerathophyllia cristata, Cyphastraea progoënsis, Cyathomorpha irregularis, Progonopora variabilis, Acropsammia sokkohensis, Javanopora ramosa, Leptoria nawoenganensis, Cyphastraea rembangensis, Confusastraea progoensis, Leptoseris densicostata, Indosmilia rembangensis.*

**Gignoux Maurice** - Les Oursins réguliers fossiles. Evolution et classification [*Echini regulares fossiles. De eorum evolutione et systematica*]. 35 fig., 3 tabl., Trav. Labor. Géol., XVII, 2, 1-125. Grenoble (1933). **b - 1251**

Structure du squelette. Description d'un type fondamental d'Oursin, le *Cidaris*. Les Oursins primaires. Les Cidaridés. Les Glyphostomes: Principales modifications survenant chez les Glyphostomes à partir de *Cidaris*; principes de classification des Glyphostomes; étude des genres de Glyphostomes. Index alphabétique de noms de familles, genres, sous-genres.

**Glaessner Martin F.** - New Tertiary Crabs in the Collection of the British Museum [*Cancri novi ætatis Tertiariæ in collectione ad* British Museum *pertinente*]. 1 fig., 6 pl., Ann. & Magaz. Natur. Hist., XII, 67, 1-28. London (1933). **b - 1252**

The new species are: *Neptunus (Achelous) withersi, Heteropanope ? wylliei, Potamon (P.) sivalense, Lobocarcinus indicus, Goniocypoda sindensis, Scylla ozawai, Archaeogeryon latus, Pseudorhombila patagonica.* Descriptions, taxonomic and distributional data, as well as a short discussion of the fauna of each region. Several known species are emended.

**Glibert Maxime** - Monographie de la faune malacologique du Bruxellien des environs de Bruxelles [*Monographia faunæ malacologicæ ætatis Bruxellensis apud Bruxellas*]. 11 pl., Mém. Mus. R. Hist. Natur. Belgique, 53, 1-215. Bruxelles (1933). **b - 1253**

Description des espèces appartenant aux classes suivantes: *Gastropoda, Acephala, Cephalopoda.* Carte des gisements. Tableau de répartition par gisements. Commentaires sur les faunes. Index bibliographique. Table alphabétique des familles, genres, sous-genres et sections. Index des noms d'espèces.

**Gubler J.** - La valeur stratigraphique des Fusulinidés du Permien [*Fusulinidæ ætatis Permianæ. Aestimatio stratigraphica*]. C. R. Acad. Sc., CXCVIII, 4, 381-383. Paris (1934). **b - 1254**

L'A. s'occupe des Fusulinidés du Permien des calcaires anthracolitiques d'Extrême-Orient et en particulier des deux problèmes stratigraphiques qu'ils soulèvent: dans quelle mesure ces Fusulinidés peuvent-ils, à eux seuls, caractériser des horizons distincts et quelle est leur répartition dans le Permien.

**Gugenberger Odomar** - Beiträge zur Kenntnis der *Cardita* - Schichten von Launsdorf (Kärnten). IV. Lamellibranchiaten [*Contributio in cognoscendos stratus qui continent « Cardita » in* Launsdorf (Kärnten). *IV. Lamellibranchiata*]. Anz. Akad. Wiss., Mathem. naturw. Kl., LXXI, 4, 45-49. Wien (1934). **b - 1255**

Bericht von Dr. G. Geyer über das oben angegebene Werk. Zur Paläontologie und Stratigraphie. Angabe neuer Arten und Varietäten.

**Gugenberger Odomar** - Die *Cardita*-Schichten von Launsdorf in Mittelkärnten und ihre Fauna. III. Scaphopoden. IV. Cephalopoden [*De stratis qui continent « Cardita » in* Launsdorf, Kärnten *centrali.* III. *Scaphopoda.* IV. *Cephalopoda*]. Sitz. Ber. Akad. Wiss., Abt. 1, CXLIII, 1/2, 41-59. Wien (1934). **b - 1256**

Die folgenden Formen sind als neu beschrieben: (*Scaphopoda*) *Dentalium arctoides* n. sp., *D. a.* var. *multicostata* nov. var., *D. Gallensteini.* n. sp., *D. herritschi* n. sp., *D. Kahleri* n. sp., *D. Schafferi* n. sp., (*Cephalopoda*) *Sirenites Collignoni* n. sp., *Trachyceras* (*Protrachyceras*) n. sp. ind. Bemerkungen über die Scaphopoden. Anhang (Conularien und hyolithenähnliche Gebilde).

**Hanzawa Shôshirô** - On a *Neoschwagerina*-Limestone from Okinawa-jima, the Riukiu (Loochoo) Islands [*De calcare quodam quod continent « Neoschwagerina » ex* Okinawa-jima *in Insulis* Riukiu]. 1 map, 1 pl., Jap. Journ. Geol. & Geogr., Trans., X, 3/4, 107-110. Tokyo (1933). **b - 1257**

The discovery of a *Neoschwagerina* bed from Okinawa-jima sufficiently proves the Upper Permian age of the limestone.

**Hayasaka I.** - On the Carboniferous Brachiopod Fauna from the Nabeyama Region, Totigi Prefecture, Japan [*Brachiopoda carbonifera in re-*

*gione* Nabeyama, *Japonia*]. 12 pl., 12 text-figs., Mem. Fac. Sc. & Agricult., Taihoku Imp. Univ., VI, 2, (Geol. N. 3), 44 pp. Taihoku (1933). **b - 1258**

Description of a small Permian assemblage of Brachiopods from Japan, including 12 forms (9 specifically named and 7 new) distributed in 10 genera. The greatest interest in this fauna lies in the gigantic size of some of the described species.

**Heritsch Franz** - Notes on *Chaetetes milleporaceus* M. E. H. [*De specie «Chaetetes milleporaceus»* M. E. H.]. 4 figs., Amer. Journ. Sc., XXV, 147, 257-260. New Haven, Conn. (1933). **b - 1259**

Brief description of a very well-preserved specimen of a new species of *Chaetetes*, *Ch. milleporaceus* from the Coal Measures of Peoria County, Illinois, from the collection of the Geological Department of the University of Graz.

**Hertlein Leo George** - A New Gryphaeoid Oyster from the Eocene of California [*De quadam nova ostrea in Eocene Californiano*]. 2 figs., Trans. San Diego Soc. Natur. Hist., VII, 22, 277-280. (1933). **b - 1260**

*Ostrea haleyi.*

**Hickson S. J.** - Systematic Position of Stromatoporoids [*Stromatoporoidea eorumque systematica*]. Quart. Journ. Microscop. Sc., LXXVI, 3, London (1934). **b - 1261**

Different hypotheses of various authors as to the systematic range of *Stromatoporoidea*. Detailed description of two specimens of *Gypsina*. The A. concludes that they were allied to recent *Foraminifera*.

**Howe Marshall A.** - Eocene Marine *Algæ* (*Lithothamnieae*) from the Sierra Blanca Limestone [*Lithothamnieæ eocenicæ e calcare regionis* Sierra Blanca]. 5 pl., Bull. Geol. Soc. America, XLV, 507-518. New York (1934). **b - 1262**

*Mesophyllum Schenckii, Archaeolithothamnium Keenani, Lithothamnium laminosum, Lithophyllum Sierrae-Blancae.*

**Huang T. K.** - Late Permian Brachiopoda of Southwestern China [*Brachiopoda ætatis Permianæ inferioris in Sinensi regione sud-orient.*]. 11 pl., Geol. Surv. China, Palaeontol. Sinica, Ser. B, IX, 2, 131 pp. Peking (1933). **b - 1263**

Continuation of the description of late Permian Brachiopods begun in the part I, dealing with 66 forms, 44 of which are named specifically and 22 of which are new. In a supplement 8 other old species are discussed.

**Huddle J. W.** - Marine Fossils from the Top of the New Albany Shale of Indiana [*Fossilia marina ad superiorem partem formationis in regione* New Albany *pertinentia*]. 2 pl., Amer. Journ. Sc., XXV, 148, 303-314. New Haven, Conn. (1933). **b - 1264**

Marine Invertebrates which indicate a Devonian age for the entire formation have been found recently in the top of the New Albany shale in Indiana. The fauna consists of eight Brachiopods and one gastropod. The entire fauna is figured and six Brachiopods are described.

**Israelsky Merle C.** - A New Species of Echinoid from Tamaulipas, Mexico [*Echinoidea. Species nova e* Tamaulipas *a regione Mexicana provenientia*]. 4 figs., Trans. San Diego Soc. Natur. Hist., VII, 23, 275-276. (1933). **b - 1265**

*Oligopygus putnami*, Upper Eocene.

**Jakovlev N. N.** - Deux Crinoïdes du Permien Supérieur de la Transcaucasie [*Crinoidea duo ætatis permianicæ superioris in Transcaucasia*] (En russe). 1 pl., Bull. Acad. Sc. U. R. S. S., Cl. Sc. Mathém. & Natur., 7, 975-977. Léningrad (1933). **b - 1266**

Description de deux espèces nouvelles de Crinoïdes découvertes dans la vallée du fleuve Arax (Transcaucasie) : *Erisocrinus araxensis* n. sp. et *Spaniocrinus transcaucasicus* n. sp. Cette découverte représente le premier cas donnant la possibilité de déterminer les genres des Crinoïdes marins dont jusqu'aujourd'hui on n'a pu trouver au Caucase que des restes informes et dans un mauvais état de conservation.

**Jakovlev N. N.** - Un graptolithe planctonique du Kasakstan [*De graptolitho quodam planctonico in* Kasakstan] (En russe). 1 fig., Bull. Acad. Sc. U. R. S. S., Cl. Sc. Mathém. & Natur., 7, 979-981. Léningrad (1933). **b - 1267**

Description et diagnose de *Planctograptus rastritoides* gen. n., sp. n. découvert en 1931 dans des couches, qui semblent appartenir au Silurien Supérieur.

**Kaufmann Rudolf** - Variationsstatistische Untersuchungen über die « Artabwandlung » und « Artumbildung » an der Oberkambrischen Trilobitengattung *Olenus* Dalm. [*Inquisitiones statisticæ in deviationes et transformationes specierum generis « Olenus* Dalm. » *ad ætatem Cambrianam superiorem pertinentis*]. Abh. Geol. Paläontol. Inst., 10, 1-54. Greifswald (1933). **b - 1268**

Spezifische und ontogenetische Studie des im freien gesammelten Materials an Hand der Vermessung aller Glieder der vorhandenen Spezimina mit dem Ziele die genetische und phylogenetische Entwicklung der Arten der Oberkambrischen Trilobitengattung *Olenus* Dalm. von einer Zone zur anderen zu verfolgen.

**Kirk Edwin** - *Syndetocrinus*, a New Crinoid Genus from the Silurian of Canada [*Syndetocrinus, genus novum ex Siluriano canadensi*]. 8 figs. on pl., Amer. Journ. Sc., XXVI, 153, 344-354. New Haven, Conn. (1933). **b - 1269**

The author has had for study a very interesting crinoid theca from the Silurian of Port Daniel, Quebec, and another specimen congeneric with the first from New Mexico. The specimens studied prove to represent a new genus referable to *Crotalocrinidae*, which is described in the present paper as *Syndetocrinus*. The two specimens differ so widely in structure as to make necessary to refer them to distinct species, which are described by the author, as *Syndetocrinus dartae* and *S. northropi*.

**Kirk Edwin** - *Corynecrinus*, a New Devonian Crinoid Genus [*Corynecrinus, genus novum devonianum*]. 1 pl., Proc. U. S. Nat. Mus., LXXXIII, 2972, 1-7. Washington, D. C. (1934). **b - 1270**

The crinoid proves to have structural features of considerable interest, and its relationship seems to be nearer certain European Devonian forms than any otherwise known in America. Diagnosis of the new genus and the new species *C. Romingeri*.

**Klinghardt F.** - Der innere Aufbau von Versteinerungen [*Structura interna fossilium*]. 7 Abb., 3 Taf., Sitz. Ber. Ges. Naturf. Freunde zu Berlin, Januar-März, 1-22. Berlin (1933). **b - 1271**

Das Ziel der Arbeit. Präparationsmethoden für : 1. Wirbellose : Seeigel (*Hemipneustes radiatus* Lamarck) ; Schlangen und Seesterne (*Inocerames involutus* Sowerby, *I. lingua* Goldfuss, *I. Koeneni* G. Müller ; Muscheln (*Avicula macroptera* Lamarck) ; Rudisten ; Tintenfische. A. Die Behandlung im Steinbruch. B. Behandlungen in den Sammlungen. (*Sepia officinalis, Hippurites* (*Vaccinites*) *cornuvaccinum* Bronn). II. Wirbeltiere.

**Knight J. Brookes** - *Littorina irrorata*, a Post-Pleistocene Fossil of Connecticut [*Littorina irrorata, fossilis post-pliocenicus e* Connecticut].

Amer. Journ. Sc., XXVI, 152, 130-133. New Haven, Conn. (1933). **b - 1272**

After a brief summary of the literature dealing with *L. irrorata* the author gives notice of the finding of this species as an abundant element of a post-pleistocenic fossil fauna found underlying a salt marsh in an exposed cove near New Haven, Conn. Two interpretations of the presence of the shell in the above deposits. Hypothesis concerned with the age of the deposits.

**Kobayashi Teiichi** - A Few Ordovician Brachiopods from Manchuria and Chosen, and a New Species of *Conchostraca* from the Basal Ordovician of Manchuria [*Brachiopoda quædam ordoviciana ad regiones* Manchuria *et* Chosen *pertinentia : Species nova ad Conchostraca pertinens proveniens ab ordoviciano basali Manciuriæ*]. 1 pl., 1 fig., Jap. Journ. Geol. & Geogr., Trans. XI, 3/4, 161-169. Tokyo (1934). **b - 1273**

List of several species of Brachiopods known from various horizons and localities of South Manchuria and an attempt to define their generic position. Description and diagnosis of *Synthrophinella* Ulrich and Cooper, n. gen., *S. typica* Ulrich & Cooper, n. sp., *S. elliptica* Kobayashi n. sp., *S. deltoides* Kobayashi n. sp., Genus *Pomatotrema* Ulrich & Cooper, *P. shinsoensis* Kobayashi n. sp., *Strophomena* sp. aff. *S. incurvata* (Shephard). Description of *Aluta chiushuensis* n. sp., a new species of *Conchostraca* remnant of Cambrian life, which has persisted into the basal Ordovician.

**Kovacs Lajos** - Einige Mittelliassische Ammonitarten aus dem nordöstlichen Bakony [*Ammonoidea ætatis mediae liassicæ in* Bakony *nord-occid.*]. (Ungar. u. Dtsch. Text). 3 Abb., Földtany Közlöny (Geol. Mitt.), LXII, 1/12, 41-56. Budapest (1933). **b - 1274**

Unter Beziehung auf seine früheren Aufsätze gibt der Vf. einen kurzen Ueberblick der verschiedenen Schichten des nördlichen Bakony, und zwar der Zone des *Psiloceras planorbis*, der Zone der *Sclotheimia angulata*, der Zone des *Arietites Bucklandi*, der Zone des *Amaltheus margaritatus* und der Zone des *Amaltheus spinatus* sowie, unter Vergleich mit anderen Formen, eine eingehende Beschreibung der folgenden aus der letzten Zone stammenden Arten : *Rhacophyllites bucovinicus* Uhl. var. *hungarica* nov. var., *Phylloceras Bonarellii* Bett. var. *anatolica* Meist. em. Gug. und *Lytoceras Francisci* Opp. var. *baconica* nov. var.

**Kutassy A.** - *Cephalopoda triadica*, II. Fossilium Catalogus, I, Animalia. LVI, 1/4, 371-832, W. Junk. Berlin (1933). **b - 1275**

Dieser Teil bildet eine Fortsetzung der von C. Diener bearbeiteten und 1915 erschienenen ersten Lieferung. Alphabetisches Verzeichnis aller Cephalopodengattungen und- arten, die seit Herausgabe des ersten Teiles neu veröffentlicht bzw. seinerseit von C. Diener übersehen worden sind. 310 Genera und Subgenera mit 3598 Arten sind hier berücksichtigt mit Angaben über den Typus, die typische Lokalität, Verbreitung, Lebenszeit usw.

**Kutassy A.** - Die Fauna des Norischen Dachsteinkalkes von St. Anna bei Neumarktl (Oberkrain) [*De fauna calcaris in civitate* St. Anna *apud* Neumarktl]. 4 Taf., Földtani Közlöny (Geol. Mitt.), LXIV, 4/6, 65-80. Budapest (1934). **b - 1276**

1. Teil *Ammonoidea* und *Gastropoda*. Von den beschriebenen Formen sind die folgenden neu : *Arcestes* (*Stenarcestes*) *noricus* nov. sp., *Scurria triadica*, n. sp., *Patella trauthi* n. sp., *Capulus austriacus* n. sp., *Worthenia* sp. indet., *Stuorella convexa* n. sp., *Dicosmos schafferi* n. sp., *Fedaiella* oder *Marmolatella* sp. ind., *Seisia* n. gen., *Seisia blaschkei* n. sp., *Parangularia* n. gen., *P. hungarica* n. sp.

**Lecompte M.** - Le genre *Alveolites* Lamarck dans le Dévonien Moyen et Supérieur de l'Ardenne [*Genus Alveolites* Lamarck *in Devoniano medio et superiori regionis* Ardenne]. 4 pl., Mém. Mus. R. Hist. Natur. Belgique, 55, 1-50. Bruxelles (1933). **b - 1277**

Avant-propos par M. Maillieux. Introduction. Le genre *Alveolites* Lamarck : *A. suborbicularis*, *A. Labechei*, *A. compressa*, *A. megastomus*, *A. Maillieuxi*, n. sp., *A. M.* var. *cavernosa*, n. var., *A. multiperforatus* n. sp., *A. tenuissimus* n. sp., *A. ramosa*, *A. Salei* n. sp.

**Lemoine P. & Mengaud L.** - Algues calcaires de l'Eocène de la Province de Santander (Espagne) [*Algae calcareæ eocenicæ in provincia* Santander (*Hispania*)]. 6 fig., Bull. Soc. Hist. Natur., LXVI, 1. Toulouse (1934). **b - 1278**

*Lithothamnium cantabricum*, *Lithophyllum Mengaudi*, *L. quadrangulum* et *Fania Mengaudi*.

**Leonardi P.** - Fauna malacologica della Barma grande di Grimaldi [*De fauna malacologica ad regionem* « Barma grande di Grimaldi » *pertinens*]. (Scavi dell' Istituto Italiano di Paleontologia Umana), Atti Soc. Ital. Progr. Sc., XXII^a^ Riunione (Bari, 12-18 ott. 1933), III, 111-112. Roma (1934). **b - 1279**

La fauna della formazione marina della Barma grande nella quasi totalità è costituita da forme tuttora viventi nel Mediterraneo ; non mancano tuttavia numerose serie di tipo caldo, attualmente non viventi nel Mediterraneo. Nuove varietà : *Morio echinopora* L. var. *Coëni* e *Loripes lacteus* L. var. *Battagliai*.

**Maury Carlotta Joaquina** - *Lovenilampas*, a New Echinoidean Genus from the Cretaceous of Brazil [*Lovenilampas, genus novum e Cretaceo brasiliensi*]. 1 fig., Amer. Mus. Novit., 744, 1-5. New York (1934). **b - 1280**

Class *Echinoidea*, order *Exocycloida*, suborder *Cassidulina*, family *Cassidulidae*, *Lovenilampas* gen. nov., *L. baixadoleitensis*.

**Maury Carlotta Joaquina** - Fossil *Invertebrata* from Northeastern Brazil [*Invertebrata fossilia e Brasilia nord-orient.*]. 11 pl., Bull. Amer. Mus. Natur. Hist., LXVII, 4, 123-179. New York (1934). **b - 1281**

Stratigraphic results of the study of the Brazilian collection. Discussion of the fossils by groups. 1) The Marine Cretaceous *Mollusca* and *Echinoidea* from various localities in the dolomitic limestone belt of Rio Grande do Norte ; 2) The Pliocene to Recent fossils of the Stone Reef, Areia Preta, Natal, Rio Grande do Norte ; 3) The Recent to Pliocene fossils of the Coral Reef, Areia Preta, Natal, Rio Grande do Norte ; 4) The Recent to Pleistocene fossils of the Soft Sandstone and Coquina at Thibau, Northwest of Mossorò, Rio Grande do Norte. Two other chapters deal with terrestrial and freshwater fossils.

**Miller A. K.** - A Mixochoanitic Cephalopod from Iowa [*De cephalopodo quodam ex* Iowa]. 1 pl., 5 figs., Amer. Journ. Sc., XXVI, 152, 178-182. New Haven, Conn. (1933). **b - 1282**

After a brief summary of the characteristics of the mixochoanitic Cephalopods which constitute a small compact group of Nautiloids, the author gives the diagnosis of *Schuchertoceras Thomasi*, n. sp., which possesses the characteristics of the genus *Schuchertoceras* but is quite distinct from all previously described species.

**Miller A. K.** - Age of the Permian Limestones in Sicily [*De calcare permianico eiusque ætas in Sicilia*]. 1 table, Amer. Journ. Sc., XXVI, 154, 409-427. New Haven, Conn. (1933). **b - 1283**

Results of a study of marine Permian limestone which occurs in the valley of the Sosio River, in the southern part of the province of Palermo. After a summary of previous work performed in the locality, the author formulates some considerations as to the age of the Sosio beds on hand of the Sosio Ammonoids and Nautiloids, which he compares with other permian Ammonoids and Nautiloids described by other scholars in other parts of the world. He concludes from the evidence collected that it seems clear that the permian Sosio beds represent a paleological zone slightly but distinctly younger than the cephalopod-bearing sandstone of the Artinsk group of the Ural Mountains.

**Miller A. K.** - The Carboniferous Ammonoid Genus *Dryochoceras*, a Synonym of *Sagittoceras* [*Genus carboniferum «Dryochoceras», synonymum generis «Sagittoceras»*]. 6 figs., Amer. Jour. Sc., XXVIII 163, 31-36. New Haven, Conn. (1934). **b - 1284**

Referring to a publication entitled « Geology of the Stonewall quadrangle Oklahoma » (Bur. Geol., Bull. 2, Oklahoma, 1924) the A. concludes that *Dryochoceras* Morgan is to be suppressed as a synonym of *Sagittoceras* Hind ; that *Sagittoceras* is known to be represented in only the Caney shale of Oklahoma and the Viséan of England and Germany and probably Czechoslovakia and France ; and that *Sagittoceras* is closely related to *Gurleyoceras*, *Milleroceras*, and *Goniloboceras*.

**Miller A. K. & Warren P. S.** - A *Propinacoceras* from North America [*Propinacoceras americanum n. sp. ex America septentrionali*]. 4 figs., Amer. Journ. Sc., XXVI, 153, 295-299. New Haven, Conn. (1933). **b - 1285**

After a brief summary of our knowledge of the genus *Propinacoceras*, the author gives a description of the only representative of *Propinacoceras* known from America, which he proposes to call *P. americanum*, n. sp.

**Monsen Astrid** - Meddelelser om nogen skjellforekomster fra Nordre Helgeland [*Relatio de Molluscis inventis in* Helgeland *sept.*] (Norw. Text., Dtsch. Rés.). Tab., Bergens Mus. Årb., Naturv. r., H. 1, 7, 1-18. Bergen (1934). **b - 1286**

Das hier untersuchte Material besteht hauptsächlich aus sandigem Strandkies (*Mytilus*- Grus) und *Lithothamnium*- Bänken sowie lusitanischen und lusitanisch- borealen Arten. Tabellarische Uebersicht der gefundenen Arten.

**Montanaro E.** - Faune attinologiche quaternarie dell'Africa Orientale [*Corallia quaternaria in Africa orient.*]. Atti Soc. Ital. Progr. Sc. (XXIª Riun., Roma, 9-15 ottobre 1932), V, 124-131. Roma (1933). **b - 1287**

Descrizione di 58 forme di Coralli pleistocenici est-africani, di cui 18 citate per la prima volta dal Pleistocene del Mar Rosso e 6 ritenute nuove per la scienza. Esame comparativo di differenti collezioni. Paragone con le faune recenti. Variazione nella distribuzione geografica di alcune specie dal Terziario all'epoca attuale.

**Montanaro E.** - Faune attinologiche pliopleistoceniche dell'Africa Orientale [*De fauna pliopleistocenica Coralliorum in Africa Orient.*]. 5 tav., Palaeontogr. Ital., XXXIII, III, 141-209. Siena (1933). **b - 1288**

Sono qui descritte e illustrate 58 specie o varietà di Coralli plio-pleistocenici, provenienti da vari giacimenti delle coste del Mar Rosso e dell'Oceano Indiano, da Suez a Port Amelia, la maggior parte dei quali non erano stati esplorati dal punto di vista delle faune attinologiche. Di queste specie 18 sono citate per la prima volta dal Pleistocene del Mar Rosso e 6 con ritenute nuove per la scienza. Seguono considerazioni sulla distribuzione delle faune e su vari esempi di restrizione dell'habitat delle specie nel corso dei tempi.

**Montanaro E.** - Primo rinvenimento di Odontoceto nello « Schlier » dell'Appennino Modenese-Reggiano [*Inventio prior Odontoceti in strato Schlieriano Montium Appenninorum in regione Mutinensi-Regiensi*]. 1 tav., Riv. Ital. Paleontol., XL, 1/2, 20-28. Pavia (1934). **b - 1289**

L'A. rende noto il rinvenimento di un Odontoceto (1928) nei depositi dell'Appennino modenese-reggiano, e ne illustra i resti con diagnosi e confronti con tipi affini, e considera l'interesse che ogni nuova traccia di cetaceo possibile può destare, dal punto di vista paleontologico-filogenetico.

**Morellet L. & J.** - Coupe dans le Bartonien de Lévignen (Oise) [*Sectio quaedam in Bartoniano e* Lévignen (Oise)]. Bull. Mus. Nat. Hist. Natur., 2e sér., V, 3, 253-256. Paris (1933). **b - 1290**

Liste des couches d'une coupe à peu près complète du Bartonien de cette localité. Considérations particulières sur certaines des couches et précisément : la couche à *Nummulites variolarius ;* une couche laguna-lacustre ; une couche lagunaire ; une couche baptisée « niveau supérieur à Cérithes » etc.

**Morellet L. & J.** - Le Bartonien de Hadancourt-le-Haut-Clocher (Oise) [*Bartonianum in* Hadancourt-le-Haut-Clocher]. Bull. Mus. Nat. Hist. Natur., VI, 1, 147-149. Paris (1934). **b - 1291**

Succession stratigraphique et fossiles.

**Mortensen Th.** - On the « Manatee » of St. Helena [*Quaestio de* « Manatee » *ex insulae Sct. Helenae*]. 2 figs., Vidensk. Medd. Dansk naturhist. Foren. i. København, XCVII, 1-9. København (1933-34). **b - 1292**

Critical review of the works concerning the supposed presence of the « Manatee » on St. Helena and its criterion for the Archhelenis-theory of a former land-connection between S. America and Africa. According to the A. this « Manatee » seems to have been the Cape Sea-Lion, *Arctocephalus antarcticus* (Thunberg).

**Muellerried Federico K. G.** - Estudios paleontológicos y estratigráficos en la región de Tehuacán, Puebla. (Conclusión) [*Studia palæontologica et stratigraphica in regione* Tehuacán, Puebla. (*Conclusio*)]. 10 figs., An. Inst. Biol., V, 1, 55-80. Mexico (1934). **b - 1293**

Descripción de : otros Lamelibranquios, *Gastropoda*, *Anthozoa*, *Echinoidea*, *Spongia*, *Bryozoa*, *Vermes*, *Belemnoidea*, *Foraminifera*.

Estratigrafia del Cretacico. Terciario. Cuaternario. Los estratos y rocas de la región de Tehuacán. Geología historica de la región de Tehuacán.

**Nagao Takumi & Saito Ryuji** - Peculiar Septal Features Observed in Ammonites of Certain Lytoceratid Genera [*Peculiaritates quoad septa quæ observatae fuerunt in generibus quibusdam ad familiam « Lytoceratidae » pertinentibus*]. 8 figs., Proc. Imp. Acad., X, 6, 357-360. Tokyo (1934). **b - 1294**

The AA. had the opportunity to examine a number of Ammonites with a « septal lobe », derived from the Cretaceous of Hokkaido and Saghalin. It is evident that the presence of extraordinarily developed antisiphonal lobes with septal lobes and pseudosiphuncular tubes traversing the shell is intimately related to a true pelagic life and may play an important rôle in the strengthening of the shell.

**Nalivkine D.** - Le Dévonien des montagnes de Kharaoulakh, de l'Ile Koteljnyj et de l'Indighirka [*Devonianum montium* Kharaoulakh *in insula* Koteljnyj *et in regione* Indighirka]. (En russe). 1 fig., Trans. Arct. Inst., XII, 203-212. Leningrad (1933). **b - 1295**

Description de la faune du Dévonien supérieur découverte au cours des travaux de l'expédition de la Léna Inférieure, caractérisée par la prédominance des Brachiopodes et dont les formes les plus caractéristiques sont *Schizophoria iowensis* Hall et *Spirifer novosibiricus* Toll.

**Nalivkine D.** - Sur le Paléozoïque de la Novaja Zemlja [*Palaeozoica œtas in Nova Zemlia*] (En russe). Trans. Arct. Inst., XII, 213-216. Leningrad (1933). **b - 1296**

Description de la faune paléozoïque de la Novaja Zemlja sur la base d'une petite collection réunie au cours des expéditions de R. L. Samojlovitch en 1925, 1927 et l'expédition de G. Gorbatzkij en 1931. Vu que l'état de conservation de certains spécimens n'était pas parfait on n'a pas pu déterminer leur âge avec exactitude.

**Nassans R.** - Liste des fossiles jurassiques figurés de la collection Victor Maire [*Index fossilium giurassicorum pinctorum ad collectionem* Victor Maire *pertinentium*]. Bull. Mus. Nat. Hist. Natur., 2e sér., VI, 1, 136-139. Paris (1934). **b - 1297**

Ouvrages dans lesquels sont décrites et figurées les espèces citées dans ce travail.

Liste de : Spongiaires, Echinodermes, Brachiopodes, Gastropodes, Lamellibranches, Céphalopodes.

**Negri Luigi** - Gasteropodi, Scafopodi e Cefalopodi paleogenici della Sirtica e del Fezzan orientale [*Gasteropoda, Scaphopoda et Cephalopoda palæogenica in Sirtica et* Fezzan *orient.*]. 6 fig., 1 tav., Missione Scient. R. Accad. d'Ital. a Cufra (1931-IX) III, 131-181. Roma (1934). **b - 1298**

I Gasteropodi raccolti in Libia dalla Missione Desio nel 1931, assommano a circa 170 individui, rappresentanti 58 specie e 24 generi ; 2 specie sono date dall'A. come nuove.

**Nomura Schichihei** - Fossil *Mollusca* from the Island of Paramushiru, Chishima (Kurile Islands) [*Mollusca fossilia ex insula* Paramushiru, Chishima, (*Insulae* Kurile)]. 1 pl., Jap. Journ. Geol. & Geogr., Trans., XI, 1/2, 1-10. Tokyo (1933). **b - 1299**

Of the ten species described, two are indeterminable, three new to science and extinct, while five living ones are found in seas adjacent to the fossil locality.

**Oepik A.** - Ueber einige *Dalmanellacea* aus Estland [*Nonnulla Dalmanellacea in Estonia*]. 6 Taf., 3 Abb., Acta et Commentationes Univ. Tartuensis (Dorpatensis), XXV, A, 1-24. Tartu (1933). **b - 1300**

Erörterung der Klassifikation der hier zu untersuchenden estländischen Platystrophien. Eine neue Familie *Apatorthidae* wird hier provisorisch aufgestellt, die mit der Unterfamilie *Angusticardiinae* Schuchert & Cooper sehr nahe verwandt ist. Diagnosen, Synonyme und Vorkommen der folgenden Familien und Arten : *Apatorthidae* nov. fam. : *Apathortis punctata* n. sp., *A. tenuicosta* (Eichwald), *A. inflata* n. sp., *A. jugata* n. sp., *A. ultima* n. sp. ; *Paurorthidae* nov. fam. : *Paurorthis parva* (Pander) ; *Onniellidae* (nomen novum), *Onniella navis* (A. Oepik), *O. navicula* n. sp.

**Ognev V. N .** - The Upper Jurassic Fossils from Hooker Island on Franz-Joseph Land [*Fossilia ad Jurassicum inferius pertinentia ex insula* Hooker]. (In Russ., Engl. Rés.). 1 table, 5 pl., Trans. Arct. Inst., XII, 217-233. Leningrad (1933). **b - 1301**

Description and diagnosis of a collection of fossils from Hooker Island, made by I. M. Ivanov in 1931, consisting of some fragments of fragmocones, nine species of Belemnites and six species of Ammonites. These characterize two beds of gypsiferous clay from the section of the sedimentary series underlying the basalts on Cape Medevezhyj. The age of the clay is determined respectively as Callovian and Portlandian. Some conclusions are drawn on hand of the study of the collection.

**Oosting C. H.** - Neue Mollusken aus dem Pliocän von Süd-Bantam (Java) [*Mollusca nova ex œtate Pliocenica in* Bantam *merid.* (Java)]. 13 Abb., De Mijningenieur, XIV, 192-197. Bandoeng (Java) (1933). **b - 1302**

Die folgenden hier beschriebenen Arten sind neu : *Mathildia bantamensis, Triphora bantamensis, Typhis* (*Typhinella*) *bantamensis, Nassarius* (*Alectrion*) *bantamensis, Nassarius* (*Alectrion*) *insulindicus, Bullia* (*Adinus*) *bantamensis, Bullia* (*Adinus*) *litoralis, Drillia Oppenoorthi, Nucula bantamensis, Nuculana bantamensis, Tellina* (*Tellina*) *rosa-indica* und *Tellina* (*Moerella*) *bantamensis.*

**Richter Rud. & E.** - Missbildungen bei *Scutellidæ* und konstruktive Konvergenzen [*De anomaliis Scutellidarum deque cumvergentiis constructionis*]. 11 Abb., Senckenbergiana, XVI, 2/3, 155-160. Frankfurt a. M. (1934). **b - 1311**

Zwei verschiedene Weisen von Versteifung des all zu dünnen Schwanzes der *Scutellidae*, das Wellblech-Verfahren durch Rippenbildung (*paliferum*-Typus), und das Gewölbe-Verfahren (*campaniferum*-Typus). Beispiele von Missbildung bei *Thysanopeltis speciosa* (Barrande) und *Harpes venulosus*. Formänderungen und die folgende Tendenz eines gleichmässig gewellten Querschnitts.

**Roth Robert** - Some Morrison *Ostracoda* [*Ostracoda quædam ad formationem* Morrison *pertinentia*]. 1 pl., Journ. Paleontol., VII, 4, 398-405. (?) (1933). **b - 1312**

A collection from the lower part of the formation in the Black Hills, S. Dakota, compared with Texas Comanchean fossils, indicates that the Morrison probably is not of Lr. Cretaceous age. A brackish water environment is suggested. *Jonesina minnekahtensis* n. sp., *J. pahasapensis*, n. sp., *Bairdiocypris morrisonensis* n. sp., *B. trapezoidalis* n. sp., *Paracypris simplus* n. sp., *P. acuminatus* n. sp., *Pseudocypridina* (*Cypridae*) erected for *P. Piedmonti*, *P. ventroas* v. *bispinosus* (*Cypridea v.* var. *b.* Vanderpool). (Author).

**Ruedemann Rudolf** - Paleozoic Planktonic Faunas of North America [*Fauna planctonica palæozoica in America sept.*]. Proc. Nat. Acad. Sc. U. S. A., XIX, 1, 157-159. Washington, D. C. (1933). **b - 1313**

Records of sporadic formations of Cambrian *Medusae*, floating stocks of Hydrozoans (*Camptostroma*), Ordovician and Devonian Siphonophores (*Discophyllum* and *Paropsonema*), Cambrian to Devonian Crustaceans, larval Trilobites etc. As to the planktonic origin of the Paleozoic fauna of N. A. it seems probable that most of the black shales (save the graptolite shales) were formed in more or less enclosed basins but not in the open ocean.

**Ruedemann Rudolf** - *Camptostroma*, a Lower Cambrian Floating Hydrozoan [*Camptostroma e Cambriano infer.*]. 2 figs., 4 pl., Proc. U. S. Nat. Mus. (N. 2954), LXXXII, 13, 1-8. Washington, D. C. (1933). **b - 1314**

Summarising the observations of the A., it seems safe to consider *Camptostroma* as a tubularian hydrozoan with relations to the the *Siphonophora* on one hand and the Paleozoic *Stromatoporoidea* on the other.

Description of the new species: *C. roddyi* and *C. resseri*.

**Ruedemann Rudolf** - Vorweltliche Meerestiere in lebenden Bildern: « Aquarien der Vorwelt » [*Animalia præhistorica in picturis. Aquaria ætatis praehistoricæ*]. 4 Abb., Natur. u. Volk, LXIV, 1, 9-14. Frankfurt a. M. (1934). **b - 1315**

Beschreibung mit Abbildungen einer dem « New York State Museum in Albany N. Y. » entstammenden Sammlung. Reproduktionen vorweltlicher Meerestiere, wie Merostomen der Silurzeit; Tintenfische, Fische, Siphonophoren, Kieselschwämme, Algen, Korallen, Seesterne, Brachiopoden etc. der oberdevonischen Zeit; Tintenfische, Trilobiten, Seelilien, Schnecken und Muscheln der unterdevonischen Zeit.

**Ruedemann Rudolf** - Cambrian Graptolites [*Graptolites e Cambriano*]. Science, LXXX, 2062, 15. New York (1934). **b - 1316**

Correction of the errors and uncorrected determinations made in the account on Cambrian Graptolites, published by the A. in Bulletin N. 3, Vol. 12 (1933) of the Public Museum of the City of Milwaukee.

**Russell Loris S.** - Pleistocene and Post-pleistocene Molluscan Faunas of southern Saskatchewan (Canada) [*Mollusca pleistocenica et post-pleistocenica in* Saskatchewan *merid.*]. ill., Canad. Field Natural., XLVIII, 34-37. Ottawa (1934). **b - 1317**

**Saito Kazuo** - Older Cambrian *Trilobita* and *Conchostraca* from North-West Korea [*Trilobita et Conchostraca e Cambriano in* Korea *nord-occid.*]. 8 figs., 3 pl., Jap. Journ. Geol. & Geogr., Trans., XI, 3/4, 211-237. Tokyo (1934). **b - 1318**

From the described species the following ones are new to science: *Eodiscus fusifrons* n. sp., *E. spiniger* n. sp., *Oryctocephalus orientalis* n. sp., *O. kobayashii* n. sp., *Redlichia coreanica* n. sp., *R. nokamurai* n. sp., *Bonnia tokunagai* n. sp., *B.* cf. *tokunagai* n. sp., *B. orientalis* n. sp., *Arthricocephalus ? primigenius* n. sp., *Bradoria subacuminata* n. sp., *Aluta obsoleta* n. sp., Out of 9 genera represented by 19 species three were hitherto unknown in Eastern Asia, while three others are recorded only from formations younger than Manto shale.

**Samoilovitch R. & Bodylevsky V.** - On Some Jurassic Fossils from Hooker Island (Franz-Joseph Land) [*Fossiles quidam jurassici in insula* Hooker (*Terra Francisci Josephi*)]. 2 figs., 2 tabl., Trans. Arct. Inst., XII, 29-41, Leningrad (1933). **b - 1319**

This paper contains the description of fossils collected during the Expedition of the Arctic Institute in 1930 and partly in 1929. The following species have been identified: *Macrocephalites ishmae* Keys, *Cadoceras nanseni* Pomp. and *Cadoceras* spec. (? cf. *nanseni* Pomp.), *Quenstedticeras* sp., *Belemnites borealis* d' Orb., *B. panderi* d'Orb., *B.* aff. *panderi* d'Orb. The described fossils assert the presence of the Lower, Middle und Upper Callovian.

**Sandidge J. R.** - Foraminifera from the Jurassic in Montana [*Foraminifera e Jurassico in* Montana]. 2 figs., 1 pl., Amer. Midland Natural., XIV, 2, 174-185. (?) (1933). **b - 1320**

Twelve species are described and figured in this paper, belonging principally to the *Lagenidae*. The chief genera represented are: *Lenticulina*, *Vaginulina* and *Frondicularia*.

**Sarra Raffaele** - Denti di Pesci del Cretaceo e di Mammiferi del Pliocene rinvenuti in Basilicata [*Dentes piscium ætatis Cretaceæ dentesque Mammaliorum ætatis pliocenicæ in Basilicata reperti*]. Riv. Ital. Paleontol., XXXIX, 1, 29-34. Pavia (1933). **b - 1321**

Esame di denti appartenenti alle forme seguenti: *Gyrodus* (?) *cretaceus* ed *Enchodus lewesiensis* Mantell., *Orca* sp., *Pristiphoca occitanica* Gerv., *Sus erymanthius* Roth e Wagner.

**Schneegans D.** - Étude paléontologique préliminaire des fossiles recueillis par R. Lambert entre Agadez et Zinder (Niger) [*Studium palæontologicum prius fossilium collectorum a.* R. Lambert *inter* Agadez *et* Zinder (Niger)]. C. R. Acad. Sc., CXCVIII, 25, 2191-2193. Paris (1934). **b - 1322**

Considérations sur les fossiles du Cénomanien supérieur et du Turonien inférieur trouvés par R. Lambert et R. Furon dans les couches marines.

**Sieber Rudolf** - Weitere Ergebnisse paläobiologischer Untersuchungen an der Fauna der rhätischen Riffkalke der Rötelwand (Osterhorngruppe, Salzburg) und anderer rhätischen Riffgebiete [*Resultatus ulteriores ex inquisitionibus palaeobiologicis in faunam scopulorum calcareorum reticorum ad* Osterhorngruppe, *Salisburgi, pertinentium et in faunam aliorum scopulorum reticorum Alpium septentrionalium*]. Anz. Akad. Wiss., Math. Naturwiss. Kl., LXXI, 19, 258-261. Wien (1934). **b - 1323**

Diese Untersuchungen bilden die Fortsetzung derjenigen, die schon in Sommer 1933 an der rhätischen Fauna der Rötelwand-Riffmasse unternommen wurden. Neue Funde sind hier angegeben wie Z. B. *Thecosmilia, Cardita, Cassianella, Pinna, Plicatula, Ostrea, Pecten* u. a. (S. auch Akad. Anz. N. 19, X, 1933).

**Silvestri Alfredo** - Su di alcuni Foraminiferi terziari della Sirtica [*De quibusdam Foraminiferis terziariis in Tripolitania*]. 3 tav., Miss. Scient. R. Accad. d'Ital. a Cufra (1931-IX), III, 5-30. Roma (1934). **b - 1324**

**Smith Stanley** - On *Xylodes rugosus* sp. nov., a Niagaran Coral [*Xylodes rugosus n. sp., corallium in* Niagara]. 1 pl., Amer. Journ. Sc., XXVI, 155, 512-522. New Haven, Conn. (1933). **b - 1325**

The main purpose of this paper is to describe and illustrate *Xylodes rugosus*, a Niagaran coral belonging to the genus *Xylodes* Lang and Smith, but it considers also several other species of silurian Corals belonging to the genus *Xylodes* and *Eridophyllum*.

**Stefanini G.** - Molluschi del Giuralias della Somalia. (Paleontologia della Somalia: Fossili raccolti dalle Missioni Stefanini-Paoli (1913) e Stefanini-Puccioni (1924) e da altri) [*Mollusca ætatis Giuraliassicæ Somaliæ*]. 5 tav., Palaeontogr. Ital., XXXII, suppl., 1, 1-53. Siena (1933). **b - 1326**

Cenni sulle conoscenze relative ai Molluschi giurassici della Penisola Somala, con elenchi completi delle specie ricordate o descritte da vari autori e illustrazione dei Cefalopodi raccolti dall'A. e da altri, specialmente nella Somalia Italiana ed Etiopia.

**Stensiö A:son Erik** - On the Heads of Certain Arthrodires I. *Pholidosteus, Leiosteus,* and *Acanthaspidis* [*Arthrodira quædam, quæstio de capite*]. 30 figs., 14 pl., Kgl. Svenska Vetenskapsakad. Handl., Tredje Ser., XIII, 5, 1-79. Stockholm (1934). **b - 1327**

The researches carried out by the A. on the head of *Pholidosteus, Leiosteus* and the Acanthaspid-form from *Podolia* have thrown much new light not only on the endocranium and visceral endoskeleton, but also on the relations between these and the dermal bones of the head. On account of this it is possible now to understand much better the organisation of the Arthrodires.

**Stewart Roscoe E. & Stewart Katherine C.** - Notes on the *Foraminifera* of the Type Merced at Seven Mile Beach, San Mateo County, California [*Foraminifera ad exemplar* Merced *pertinentia in* Seven Mile Beach S. M. County *in California*]. 2 pl., Trans. San Diego Soc. Natur. Hist., VII, 21, 259-270. (1933). **b - 1328**

Description of *Nonionella Cushmani* and notes on 22 associated *Foraminifera*.

**Störmer Leif** - Are the Trilobites Related to the Arachnids? [*Num Trilobita affinia sunt Arachnidarum* ?]. 2 figs., Amer. Journ. Sc., XXVI, 152, 147-157. New Haven, Conn. (1933). **b - 1329**

Contribution to the discussion of the zoölogical position of the Trilobites, on hand of original material, which brings out certain facts about the appendages that have previously escaped notice or have not been sufficiently emphasized. The author reaches to conclusion on several analogies existing between Trilobites and Arachnids.

**Störmer Leif** - *Merostomata* from the Downtonian Sandstone of Ringerike [*Merostomata in arenaria downtoniana in regione norvegica* Ringerike]. 39 figs., 12 pl., 125 pp., Skrift. Norsk. Vidensk. Akad. Oslo, 1, Math.-Naturv. kl. 1933, 10. Oslo (1934). **b - 1330**

Morphology and relationships of ten species of *Merostomata*. The A. studies especially the eurypterids, six species of which are new, their relation to *Xiphosura, Chelicerata, Pedipalpi,* and *Scorpionida* and gives a long discussion of the « median appendages ».

**Storrs Cole W. & Ponton Gerald M.** - New Species of *Fabularia, Asterocyclina* and *Lepidocyclina* from the Florida Eocene [*Species novæ ad genera « Fabularia », « Asterocyclina » et « Lepidocyclina » pertinentes ex aetate eocenica floridensi*]. 2 pl., Amer. Midland Natural, XV, 2, 138-147. (?) **b - 1331**

Detailed description of the new species *Fabularia Vaughani*. This is the first record of this genus in America.

**Straw S. H.** - The Fauna of the Palaeozoic Rocks of the Little Missenden Boring with a Report on the Fish Remains, by Arthur Smith Woodward [*Fauna saxorum palaeozoicorum ad perforationem nomine* « Little Missenden » *pertinentium. Relatio adiungitur de relictis piscium per* Arthur Smith-Woodward]. 2 pl., Summary Progr. Geol. Surv. Great Britain and Mus. Pract. Geol. 1932, 2, 112-142. (?) (1933). **b - 1332**

The following forms are new: *Lingula missendenensis, L. zigzag, Orbiculoidea crudifera, Dalmanella missendenensis, Chonetes novascotius* v. *missendenensis, Hormotoma missendenensis, Orthoceras ludense* v. *granulatum*. Table showing the vertical distribution of the *Crinoidea, Annelida, Bryozoa, Brachiopoda, Lamellibranchiata, Gastropoda, Cephalopoda, Trilobita, Crustacea,* and *Pisces*. Brief notes on the fish remains.

**Szörenényi Elisabeth** - Neue tertiäre *Sepiinæ* aus Ungarn nebst Bemerkungen zum zeitlichen Auftreten und zur Entwicklung der Gattung *Sepia* [*Sepiinæ tertiariae novae Ungaricæ cum observationibus circa præsentiam temporariam et progres-*

*sionem generis « Sepia »*]. 10 Abb. a. T., Földtani Közlöny (Geol. Mitt.), LXIII, 7/12, 183-189. Budapest (1933). **b - 1333**

Kurze Uebersicht über frühere Befunde. Diagnose mit Angabe des Alters und Fundortes der folgenden neuen Formen: *Sepia oligocaenica* n. sp., *Sepia harmata* n. sp., *Archaeosepia naefi* n. gen. n. sp., *Belosepia* n. sp., Die Vf. versetzt die Entstehung der *Sepiinae* in die voreozäne Zeit.

**Taliaferro N. L. & Schenck Hubert G.** - *Lepidocyclina* in California. 4 figs., Amer. Journ. Sc., XXV, 145, 74-80. New Haven, Conn. (1933). **b - 1334**

Description of a formation of early Miocene age in San Luis Obispo County, California, in which orbitoidal Foraminifera of the genus *Lepidocyclina* were recently discovered. The present is not only the first record of the genus from the Pacific Slope of North America, but is one of the few Miocene occurrences of the subgenus *Lepidocyclina* in the world. The formation carrying these fossils is known in California as the Vaqueros. Description and diagnosis of the specimens discovered; their relationship with other marine Invertebrates of the Miocene age.

**Tanner V.** - Bidrag till kännedomen om den subfossila marina molluskfaunan i Ishavsfinland [*Contributio in faunam marinam subfossilem Molluscorum cognoscendam*]. Mem. Soc. pro Fauna et Flora Fennica, 1932-1933, IX, 92-103. Helsinki (1933-34). **b - 1335**

Questo lavoro completa le ricerche precedenti dell'A. sul Quaternario delle parti settentrionali della Fennoscandia. Lista delle specie trovate nelle differenti località.

**Tegland Nellie May** (a Posthumous Paper) - The Fauna of the type Blakeley Upper Oligocene of Washington [*De fauna ad specimen* Blakeley *oligocenicum superius in* Washington *pertinente*]. 14 pl., 2 maps, Univ. Calif. Publ., Bull. Dpt. Geol. Sc., XXIII, 3, 81-174. Berkeley, Calif. (1933). **b - 1336**

Historical review. A brief description of the type section of the Blakeley horizon. Fauna of the Lower Blakeley conglomerate. Shale Fauna of the type Blakeley. Relationship of fauna of the type Blakeley to fauna of the Astoria, Oregon, Miocene. Mistaken identifications of Blakeley species, with correction. Relationship between the type Blakeley and the Twin Rivers formations. Faunal relation to the San Lorenzo formation of Santa Cruz County, California. Transitional Oligocene-Miocene. Faunal relation to Mount Diablo San Lorenzo. Faunal relations of type Blakeley and Sooke. Description and discussion of species belonging to: Class *Pelecypoda*, Class *Gastropoda*, Phylum *Brachiopoda*, Phylum *Echinodermata*, Phylum *Coelenterata*. Bibliography.

**Tesch P.** - De Opeenvolging van de oud-plistoceene lagen in Nederland [*De successione stratorum ætatis Pleistocenicæ superioris in Hollandia*] (Holländ. Text, Dtsch. Rés.). 4 Karten, Tab., Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam, LI, 5, 649-675. Leiden (1934). **b - 1337**

In dieser Abhandlung wird gezeigt, dass in gewissen westlichen Teilen der Niederlande eine mächtige marine Schichtenfolge vorliegt, welche im mittleren Teil eine ausgesprochene arktische Molluskenfauna (*Yoldia* (*Portlandia*) *arctica*, *Leda minuta*, *Astarte borealis*, *Cardium groënlandicum*, *Scalaria groënlandica* usw.) führt. Wenn man die alpine Gliederung auch dem nordeuropäischen Quartär zu Grunde legt, erscheinen die marine Schichtenfolge mit arktischer Molluskenfauna im Westen des Landes als eine Meeresbildung des Günzglazials, der Horizont von *Viviparus glacialis* als Günz-Mindelinterglazial, der Horizont von *Viviparus diluvianus* als Mindel-Rissinterglazial. Nur in dieser Weise besteht die Möglichkeit das Quartär von Skandinavien und Deutschland mit demjenigen Englands in befriedigender Weise in Verbindung zu bringen. (Aus der Zusammenf. des Vf.).

**Thalmann Hans E.** - Nachtrag zum Nomenclator zu Brady's Tafelband der Foraminiferen der « Challenger » - Expedition [*Supplementum ad nomenclaturam qua utitur in tabulis per* Brady *redactis quæ repraesentant Foraminifera collecta inter navigationem* « Challenger »]. Eclogae geol. Helvetiae, XXVI, 2. Basel (1933). **b - 1338**

**Thalmann Hans E.** - Zwei neue Vertreter der Foraminiferen-Gattung *Rotalia* Lamarck 1804; *Rotalia cubana* nom. nov. und *R. trispinosa* nom nov. [*Species duæ novæ ad genus « Rotalia »* Lamarck *1804 pertinentes*]. Eclogae geol. Helvetiae, XXVI, 2, 248-251. Basel (1933). **b - 1339**

Die von d'Orbigny in 1839 unter dem Namen *Calcarina pulchella*, beschriebene kubanische Form dürfte *Rotalia cubana* Thalmann genannt werden. Die Art genannt *Rotalia pulchella* (d'Orbigny) de Brady muss zu *R. trispinosa* Thalmann berichtigt werden.

**Thalmann Hans E.** - Index to Genera and Species of *Foraminifera* Erected during the Year 1931 [*Index generum et specierum Foraminiferorum a. 1931*]. Journ. Palaeontol., VII, Sept. Oklahoma (1933). **b - 1340**

List of eleven new genera and 194 new species described in the literature for 1931.

**Thalmann Hans E.** - Bibliography of the *Foraminifera* for the Year 1931 [*Foraminifera. Bibliographia a. 1931*]. Journ. Palaeontol., VII, Sept., 343-349. Oklahoma (1933). **b - 1341**

This list contains the titles of 145 papers published in 1931.

**Thalmann Hans E.** - Ueber geographische Rassenkreise bei fossilen Foraminiferen [*Stirpes differentes inter Foraminifera fossilia*]. Paläontol. Ztschr., XVI. Berlin (1934). **b - 1342**

**Trusheim F.** - Eine bedeutsame Schichtfläche aus dem Muschelkalk und ihre Auswertung durch die Meeresgeologie [*De notando quodam strato in formatione calcarea Molluscorum eiusque momento pro geologia marina studenda*]. Natur. u. Volk, LXIV, 9, 333-340. Frankfurt a. M. (1934). **b - 1343**

Beschreibung, auch an Hand sehr wohl gelungener Photographien von verschiedenen durch Luft und Tiere gebildeten Trichtern und Auftreibungen im Sande, besonders an den Nordseewatten. Aus den hier beobachteten Erscheinungen können viele bedeutende Schlüsse in Bezug auf geologische Formationen gezogen werden. Ein Beispiel ist hier angeführt, Vergleich zwischen der Strandoberfläche am Nordseewatten und einer Sandwurm-Siedlung (*Arenicolites franconicus* Trush.) aus dem Hauptmuschelkalk von Würzburg.

**Van Straelen V.** - Notes sur les Phyllocarides Paléozoiques ou *Archaeostraca* de la Belgique et remarques sur la systématique de ces Crustacés [*Archaeostraca palaeozoica belgica. Considerationes de eorum systhematica*]. 2 fig., Bull. Mus. R. Hist. Natur., IX, 16, 1-12. Bruxelles (1933). **b - 1344**

Description des espèces suivantes: 2 *Ceratiocaris* spp., *Caryocaris Wrighti*, *Dithyrocaris tenuistriata*, *Ellipsocaris dewalquei*, *Spathiocaris chagrinensis*. Répartition systématique des Phyllocarides trouvés en Belgique. Remarque sur la systématique des Phyllocarides, dont la nature est problématique.

**Wagner Georg** - Deutscher Muschelkalk (« Wellengebirge ») am Toten Meer [*De calcare germanico Molluscorum apud lacum Asphaltiden*]. 5 Abb., Natur. u. Volk, LXIV, 11, 449-454. Frankfurt a. M. (1934). **b - 1345**

Unter Hinweisung auf die Arbeiten von L. R. Cox « A. Triassic Fauna from the Jordan Valley », « Further Notes on the Transjordan Trias » macht der Vf. hier einen Vergleich zwischen den deutschen Triasformationen und denen am Nord-Ost-Rande des Toten Meeres; dieselben äusseren Bedingungen, dieselben Gesteine, dieselbe Fauna: *Lingula*, *Lima striata*, *Gervillia socialis*, *Pecten discites*, *Placunopsis*, *Terquemia*, *Plicatula* usw.

**Wickenden R. T. D.** - Jurassic *Foraminifera* from Wells in Alberta and Saskatchewan [*Foraminifera jurassica e puteis in* Alberta *et* Saskatchewan]. 2 pl., Trans. R. Soc. Canada, ser. 3, sect. 4, 27, 157-170. Ottawa (1933). **b - 1346**

The majority of species described belongs to the *Lagenidae*. The fauna of this formation is very similar to one described by Sandidge from the Sundance formation in S. E. Montana.

**Yabe Hisakatsu & Sugiyama Toshio** - Notes on Three New Corals from Japan [*Corallia nova tria ex Japonia*]. 3 pl., Jap. Journ. Geol. & Geogr., Trans., XI, 1/2, 11-18. Tokyo (1933). **b - 1347**

This paper is divided into two parts: 1) The second living species of *Stylocoenia*, *S. hanzawai* from Amami-O-shima, the Riukiu Islands and 2) Two new Corals from Borodino Islands: *Pseudo-columnastrea Yamanarii* and *Stylocoenia ? aokii.*

**Yabe Hisakatsu & Sugiyama Toshio** - A New Species of *Disjectopora* from Japan [*Species nova ad genus « Disjectopora » pertinens ex Japonia*]. 1 fig., 1 pl., Jap. Journ. Geol. & Geogr., Trans., XI, 3/4, 171-174. Tokyo (1934). **b - 1348**

After some general considerations on the occurrence of Stromatoporoids and their related forms in the Permian deposits of the world the A. gives a diagnosis and description of *Disjectopora japonica* n. sp. on hand of the unique specimen of this species consisting in a very fragmental piece of a coenosteum.

**Yabe Hisakatsu & Sugiyama Toshio** - *Amblysiphonella* and *Rhabdactinia* gen. and sp. nov. from the Upper Palaeozoic Limestone of Mimikiri, near Sakawa-mati, Tosa Province, Sikoku, Japan [*Amblysiphonella et Rhabdactinia gen. et sp. nov. e calcare Palaeozoici superioris in* Mimikiri, *apud* Sakawa-mati, *in provincia* Tosa, Sikoku, *Japonia*]. 3 pl., 1 table, Jap. Journ. Geol. & Geogr., Trans., XI, 3/4, 176-180. Tokyo (1934). **b - 1349**

Description of *Amblysiphonella* Steinmann and diagnosis of *A. sikokuensis* sp. n. and *A. mabuchii*, sp. n.; *Rhabdactinia*, gen. nov.: *R. columnaria* sp. n. These fossils are indisputable evidences of the Permian age of the limestone of Mimikiri, studied during students' excursions in the summer 1932.

**Yabe Hisakatsu & Sugiyama Toshio** - An Upper Palaeozoic Crinoid from Japan [*Amphoracrinus sp. e Palaeozoico superiore japonensi*]. 1 pl., Jap. Journ. Geol. & Geogr., Trans., XI, 3/4, 349-351. Tokyo (1934). **b - 1350**

Diagnosis of *Amphoracrinus* sp. indet. on hand of material consisting of a calyx of a crinoid in external cast and some stem-joints. The fossil may possibly represent a new species, but the material in hand is too imperfect to warrant a new specific name being given to it.

**Zanon D. V.** - Silicoflagellate fossili italiane [*Silicoflagellata italica fossilia*]. 3 fig., 1 tav., Acta Pont. Acad. Sc. Novi Lyncaei, LXXXVII, 1, 40-82. Roma (1933-34). **b - 1351**

Depositi marini esaminati dall'A. e da altri per lo studio delle Silicoflagellate fossili. Descrizione di specie appartenenti agli ordini *Siphonotestales* e *Stereotestales.*

**Zilch Adolf** - Eine Perle aus der Meereszeit der Wetterau [*Margarita e zona marina Miocenis inferioris in* Wetterau]. 2 Abb., Natur u. Volk, LXIV, 3, 93-95. Frankfurt a. M. (1934). **b - 1352**

Im Jahre 1933 wurde in einem unter-miozänen Meeresarm in der Nähe von Frankfurt eine vorweltliche Perle gefunden, die von der Muschel *Perna sandbergeri* erzeugt worden ist. Etwas über ihre Bildung. Andere ähnliche Funde.

**Zuffardi-Comerci R.** - Corallari del Cretaceo della Somalia [*Corallaria ab aetate cretacea in Somalia*]. (Paleontologia della Somalia: Fossili raccolti dalle Missioni Stefanini-Paoli (1913) e Stefanini-Puccioni (1924) e da altri), 1 tav., Palaeontogr. Ital., XXXII, II, 209-216. Siena (1933). **b - 1353**

Notizia circa precedenti indicazioni di Corallari cretacei della Penisola e descrizione di 6 specie, delle quali 2 nuove.

**Zuffardi-Comerci R.** - Corallari-Zoantari fossili del Miocene della « Collina di Torino » [*Corallaria-Zoantharia fossilia ab aetate miocenica in* « Collina di Torino »]. 9 fig., 4 tav., Palaeontogr. Ital., XXXII, III, 1932, 85-132. Siena (1933). **b - 1354**

Elenco generale degli Zoantari miocenici dei celebri giacimenti della collina torinese, seguito dalla descrizione e illustrazione di numerose specie nuove o poco note.

**Zuffardi-Comerci R.** - Su alcuni Corallari terziari della Cirenaica e della Tripolitania orientale [*De Corallariis tertiariis e Cyrenaica et Tripolitania orient.*]. 1 tav., Missione Scient. R. Accad. Ital. a Cufra (1931 - IX), III, 43-60. Roma (1934). **b - 1355**

Studio della fauna terziaria di Coralli della Sirtica e dell'oasi di Cufra, rappresentata da avanzi di banchi corallini vissuti in ottime condizioni di clima e di ambiente.

**Brunelli Gustavo** - La coltivazione degli stagni salsi e la vallicoltura. (III Corso magistrale marittimo peschereccio). - Tip. A. Manuzio. Ist. Poligr. dello Stato Edit. Roma (1933). **b - 1471**

Concetto di vallicoltura quale pratica peschereccia. Distinzione delle valli in: arginate, semi-arginate e aperte, e loro rendimento. Criteri del moderno orientamento verso la bonifica peschereccia e valliva, la quale poggia sopra precise conoscenze idrauliche e biologiche relative al regime delle acque, all'anofelismo e allo sfruttamento piscicolo, e rappresenta una delle più solide conquiste della collaborazione degli studi idraulici, sanitari e naturalistici.

**Brunelli Gustavo** - La coltivazione degli stagni salsi e la vallicoltura. - Boll. Pesca, Piscicolt. e Idrobiol., IX, 5, 791-798. Roma (1933). **b - 1472**

Cenni sulla vallicoltura e sulla importanza del suo odierno sviluppo nei riguardi della scienza ittiologica, malariologica e di bonificazione. Caratteristiche della fauna dei fondi vallivi in rapporto al particolare ambiente lagunare. Distinzione delle valli in arginate, semi-arginate e aperte. La bonifica peschereccia come una delle più solide conquiste della collaborazione fra studi idraulici, sanitari e naturalistici.

**Brunelli Gustavo** - La coltivazione degli stagni salsi e la vallicoltura. - Ital. Pescher., 1/2, 9-10. Roma (1934). **b - 1473**

Importanza della vallicoltura nei riflessi della scienza ittiologica, di quella malariologica e delle bonifiche. Illustrazione di questa tecnica peschereccia nei suoi solidi fondamenti biologici, quali derivano dai nostri studi lagunari. La vallicoltura, bonifica igienica. Si dimostra che per conservare sana la valle, basta regolare la salsedine e provvedere al tempestivo ricambio delle acque.

(—) Boll. Pesca, Piscicolt. e Idrobiol., IX, 5, 799-808. Roma (1933). **b - 1475**

Specie di pesci di origine marina allevate in acque interne. Allevamenti in acque interne. Montata del novellame. Quantità seminate. Accrescimento di muggini. Cenno sulla biologia dell'anguilla e sulla sua diffusione spontanea nelle acque interne e nei laghi alpini. Montata naturale e cattura delle cieche, trasporto e semina delle medesime. Cattura e commercio dell'anguilla.

**Chiappi T.** - La pesca e la piscicoltura nella provincia di Roma. Aspetti e Probl. della Città e prov. di Roma, 113-138. Roma (1933). **b - 1476**

Dopo un rapido cenno sulla piscicoltura primitiva, e sulla pesca di mare nel litorale romano e nei più grandi stagni litoranei, l'A. passa ed esaminare la pesca nelle acque interne della provincia che hanno particolare importanza per la piscicoltura.

**Clemens W. A. & Clemens Lucy S.** - Contributions to the Life-History of the Sockeye Salmon (nº 19). 5 figs., 35 tabl., Rep. Comm. Fish., 1933, App., 12-47, Victoria, B. C. (1934). **b - 1477**

Analysis of the runs of sockeye salmon of 1933 preceeded by graphs showing the pack records from the early beginnings of the fishery to date and the calculated trends. The pronounced downward trends for the Fraser, Skeena, and Nass Rivers are noteworthy. For each run are given : the general characteristics, the age-groups, the lengths and weights, the distribution of the sexes and the changes during the run and their probable significance.

**D' Ancona Umberto** - Ulteriori osservazioni sulle statistiche della pesca dell'Alto Adriatico. - 8 tab., R. Comit. Talassogr. Ital., Mem. Nº CCXV, 1-27. Venezia (1934). **b - 1478**

L'A. prima discute il valore fondamentale delle obiezioni mosse a un suo lavoro precedente (R. Comit. Talassogr. Ital. N. CXXVI, 1926), nel quale egli giungeva alla conclusione che la stasi peschereccia del 1914-18 aveva temporaneamente spostato l'equilibrio esistente tra le diverse specie animali dell'Alto Adriatico, favorendo, fra quelle economicamente importanti, le più voraci a danno delle più inermi. Egli passa poi all'esame critico dei dati statistici raccolti sui mercati di Trieste e Fiume fino al 1932, in base al quale giunge di nuovo alla conclusione che « pare verosimile che nell'Alto Adriatico, nel periodo finale della guerra si sia avuto un non comune aumento di Selacei, fatto di cui si può attribuire la causa alla sospensione della pesca ».

**Duff D. C. B.** - *Octomitus*. - Ann. Rep. Biol. Board Canada, 1933, 76. Ottawa (1934). **b - 1479**

Results of an histological examination of a number of sockeye-salmon fry and cutthroat trout infested by *Octomitus salmonis*, which is undoubtedly the most serious protozoan parasite of Salmonoids frequently causing very great mortality among young fish at hatcheries.

## *Naviculae pro inquisitionibus scientificis.*

**Abbat P.** - Le navire de recherches océanographiques « Président-Théodore-Tissier ». - Pêche Marit., Pêche Fluviale et Piscicult., XVI, 427-441. Paris (1933). **b - 1510**

**Blegvad H.** - S/S « Biologen ». - Rep. Danish Biol. Stat., XXXVIII, 3-8. Copenhagen (1933). **b - 1511**

**Courtin H.** - Le nouveau navire de recherches océanographiques de l'Office scientifique et technique des Pêches Maritimes. - Rev. Industr., LXIV, 2294, 28-31. (1934). **b - 1512**

Description de ce navire et son équipement pour des recherches océanographiques.

**Graham William** - Our Cod and Haddock Fishery Needs a Research Vessel. 4 ills., Fish. Gaz., LI, 4, 7-10. New York (1934). **b - 1513**

The author asks one research vessel for the cod and haddock fishery in American waters and outlines a research program, which would aid not only the fishermen, but important manufacturing industries as well.

**An.** - Plea For Research Vessel Wins Hearty Approval. - Fish Gaz., LI, 5, 15. New York (1934).

(—) S. also: John Graham: « Our Cod and Haddock Fishery Needs a Research Vessel », Fish. Gaz.. LI, 4, 1934. **b - 1514**

Introduction in Congress of a bill calling for an appropriation of 500,000 for the express purpose of building a research ship for fishery.

**An.** - Le « Misago-Maru », Navire de recherche. - Rev. Hydrogr., XI, 1, 17. Monaco (1934). **b - 1515**

Principales caractéristiques du navire de recherche de la Station d'Etude des Pêcheries du Gouvernement Général de la Corée-Fusan.

***

## *Hydrographia piscatui applicata.*

**Buch Kurt** - Beobachtungen über chemische Faktoren in der Nordsee, zwischen Nordsee und Island sowie auf dem Schelfgebiete nördlich von Island. (Engl. Rés.). 2 Abb., 8 Tab., Rapp. Pr.-Verb. Cons. Expl. Mer, 3-ème partie, Appendices 1933-1934, LXXXIX, 13-31. Copenhague (1934). **b - 1516**

Diese während der Fischereisaison 1932 und 1933 ausgeführten Untersuchungen bilden die Unterlage eines eingehenden Studiums über die Kohlensäuregleichgewichtsverhältnisse im Meere sowie den $CO_2$ Austausch zwischen Meer und Atmosphäre. Die Fahrten. Methodik. Berechnete Grössen. Das Beobachtungs-und Analysenmaterial. Nordsee und Nordatlantischer Ozean. Das isländische Assimilationsgebiet.

**Eggvin Jens** - VIII. Biologiske og oceanografiske undersøkelser. De oceanografiske forhold i Vestfjorden og deres sammenheng med Lofotfisket 1933. 6 graph. figs., Årsber. v. Norg. Fisk. 1933. Lofotfisket 1933, 2, 94-102. Bergen (1934). **b - 1517**

The highest temperature ever measured prevailing in a depth of 100-150 m. during March 1933 ; causes of this anomaly ; its influence on the occurrence of spawning cod in the thin transition layers between the cold coast waters and the deep salt water.

**Eggvin Jens** - VIII. Biologiske og oceanografiske undersøkelser. Litt om de oceanografiske forhold under Lofotfisket 1934. 2 fig., Årsber. v. Norg. Fisk. 1934. Lofotfisket 1934, 2, 93-95. Bergen (1934). **b - 1518**

Observations on temperature and salt conditions made at Hola in March 1934. The transition layers between the cold coast waters and the deep salt water and its influence on the fishery.

**Fish Charles J.** - The Investigations of the International Passamaquoddy Fisheries Commission in 1931 and 1932. - Trans. Amer. Geoph. Union, 14th Ann. Meet., Apr. 27-29, 1933, Nat. Res. Counc., 225-226. Washington, D. C. (1933). **b - 1519**

An account of the work made for the last two years by the scientific staff of the International Passamaquoddy Fisheries Commission in order to determine as accurately as possible the effect of the proposed tidal-power dams on the fisheries of Passamaquoddy Bay and adjacent regions in the Bay of Fundy and Gulf of Maine.

**Le Danois Ed.** - Les transgressions océaniques. - Bull. Inst. Océanogr., 613, 1-16. Monaco (1933). **b - 1520**

Examen de la théorie des transgressions océaniques dans son principe et dans son mécanisme. Hypothèses expliquant ces transgressions. Influence de la transgression des eaux sur la pêche des principaux Poissons des eaux atlantiques et d'origine équatoriale. Les variations transgressives et les prédictions du rendement de la pêche. Mise au point de la question des variations de la pêche de la morue sur le banc de Terre-Neuve. Importance de la théorie des transgressions pour l'industrie de la pêche.

**McKay C.** - Water Temperatures for Cod Fishing. - Canad. Fisherm., XXI, 3, 11. Gardenvale, Que. (1934). **b - 1521**

Some results of various investigations concerned with the best temperature of water to fish for cod.

**McKenzie R. A.** - The Relation of the Cod to Water Temperatures. 3 figs., Canad. Fisherm., XXI, 7, 11-14. Gardenvale, Que. (1934). **b - 1522**

It is seen that the low temperature death point for the cod is approximately 30°-29° F. while its high temperature death point lies between 68° and 76° F. Between these limits there are records of fairly good cod fishing being obtained at various times, seasons, and places over the range 31°-60° F. While at present it is not possible fully to correlate these results with the fishery, they do explain the sudden cessation of fishing when the temperature rises rapidly.

**Musella F.** - Brevi cenni di idrografia (III Corso Magistrale marittimo peschereccio). 14 fig., 26 pp., Soc. Tip. A. Manuzio, Ist. Poligr. dello Stato - Libreria, Roma (1933). **b - 1523**

**Wilson A. M. & Thompson H.** - Notes on the Physical Conditions in 1933. 2 maps, 2 tabl., 1 pl., Rep. Newfoundland Fish. Res. Comm., Ann. Rep., II, 2, 40-47. Plymouth (1934). **b - 1524**

Account of the cruises undertaken in 1933 by the research trawler S. S. « Cape Agulhas ». Hydrographic data for both spring and fall seasons in 1932 and 1933 ; results of salinity and temperature observations. Drift bottles returns.

**G. A. S.** - Currents and Fisheries of the North Sea. - Nature, CXXXIV, 3388, 543-544. London (1934). **b - 1525**

Account of the session of the zoologic section of the British Association at Aberdeen on Sept. 11th devoted to a discussion on « The Currents of the Sea and their Biological Importance». The attention was drawn to the double effects of the currents forming a purely mechanical effect on the conveyance of the food and larvae as well as governing the physical and chemical conditions of any given region. Elucidation of the current conditions in the Dove Straits based on data obtained during the last three years from the Varne lightvessel and their application on forecasting of plaice, haddock and herring fisheries.

**An.** - Hydrographic Data. - Tabl., Rep. Newfoundland Fish. Res. Comm. Ann. Rep., II, 2, App. B, 86-99. Plymouth (1934). **b - 1526**

Data on temperatures and salinities at depth m (Metres) collected during two commercial and two research cruises of the steam trawler « Cape Agulhas » in the waters of Newfoundland in the year 1933.

**Conn W. T.** - More Life from the Nets. - Fish & Oyster Rep., XV, 8, 6-7. Tampa, Fla. (1934). **b - 1624**

The purpose of this paper is to assist many fishermen to reduce the cost of fishing by increasing the service life of nets. It contains some information as to the preserving of « heavy nets » and of good tarring of them.

**Conn W. T.** - Net Preservatives Research, 1933. With Recommendations. - Fish & Oyster Rep., XV, 9, 5/9, 12-13 & 16. Tampa, Fla. (1934). **b - 1625**

Account of a research conducted for several years with the object of producing information that would serve in reducing depreciation in fish nets and ultimately lowering the retail cost of fish by eliminating needless waste. Experimental material has been distributed over a wide range of typical waters and considerable personal contact has been made with conditions that surround net operation.

**Davis B. A.** - Mesh Experiments With Trawls 1928-1933. 12 figs., 16 tabl., Minist. Agricult. & Fish., Fish. Invest., Ser. II, XIV, 1, 3-36 & 39-58. London (1934). **b - 1626**

This report deals with the Ministry's researches on the effect of varying the size of the cod-end meshes of trawls on the size of the fish caught. The work described is of two types. There are the preliminary and control experiments designed to test the adequacy of the various methods of research, and secondly, the experiments carried out from commercial vessels under commercial conditions.

**Davis F. M.** - Report on the Results of Experiments with Saving Gears. 3 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, XC, 14-21. Copenhague (1934). **b - 1627**

Appendix B. to the Report by E. S. Russell on « Size Limits and Mesh Regulations for Sea Fish ».

In this paper the A. describes the methods employed and the results obtained in his investigations on the releasing power of meshes of different types of net. In his conclusions he claims that the size of fish retained and released is a function of the size of the mesh, but that other factors, such as speed of towing and quantity of fish on the ground may also affect the question.

**Davis F. M.** - A Mesh Experiment Indicating that Small Fish Escape while the Trawl is Being Towed. 2 figs., 1 table, Rapp. Pr.-Verb. Cons. Expl. Mer, XC, 22-26. Copenhague (1934). **b - 1628**

Appendix C. to the Report by E. S. Russell on « Size Limits and Mesh Regulations for Sea Fish ». Account of an experiment carried out in order to solve the problem as to whether fish did or did not escape through the codend meshes when the net is towed. General principle of the experiment. Its results, which show that the greater part of fish escape through the meshes of the codend when the net is being towed, and before it is hauled. Note on the construction of the retainer.

**Davis F. M.** - Preliminary Note on a Commercial Mesh Experiment. 2 figs., 2 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, XC, 27-31. Copenhague (1934). **b - 1629**

This preliminary note describes, in the broadest manner only, the methods used and the results obtained in a mesh experiment under commercial conditions carried out in accordance with Recommendation 2 of the Combined North and Eastern Channel Committee (June 23rd, 1932) by the Ministry of Agriculture and Fisheries in England (Lowestoft). The experiments indicate that the use of a codend of larger mesh allows considerably greater number of the smaller fish to escape.

**Elden Alfred** - Novel Devices for Catching Fish. 2 figs., Canad. Fisherm., XXI, 11, 12-13. Gardenvale, Que. (1934). **b - 1630**

An account of the results of a study carried on by Herbert W. Spear of the devices used in salt water commercial fishing with a view of bettering them, and with especial reference to the employing of colored lights, artificial baits and traps.

**Fraser-Brunner A.** - An Arrangement of Nets for Capturing Small Oceanic Fishes. 1 fig., Journ. Cons. Expl. Mer, IX, 46-48. Copenhague (1934). **b - 1631**

The bearing principle in the arrangement described here is the ever growing velocity with which the water displaced from the first net is driven into the second, and from this into the third original net thus collecting a quantity of fish much larger than that of an ordinary single net. A corrected list of the oceanic species obtained is given.

**Iversen Thor** - Some Remarks on Mesh Width and Its Influence on Young Fish. With addendum. 2 figs., Rapp. Pr.-Verb. Cons. Expl. Mer, XC, 40-44. Copenhague (1934). **b - 1632**

Criticism of the statement of Commandant Beaugé (See : « Report of Cod Expert Meeting », Note. Rapp. Pr.-Verb., LXXXIX, part II, p. 14), who does not believe in the utility of fixing a definite size of mesh for trawls in order to limit the number of young fish in catches, on hand of the experiments carried out by F. M. Davis (See : Rapp. & Pr.-V. Réun., XC, pp. 14-29). In the addendum the author expresses the opinion that it would be possible to introduce in a practical way a separate mesh regulation for the North Sea and similar waters and another regulation for more far-off waters, including the Barents Sea.

**Jackson V. W.** - Fish Nets... Made of Whalebone. 1 fig., Fish. Gaz., LI, 3, 6. New York (1934). **b - 1633**

Description of a baleen fish net, belonging to the University of Manitoba Museum, 30 feet long by four feet wide, made by the Eskimos of Herschel Island about 100 miles west of the mouth of McKenzie River and near the Alaskan boundary. The net is made with fresh baleen of the arctic whale *Balaena mysticetus*.

**Jensen Aage J. C.** - Contribution to an Investigation into the Most Profitable Size-limit for Plaice in the North Sea. 1 table, Rapp. Pr.-Verb. Cons. Expl. Mer, XC, 46-48. Copenhague (1934). **b - 1634**

After some introductory remarks, in which the author shows that an investigation of the most profitable minimum size must be made for each single fishery individually, he discusses the size limit for the Danish plaice fishery in the North Sea, considering separately the cutter fishery for « live plaice » generally caught at the outer parts of the Horns Rev nursery grounds and the fishery which lands « iced plaice » from the open North Sea.

The present position as regards size limits with respect to the principal species of sea fish. The present position as regards mesh regulations. General considerations and suggestions.

**Wimpenny R. S.** - An Analysis of Arabian Seine Net Hauls on the Sea-Coast near Ashtoum el Gameel, August 1928-May 1929. 3 figs., 4 append., Fish. Res. Direct., Notes & Mem., 2, 1-113. Cairo (1934). **b - 1644**

Introductory. Stations. The economics of the Arabian seine. Seasonal variations in the catch. Local variations in the catch. Probable earnings of the catch. The gear. General composition of the catch. Fish species present. Spawning stocks. General occurrence of the different fish species. Crustacean species present. General occurrence of Crustaceans. Discussion. Summary. Bibliography.

**Conseil Permanent International pour l' Exploration de la Mer** - Summary of Existing Regulations (1933) Regarding Size Limits and Mesh Restrictions for Fish Taken in The Sea or Brackish Water. - Rapp. Pr.-Verb. Cons. Expl. Mer, XC, 6-13. Copenhague (1934). **b - 1645**

Appendix A to the report by E. S. Russell on the « Size Limits and Mesh Regulations for Sea Fish », containing a summary of the information received from members of the Council as to size limits and mesh regulations in force in 1933. It contains also additions and revisions bringing its information up to date to May, 1934. It has been found impossible especially in view of the conditions in the Baltic, to draw a hard and fast line between sea fish and fresh water fish, and therefore data relating to anadromous fish and these found in partially salt waters, have been included in this Appendix. It has one Annexe, containing data on Local Mesh Regulations in Germany (In German).

**Ministry of Agriculture and Fisheries** - The Use of a Large Cod-end Mesh in the Hake Fishery. 1 table, Fish. Notice, 24, 1-7. London (1932). **b - 1646**

Preface by Henry G. Maurice.
Results of the tests show that the use of a large mesh in the cod-end of the trawl (18-19 rows to the yard) saved more than half the undersized hake brought on deck and killed by the smaller or legal minimum mesh (21 rows to the yard).

**An.** - Why Catch Trash ? 3 figs., Fish. Gaz., LI, 9, 8 & 30. New York (1934). **b - 1647**

Description of a new type of trawl which rids haul of rocks, weeds, etc., without loss of fish. Its cod-end is divided in an upper and lower compartment.

AMERICAE PROVINCIAE FOEDERATAE.

**Adams W. M.** - New York. 1 ill., Fish. Gaz., LI, 7, 45-47. New York (1934). **b - 1671**
Historical account of the development of the fishing industry in the State of New York ; statistic data on annual catch of commercial varieties of Fishery products taken in Marine District. The Great Fulton Market. The Department of Conservation and the organization and preservation of fisheries. New York's inland fisheries.

**Brennan B. M.** - Washington. 1 ill., Fish. Gaz., LI, 7, 43. New York (1934). **b - 1672**
Some information of the administration and organization of the production of the fishing industry in the State of Washington ; the Department of Fisheries and its activities ; biological investigations.

**Desmond Wm. D.** - Massachusetts. 1 ill., Fish. Gaz., LI, 7, 39-40. New York (1934). **b - 1673**
Importance of the fishing industry of Massachusetts ; statistic data on the fishing fleet, the fishing grounds, the amount of fish landed. Account of investigations carried out by the Bureau of Marine Fisheries. Measures taken in order to organize intensive fishing of the Crabs. Extensive plan of the Bureau for reseeding shellfish area : Act providing for the extermination of starfish in the shellfish areas along the southern shore.

**Diebler O. M.** - Pennsylvania. - Fish. Gaz., LI, 7, 55-56. New York (1934). **b - 1674**
Story of the Pennsylvania fisheries with particular reference to catch of whitefish.

**Fiedler R. H., Manning John R. & Johnson F. F.** - Fishery Industries of the United States, 1933. num. tables., U. S. Dpt. Comm., Bur. Fish., App. I, Rep. Comm. Fish. Fisc. Year 1934, 2-237. Washington, D. C. (1934). **b - 1675**
Summary of the activities of the Division of Fishery Industries and annual review of fishery statistics of the United States. This Division of the Bureau of Fisheries is concerned with : the commercial fisheries, the trade in fishery products, and the fish canning and preserving industries. The information obtained from statistical surveys is published in part 2 of this report, which includes detailed statistical information for the year 1932.

**Nelson J. A.** - North Carolina. - Fish. Gaz., LI, 7, 62. New York (1934). **b - 1676**
After some observations concerned with the importance of the fishing industry for the population of North Carolina and of the depression of this industry during last year, the author gives some information especially concerned with the actual conditions of the shrimp, menhaden, oyster, clam and soft shell crabs industries.

**Scofield W. L.** - California. 1 fig., 1 table, Fish. Gaz., LI, 7, 36-37. New York (1934). **b - 1677**
Report of the condition of the California fishing industry : ninety per cent of the product canned ; poundage in round numbers of the 1933 California catch of the 40 leading species or group of species classed under one name ; canning centers ; fishing conditions ; fishing devices ; fish trade of California.

**Thompson C. F.** - Illinois. - Fish. Gaz., LI, 7, 57-58. New York (1934). **b - 1678**
Illinois as leader in the commercial fish industry ; Chicago a fruitful locality for receipt, processing, and disposition of fresh and salt water catch ; Wabash River production ; Ohio and Kaskaski waters ; operation of six hatcheries ; measures taken against pollution.

**Webster B. O.** - Wisconsin. 1 ill., Fish. Gaz., LI, 7, 59-60. New York (1934). **b - 1679**
Account of the development of the fishing industry in Wisconsin ; principal kinds of fish that are taken in the waters of the State : whitefish, lake trout, chubs, and herring. Development of artificial propagation of commercial fish species.

**M.** - Entwicklung der Fischereiwirtschaft der U.S.A. - Mitt. Dtsch. Seefisch.-Ver., XXXXIX, 6, 257-259. Berlin (1934). **b - 1680**
Entwicklung und Lage der amerikanischen Fischerei und Fischindustrie nach den Ausführungen des Fischereibüros beim Handelsdepartement in Washington. Statistische Angaben.

**An.** - New Jersey. - Fish. Gaz., LI, 7, 41-42. New York (1934). **b - 1681**
Report on the New Jersey's fisheries ; value of the fish catch in the State : importance of the fish industry to the industrial life of the State ; the single branches of the industry ; its organization ; fishing methods.

**An.** - Michigan. - Fish. Gaz., LI, 7, 42. New York (1934). **b - 1682**
Statistic data on the Michigan fisheries ; this State ranks 9th in value and 13th in volume in the list of all States producing salt-water and fresh-water species.

**An.** - Florida. 1 ill., Fish. Gaz., LI, 7, 47-48. New York (1934).
(—) Fish & Oyster, Rep. XV, 13/14, 5. Tampa, Flo. (1934). **b - 1683**
Statistical data on Florida fisheries. This State is possessor of United States' longest coast line, and accounts for two percent of entire world's production.

**An.** - Connecticut. 1 ill., Fish. Gaz., LI, 7, 48-49. New York (1934). **b - 1684**
Statistic data on the yield of Connecticut's fisheries, its fishing fleet ; importance of the size of its fish and shellfish production ; State bodies which administrate Connecticut's fisheries.

**An.** - Louisiana. - Fish. Gaz., LI, 7, 49-50. New York (1934). **b - 1685**
Data on Louisiana's fisheries, second only to Florida among Southern States from the standpoint of value of the catch, and noted especially for its shrimp, which leads all other species both in quantity and value. A peculiar feature of Louisiana's fisheries is that for bullfrogs (*Rana catesbeiana*).

**An.** - Virginia. 1 ill., Fish. Gaz., LI, 7, 50-51. New York (1934). **b - 1686**
Statistical record of the Virginia's fisheries ; organization and activities of the two separate Departments which are in charge of commercial and sport fishing in Virginia ; the Commission of Game and Inland Fisheries and the Commission of Fisheries of Virginia.

**An.** - Maine. 1 ill., Fish. Gaz., LI, 7, 51-52. New York (1934). **b - 1687**

Statistical record of the fisheries of the State of Maine; number of fishermen and types of gears employed in the fisheries; outstanding position of the lobster and sardine industries; depletion of the lobster fishery.

**An.** - Rhode Island. - Fish. Gaz., LI, 7, 53. New York (1934). **b - 1688**

Statistical data on the fisheries of Rhode Island; text of an article by A. L. Clark, Secretary of Commissioners of Shell Fisheries, dealing with the shellfish fisheries of the State, whose value exceeds that for fin fish by more than a 3 to 1 ratio.

**An.** - Ohio. - Fish. Gaz., LI, 7, 54. New York (1934). **b - 1689**

Prominent position of Ohio as quantity producer of fresh-water species.

**An.** - Minnesota. - Fish. Gaz., LI, 7, 56. New York (1934). **b - 1690**

Statistic data on the commercial fishing of the State.

**An.** - Delaware. 1 ill., Fish. Gaz., LI, 7, 60. New York (1934). **b - 1691**

General data on the fisheries of the State, which, despite of its small size, outranks many other States in the volume of fish and shellfish produced.

**An.** - Indiana. - Fish. Gaz., LI, 7, 60. New York (1934). **b - 1692**

Description of the activities of fish culture work stressed in the State by the Conservation Department; statistical record concerned with Indiana's fishing fleet, and the amount of catch in 1932.

**An.** - Alabama. - Fish. Gaz., LI, 7, 61. New York (1934). **b - 1693**

Brief statistical data on the fisheries of the State.

**An.** - Georgia. - Fish. Gaz., LI, 7, 61. New York (1934). **b - 1694**

Statistical record of the amount and value of the catch, of the fishing fleet and of the gear used in the fisheries of Georgia.

**An.** - Mississippi. - Fish. Gaz., LI, 7, 61. New York (1934).
(—) Fish. & Oyster Rep., XV, 13/14, 5. Tampa, Fla. (1934). **b - 1695**

Important part played by Mississippi in the fishing industry of the United States; statistical records of the total production of the fisheries of the States in 1932 and of those of the shrimp which leads production.

**An.** - South Carolina. - Fish. Gaz., LI, 7, 62. New York (1934). **b - 1696**

Location of South Carolina Fisheries, principal species taken, fishing gears employed, fisheries jurisdiction, capital invested in the fisheries of the State.

**An.** - Fisheries of the United States and Alaska, 1932. 4 tabl., Fish. Gaz., LI, 7, 63-70. New York (1934). **b - 1697**

Statistic tables with data on (1) catch: by sections, (fish, shellfish, etc., whaleproducts), (2) operating units: by sections; (3) catch: by states, and (4) seed oyster fishery.

**An.** - Production of Fresh and Frozen Packaged Fish, 1933. 1 table, Fish. Gaz., LI, 7, 71. New York (1934). **b - 1698**

Table containing statistic data on the production of 22 species of frozen and fresh packaged fish (pounds and values) in the single States of North America.

**An.** - Fishery Products Frozen, 1933. 1 table, Fish. Gaz., LI, 7, 73. New York (1934). **b - 1699**

Table reporting statistic data, by species and months, of the fishery products frozen in 1933, in the United States.

**An.** - Holdings of Frozen Fishery Products, 1933. 1 table, Fish. Gaz., LI, 7, 75. New York (1934). **b - 1700**

Table containing statistic data (by species and months) of the holdings of fishery products in the United States for 33 species of fish.

**An.** - Exports of Fishery Products, 1933. Of Domestic Production. 1 table, Fish. Gaz., LI, 7, 78. New York (1934). **b - 1701**

Statistic data of the edible and non edible fishery products exported from the United States (quantity and value).

**An.** - Imports of Fishery Products, 1933. 1 table, Fish. Gaz., LI, 7, 78. New York (1934). **b - 1702**

Statistic data on edible and non edible fishery products, imported in the United States in 1933 (by quantity and value).

**An.** - Lobster Catch, United States and Canada, 1880-1932. 1 table, Fish Gaz., LI, 7, 95. New York (1934). **b - 1703**

Statistic records (in pounds) on the lobster catch in New England, Middle Atlantic and Canada.

## ANGLIA.

**Heyer F.** - Die heutige Lage der britischen Fischerei. - Fischmarkt, II, 11, 300-301. Cuxhaven (1934). **b - 1704**

Einige Angaben über die Entwicklung und den heutigen Zustand der folgenden vier Gruppen der britischen Fischerei: die Binnenfischerei, die Küstenfischerei, die Fischerei mit Treibnetzen und die mit Schleppnetzen, welche sich nacheinander entwickelt haben.

**Maurices Henry G.** - Sea Fisheries. Statistical Tables 1933. 28 tabl., H. M. Stat. Off., Minist. Agricult. & Fish. 2-49. London (1934). **b - 1705**

Quantity and value of landings, and method and place of capture. Fish landed each year, usually 1913 and 1924-33.Fishermen and fishing vessels. Imports and exports.

**Fishery Board for Scotland** - Sea Fisheries. Statistical Tables, 1933. 31 tabl., H. M. Stat. Off., 4-63. Edinburgh (1934). **b - 1706**

Means of capture. Maximum activity in herring fishing. Personnel. Fish landed. Treatment of catch. Cured fish branded. Fish exported. Summary tables, 1913 and 1925-33.

**La.** - Ueber den Stand der englischen Seefischerei im Jahre 1933. - Fischmarkt, II, 9, 243-244. Cuxhaven (1934). **b - 1707**

Zusammenfassende Wiedergabe der wichtigsten Folgerungen des vom Ministerium für Landwirtschaft und Fischerei für England und Wales herausgegebenen Berichtes über die Seefischerei im Jahre 1933.

## AUSTRALIA.

**Legislative Assembly. New South Wales** - Annual Report on the Fisheries of the New South Wales for the Year 1932. - num. tabl., A. J. Kent, 1-13. Sydney (1933). **b - 1708**

Amount of the catches; usual means of conservations in both tidal and inland fisheries; regulation with respect to the lawful size of fishes; freshwater fisheries; oyster fisheries; imports and exports of fish, prices of fish; personnel, boats and gear employed in connection with the Fisheries of New South Wales.

**State Fisheries Department. New South Wales** - Fisheries (Annual Report of the Fisheries of New South Wales for the Year 1933). 17 tabl., Rep. Print. Comm., 6, 1-12. Sydney (1934). **b - 1709**

Statistical statements concerning the conditions of the fisheries of New South Wales with especial regard to the staff of the Department, the fishermen, the amount of fish captured, the protective measures adopted, and other matters of interest and benefit to fishermen, oyster culturists, and the general public.

CANADENSIS REGIO.

**Grant Ruth Fulton** - The Canadian Atlantic Fishery. 148 pp., Ryerson Press. Toronto (1934). **b - 1710**

Books dealing with the Canadian fishing industry and its problems. Compilation of the story of Canada's Atlantic fisheries and the various factors which have influenced its progress. Some conclusions concerned with the further development and possibilities of the Atlantic Canadian Fishery.

**McKenzie R. A.** - The Inshore Cod Fishery of the Halifax Area. - Ann. Rep. - Biol. Board Canada, 1933, 26-27. Ottawa (1934). **b - 1711**

Account of the fishery oscillation on hand of the results of a statistical investigation of landings; various reasons which may account for the observed summer slack; the moving of the cod as cause of the observed oscillations of catches.

**Dominion Bureau of Statistics** - Fisheries Statistics of Canada 1931. Statistique des Pêches (Texte angl. et franç.). num. tabl., Fish. Stat. Branch, 1-216, 217-273. Ottawa (1932). **b - 1712**

Preface. The Fisheries of Canada. Quantity and value of chief commercial Fishes, 1927-1931. Review of the fisheries of 1931. Summary of production, 1930 and 1931. Agencies of production, 1929-1931. Review by provinces. Fishing Bounty. Foreign trade. Historical review. General tables: I. Fish caught and marketed, 1931 ; II. Agencies of production, 1931 - capital, equipment, employees, etc. ; III. Classification of vessels and boats ; Imports and exports of fish and fishery products, the salmon pack of British Columbia; the lobster pack of Canada 1919-1931. Table for conversion of weights of fish ; fishing bounties ; Fisheries production in 1931.

**An.** - Quebec Fisheries Development Program Proceeds. - Canad. Fisherm., XXI, 7, 10. Gardenvale, Que. (1934). **b - 1713**

Information on the last measures taken by the Quebec Government in order to develop the Gulf of St. Lawrence fisheries and assist the fishermen.

**An.** - Summary of Canadian Fisheries, 1933. 1 table, Fish. Gaz., LI, 7, 95. New York (1934). **b - 1714**

Statistic record of principal species of fish (quantity and value) taken in Canadian waters in 1933.

FINLANDIA.

**Järvi T. H.** - Die Seefischerei von Finnland. 54 Abb., 12 Taf., 1 Tabellenbeil., Handb. Seefisch. Nordeuropas, VIII, 4, 1-73. Stuttgart (1934). **b - 1715**

Die natürlichen Verhältnisse in der östlichen Ostsee. Die Pflanzen- und Tierwelt in den finnischen Meeren. Allgemeiner Charakter der Seefischerei. Rechtsverhältnisse der Fischgewässer. Die Fischerbevölkerung. Ertrag der Seefischerei. Fischereigebiete. Die einzelnen Fischereien.

**Lau.** - Finnland. Fisch- und Seehundfang 1877-1931. 1 Tab., Mitt. Dtsch. Seefisch.-Ver., XXXXIX, 5, 222-223. Berlin (1934). **b - 1716**

Jahresdurchschnitt (1000 kg.) der Fänge von Lachsen u. Taimen, Renken u. Aeschen, Strömlingen, Maränen u. Stinten, Sprotten, anderen Fischen und Seehunden (nach Tausenden).

Statistische Angaben und Kommentar über das Gesamtergebnis der niederländischen Seefischerei einschliesslich der Anlandungen durch ausländische Fischerfahrzeuge.

**An.** - Niederlande. Ergebnisse der niederländischen Seefischerei im zweiten Halbjahr 1933. 1 Tab., Mitt. Dtsch. Seefisch.-Ver., XXXXIX, 5, 221-222. Berlin (1934). **b - 1740**

Statistische Angaben und Bemerkungen über den Verlauf der niederländischen Seefischerei (einschl. der Anlandungen durch ausländische Fischerfahrzeuge).

### ITALIA.

**Bini Giorgio** - La pesca nelle nostre colonie. 14 fig., 25 pp., III Corso Magist. Maritt. Pescher. Roma (1933). **b - 1741**

Condizioni fisiche e meteorologiche dei nostri possedimenti del Mediterraneo e dell'Egeo; sistemi di pesca, attrezzi e qualità di prodotti pescati. Influenza delle caratteristiche fisiche e meteorologiche del Mar Rosso sulla industria della pesca. Fauna ittica del Mar Rosso. Attrezzi di pesca preferiti dagli indigeni. Conservazione dei prodotti eduli mediante salatura ed essiccamento al sole. Sistemi di pesca e commercio dei prodotti non eduli: perle, madreperla, tartaruga.

**Da Crevan Gigi** - L'espansione peschereccia nel Levante. 1 fig., Italia pescher., 1, 11. Napoli (1933). **b - 1742**

Possibilità di sviluppo delle nostre industrie del mare verso il Levante.

**Da Crevan Gigi** - La bonifica agraria peschereccia. - Italia pescher., 3/5, 7-8. Roma (1933). **b - 1743**

Come potrebbe essere utilmente trasformata la vasta zona paludosa di « Variconi » nel comune di Castelvolturno. Bonifica idrologica: disciplina delle acque. Fini economici igienici e sociali della bonifica. L'industria della Vallicoltura troverebbe campo propizio nella palude salmastra del basso Volturno.

**Lo Giudice Pietro** - I principali Pesci dei mari italiani interessanti l'alimentazione e l'industria. - 26 pp., (III° Corso Magistrale Marittimo Peschereccio), Tip. Aldo Manuzio, Ist. Tip. Stato. Roma (1933). **b - 1744**

Note biologiche sui Pesci, loro importanza come fonte alimentare e necessità di diffonderne il consumo dato che essi rappresentano un alimento sano, digeribilissimo, completo. Distinzione dei Pesci dei nostri mari in: Selaci o Elasmobranchi e Olocefali o Teleostomi e studio delle singole specie appartenenti a questi gruppi.

**Maggi Umberto** - La pesca e i suoi problemi. - Critica Zootec., 7/8, 281-300. Roma (1934). **b - 1745**

Esame della produzione, del consumo e del commercio dei prodotti della pesca.

**Mola Pasquale** - I nostri paesaggi e i nostri centri pescherecci. L'Arcipelago de la Maddalena e la costa Nord-orientale sarda. 5 fig., Boll. di Pesca, Piscicolt. e Idrobiol., X, 1, 1-17. Roma (1934). **b - 1746**

Caratteri fisici, importanza commerciale dei porti, risorse ittiche e sistemi di pesca di tre importanti centri pescherecci della Sardegna: l'Arcipelago de la Maddalena, Terranova Pausania, e S. Teresa di Gallura.

**Mori Alberto** - Note sulla pesca a Zara e a Lagosta e sull'emigrazione peschereccia nell'Adriatico. 4 fig., 1 tav., Boll. R. Soc. Geogr. Ital., 9/10, 661-680. Roma (1933). **b - 1747**

Esame delle condizioni della pesca a Zara e a Lagosta e dei suoi possibili ulteriori sviluppi.

**Ninni E.** - Pesci stranieri che compariscono sul mercato di Venezia. - Boll. di Pesca, Piscicolt. e Idrobiol., X, 1, 69-76. Roma (1934). **b - 1748**

Accennato alle ragioni dell'importanza del mercato di Venezia e di conseguenza al bisogno dell'esportazione e dell'importazione sua del pesce, l'A. offre un elenco di pesci stranieri che vi affluiscono quasi ogni giorno unitamente a quello delle specie che devono venire escluse dal novero delle adriatiche.

**Parenzan Pietro** - Notizie sul lago d'Averno, dal punto di vista di una possibile valorizzazione peschereccia. - Boll. di Pesca, Piscicolt. e Idrobiol., X, 1, 47-51. Roma (1934). **b - 1749**

Eseguite pescate planctoniche ed esaminate le condizioni generali del lago, risulta che l'Averno si trova in condizioni ottime per lo sviluppo rigoglioso della popolazione ittica d'acqua dolce. Senonchè data l'estensione del bacino e date le difficoltà di pesca, opposte sopratutto dalla densa vegetazione di *Potamogeton* della platea costiera, dall'intorbidamento o pseudointorbidamento periodico dell'acqua, dalla profondità del lago, ne deriva che sia molto più vantaggioso ai fini dell'industria peschereccia ricorrere ai lavori di trasformazione dell'Averno in un lago salso.

**Vinelli Marcello** - La pesca in Sardegna. 11 fig., Le Vie d'Italia, 3, 230, 239. Milano (1933). **b - 1750**

La pesca sul mare: mezzi con i quali essa si pratica. La pesca del tonno: la mattanza. La pesca nei fiumi e negli stagni. Il prodotto.

**C. J.** - L'exploitation de la mer en Erythrée. - Ann. d. Géogr., XLII, 15 Nov., 665. Paris (1933). **b - 1751**

**Monitore (il) Tecnico** - Le iniziative italiane di pesca nell'Atlantico. 2 fig., Monit. Tecn., 10, 999-1004. Milano (1933). **b - 1752**

Il problema della pesca nazionale nell'Atlantico non è solo di natura tecnica ma implica ardue questioni relative al trasporto e alla possibilità di vendita. Tuttavia la Società Italiana di Pesca e Sottoprodotti disponeva di un naviglio di ottime caratteristiche nautiche, ma non per tanto fu soggetta a numerose difficoltà insormontabili di natura tecnica e commerciale. Fu così iniziato un nuovo piano di azione per la costruzione di una flotta peschereccia che desse più affidamento, e così fu allestita una flottiglia comprendente tre navi. Se ne dà qui una ampia descrizione circa le caratteristiche architettoniche e si rileva: 1°) Un'attrezzatura per la pesca con tavolini divergenti e apparato divergente; 2°) Celle frigorifere e sistema di isolamento; 3° Impianto frigorifero e di congelamento. Tipi dell'apparato motore.

### JAPONIA.

**Lancley J. A.** - Production of Salted Codfish in Japan. 1 table, Canad. Fisherm., XXI, 8, 8. Gardenvale, Que. (1934). **b - 1753**

Statistic statements of the production of dried salted and wet salted cod in Japan.

**R.** - Japan. - Die Entwicklung der japanischen Ausfuhr an Fischkonserven im ersten Halbjahr 1933. - Mitt. Dtsch. Seefisch.-Ver., XXXXIX, 4, 180. Berlin (1934). **b - 1754**

Angaben über den japanischen Fischexport mit besonderer Berücksichtigung seiner Lage auf dem französischen Markte und eines Rückganges infolge des chinesischen Boykotts.

### LITUANIA.

**lydis** - Memelgebiet. - Fischereiergebnisse. 1 Tab., Mitt. Dtsch. Seefisch.-Ver., XXXXIX, 4, 176-177. Berlin (1934). **b - 1755**

Statistische Angaben über das Gewicht, den Gesamtbetrag in Litas der im Juli-September 1933 gefangenen Fischarten im Memelgebiet, mit begleitenden Bemerkungen über den Stand der Memelseefischerei.

**lydis** - Memelgebiet. Fischereiergebnisse. 1 Tab., Mitt. Dtsch. Seefisch.-Ver., XXXXIX, 5, 220-221. Berlin (1934). **b - 1756**

Gewicht, Gesamtbetrag in Litas der verschiedenen Fischarten. Bemerkungen über den Verlauf der Fischerei im Memelgebiet während der Monate Oktober und November 1933.

## NORVEGIA.

**Behre A. & Schnakenbeck** - Handelsbezeichnungen von Fischen und Fischzubereitungen. - Fischmarkt, II, 5, 120-125. Cuxhaven (1934). **b - 1792**

Ausführungen über Aufgaben, Richtlinien und Grundsätze von Lebensmittelgesetz und Lebensmittelkontrolle in Antwort auf einen Aufsatz von Prof. Dr. Schnakenbeck in « Fischmarkt », nº 3, S. 64, 1934, in welchem dieser zu zwei Aufsätzen vom Vf. in der « Zeitschrift für Untersuchung der Lebensmittel » 1932 und im « Fischerboten » vom Februar 1934, Stellung nimmt, nebst einer Antwort von Prof. Schnakenbeck auf die obigen Ausführungen.

**Bueckmann A.** - Seefischereistatistik und biologische Untersuchungen an den Fischmärkten. - Mitt. Dtsch. Seefisch.-Ver., XXXXIX, 5, 182-189. Berlin (1934). **b - 1793**

I. Die Hauptprobleme der marinen Fischereibiologie und die Bedeutung biologisch-statistischer Untersuchungen für ihre Lösung: 1. Die Ueberfischungsfrage. 2. Biologisch-statistische Untersuchung zur Beurteilung von Schonmassnahmen. 3. Die Ertragsschwankungen. 4. Biologisch-statistische Untersuchung über die Wanderung der Fische. II. Die Organisation der statistisch-biologischen Untersuchungen: 1. Die Seefischereistatistik. 2. Die biologischen Marktuntersuchungen.

**Ciuffa Emilio** - L'organizzazione della vendita dei prodotti della pesca ed i mercati all'ingrosso. - Boll. Pesca, Piscicolt. e Idrobiol., IX, 5, 888-896. Roma (1933). **b - 1794**

Stabilito che la funzione commerciale ha specifico carattere integrativo del fatto produttivo, nel campo peschereccio, provvedendo non solo al semplice smistamento ed al trasporto della merce, ma anche alle più difficili cure della conservazione e della valorizzazione, si esamina l'organizzazione della vendita del prodotto da parte dell'impresa di produzione e i problemi inerenti all'organizzazione di un mercato all'ingrosso del pesce.

**Despott Giuseppe** - Omologazione delle voci dei mercati del pesce di Malta e Gozo. - Boll. Pesca, Piscicolt. e Idrobiol., X, 2, 243-250. Roma (1934). **b - 1795**

Riferimento dei nomi latini e maltesi del materiale ittiologico relativo alla regione melitense.

**Edser T. & Crouchen S. H.** - Observations on the Accuracy of the Collection of Fishery Statistics. 2 tabl., Journ. Cons. Expl. Mer, IX, 83-86. Copenhague (1934). **b - 1796**

After a short recapitulation of the methods described in Rapp. et Pr.-Verb., Vol. XXXVI, the A.A. deal with the difficulties met with in obtaining correct values of the quantities and prices of the landings. The total value having however been proved to have a rather high degree of reliability the average value conversed into cwt may be considered substantially accurate.

**Eichelbaum** - Vor einer umfassenden Marktordnung für die gesamte Fischwirtschaft. 1 Tab., Dtsch. Fischwirtsch., I, 26, 453-454. Berlin (1934). **b - 1797**

Grundsätze und Richtlinien für die Behandlung und Bearbeitung der Angelegenheiten der Fischwirtschaft im Reichsministerium für Ernährung und Landwirtschaft.

**Hilker Chr.** - Das Erzeugnis der deutschen Fischindustrie als Begriff der « Marke » in der Werbung. - Dtsch. Fischwirtsch., I, 27, 470-471. Berlin (1934). **b - 1798**

Einige Betrachtungen über die Möglichkeit das Erzeugnis der deutschen Fischindustrie als Begriff eines Markenartikels in der Verbraucherschaft zu verankern.

**Kunz Karl** - Unhaltbare Zustände am Berliner Frischfischmarkt und deren Auswirkung auf den Berliner Räuchfisch- Gross- und Letzthandel. - Dtsch. Fischwirtsch., I, 5, 75-76. Berlin (1934). **b - 1799**

Betrachtungen über die Notwendigkeit einer Neuorganisation der Fänge und deren Absatz, mit besonderer Berücksichtigung der Sprott-, Hering- und Plattfischfischerei.

**Laurinat K.** - Absatzförderung der frischen Seefische durch Qualitätsbehebung. - Mitt. Dtsch. Seefisch.-Ver., XXXXIX, 5, 190-193. Berlin (1934). **b - 1800**

Qualitätsbehebung der auf den Markt kommenden frischen Seefische durch das Wirkungsvollermachen des beim Anbringen und Lagern der Seefische zum Kühlhalten dienenden Eises durch geeignete Zusätze. Ergebnisse der Vor- und Hauptversuche.

**Ninni E.** - Pesci stranieri che compariscono sul mercato di Venezia. - Boll. Pesca, Piscicolt. e Idrobiol., X, 1, 69-76. Roma (1934). **b - 1801**

Dopo aver accennato all'importanza del mercato di Venezia e di conseguenza al bisogno dell'esportazione e dell'importazione del pesce, l'A. offre un elenco di pesci stranieri che vi affluiscono quasi ogni giorno unitamente a quello delle specie che devono venire escluse dal novero di quelle adratiche.

**Schnakenbeck W.** - Handelsbezeichnungen von Fischen und Fischereierzeugnissen. - Fischmarkt, II, 3, 67-73. Cuxhaven (1934). **b - 1802**

Kritische Betrachtungen über zwei Aufsätze von Prof. Dr. A. Behre, Altona, von denen der erste bereits 1932 in der « Zeitschrift für Untersuchung der Lebensmittel » (1932, Bd.64, H. 5), der zweite in « Fischerbote » (1934, H. 2) erschienen ist.

**Schwädke** - Zur Bedeutung der Fischmarktberichte in der Tagespresse für die Fischwirtschaft. - Dtsch. Fischwirtsch., I, 2, 23-24. Berlin (1934). **b - 1803**

Wichtigkeit der regelmässigen Berichte über den Fischmarkt für die deutsche Fischwirtschaft, für welche infolge ihrer Aufnahme in den Reichsnährstand das Interesse der Oeffentlichkeit sehr rege geworden ist.

**Schwädke** - Die Berliner Zentralmarkthalle gibt dem Fischgrosshandel neue Verkaufsstände. - Dtsch. Fischwirtsch., I, 20, 317-319. Berlin (1934). **b - 1804**

Ein Schritt zur Neugestaltung des Berliner Fischmarktes.

**Industrie & Handelskammerverband Niedersachsen-Kassel** - Fisch- und Feinkost-Industrie und -Handel im IV. Quartal 1932. - Fische u. Fischw., 2, 27-28. Braunschweig (1933). **b - 1805**

### *Residua et reiectanea.*

**Alfonsi Bianca** - La lavorazione del pesce e i residuati. - Boll. Pesca, Piscicolt. e Idrobiol., IX, 5, 876-887. Roma (1933). **b - 1829**

Vari metodi attualmente in uso per la conservazione del pesce : refrigerazione, congelamento, sterilizzazione a mezzo del calore (processo Appert), essiccamento, salagione, affumicamento, marinatura. Sottoprodotti del pesce : residui in farina e olio di pesce ; loro utilizzazione industriale.

**Alfonsi Bianca** - La lavorazione del pesce e i residuati. - Ind. Ital. Cons. Alim., 2, 43-48. Parma (1934). **b - 1830**

Rilevata la necessità di assicurare al prodotto della pesca catturata, una buona conservazione, per poterlo agevolmente distribuire in paesi lontani dal campo di pesca ed evitare deterioramenti per opera di organismi unicellulari che attaccano la sostanza organica, si indicano i vari sistemi di conservazione basati per lo più su elementi capaci di arrestare lo sviluppo dei microrganismi (temperatura, secchezza di ambiente, antisettici ecc.). I sistemi maggiormente in uso sono i seguenti : refrigerazione e congelamento, sterilizzazione a mezzo del calore (processo Appert), essiccamento, salagione, affumicamento, marinatura. Il materiale grezzo non direttamente utilizzato nell'alimentazione umana, viene sottoposto ad una serie di manipolazioni, e trasformato in farina ed olio di pesce.

**Bailey B. E.** - Statistical Study of the Vitamin Potency of Pilchard Oil. - Ann. Rep. Biol. Board Canada, 1933, 108. Ottawa (1934). **b - 1844**

Account of a preliminary attempt to obtain data regarding the variations which occur in the vitamin potency of the pilchard oil due to seasonal variations and to the various factors of processing.

**Bailey B. E.** - The Relation Between the Biological and Colorimetric Assay for Vitamin A in Pilchard Oil. - Ann. Rep. Biol. Board Canada, 1933, 108. Ottawa (1934). **b - 1845**

Results of an examination of the comparative value and convenience of biological and colorimetric assays for vitamin of pilchard oil.

**Bailey B. E.** - Vitamin A Potency of Salmon Liver Oil. - Ann. Rep. Biol. Board Canada, 1933, 108-109. Ottawa (1934). **b - 1846**

Account of a detailed study of the vitamin A potency of salmon liver oil made with a view to disclose the variations between the liver oils from salmon of different species, and from fish caught in different localities.

**Bailey B. E.** - Salmon Body Oil Pigments. - Ann. Rep. Biol. Board Canada, 1933, 109. Ottawa (1934). **b - 1847**

Brief account of a study made on pigments present in salmon body oil with a view to throw some light on the relationship between the vitamin A potency of the liver oil, and the colour of the body oil by species, in sockeye, coho, pink, and chum.

**Bailey B. E.** - The Vitamin A Potency of Flounder Liver Oil. - Ann. Rep. Biol. Board Canada, 1933, 109. Ottawa (1934). **b - 1848**

Account of a brief investigation on the vitamin A potency of flounder liver oil determined by means of colorimetric test.

**Bailey B. E.** - Comparison of Vitamin Standards. - Ann. Rep. Biol. Board Canada, 1933, 109-110. Ottawa (1934). **b - 1849**

Brief account of the use of international vitamin standards in vitamin assays conducted at the Fisheries Experimental Stations, Prince Rupert, B. C.

**Beatty S. A.** - Fish Liver Oils. - Ann. Rep. Biol. Board Canada, 1933, 50. Ottawa (1934). **b - 1850**

Account of the results of an analysis for vitamin A of liver oils from three flat Fishes, *Pseudopleuronectes americanus*, *Limanda ferruginea*, and *Hippoglossoides platessoides*.

**Bills Charles E., Massengale O. N. & Imboden Miriam** - Demonstration of the Existence of Two Forms of Vitamin D in Fish Liver Oils. - Science, LXXX, 2086, 596. New York (1934). **b - 1851**

From the experiments undertaken by the AA. one must conclude that the vitamin D of bluefin tuna liver oil and the vitamin D of cod liver oil are different substances.

**Brocklesby H. N.** - The Susceptibility of Some Medicinal Oils to Oxidative Rancidity. - Ann. Rep. Biol. Board Canada, 1933, 113-114. Ottawa (1934). **b - 1852**

Account of a research made with a view (1) to compare several of the better known methods now used for the evaluation of the oxidative rancidity of oils, and (2) to compare the susceptibilities of some of the medicinal oils now on the market with the susceptibility of the newly developed product « Marinol », a mixture of two potent oils from Pacific coast Fishes.

**Brocklesby H. N.** - The Chemistry of Some Unsaturated Fatty Acids and Esters Present in Marine Oils. - Ann. Rep. Biol. Board Canada, 1933, 114. Ottawa (1934). **b - 1853**

Results of a study of the polymerization of mono-, di-, tri-, tetra- and penta-ethylenic fatty acids and methyl esters of the fish oils by heat, ultraviolet light and other agencies.

**Brocklesby H. N. & Denstedt O. F.** - Polymerization and Oxidation of Pilchard Oil. - Ann. Rep. Biol. Board Canada, 1933, 114-115. Ottawa (1934). **b - 1854**

Account of an investigation whose object has been to improve the properties of fish oil films by various methods of heat treatment and thus make such oils of more value in the paint and varnish industry.

**Brocklesby H. N. & Denstedt O. F.** - The Properties of Pilchard Oil Films. - Ann. Rep. Biol. Board Canada, 1933, 115. Ottawa (1934). **b - 1855**

Result of an investigation on the properties of a large number of pilchard oil films prepared from oils processed in a variety of ways.

**Brocklesby H. N. & Denstedt O. F.** - Fish Oils. 4. The Bodying of Pilchard Oil. 5 figs., 3 tabl., Contr. Canad. Biol. & Fish., VIII, 26, 321-343. Toronto (1934). **b - 1856**

The present paper deals with the physical and chemical changes that occur in pilchard oil when the latter is bodied by heating and blowing. The data presented give the paint and varnish chemist some idea of the rate of bodying of this oil at various temperatures and also indicate some of the more important properties of the product.

**Charnley F.** - Hydrogenation of Pilchard Oil. - Ann. Rep. Biol. Board Canada, 1933, 115-116. Ottawa (1934). **b - 1857**

Account of a research on the hydrogenation of pilchard oil made with the primary object to establish the most suitable conditions of hydrogenating the oil to produce a fat of given properties.

**Charnley F.** - Composition of Oils and Fats. - Ann. Rep. Biol. Board Canada, 1933, 116-117. Ottawa (1934). **b - 1858**

Account of the method of estimating the composition of a fish oil from the fractionation data of the methyl esters derived from the fatty acids of the oil, which is the only reliable method so far developed for estimating the composition of the more complex vegetable and animal oils : Some details of the method of carrying out the calculations, of correcting the data obtained of the lower-boiling fractions, and the effect of errors in the data on the estimated composition of a fraction are given.

**Charnley F.** - Calculations in the Investigation of Oils and Fats with Special Reference to Fish Oils. Part I. 8 tabl., Contr. Canad. Biol. & Fish., VIII, 35, 507-529. Toronto (1934). **b - 1859**

Equations relating total iodine values and equivalents of mixtures of esters of the fatty acids to those of the individual esters are given. Together with a knowledge of the percentages of saturated esters these equations enable the composition of simple mixtures (refractionations of the lower-boiling fractions) to be deduced from the iodine values and equivalents.

**Cooper D. Le B.** - Determination of Iodine in Fish Oils. - Ann. Rep. Biol. Board Canada, 1933, 53. Ottawa (1934). **b - 1860**

Description of a simple apparatus for the enclosed combustion of fish oils and its application to determination of iodine in these oils.

Results of observations on the variations in the gastric secretion produced by different preparations of fish muscle determined in a dog with an Armour pouch. It has been demonstrated that variously cooked sea-foods elicite very different responses from the gastric glands.

**Aquino (de) Radler** - O que contém o oceano. 12 fig., 4 lám., Rev. Marit. Brasil. março-abril, 1-19. (1934). **b - 1872**

Traduction de l'anglais du travail du Dr. Harden F. Taylor: What's in the Ocean, publié in Canad. Fisherm., XVIII, 10, 17-20. Voir résumé in: Bibliographia Oceanographica, Vol. IV, b - 1471.

**Bailey B. E.** - The Nutritive Value of Marine Products. VI. The Vitamin A Potency of Salmon Liver Oil. 4 tabl., Contr. Canad. Biol. & Fish., VIII, 21, 265-274. Toronto (1934). **b - 1873**

The vitamin A content of liver oils of five species of salmon in the genus *Oncorhynchus* has been determined. The richest samples contained 40 times, and the poorest twice as much vitamin A per gram as a sample of cod liver oil stated to contain 500 A. D. M. A. units per gram. Potencies of samples were in descending order: Skeena spring, Vancouver spring and sockeye, coho, pink and chum salmon.

**Beatty S. A.** - Food Value of Common Sea Fish of Atlantic Coast. - Ann. Rep. Biol. Board Canada, 1933, 51. Ottawa (1934). **b - 1874**

Report of the results of analysis of muscles of cod, haddock, cusk, hake, Canadian plaice, herring, halibut, mackerel, and salmon. Changes in the food constituents of these fish over a period of one year.

**Bedford R. H.** - The Bacterial Infection of Fish Muscle by Worms. - Ann. Rep. Biol. Board Canada, 1933, 112. Ottawa (1934). **b - 1875**

Account of research carried on in order to determine the rôle of worm in bacterial infection of fish, in the present case of grey and red cod. It is believed that this investigation represents the first instance on record of bacterial infection of fish by worms.

**Bedford R. H.** - The Fluctuations of the Bacterial Population in Frozen Halibut Muscle Juice. - Ann. Rep. Biol. Board Canada, 1933, 112. Ottawa (1934). **b - 1876**

Results of a preliminary experiment concerned with the fluctuations of the bacterial population in the frozen halibut muscle juice carried out in connection with an investigation concerning the extent of denaturation of proteins in halibut muscle juice by freezing.

Ein interessantes Obergutachten über Fischvergiftung, welches von ausserordentlicher Wichtigkeit für den Fischhandel ist.

**Carteni A. & Aloj G.** - Composizione chimica di animali marini del Golfo di Napoli. - Quad. Nutr., I, 1, 49-63. Napoli (1934). **b - 1880**

Dati concernenti vari pesci ossei d'uso alimentare più comune, pescati nel Golfo di Napoli. Di essi si determinano: la parte non edibile e quella edibile, e la composizione chimica della parte edibile; il valore calorico della parte edibile; quello della parte edibile contenuta in 1 Kg. di materiale alimentare grezzo quale si acquista al mercato; il contenuto proteico della parte edibile di 1 Kg. di materiale alimentare grezzo. In base al costo medio di vari tipi di pesce si calcola inoltre il quantitativo di calorie e di proteine (in grammi) acquistabili con 1 lira; infine il rapporto tra equivalenti basici e acidi fissi nelle ceneri.

**Carter Neal M.** - Analysis of British Columbia Marine Products. 1 table, Ann. Rep. Biol. Board Canada, 1933, 71-72. Ottawa (1934). **b - 1881**

Results of a series of analyses on canned sockeye and pink salmon, and on canned pilchard; determination of the percentage of moisture, oil, protein and mineral ash in an aliquot portion of the contents of several cans. The summary of the results ready for publication is presented in a table.

**Caserio E.** - Ricerche sul valore alimentare del dentice conservato. - Ind. Ital. Conserve Alim., 5, 142. Parma (1934). **b - 1882**

Il dentice conservato pure avendo un contenuto sensibilmente inferiore di grasso in confronto al tonno (e quindi un minor valore nutritivo) è un ottimo prodotto alimentare, con un armonico equilibrio tra sostanze proteiche e grassi. Si distingue dal tonno per una percentuale di sostanze proteiche sensibilmente maggiore, per una minore percentuale di ceneri e di basi puriniche.

**Gibbons Norman E.** - A Bacteriological Study of « Ice Fillets ». 4 tabl., Contr. Canad. Biol. & Fish., VIII, 24, 301-310. Toronto (1934). **b - 1883**

Twenty-nine « ice-fillets » (mostly haddock) were examined bacteriologically after varying periods of storage at temperatures from — 5° to — 18° C.

Variability in the number of *Bacteria* in relation to the temperature was studied.

Sixty-eight species and varieties of *Bacteria* were isolated and grouped according to the species they most closely resembled.

**Gimenenz José Cerezo** - La valeur alimentaire du poisson. 6 tabl., Rapp. Pr.-Verb. Comm. Int. Expl. Scient. Méditerranée, VIII, 89-116. Paris (1934). **b - 1884**

Résumé de ce qui jusqu'à présent a été écrit sur la valeur alimentaire du poisson. Facteurs qui déterminent la valeur nourissante d'un aliment. Composition immédiate et valeur énergétique du poisson. Nature des aliments primaires du poisson. Digestibilité. Eléments minéraux. Vitamines. Considérations économiques. Conditions hygiéniques du poisson. Bibliographie consultée (pp. 113-116).

**Hess Ernest** - Discoloration of Halibut. - Ann. Rep. Biol. Board Canada, 1932, 58. Ottawa (1933). **b - 1885**

Discoloration of the white skin of halibut observed in halibut caught and landed both on the Canadian Pacific and Atlantic coasts. Results of bacteriological examinations of two Atlantic discolored Halibuts showing that, as it has been discovered by previous investigators, *P. fluorescens*, as well as a number of chromogenic types producing yellow pigments are responsible for the discoloration.

**Hess Ernest** - Effect of Low Temperatures on Marine *Bacteria*. - Ann. Rep. Biol. Board Canada, 1933, 56. Ottawa (1934). **b - 1886**

Brief account of the results of studies on fundamental effects of cold on *Pseudomonas fluorescens*, *Flavobacterium deciduosum*, and *Bacillus vulgatus*. These studies have brought forward explanations of problems encountered in the preservations of fish by chilling and freezing.

**Hess Ernest** - Cultural Characteristics of Marine *Bacteria* in Relation to Low Temperatures and Freezing. 4 tabl., Contr. Canad. Biol. & Fish., VIII, 32, 459-474. Toronto (1934). **b - 1887**

For the study of various physiological activities of marine *Bacteria*, especially at low temperatures, three organisms were chosen, namely; *Pseudomonas fluorescens*, *Flavobacterium deciduosum*, and *Achromobacter* (n. sp.), all having been isolated from cod fish slime.

**Hess Ernest** - Effects of Low Temperatures on the Growth of Marine *Bacteria*. 4 tabl., Contr. Canad. Biol. & Fish., VIII, 34, 489-505. Toronto (1934). **b - 1888**

The experiments carried out show that the marine *Bacteria* studied, namely *P. fluorescens*, *F. deciduosum* and *B. vulgatus* must be considered to be truly psychrophilic.

**Hess Ernest** - The Effects of Freezing on Marine *Bacteria*. I. Quantitative Studies. 12 tabl., Journ. Biol. Board Canada, I, 2, 95-108. Toronto (1934). **b - 1889**

For the experiments reported in this paper strains of *Pseudomonas fluorescens*, *Flav. deciduosum* and *Achromobacter*, all isolated from codfish slime, were used.

**Hess Ernest** - Effect of Temperature on the Cell Length and Shape of *Bacillus vulgatus*. 6 figs., 1 table, Journ. Biol. Board Canada, I, 2, 109-119. Toronto (1934). **b - 1890**

The effect of temperature on the growth, as determined by an increase in the length of the cells of *B. vulgatus* isolated from halibut intestine, was studied.

**Leonardi A.** - Igiene ed ispezione dei prodotti della pesca (Pesci, Molluschi e Crostacei). xii + 176 pp., Scuola Tipogr. « Oderisi ». Gubbio (1934). **b - 1891**

Valore alimentare della carne di pesce. Riconoscimento dei prodotti della pesca posti sul mercato; sorveglianza sanitaria. Intossicazioni alimentari e intossicazioni da carni di pesce. Tossicità dei pesci velenosi, dei pesci pescati nel periodo della fregola, dei pesci malati, pescati in acque luride e pantanose o con sostanze nocive. Tossicità dei pesci che sono terreni di coltura a vari germi o in putrefazione. Caratteri della putrefazione nei Molluschi e nei Crostacei, malattie infettive e parassitarie a cui vanno soggetti, Molluschi tossici ed infettivi.

**MacPherson N. L. & Wilson A. M.** - Nutritive Value of the Atlantic Salmon (*Salmo salar*). 5 tabl., Rep. Comm. Newfoundland Fish. Res., Ann. Rep., II, 2, 28-31. Plymouth (1934). **b - 1892**

Figures are given which indicate the composition of the red and white flesh of *S. salar*, the number of calories per pound of canned product and the percentage of water, solids, fat, protein, phosphorus of salmon.

### *Industria conservationis fructuum piscatus - Conditura in thecis - Machinae - Officinae fructibus piscatoriis conficiendis et conservandis.*

**Alfonsi Bianca** - La lavorazione del pesce e i residuati. - Ind. Ital. Cons. Alim., 2, 43-48. Parma (1934). **b - 1946**

Rilevata la necessità di assicurare al prodotto della pesca catturata, una buona conservazione per poterlo agevolmente distribuire in paesi lontani dal centro di pesca ed evitare deterioramenti per opera di organismi unicellulari che attaccano la sostanza organica, si indicano i vari sistemi di conservazione basati per lo più su elementi capaci di arrestare lo sviluppo dei microrganismi (temperatura, secchezza di ambiente, antisettici ecc.). I sistemi maggiormente in uso sono i seguenti: refrigerazione e congelamento, sterilizzazione a mezzo del calore (processo Appert), essiccamento, salagione, affumicamento marinatura. Il materiale grezzo non direttamente utilizzato nell'alimentazione umana, viene sottoposto ad una serie di manipolazioni, e trasformato in farina ed olio di pesce.

**Bedford R. H.** - Preservation of Fish. - Ann. Rep. Biol. Board Canada, 1933, 110-111. Ottawa (1934). **b - 1947**

(1) Results of an investigation on methods for the desinfection of fishing boats and fish canneries, conducted at the Fisheries Experimental Station, Prince Rupert, B. C., and (2) on the pre-cooling of fresh halibut before stowage.

**Behre A.** - Die Konservierungsmittelfrage. - Dtsch. Fischwirtsch., I, 29, 497-499. Berlin (1934). **b - 1948**

Vf., Sachberater des Reichsgesundheitsamtes, beantwortet in vorliegendem Aufsatze die Frage, ob und welche Konservierungsmittel in der Fischindustrie zu gebrauchen sind, und ob die damit hergestellten Fertigwaren durch solchen Zusatz im günstigen oder auch ungünstigen Sinne beeinflusst werden.

**Cameron E. J. & Williams C. C.** - How *Bacteria* Affect the Shrimp Canner. 1 ill., Fish. Gaz., LI, 10, 16-18. New York (1934). **b - 1949**

Illustration of the three divisions, in which contamination of shrimp during packing may be roughly divided. Three types of spore-forming *Bacteria* were repeatedly isolated from wet pack shrimp. The characteristics of these organisms were studied and methods developed to test for the presence of the organisms in canning plants.

**Cerruti Carlo F.** - Una non rara alterazione del tonno in scatola: il tonno «tarlato» o «spugnoso». - Atti VIII Congr. Naz. Igiene (Roma, 19-23 ott. 1932-X), 405-406. Napoli (1933). **b - 1950**

La particolare alterazione del tonno in iscatola sarebbe da ricondurre secondo l'A., a fatti iniziali di decomposizione della carne stessa avvenuti nell'intervallo di tempo tra il momento della cattura e quello dell'inscatolamento del pesce. Questa alterazione non sembra dannosa alla salute; diminuisce tuttavia il valore commerciale del prodotto, e in taluni paesi è motivo sufficiente per vietarne la vendita.

**Cultrera Rolando** - Su un'alterazione dei filetti di acciughe in conserva. 1 fig., Ind. It. Cons. Alim., 2, 31-32. Parma (1934). **b - 1951**

Si è determinata la natura di un'alterazione che subiscono i filetti di acciuga in conserva e si consiglia un metodo per eliminarla o ridurla notevolmente.

**Ellison W. A. Jr.** - The Prevention of Spoilage at Sea. 1 photo, 1 fig., Fish. Gaz., LI, 3, 8-10 & 20. New York (1934). **b - 1952**

The author gives some suggestions in accordance with his opinion that 90 per cent of the fish landed in a soured and spoiled condition can be landed as good as the rest of the catch. His foundings are applicable to all boats whose catch is held at sea for several days. His recommendations are chiefly concerned with foredeck improvement.

**Franchini Antonio** - Sulla conservabilità del pesce azzurro pescato con le sorgenti luminose. - Ann. di Merceol. Sicil., I, 1932-33, 277-281. Acireale (1934). **b - 1953**

Prima di porre il dilemma della maggiore o minore conservabilità del pesce azzurro catturato con le sorgenti luminose e delle varie ripercussioni di ordine economico-sociale che esso suscita, si accenna al principio fondamentale su cui si basano le applicazioni della pesca delle varie specie di sorgenti luminose. I pesci maggiormente catturati con tale sistema di pesca sono i Clupeidi di piccole dimensioni (Sardine, Acciughe, Scombri, Sauri, ecc.) chiamati pesci azzurri.

**Gire G.** - Sulfuration électrolytique des fers-blancs. 18 fig., 1 table, Rev. Trav. Off. Pêches Marit., VII, 2, 223-235. Paris (1934). **b - 1954**

The material for these investigations including 6833 larvae has been gathered from plankton samples originating from the cruises of research vessels during the years 1900-1910 and 1922-1932. The results of the researches are expressed in tables and graphs indicating different size groups, localities and time. Some new information on the spawning places and the transport of fry has been gained.

**Savage R. E. & Hodgson W. C.** - Lunar Influence on the East Anglian Herring Fishery. 6 figs., 1 table on pl., Journ. Cons. Expl. Mer, IX, 2, 223-239. Copenhague (1934).

(—) See also résumé by Erdmann, Fischmarkt, II, 12, 315-317. Cuxhaven (1934). **b - 2041**

The authors have found a definite rhythm in the quantities of Herrings caught off East Anglia, a monthly rhythm with maxima coinciding with the period of full moon, but the preliminary observations on the fisheries of North Shields and Grimsby are not so conclusive. In a table are given dates which represent the midpoints of seven-day periods calculated from the dates of the October and November full moons.

Preface. Technical terms. Introduction and survey of results. Details of samples from the several centres. Summary. Appendix I: Brown trout. Appendix II: North Harris salmon. The senior author of the paper is responsible for analysisg the results and writing the paper. The descriptive section on North Harris is written by Mr. W. J. M. Menzies, the Appendix on North Harris Salmon by Mr. Macfarlane, who also made the photomicrographs of scales and the map.

**Pellegrin J.** - La pêche du saumon en Ecosse. - Bull. Soc. Centr. Aquicult. et Pêche, XL, 10/12, 105-116. Paris (1933). **b - 2083**

**Poulsen Erik M.** - Remarks on the Artificial Propagation of Salmon and Sea Trout. - Rapp. Pr.-Verb. Cons. Expl. Mer., XCI, 15-16. Copenhague (1934). **b - 2084**

On hand of comparisons between natural and artificial propagations with regard to the number of spawning fish, the number of eggs fertilized, the hatching of eggs and the loss from « the tiny fry stage » to the smolt stage the A. discusses the value of the artificial propagation without however giving any definitive answer to its efficacy, for which further statistical observations will be necessary.

**Pritchard A. L.** - Efficiency of Artificial Propagation in Establishing a Run of Pink Salmon. 2 tabl., Ann. Rep. Biol. Board Canada, 1933, 93-94. Ottawa (1934). **b - 2085**

The conclusion which seems warranted from the experiments undertaken is that while the transplantation no doubt contributed to the general run of pinks, it was not successful in building a run in the area where no run occurred.

**White H. C.** - The Killing of Smolts and Parr by Anglers. - Ann. Rep. Biol. Board Canada, 1933, 42. Ottawa (1934). **b - 2086**

Necessity of organizing an educational campaign in order to instruct anglers who very often do not know that they destroy young salmon.

**White H. C.** - Restigouche Salmon Fry in East Apple River, N. S. - Ann. Rep. Biol. Board Canada, 1933, 43. Ottawa (1934). **b - 2087**

Results of observations on migrations, growth and survival of the 25,000 fry hatched from eggs of salmon from the Restigouche river, and planted in East Apple River, N. S., on July 15, 1932, during their second summer.

**Yamagawa Makoto & Nishizawa Tanzo** - Chemical Study on Protamine VI. 1) Acid Hydrolysis of Salmine. 19 tabl., Journ. Imp. Fish. Inst., XXX, 2, 97-116. Tokyo (1934). **b - 2088**

Results of a study performed on salmine sulphate, isolated and purified by Kossel's method from the sperm of Japanese Salmon, *Oncorhynchus keta*. Material. Analytical methods of free aminoacids after partial hydrolysis. Arginine and monoaminoacids set free by partial hydrolysis. Residue in the partial hydrolysis.

**An.** - Predictions of 1934 Salmon Runs. - Canad. Fisherm., XXI, 6, 25. Gardenvale, Que. (1934). **b - 2089**

Summary of the Preliminary Digest of the sockeye salmon run of 1933 to the four principal watersheds of British Columbia, and predictions based on same for 1934, by Drs. W. A. and Lucy S. Clemens of the Pacific Biological Station.

**An.** - Optimistic Outlook in Salmon Industry. - Canad. Fisherm., XXI, 8, 17, Gardenvale, Que. (1934). **b - 2090**

Good outlook for the salmon pack in British Columbia; lessening of the fears of depletion of the salmon and halibut areas; actual conditions of the salmon canning industry.

**An.** - Salmon Trap Vote Will Affect B. C. Fishermen. - Canad. Fisherm., XXI, 11, 25. Gardenvale, Que. (1934). **b - 2091**

Some considerations regarding the ballotting of the referendum on the abolishment of fish traps in the Puget Sound area, and the favorable effect the abolishment of the trap would have on the Canadian export trade.

**An.** - « Seelachs » im Urteil des Lebensmittelrechtes. - Dtsch. Fischwirtsch., I, 23, 366-367. Berlin (1934). **b - 2092**

Zusammenfassende Wiedergabe des Standpunktes des Lebensmittelrechts über die Frage der einwandfreien Bezeichnung von Seelachs für den Köhler oder Blaufisch (*Gadus virens* L.) mit besonderer Berücksichtigung des mit Anilinfarbe rot gefärbten Köhlers in Oel.

**An.** - Pack of British Columbia Salmon, Season 1933. 1 table, Rep. Comm. Fish., 1933, app., 74. Victoria, B. C. (1934). **b - 2093**

Statistic data showing the origin of Salmon caught in each district.

**An.** - Statement Showing the Salmon Pack of the Province, by Districts and Species, from 1918 to 1933, inclusive. 1 table, Rep. Comm. Fish. 1933, 74-77. Victoria, B. C. (1934). **b - 2094**

Statement concerning Fraser, Skeena Rivers, Rivers Inlet, Smith Inlet, Nass River, Vancouver Island District, Queen Charlotte and other Districts, and total packed by districts in 1918 to 1933, inclusive.

**An.** - Statement Showing the Sockeye-Pack of the Entire Fraser River System from 1894 to 1933, inclusive. 1 table, Rep. Comm. Fish. 1933, App., 77. Victoria, B. C. (1934). **b - 2095**

**An.** - Statement Showing the Sockeye-Pack of the Province by Districts, 1918 to 1933, inclusive. 1 table, Rep. Comm. Fish. 1933, App., 78. Victoria, B. C. (1934). **b - 2096**

**An.** - Salmon. - Rep. Newfoundland Fish. Res. Comm., Ann. Rep., II, 2, 66-71. Plymouth (1934). **b - 2097**

Some results of the biological study of the life history of the salmon of Newfoundland. Greater quantity of small summer fish during 1933 than in 1932. Relation of catches to water-temperature. The spring fishery at Bay Bulls. The outlook for 1934.

## *Plantae marinae.*

**Burgwitz G.** - Ueber Verwertung von Meeresalgen zur Gewinnung von Hefen und Alkohol (Russ. Text, dtsch. Rés.). 4 Taf., Bull. Acad. Sc., U. R. S. S., Cl. Sc., Mathém. & Natur., 6, 837-848. Léningrad (1933). **b - 2197**

Ergebnisse einer neuen Untersuchung über die Alkoholgewinnung aus Meeresalgen durch Gärung derselben. Die Versuche sind mit *Laminariae* und *Alariae* von der Murmansküste ausgeführt worden.

**Fujikawa Kiyoshi & Kashiwada Ken'ichi** - Color of « Asakusa-nori » in Relation to Chlorophyl Content. (In Jap., Engl. Rés.). 4 tabl., 1 diagr., Journ. Jap. Soc. Scient. Fish., II, 4, 159-161. Tokyo (1933). **b - 2198**

The dried commercial preparation of the marine Alga, *Porphyra tenera*, known by the name of « Asakusa-nori » in Japan is widely consumed as food over here. It is graded on the market according to its color, lustre, taste, flavor and form. The chemical analysis of the AA. has shown in the material from Corea that the grading by the color is given in terms of relative amount of chlorophyl in the preparation.

**Koudrjavtzev V. I.** - Sur la question de l'utilisation des Algues marines à l'aide de microorganismes (En russe, rés. allem.) - Bull. de la filiale de l'Extrême Orient de l'Acad. Sc., U. R. S. S., 1/2/3, 99-108. Vladivostok (1933). **b - 2199**

**Treumann I.** - Agar-agar aus den Rotalgen des Küstengebietes des Fernen Ostens (Russ. Text, Dtsch. Rés.). - 1 Tab., Bull. Far East. Branch Acad. Sc., U. S. S. R., 1/2/3, 109-114. Vladivostok (1933). **b - 2200**

Nach Untersuchungen einer ganzen Reihe von Algen ist es dem Institut endlich gelungen in der Rotalge *Ahnfeltia plicata* ein allen Anforderungen für eine wirtschaftlich vorteilhafte Bereitung von Agar Agar entsprechendes Material zu finden. Verbreitung, Produktion und Bereitungsmethode.

**B. Tsch.** - Les Algues marines pour l'alimentation du bétail (En russe). - Sov. Sever., 6, 92-93. Moskva (1933). **b - 2201**
